tile (1), * tyle, s. [A contract. of *tigel*; A.S. *tigela*; from Lat. *tegula* = a tile, lit. = that which covers, from *tego* = to cover.]

1. A kind of thin slab of baked clay, used for covering roofs, paving floors, lining furnaces or ovens, constructing drains, &c. Tiles, both flat and curved, were in great demand in Roman architecture. Roofs were covered with the flat and curved tiles alternating. Tiles two feet square with a foot at each angle were used to line the thermæ, so that an air space between them and the wall should prevent the absorption of the water by the latter. Tiles are manufactured by a similar process to bricks. Roofing tiles are of two sorts, plain tiles and pantiles; the former are flat, and are usually made $\frac{1}{2}$ inch in thickness, $10\frac{1}{2}$ inches long, $6\frac{1}{2}$ wide. They weigh from 2 to 2 $\frac{1}{2}$ pounds each, and expose about one-half to the weather; 740 tiles cover 100 superficial feet. They are hung upon the lath by two oak pins, inserted into holes made by the moulder. Pantiles, first used in Flanders, have a wavy surface, lapping under and being overlapped by the adjacent tiles of the same rank. They are made $14\frac{1}{2} \times 10\frac{1}{2}$; expose ten inches to the weather; weigh from 5 to 5 $\frac{1}{2}$ pounds each; 170 cover 100 superficial feet. Crown, Ridge, Hip, and Valley tiles are semi-cylindrical, or segments of cylinders, used for the purposes indicated. Siding-tiles are used as a substitute for weather boarding. Holes are made in them when moulding, and they are secured to the lath by flat-headed nails. The gauge or exposed face is sometimes indented, to represent courses of brick. Fine mortar is introduced between them when they rest upon each other. Siding-tiles are some-

times called *Weather-tiles* and *Mathematical tiles*; these names are derived from their exposure or markings. They are variously formed, having curved or crenated edges, and various ornaments either raised or encaustic. Dutch tiles, for chimneys, are made of a whitish earth, glazed and painted with various figures. Drain-tiles are usually made in the form of an arch, and laid upon flat tiles called *Soles*. Paving-tiles are usually square and thicker than those used for roofing. [ENCAUSTIC.] Galvanized iron tiles have been introduced in France. They are shaped like pantiles, so that each laps upon its neighbour in the course, and each course laps upon the one beneath it.

"The houses are represented as considerable, being built with stone and timber, and covered with tiles, a very uncommon fabric for these warm climates and savage countries."—*Anson's Voyages*, bk. III., ch. VI.

2. *Brass-founding*: The cover of a brass furnace. Now made of iron, but formerly a flat tile.

3. *Metall.*: A clay cover for a melting-pot.

4. A tall stiff hat; a tall silk hat, or one of that shape. (*Slang.*)

"And down he sat without further bidding, having previously deposited his old white hat on the landing outside the door. 'T'wixt a werry good 'un to look at,' said Sam, 'but it's an astonishin' 'un to wear; and afore the brim went, it was a werry handsome tile.'"—*Dickens's Pickwick*, ch. XII.

tile-creasing, s.

Mason.: A row of tiles laid along the top of a wall, projecting beyond the face; or each face, if both are exposed. A row of bricks laid header fashion is laid above, and is called a cope. A double row laid so as to break joint is double tile-creasing.

tile-drain, s. A drain made of tiles.

tile-earth, s. A strong clayey earth; stiff, stubborn land. (*Prov.*)

tile-field, s. Ground on which tiles are made.

tile-kiln, s. A form of kiln adapted to burning tiles.

tile-ore, s.

tile-pin, s. A pin, usually of hard wood, passing through a hole in a tile into a lath, &c., to secure it to the roof.

tile-root, s.

Bot.: *Geissorrhiza*; a genus of Iridaceæ, with showy flowers, chiefly from the Cape of Good Hope. Seven species are cultivated in British greenhouses.

tile-stone, s.

I. *Ord. Lang.*: A tile.

II. *Technically*:

1. *Geol. (Pl.)*: Certain beds originally considered by Murchison to be the base of the Old Red Sandstone, but afterwards transferred by him to the highest part of the Upper Silurian. They have been retained in this position, and are considered to be the transition beds from the Upper Silurian to the Old Red Sandstone. Salter proposed to call them *Ledbury shales*. They range from Shropshire, through Hereford and Radnorshire, into Brecon and Carmarthenshire. Their fauna is essentially that of the Upper Ludlow rock.

2. *Petrol.*: A name by which certain slates which cleave along planes of bedding are known. They form roofing slates.

tile-tea, s. A kind of inferior tea prepared by stewing refuse leaves with milk, butter, salt, and herbs, and solidifying the mixture by pressing into moulds. It is sold at Kiachta to the Armenians for distribution through Western Siberia and the Caucasus. It is an article of food rather than a beverage.

till (4), s. [Scotch = a cold, unproductive clay.]

Geol.: The Lower Boulder clay; a stiff, stony, unstratified clay produced by the bottom moraine of a great ice sheet. It is found largely in all regions of extended glacial action, and has been traced over vast regions of the northern United States and Canada. Till varies in thickness from a few feet to 20 or 30 yards, being usually thickest upon low-lying regions, and thinning out on elevated tracts. Stones of all sizes and shapes are disseminated through it, some of them several tons in weight. Boulder clay is undoubtedly the result of glacial action, produced by the bottom moraines of extinct glaciers.

till, *til, *tulle, *tyll, *tyll, *tylle, prep. [Icel. *tíll* = till, to; Dan. *tíl*; Sw. *tíll*.]

1. To. (In this sense still commonly used in Scotland and parts of England and Ireland.) "Thei fled out of Wales away tulle Ireland."

A. Intransitive:

*1. To totter, to fall.

"This ilk toon selah tytle to grounde."

Allist. Poems, 361.

*2. To toss about, to ride or float.

"The floating vessel . . .
Rode tilting o'er the waves."

Milton: P. L., xl. 777.

3. To run or ride sad thrust with a lance; to joust, as in a tournament.

4. To fight; to thrust in general.

"Swords out and tilting one at other's breast."

Shakesp.: Othello, II. 2.

5. To lean or be inclined forward; to rise or fall into a slanting position; to fall as on one side. (Frequently with up.)

"As the trunk of the body is kept from tilting forward by the muscles of the back, so from falling back ward by those of the belly."—*Gray: Cosmology*.

B. Transitive:

til-wood, s. [TIL (3).]

tim'-a-çite, s. [From Lat. *Timacum minus* = Gamzigrad, Servia; suff. -ite (*Petrol.*)]

Petrol.: A name given by Breithaupt to a felsitic rock enclosing crystals of white feldspar, &c. Now shown to belong to the

andesites (q.v.), some being quartz-free, and others grouping with the Quartz-andesites.

ti-ma'-li'-s, s. [Elym. doubtful.]

Ornith.: The type-genus of *Timalinae* (q.v.), with twelve species from the Malay Peninsula, Sumatra, Borneo, and Java. Bill with sides much convex to tip; few short bristles at base; nostrils in small groove, semitunar opening with a small scale; wings fifth to seventh quills longest; tarsi with one long scale in front.

tim-a-li'-i-dæ, s. pl. [Mod. Lat. *timali*(a); Lat. fem. adj. suff. -idæ.]

Ornith.: Babbling Thrushes; a group of small, strong-legged, active Passerine birds, mostly of dull colours, which are especially characteristic of the Oriental region, in every part of which they abound, while they are much less plentiful in Australia and Africa. The Indo-Chinese sub-region is the headquarters of the family, whence it diminishes rapidly in all directions in variety of both generic and specific forms. Wallace puts the genera at thirty-five and the species at 240. Other writers extend the limits of the family, making the chief characteristic a rounded and concave wing, and divide it into the following sub-families: Troglodytine, Brachypodine, *Timalinae*, *Cisticolæ*, and *Miminae*.

ti-mâi'-i'-næ, s. pl. [Mod. Lat. *timali*(a); Lat. fem. pl. adj. suff. -inæ.]

Ornith.: A sub-family of *Timaliide* (q.v.), approximately equivalent to the family *Timaliide* as first described above. Bill moderate, keel curved; nostrils exposed; wings short and rounded; tail graduated; tarsi long and strong; toes long, strong, with large scales above; claws compressed and alarp.

tim-ar'-cha, s. [Gr. *τιμαρχία* (*timarchia*) = honour, respect.]

Entom.: A genus of *Chrysomelide*, akin to *Chrysomela*, but without wings, and having the elytra joined. One species, *Timarcha tenebriosa*, is popularly called the Bloody-nose Beetle.

ti-ma'-ri-öt, s. [Turk.] (See extract.)

"Those who, by a kind of feudal tenure, possess land on condition of service, are called *Timarçis*; they serve as spahis, according to the extent of territory, and bring a certain number into the field, generally cavalry."—*Ayron: Bride of Abydos*. (Note.)

tim'-bal, s. [TYMBAL.]

tim'-ber (1), * tim-bre, * tym-ber, s. & a. [A.S. *timber* = stuff or material to build with; cogn. with Dut. *timmer* = timber or structure; Icel. *timbr*; Dan. *tømmer*; Sw. *timmer*; Ger. *zimmer* = a room, timber; Goth. *timbarja* = to build; *timrja* = a builder; Icel. *timbra* = to build; Dan. *tømre*; Ger. *zimmerer*; A.S. *timbrian* = to build. From the same root as Gr. *δέμα* (*demâ*) = to build; Eng. *dome*, *domicil*, *domestic*, &c.; Lat. *domus* = a house. The *b* is excrement, as in *number*.]

A. As substantive:

I. Ordinary Language:

1. Trees cut down, squared, or capable of being squared, into beams, rafters, boards, planks, &c., to be employed in the construction of houses, ships, &c., or in carpentry, joinery, &c. [BATTEN, BEAM, BOARD, DEAL, POST, RAFTER, &c.] Timber is usually sold by the load. A load of rough or unwhewn timber is forty cubic feet, and a load of squared timber fifty cubic feet, estimated to weigh twenty cwt. In the case of planks, deals, &c., the load consists of so many square feet. Thus, a load of one-inch plank is 600 square feet, a load of planks thicker than one inch equals 600 square feet divided by the thickness in inches. The term is often used for all kinds of felled and seasoned wood.

2. A general term for growing trees yielding wood suitable for constructive purposes. The chief are fir, pine, oak, ash, elm, beech, sycamore, walnut, chestnut, mahogany, teak, &c.

"Oaks there are as fair, straight, tall, and as good timber as any can be, and also great store."—*Hackluyt: Voyages*, III. 275.

3. Sometimes applied to growing trees; trees generally; woods.

"The lack of timber is the most serious drawback of the whole region."—*Century Magazine*, Aug., 1882, p. 607.

4. A piece of wood for building, or already framed; one of the main beams of a building.

"Timbers and planks . . . were all prepared."—*Anson: Voyages*, bk. III., ch. III.

bil, bôy; pouî, jôwî; cat, çell, chorns, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -îng. -alan, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bel, del.

5. The materials for any structure. (Used also figuratively, as in the example.)

"Such dispositions are the very errors of human nature; and yet they are the fittest timber to make pillars of, like to knee timber, that is good for ships to be tossed, but not for houses that shall stand firm." Bacon.

6. The body, stem, or trunk of a tree.

"We take From every tree top, bark, and part of the timber." Shakespeare: Henry VIII., l. 2.

7. A leg. (Naut. slang.)

II. Technically:

1. Mining: Planks set to support the roof and sides of a gallery or drift. A set of timbers consists of the cap or head-piece, two uprights, legs, or stanchions, and the sleeper or sill.

2. Shipbuild.: One of the curved frames which form the ribs of a ship. They are built up of several pieces. The floor-timbers are between the keel and keelson, and the outward and upward extension-pieces are futtocks, first, second, third, &c. The portions extending above the deck-level are the top timbers. (Usually in the plural.)

B. As adj.: Made or constructed of wood: as, a timber house, timber work.

Timbers in the head:

Shipbuild.: Pieces of timber with one end bearing on the upper cheeks, and the other extended to the main rail of the head.

timber-and-room, s.

Shipbuild.: The width of a timber and a space. Also called room-and-space, or berth-and-space.

timber-brick, s. A piece of timber, of the size and shape of a brick, inserted in brickwork to attach the finishings to.

timber-frame, s. The same as GANG-BAW (q.v.).

timber-head, s.

Shipbuild.: So much of a frame-timber as rises above the deck.

timber-hitch, s.

* timber-lode, s.

Law: A service by which tenants formerly were bound to carry felled timber from the woods to the lord's house.

timber-man, s.

Mining: The man employed in placing supports of timber in the mine.

* timber-mare, s. A sort of wooden horse on which soldiers were made to ride as a punishment.

timber-measure, s. [TIMBER, s., A. I. l.]

timber-merchant, s. A dealer in timber.

timber-scribe, s. A race-knife (q.v.).

timber-sow, s. A worm in wood; a wood-louse.

"Diverse creatures, though they be loathsome to take, are of this kind; as earth-worms, timber-sues, anails." Bacon.

timber-toe, s. A ludicrous term for a wooden leg or a person with a wooden leg. Used also in the East-end of London for a person wearing clogs.

timber-trade, s. Commerce in timber. Up till the time of Henry VIII. the woods and forests of England supplied the timber which the country required. In this reign and that of Queen Elizabeth various measures were passed to prevent waste of native wood, and a timber trade from abroad arose. In the United States the abundance of native timber renders unnecessary any foreign trade except as an exportation, or the importation of fine cabinet woods from the tropics. The export of American timber (crude and manufactured) from the ports of the United States is large, reaching in 1890 the value of \$23,255,745. The annual lumber product of this country is estimated as worth \$700,000,000.

timber-tree, s. A tree yielding wood fit for building purposes.

timber-wain, s. A timber-waggon.

"Downward the ponderous timber-wain resounds." Wordsworth: Evening Walk.

timber-work, * timber-worke, s. Work constructed of wood; woodwork.

"The stone work withstandeth the fier, and the timber-worke the battell rain." Goldinge: Cæsar, fol. 191.

timber-worm, s. Probably the larva of a beetle which bores into and feeds on timber.

timber-yard, s. A yard or place where timber is stored.

* tim-bër (2), s. [Fr. *timbre*; Sw. *timber*; Low Ger. *timmer*; Ger. *zimmer* = a certain number of skins. Remote etym. doubtful.] An old mercantile term, used both in England and Scotland to denote a certain number of skins, in the case of the skins of martens, ermine, sables, and the like, 40; of other skins, 130.

"Having presented them with two timber of sables." Heylin: Reformation, II. 202.

tim-bër (3), s. [Fr. *timbre* = a crest, a helmet.] Heraldry:

1. A row or rank of ermine in a nobleman's coat.

2. The helmet, mitre, coronet, &c., when placed over the arms in a complete achievement.

tim-bër (1), * tim-bre, v.t. & i. [TIMBER (1), s.]

A. Trans.: To furnish or construct with timber; to support with timber.

"The sides of this road, it was said, were not sufficiently timbered." Daily Chronicle, March 16, 1887.

B. Intrans.: To take to a tree; to settle or build on a tree.

"The one took up in a thicket of brushwood, and the other timbered upon a tree hard by." D'Estrange.

* tim-bër (2), v.t. [TIMBER (3), s.] To surround, to decorate, as a crest does a coat of arms.

"A purple plume timbers his stately crest." Sylvester.

tim-bëred, * tim-bred, a. [Eng. *timber* (1), s.; -ed.]

I. Literally:

1. Furnished or constructed with timbers.

"A low timbered house, where the governor abides all the day-tide." Dampier: Voyages (an. 1688).

2. Covered or abounding with growing timber; wooded: as, The country is well timbered.

II. Figuratively:

1. Built, framed, shaped, formed.

"I think, Hector was not so cleanly timbered." Shakespeare: Love's Labour's Lost, v. 2.

2. Massive; like timber.

"His timbered bones all broken rudely rumbled." Spenser: F. Q., V. li. 50.

tim-bër-ër, s. [Eng. *timber* (1), s.; -er.] A timber-man.

timberer's axe, s.

Mining: An axe or hatchet used in chopping to length, and notching the timbers which support the roof and sides of the gallery or drift.

tim-bër-lîng, s. [Eng. *timber* (1), s.; dimin. suff. -ling.] A small timber-tree. (Prov.)

* tim-bes-tere, * tym-bes-tere, s. [Eng. *timbre* (rel.); fem. suff. -ster.] A woman who played on the timbre or tambourine, to the music of which she danced. They often went about in bands or companies.

"A troop of timbre-girls (or tymbesteres, as they were popularly called)." Lytton: Last of the Barons, ch. 11.

* tim-bour-ine, s. [TAMBOURINE.]

tim-bre (bre as bër) (4), tym-bre, s. [Fr., from Lat. *tympanum* = a drum.] [TIMBREL.]

Music:

* I. A timbrel (q.v.).

"Where as she passeth by the streets, There was ful many a tymbre beat, And many a maide carolede." Gower: C. A., vl.

2. The quality of tone distinguishing voices, instruments, and stops, irrespective of pitch or intensity. All the notes of a given stop of an organ have of necessity the same timbre, but in pitch they range throughout the extent

of the chromatic scale. Corresponding notes of stops pitched in unison, such as the open diapason, dulciana, trumpet, bassoon, cremona, vox humana, have the same pitch, but each differs from the others in timbre; the quality of the tone is different. This difference is attained in various ways. Some of the pipes have wooden mouth-pieces, others metallic mouth-pieces, reed pipes, reeds of varying qualities, tubes of varying proportions and shapes, to imitate the peculiar sounds of the various instruments after which they are named, as flute, trumpet, bassoon, oboe, &c.

tim-brel, * tim-brell, * tym-brel, * tym-byre, s. [A dimin. from Mid. Eng. *timbre*, from Fr. *timbre*; O. Fr. *tymbre* = a timbrel, from Lat. *tympanum* = a drum, from Gr. *τύμπανον* (*tympanon*) = a kettledrum.] [TYPANUM.]

Music: An instrument of music; a kind of drum, tabour, or tambourine. It has been in use from the earliest times (Exod. xv. 20). It is now known as a tambourin.

"Field, town, and city with his oams do ring; The tender virgins to their timbrels sing." Dryden: David & Goliath.

* timbrel-girl, s. A timbestere (q.v.).

"She saw . . . the hateful timbrel-girls, followed by the rabble, and weaving their strange dances towards the spot." Lytton: Last of the Barons, ch. 11.

* tim-brelled, * tim-breled, a. [Eng. *timbre* (1); -ed.] Sung to the accompaniment of the timbrel.

"In vain with timbrelled anthems dark The sable-stoled sorcerers bear his whorlpet ark." Milton: On the Nativity.

* tim-bröl-ö-gý, s. [Fr. *timbre* = a stamp; Eng. suff. -ology.] The science or study of postage-stamps.

* tim-bröph-i-lý, s. [Fr. *timbre* = a stamp, and Gr. *φιλέω* (*philéō*) = to love.] The same as PHILATELY (q.v.).

"It is possibly a question whether the science should properly be called philately or timbrophily. It is, we believe, also styled in some English works timbrology." Athenæum, Oct. 1, 1881, p. 431.

* tim-bu-rine, a. [TAMBOURINE.]

time (1), * tyme, s. [A.S. *tīma* = time; cogn. with Icel. *tími*; Dan. *tīme*; Sw. *tīme* = an hour. From the same root as *tide* (q.v.).]

I. Ordinary Language:

1. The general idea of successive existence; measure of duration. It is absolute or relative. Absolute time is considered without any relation to bodies or their motions. It is conceived by us as unbounded, continuous, homogeneous, unchangeable in the order of its parts and divisible without end. Relative time is the sensible measure of any portion of duration, often marked by particular phenomena, as the apparent revolution of the celestial bodies, the rotation of the earth on its axis, &c. Relative time is divided into years, months, weeks, days, hours, minutes, seconds, and measured by instruments constructed for the purposes, as clocks, watches, chronometers, clepsydres, sun-dials, hour-glasses, &c., the first three being those commonly employed. Time is often personified as an old man, winged and bearing a scythe.

"Our conception of time originates in that of motion; and particularly in those regular and easy motions carried on in the heavens, the parts of which, from their perfect similarity to each other, are correct measures of the continuous and successive quantity called Time, with which they are conceived to co-exist. Time therefore may be defined, The perceived number of successive movements." Gillies: Aristotle's Ethics; Analytica, ch. 11.

2. A particular portion or part of duration, whether past, present, or future, and considered either as a space or as a point, a period as well as a moment; season, moment, occasion.

"At that time I made her weep." Shakespeare: Two Gentlemen, iv. 4.

3. An age; a part of duration distinct from other parts; the period at which any definite event occurred or person lived: as, This happened in the time of Moses.

4. The time: The present age or period.

"The time is out of joint." Shakespeare: Hamlet, I. 5.

4. A proper occasion or season for anything; hence, an opportunity.

"But an adversary of no common prowess was watching his time." Macaulay: Hist. Eng., ch. 1v.

5. Life or duration of life regarded as employed or destined to employment; the allotted period of life.

"I like this place, And willingly would waste my time in it." Shakespeare: As You Like It, II. 4.

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, eamel, hër, thère; pine, pît, sìre, sìr, marine; gô, pôw, or, wôre, wôlf, wôrck, whô, sôn; müte, öüb, öüre, ünite, öür, rüle, füll; trÿ, Sÿrian. æ, œ = ô; ey = â; qu = kw.

6. The present life; existence or duration of a being in this world.

7. All time, the future, eternity.

"To keep your name living to time."
Shakesp.: Coriolanus, v. 2.

8. The state of things at a particular moment or season; prevailing state of circumstances; circumstances. (Generally in the plural, and often with an adjective, as good times, hard times, &c.)

"The spacious times of great Elizabeth."
Tennyson: Dream of Fair Women, 7.

9. Performance or occurrence of an action or event with reference to repetition; hence, simply used by way of multiplication.

"Ay me, she cries, and twenty times Woe."
Shakesp.: Venus & Adonis, 83.

10. Leisure; sufficient time or opportunity.

"Little time for idle questioners."
Tennyson: Enid, 572.

* 11. Duration of a being; age, years.

"A youth of greater time than I shall show to be."
Shakesp.: Two Gentlemen, II. 7.

12. Hour of death, period of travail or the like. (*Luke* I. 57.)

13. One of the three dramatic unities formerly considered essential in the classical drama. The Unity in time consisted in keeping the period embraced in the action of the piece within the limit of twenty-four hours. [UNITY.]

II. Technically:

1. Gram.: The same as TENSE, a. (q.v.)

2. Music:

(1) The relative duration of a sound (or rest) as measured by the rhythmical proportions of the different notes, taking the semibreve (C) as the unit or standard: the minim (c) being half the semibreve; the crotchet (q) half the minim; the quaver (f) half the crotchet, and so on.

(2) The division of musical phrases into certain regulated portions measured with regard to the value of the notes with respect to the semibreve, which, in modern music, is held to be the standard of time. There are two sorts of time: duple, with two, four, or eight beats in the bar; and triple, with three beats in a bar. There is also compound time, or time formed of the union of triple with duple, and triple with triple, each having a distinctive time signature.

(3) The absolute velocity or pace at which a movement is performed, as indicated by the directions, quick, slow, presto, grave, lento, allegro, &c.

3. Phrenol.: One of the perceptive faculties, the organ of which is divided into two portions, one placed above the middle of each eyebrow. It is supposed to enable one to conceive the duration of events or phenomena, and their simultaneous or successive occurrence.

* Time is the generic term; it is either taken for the whole or the part. We speak of time when the simple idea of time only is to be expressed, as the time of the day, or the time of the year. The date is that period of time which is reckoned from the date or commencement of a thing to the time that it is spoken of; hence, we speak of a thing as being of a long or a short date. Era and epoch both refer to points of time rendered remarkable by events; but the former is more commonly employed in the literal sense for points of computation in chronology, as the Christian era; the latter is indefinitely employed for any period distinguished by remarkable events; the grand rebellion is an epoch in the history of England. (*Crabb*.)

* 1. Absolute time: Time irrespective of local standards; time everywhere reckoned from one standard.

2. Apparent time, Solar time: Time as reckoned by the movements of the sun; time as shown by a sun-dial.

3. Astronomical time: Mean solar time, reckoned by counting the hours continuously from one to twenty-four, instead of dividing them into two twelves.

4. At times: At distant intervals of duration. "The Spirit of the Lord began to move him at times."
—*Judges* xiii. 25.

5. Civil time: Time as reckoned for the purposes of civil or of ordinary life. In most civilised countries the division of civil time is into years, months, weeks, days, hours, minutes, and seconds, besides vaguer designations, such as morning, noon, evening, night, &c.

6. Common time:

(1) *MIL.*: The ordinary time taken in marching, being about ninety paces per minute, as distinguished from quick time, in which 110 paces are taken.

(2) *MUSIC*: [COMMON-TIME.]

7. Equation of time: [EQUATION.]

8. Greenwich time: Time as settled by the passage of the sun's centre over the meridian of Greenwich, England. [RAILWAY-TIME.]

9. In good time:

(1) At the right moment; in good season.

"To jest in good time."
Shakesp.: Comedy of Errors, II. 2.

(2) Fortunately, happily. (Often used ironically.)

"In good time here comes the noble duke."
Shakesp.: Richard III., II. 1.

10. In time:

(1) At the right moment; before it is too late.

"Gentle phylax given in time had cured me."
Shakesp.: Henry VIII., IV. 2.

(2) In course of time; in the course of things; by degrees; eventually: as, He got well in time.

11. Local time: Time determined by the moment at which the sun comes to the meridian at any particular place. As the extension of the railroad system has introduced railroad, or standard, time into every part of the United States, the reckoning of local time is becoming obsolete. [STANDARD-TIME, UNIVERSAL-TIME.]

12. Mean time, Mean solar time: [MEAN-TIME.]

13. Nick of time: The exact moment in point of time required by necessity or convenience; the critical moment.

14. Railroad time: Standard time, to which all railroad clocks are adjusted.

* Central-time; Eastern-time; Mountain-time; Pacific-time. [See UNIVERSAL-TIME.]

15. Sidereal time: [SIDEREAL-TIME.]

16. Solar time: [* 2.]

17. Time about: Alternately.

18. Time enough: In season; soon enough.

19. Time of day:

(1) A greeting or salutation appropriate to the hour of the day, as Good morning, Good evening, &c.

"When every one will give the time of day."
Shakesp.: Henry VII., III. 1.

(2) The latest aspect of affairs; a dodge. (*Slang*.)

* 20. Time of grace: Time during which hunting could be lawfully carried on.

21. Time out of mind, Time immemorial:

Law: Time beyond legal memory: that is, the time prior to the reign of Richard I, A.D. 1189.

22. To beat time: [BEAT, v., C. 16.]

23. To move, run, or go against time: To move, run, or go, as a horse, a runner, &c., as fast as possible so as to ascertain the greatest speed attainable, or the greatest distance that can be passed over in a certain time.

24. To kill time: To beguile time; to occupy one's self so as to cause the time to pass pleasantly or without tediousness.

25. To lose time:

(1) To fail by delay to take full advantage of the opportunity afforded by the conjuncture; to delay.

"The earl lost no time, but marched day and night."
—*Clarendon*.

(2) To go too slow: as, A watch or clock loses time.

26. True time:

(1) *Ord. Lang.*: Mean time as kept by a good clock.

(2) *Astron.*: Apparent time as reckoned from the transit of the sun's centre over the meridian.

* Time is used in many compounds, the meanings of which are for the most part self-explanatory: as, time-battered, time-enduring, time-worn, &c.

time-ball, s. A ball on a pole, dropped by electricity at a prescribed instant of time (usually 12 m.); an electric time-ball. It is used especially in maritime cities to give time to the officers of the ships in port.

time-bargain, s. An engagement entered into with a view to being closed before or at a given time. The subject of these bargains may be any commodity whatever, such as cotton, iron, wool, tobacco, corn, &c., and purchases or sales of these commodities against time are often made. But by far the largest number of time bargains are made in Stock Exchange securities; and are generally mere gambling transactions, carried on from time to time by the mere payment of the difference between the stipulated price and the actual price on the settling-day.

* Time-bargains originated in the practice of closing the bank for six weeks in each quarter for the preparation of the dividends. As no transfer could be made during that period, it became a practice to buy and sell for the opening. The habit, once formed, was extended to other stocks, and as neither stock nor capital was necessary for the conclusion of bargains, it opened the way for a host of needy adventurers, who were not slow to avail themselves of the opportunity of making a gain, while they had nothing to lose.—*Bithell: Counting-house Dict.*

time-beguiling, a. Making time pass quickly and pleasantly away.

"A time-beguiling ditty, for delight
Of his fond partner, silent in the nest."
Wordsworth: Excursion, bk. vi.

* time-bettering, a. Improving the state of things; full of innovations.

"Some fresher stamp of the time-bettering days."
Shakesp.: Sonnet 28.

* time-bewasted, a. Consumed or used up by time.

"My oil-dried lamp, and time-bewasted light."
Shakesp.: Richard II., I. 1.

* time-bill, s. A time-table.

time-book, s. A book in which is kept a record of the time persons have worked.

* time-candle, s. A candle in which the size and quality of the material and the wick are so regulated that a certain length will burn in a given time. Candles coloured or indented at certain intervals so as to mark time were patented in England in 1859.

time-detector, s. An instrument for recording the time at which a watchman may be present at different stations on his beat.

time-fuse, s. A fuse which can be so arranged as to explode a charge at a certain determinate interval after the time of its ignition. This is usually effected either by cutting out or off a portion of the fuse or by employing compositions of which given lengths burn at different rates.

time-gun, s. A gun which is fired by electricity at a particular time of day, as on the falling of a time-ball, or as a substitute for it.

time-hallowed, a. Hallowed or sanctified by age.

"The energetic words
Which a time-hallowed poet hath employed."
Wordsworth: Excursion, bk. IV.

time-honored, a. Honored for a long time; venerable and worthy of honor by reason of antiquity and long continuance; being of a venerable age.

"Herself the solitary squire left
Of a time-honoured race."
Byron: Dream, 2.

time-keeper, s.

1. A clock, watch, or chronometer.

"The same watch, or time-keeper, which I had carried out to my last voyage."
—*Cook: Third Voyage, bk. I., ch. I.*

2. A person who keeps, marks, regulates, or records the times, as of the departure of conveyances, performances in races, &c., hours worked by workmen, &c.

time-lock, s. A lock having clock-work attached, which, when wound up and locked, prevents the bolt being withdrawn, even by means of the proper key, until a certain interval of time has elapsed.

time-piece, s. An instrument for recording time; especially a small clock placed on mantel-pieces, side-tables, &c.

"That warning time-piece never ceased."
Longfellow: Old Clock on the Stairs.

time-pleaser, s. One who complies with the prevailing opinions, whatever they may be.

"Time-pleasers, flatterers, foes to nobleness."
Shakesp.: Coriolanus, III. 1.

time-server, s.

* 1. One engaged in serving his time. Not originally conveying the imputation which it does now.

"He is a good time-server that improves the present for God's glory and his own salvation."
—*Fuller: Holy State, vol. III., ch. xix.*

bill, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f

2. A record of time of employes.

3. A board divided by vertical and horizontal lines representing time and distance respectively, and used to denote speed of trains.

4. A table containing the relative value of every note in music.

time, vt. & i. [TIME, a.]

A. Transitive:

1. To adapt to the time, or occasion; to bring, begin, or perform at the proper time or season.

"The powerful impression being well timed, produced in them a permanent reformation."—Knox: *Winter Evenings*, even, 20.

2. To regulate as to time.

"Alone I tread this path—'er sought I know, Timing my steps to thine."

Wordsworth: *Poems on the Naming of Places*, No. VI.

3. To ascertain, mark, or record the time, duration, or rate of.

"It would be well to know whether the speeds stated to have been attained by the Scotch express were proved by actual timing with a watch, or only guessed at."—Globe, Sept. 2, 1885.

4. To measure, as in music or harmony.

B. Intransitive:

1. To keep time; to harmonize.

2. To waste time; to procrastinate, to delay.

"They timed it out all that spring, and a great part of the next summer."—Daniel: *Hist. Eng.*, p. 81.

tí-móc-ra-óy, s. [Gr. *τιμοκρατία* (*timokratia*): *τιμή* (*timé*) = honour, worth, and *κρατέω* (*krateo*) = to rule.] A form of government in which a certain amount of property is requisite as a qualification for office. It also signified a government which formed a sort of mean between aristocracy and oligarchy, when the ruling classes, composed of the best and noblest citizens, struggled for pre-eminence between themselves.

"Timocracy [is] a term made use of by some Greek writers, especially Aristotle, to signify a peculiar form of constitution: but there are two different senses in which it is thus used, corresponding to the different meanings of the word *τιμή*, a price, or honour, from which it is derived. According to the first, it represents a state in which the qualification for office is a certain amount of property; in the latter, it is a kind of mean between aristocracy and oligarchy, when the ruling class, who are still the best and noblest citizens, struggle for pre-eminence amongst themselves."—Brande & Cox.

*tí-mó-crát-ic, a [TIMOCRACY.] Of pertaining to, or of the nature of a timocracy.

"The timocratic democracies of the Achæans rose upon the ruins of the aristocracy, . . . oligarchies."—G. H. Lewis: *Hist. Philosophy* (ed. 1881), l. 2.

tim-ór-óme, a. [Lat. *timor* = fear; Eng. suff. -some.] Easily frightened; timid. (Scotch.)

Tím-ó-thý, s. [Lat. *Timotheus*; Gr. *Τιμόθεος* (*Timotheos*) = one who honours God; as adj. = honouring God; *τιμάω* (*timáo*) = to honour, and *θεός* (*theos*) = God.]

Script. Biog.: One of the companions of St. Paul on his missionary travels. Timothy was born either at Lystra or Derbe; his father was a Greek, his mother a Jewess (Acts xv. 1-2). Both his mother Eunice and his grandmother Lois were Christians (2 Tim. i. 5), having probably been converted by St. Paul on his first missionary tour through Lycaonia (Acts xiv. 6). Hence Timothy early knew the [Jewish] scriptures, probably with Christian interpretations (2 Tim. ii. 15); but his actual conversion seems to have been effected through the instrumentality of St. Paul, if, indeed, this be the meaning of the phrase "my own son in the faith" (1 Tim. i. 2). His constitution was feeble, sensitive, with a certain tendency to asceticism, yet not free from temptation to "youthful lusts" (2 Tim. ii. 22). He was

strongly recommended to St. Paul by the Christians at Lystra and Iconium. The apostle therefore chose him as missionary colleague, and had him circumcised for the sake of facilitating his work among the Jews (Acta xvi. 3). He thoroughly gained the confidence and affection of St. Paul, and was with him in Macedonia and Corinth (A.D. 52-53; Acta xvii. 14, xviii. 5; 1 Thess. i. 1), and at Ephesus, from which he was despatched for special duty to Corinth (A.D. 55-56; 1 Cor. iv. 17, xvi. 10). Returning, he was with St. Paul when the second epistle to the Corinthians and that to the Romans were penned (2 Cor. i. 1; Rom. xvi. 21), as also when he passed through Asia Minor prior to his arrest (A.D. 57-58; Acta xx. 4), and during his imprisonment at Rome (A.D. 61-63; Col. i. 1; Phil. i. 1). Probably about A.D. 64 he was left in charge of the Ephesian church. In Heb. xiii. 23 his own imprisonment and liberation are recorded. Tradition makes him ultimately suffer martyrdom, either in A.D. 96 or in A.D. 109.

¶ (1) *The First Epistle of Paul the Apostle to Timothy:*

New Test. Canon: An epistle addressed by St. Paul to Timothy. Some persons in the Ephesian church had taught, or appeared disposed to teach, a doctrine different from that of the apostle. Paul therefore, on departing for Macedonia, left Timothy behind to restrain those false teachers (1 Tim. i. 3-7), pretensions men too much given to profligate "fables and endless genealogies" (verse 4). Paul charged Timothy to preach the gospel, defying it as "a faithful saying, and worthy of all acceptance, that Christ Jesus came into the world to save sinners" (i. 5-20). Paul then commends prayer (ii. 1-8), defines the position of women in the Christian church (9-15), explains the duties of a bishop (iii. 1-7), and of a deacon and his wife (iii. 8-13), and, expressing the hope that he soon may see Timothy (iii. 14), gives him personal counsel (15), presents as beyond controversy the mystery (hidden thing) of godliness (16), predicts by the Spirit perilous times (iv. 1-4), adds fresh injunctions to his younger colleague (v.-vi.), explaining what his action should be towards elderly and younger men, and elder and younger women (v. 1-16), the Christian functionaries called elders (17), slaves (vi. 1-2), the rich (17-19), and what should be his conduct in the office which he held in trust (20-21). Eusebius summed up the verdict of Christian antiquity in placing the first epistle to Timothy among the Homologomena. Modern rationalistic critics, from Schmidt and Schleiermacher to Renan, have denied its authenticity, of which, however, there have been powerful defenders. Various dates have been assigned to it; one of the most probable is A.D. 56.

(2) *The Second Epistle of Paul the Apostle to Timothy:*

New Test. Canon: An epistle written by St. Paul after he had become a prisoner (i. 8). In Rome (17), in bonds (ii. 9), who had been at least once judicially examined and been required to make his "answer" (iv. 16), a crisis which, however, ended in his being "delivered out of the mouth of the lion" ("Nero") (iv. 17). Commencing by expressing his love for Timothy and his earnest desire to see him (i. 1-5), he exhorts him to steadfastness in the faith (6-18), to hardness and unworldliness (ii. 1-7), to the avoidance of frivolous and entangling questions, to purity, (ii. 8-23), and to meekness under provocation (24-26). His counsels are all the more fervent that many have deserted him for heresy or the world (i. 15, ii. 17, 18, iv. 10); and he foresees that a general impatience of sound doctrine was destined to appear (iii. 1-7, iv. 1-4). A certain air of sadness pervades the epistle, but the writer looks forward to his probably near martyrdom in tranquil trust in his Redeemer whom he had served so long and so well (iv. 6-8). He closes with sundry greetings and with the benediction. The evidence for the authenticity of the epistle is the same as that for the previous letter. Two dates assigned to it are A.D. 63 and July or August A.D. 65. It seems to have been the last of St. Paul's epistles.

Timothy-grass, s.

Bot.: *Phileum pratense*. Its common name from Mr. Timothy Hanson, who did much to promote its cultivation in the United States and Canada. It is a native of Europe, but is very extensively grown in this country. It is

often called Cat's-tail Grass from its spike-like panicle, several inches long. It is tender and nutritious and much relished by cattle.

2. *Fig.*: A slang term for money.

"And is this all! And I have seen the whole, Cathedral, chapel, nursery, and graves!" "Tis scanty with the tin, upon my soul!" —*Blackie: Lays of Highlands & Islands*, p. 20.

II. *Technically:*

1. *Chem.*: Stannum. A tetrad metallic element. Symb. Sn; at. wt. 118; sp. gr. 7.28; found in the state of oxide in tin-stone, in Cornwall, and also in Saxony, Bohemia, and Malacca. To obtain the metal, the ore is first crushed to a powder, washed to free it from earthy impurities, and roasted in a reverberatory furnace to expel sulphur and arsenic. It is then strongly heated with coal or charcoal, and the metal thus obtained cast into blocks. When pure it is a white metal with a high metallic lustre, is soft and malleable, and may be beaten into thin leaves (tin-foil). At a temperature of 200° it becomes brittle, at 228° it fuses, and when raised to a white heat it enters into ebullition, and burns with a brilliant white light. When rubbed, it evolves a peculiar odour, and when bent backwards and forwards emits a peculiar crackling noise. It dissolves in hydrochloric, nitric, and sulphuric acids. Tin forms two well-defined classes of compounds, viz., the stannous, in which it is bivalent, and the stannic, in which it is quadrivalent. It also forms an intermediate class called stannoso-stannic compounds.

2. *Hist. & Comm.*: The tin-mines of Cornwall have been worked from a very remote period. The Phœnicians probably obtained the metal from the Scilly Isles, the Romans did so from Spain. In modern times the mines of Cornwall and Devon have been worked with much success. Tin is abundant in the Black Hills, South Dakota, but is difficult to extract from its ore, and is not much worked.

3. *Min.*: Stated to have been found in Siberia with gold, and also in Bolivia; but it is still a doubtful native element.

4. *Pharm.*: Tin-salts have been experimentally administered, though rarely, in some nervous affections, as epilepsy and chorea. By the Hindoo native doctors they are given chiefly for urinary affections.

B. As *adj.*: Made of tin; as, a tin pot, a tin canister, &c.

¶ Tin-ore = *Cassiterite*, *Stannine*; tin-oxide and tin-pyrites = *Stannine*; tin-stone = *Cassiterite*.

tin-dichloride, s.

Chem.: SnCl₂. Stannous chloride. A gray resinous-looking substance, obtained in the anhydrous state by distilling a mixture of calomel and powdered tin. It is fusible below redness, and volatile at a higher temperature.

tin-dioxide, s.

Chem.: SnO₂. Stannic oxide. A white amorphous powder prepared by heating tin, or tin monoxide, in contact with air. It is very insoluble, not being attacked by acids even in the concentrated state.

tin-glass, * tin-glasse, s.

* 1. An old name for pewter or solder.

* 2. The glassmakers' name for hisiruth.

tin-glaze, s.

Pottery: An opaque glaze, or enamel, having

oxide of tin as a basis, used upon majolica ware and other fine pottery.

tin-liquor, s. A dyer's solution of tin, digested in hydrochloric and nitric acids, with an addition of salt.

tin-monoxide, s.

Chem.: SnO. Stannous oxide. A dense black powder prepared by heating stannous oxalate out of contact with air. It is permanent in the air, but when touched with a red-hot wire takes fire and burns like tinder.

tin-mordant, s. The same as TIN-LIQUOR (q.v.).

tin-ore, s. The ore of tin. [TIN, s.]

* **tin-penny, s.** A customary duty in England, formerly paid to the tithingmen for liberty to dig in tin mines.

tin-pot, s. The first of the set of baths in which sheet-iron is dipped for tinning.

tin-salt, s.

Chem.: SnCl₂.2H₂O. The hydrated chloride of tin produced by dissolving tin in hot hydrochloric acid. It crystallizes in needles, freely soluble in water, and is extensively used as a mordant in dyeing and calico-printing.

tin-saw, s.

Bricklay.: A saw used by bricklayers for cutting kerfs in bricks in order to render them more readily dressed by the axe which hews them into shape for the skew or ganged work, dome, or niche for which they are destined.

tin-scrap, s. Clippings or scraps made in the manufacture of tin-ware. It consists of iron plate, partially alloyed, and also coated with tin, the amount of the latter varying from three to five per cent. In inferior wares the tin is itself debased with lead.

tin-sesquioxide, s.

Chem.: Sn₂O₃. A silmy substance obtained by the action of ferric oxide on stannous chloride. It is soluble in hydrochloric acid and in ammonia.

tin-smith, s. One who makes articles of tin or tin-plate.

tin-tack, s. A tack dipped in melted tin.

tin-tetrachloride, s.

Chem.: SnCl₄. Stannic chloride. A thin, colourless, mobile liquid obtained by distilling a mixture of powdered tin and corrosive sublimate. It boils at 120°, fumes in the air, and, when mixed with water, solidifies to a soft mass called butter of tin.

tin-trichloride, s.

Chem.: SnCl₃. Stannoso-stannic chloride. Produced by dissolving tin sesquioxide in hydrochloric acid. It is only known in solution, and acts like a mixture of dichloride and tetrachloride.

tin-type, s. A photograph taken on a tinned plate; a stannotype or ferrottype.

tin-white cobalt, s.

Min.: The same as SMALTYNE (q.v.).

* **tin-worm, s.** An insect; a species of millipede. (*Bailey*.)

tin, v.t. [TIN, s.]

1. To cover or overlay with tin.

"The cover may be tinned over only by nailing of single tin plates over it." —*Mortimer*.

2. To put up in a tin case: As, To tin meat, fish, fruit, vegetables, &c.

tî-nâm'-î-dæ, s. pl. [Mod. Lat. *tinam(us)*; Lat. fem. pl. *adj. suff. -idæ*.]

Ornith.: A family of Game Birds, with nine genera and thirty-nine species. Bill straight, flattened, with membrane at base, nostrils large; wings short and concave, toes long. They form a very remarkable family, with the general appearance of partridges or hennipotes, but with the tail very small or entirely wanting. They differ greatly in their organization from any of the Old World Gallinæ, and approach, in some respects, the Ostriches. They are very terrestrial in their habits, frequenting the forests, open plains, and mountains of the Neotropical region, from Patagonia and Chili to Mexico, but are absent from the Antilles. Their colouring is very

sober and protective, as is the case with so many ground-birds, and they are seldom adorned with crests or other ornamental plumes, so prevalent in the order to which they belong. (Wallace.)

tin'-a-môu, s. [Native name.]

Ornith.: Any individual of the family Tinamidae (q.v.).

tin'-a-mûs, s. [Latinised from *tinamou* (q.v.).]

Ornith.: The type-genus of Tinamidae, with seven species, ranging from Mexico to Paraguay. Bill rather short, hooked at tip, sides compressed, nostrils towards base; wings with third and fourth quills longest, tips curved; tail very short, coverts lengthened; claws thick and short.

tin'-ca, s. [Lat.]

1. *Ichthy.:* Tench (q.v.); a genus of Cyprinidae, with a single species, *Tinea tinca* (= *variegata*), found all over Europe in stagnant waters with soft bottom. Scales small, deeply embedded in the thick skin; lateral line complete; dorsal short, having its origin opposite the ventral, anal short, caudal somewhat truncated; mouth anterior, with a barbel at the angles; gill-rakers short, lanceolate; pseudobranchiae rudimentary; pharyngeal teeth conchiform, slightly hooked at the end.

2. *Palaeont.:* From Tertiary freshwater formations.

tin'-cal, s. [TINKAL]

tin'-câl-cô-nite, s. [Eng. *tinical*, and *conite*.]

Min.: A pulverulent and efflorescent variety of borax (q.v.), containing 32 per cent. of water, found in California.

tin'-chill, tin'-chel, s. [Gael. & Ir. *tim-chill* = circuit, compass.] A circle of sportsmen, who, by surrounding a great space of country, and gradually closing in, brought immense quantities of deer together so as to capture or kill them.

"We'll quell the savage mountaineer,
As their *Tinchel* cove the game."
Scott: Lady of the Lake, vi. 17.

tin'-ct, v.t. [Lat. *tinctus*, pa. pr. of *tingo* = to dye.] [TINCE.]

1. To tinge, to stain, to dye, to spot, to tint.

"March the 27th in the sealed weather-glass, when first tint into water, the *tinced* spirit rested at 84 inches."
Boyle: Works, III. 137.

2. To imbue with a taste.

"We have artificial wells made in imitation of the natural, as *tinced* upon vitriol, sulphur, and steel."
Bacon.

tin'-ct, s. [TINCT, v.]

1. Stain, colour, tint, dye.

"Raising a world of gay *tinced* and grace."
Thomson: Castle of Indolence, l. 44.

2. The grand elixir of the alchemists; tincture.

"That great med'cine bath
With his *tinced* gilded thee."
Shakesp.: All's Well, v. 3.

tin'-ct, a. [Lat. *tinctus*.] Coloured, tinctured, stained.

"The blew ju black, the green in gray, is *tinced*."
Spenser: Shepherds' Calendar; Nov.

tin'-côr'-î-al, a. [Lat. *tinctor* = a dyer, from *tinctus*, pa. pr. of *tingo* = to dye.] Pertaining to colours or dyes; imparting a colour or dye.

tin'-côre, s. [Lat. *tinctoria* = a dyeing, from *tinctus*, pa. pr. of *tingo* = to dye; Sp. & Ital. *tinctora*; Fr. *teinture*.]

I. *Ordinary Language:*

1. *Lit.:* A tinge or shade of colour; a colour, a tint.

2. *Figuratively:*

(1) A slight taste superadded to any substance: as, a *tinctor* of orange-peel.

(2) A slight quality added to anything; a tinge.

"All manners take a *tinctor* from our own,
Or come discoloured through our passions shown."
Pope: Moral Essays, l. 33.

II. *Technically:*

1. *Chem.:* The finer and more volatile parts of a substance, separated by a menstruum; an extract of a part of the substance of a body communicated to the menstruum.

2. *Her.:* The name given to the colours, metals, or tints used for the field or ground of an emblazoned shield, including the two metals

or and argent, or gold and silver, the several colours, and the furs.

3. *Pharm.:* A coloured solution of some animal or vegetable principle. *Tinctures* are very numerous. Garrod has a list of nearly seventy, commencing with the tincture of aconite and the tincture of aloes. Different menstrua are employed; chiefly rectified spirit, proof spirit, compound spirit of ammonia, and spirit of ether.

tincture-press, s. An apparatus for thoroughly extracting the active principles of plants, &c., by submitting them to compression.

tin'-cure, v.t. [TINCTURE, s.]

1. *Lit.:* To colour, to dye, to stain; to imbue or impregnate with a colour or tint.

"A little black paint will *tinctor* and spoil twenty gay colours."
Watts.

2. *Fig.:* To imbue, to tinge.

"It is, indeed, generally true, that the history of a mechanical art affords but insipid entertainment to a mind which is *tinctor* with the liberality of philosophy and the elegance of classical literature."
Esays, No. 135.

tin'd, tin'de, teend, tend, v.t. [A.S. *tendan* = to kindle; cogn. with Dan. *tende*; Sw. *tända*; Goth. *tandjan*; Ger. *tünden*.]

[TINDER.] To kindle; to set on fire.

"And stryful Atin in their stabbome mind
Coles of contention end hot vengeance *tind*."
Spenser: F. Q., II. viii. 11.

That mote recover their wounds; so ill they did *tine*."
Spenser: F. Q., II. xi. 21.

tin'-ô-a, s. [Lat. = a gnawing worm, a moth, a bookworm.]

Entom.: The typical genus of *Tineidae* (q.v.). Head hairy; antennæ in the male sometimes slightly ciliated; maxillary palpi folded, generally five-jointed; labial palpi cylindrical, hairy, or bristly; fore wings oblong, ovate; hind wings ovate, clothed with scales. Species numerous; widely distributed. Some are very destructive to clothes, especially *Tinea biellii* and *T. pellionella*. The expansion of their wings is about half an inch. The first has the fore wings glossy, pale ochreous, with no spots, the hind wings whitish, with pale ochreous cilia. It feeds largely on horserhair, and constructs silken galleries in the interior of chairs, sofas, mattresses, &c., and attacks carpets. The second species has three indistinct, brownish spots on the fore wings, the larva has a reddish-brown head; it attacks quilts, feathers, stockings, cloth, &c., constructing a portable case of the substance on which it feeds. Both are common in houses throughout the year, but are most abundant in summer. Another destructive species is *T. tapetella*, which has a wing-expanse of three-quarters of an inch; the base of the fore wings is black, the apex white; the larva feeds on the linings of carriages, green baize, down, &c., constructing a gallery partly of the cloth, partly of its own silk. It is found in June and July on palings, in houses, &c. *T. granella* attacks corn in granaries, and *T. ochraceella* lives in ants' nests.

2. *Pathol.:* Skin diseases produced by vegetable fungi in or upon the epidermis, the chief being ringworm (q.v.). There are many species, *Tinea tonsurans*, *T. kerion*, *T. favosa*, *T. decalvans*, *T. sycosis*, and *T. versicolor*.

tined, a. [Eng. *tine* (1), s.; -ed.] Furnished with tines.

"A mattocks or two *tined* forks."
P. Holland: Pinner, bk. xviii, ch. vi.

tÿ-nö'-î-dæ, s. pl. [Mod. Lat. *tine(a)*; Lat. fem. pl. *sj. suff. -idæ*.]

Entom.: The typical genus of *Tineina*. Head rough; labial palpi short, thick, frequently bristly; maxillary palpi often greatly developed. Larva with sixteen legs, living in a portable case, or feeding on fungi, decayed wood, &c. It contains the Clothes Moths and the Long-horned Moths. The species very numerous.

tin'-ô-î-næ, s. pl. [Mod. Lat. *tine(a)*; Lat. neut. pl. *idæ*.]

Entom.: A group of small Heterocera (Moths). Antennæ setaceous, rarely pectinated or ciliated, longer than the body, which is slender; wings long, with long cilia. Hind wings attenuated, or of an elongate trapezoidal form. Larva with sixteen, fourteen, or no legs. Known British species 669, or more than a third of the British Lepidoptera. (*Stainton*.)

tine'-man, s. [Prob. from *tine* (2), v., and *man*.] An officer of the forest who had the nocturnal care of vert and venison, and other servile employments. (*Cowell*.)

tin'-ët, s. [TINE (2), v.] Brushwood and thorns for masking and repairing hedges. (*Burritt*.)

tine'-wâld, s. [A.S. & Icel. *thing* = an assembly; Dan. *ting*, and A.S. *weald* = a wood, an open space; cf. Icel. *thing-völlr* = a place where a thing sat, a parliament field.] The ancient parliament or annual convention of the people in the Isle of Man.

tin'-föör, s. [Eng. *tin*, and *floor*.]

Tin-mining: The name usually given to a small vein or thin flat mass of tinstone interposed between certain rocks and parallel to

Chair beds. The same name is occasionally given to a large, irregular mass of tin-ore.

tin-foil, s. [Eng. tin, v., and foil (2) (q.v.)] Nominally pure tin beaten out into a thin sheet. Very frequently, however, it is a mixture of tin and lead.

tin-foiled, a. [Eng. tin-foil; -ed.] Covered with tinfoil; hence, glittering, but worthless. "O Lucio, fortune's gift is rubbed quite off from my slight tin-foiled state." Marston: Antonio's Revenge, l. 2.

ting (1), s. [From the sound.] A sharp sound, as of a bell; a tinkle; a tinkling.

ting (2), s. [Chinese.] The room in a Chinese temple containing the idol.

B. Trans. : To ring, to tinkle. "Capide thi king tinging a silver bell." Chaucer: Testament of Greceida.

tinge, v. t. [Lat. tingo = to dye; Gr. réyvo (tinggo) = to wet, to moisten, to attain.] I. Lit. : To colour, to dye, to stain; to modify the colour or tinge of.

"Where the high plumes above the helmet dance, New tinged with Tyrian dye." Pope: Homer; Iliad xv. 684.

II. Figuratively : 1. To qualify or modify the taste or flavour of; to give a taste, flavour, or smack to.

2. To modify the character or qualities of. "Sir Roger is something of an humourist; and his virtues, as well as imperfections, are tinged by a certain extravagance, which makes them particularly his." Addison: Spectator, No. 104.

tinge, s. [TINGE, v.] I. Lit. : A slight degree of colour, shade, or hue superadded or infused into another substance or mixture; a colour, a tint. "It gives boldness and grandeur to plains and fens, tinge and colouring to days and fallows." Paley: Nat. Theol., ch. xxv.

II. Figuratively : 1. A superadded taste or flavour; a smack.

2. A modification of character or qualities; a smack : as, There is a tinge of bitterness in his language.

ting-ent, a. [Lat. tingens, pr. par. of tingo = to dye.] Having the power to tinge or colour.

"This wood, by the tincture it afforded, appeared to have its coloured part genuine; not as for the white part, it appears much less enriched with the tingent property." Boyle.

tin-gi, tin-gu-y, s. [See def.] Bot. : The Brazilian name of Magnolia pubescens and M. glabrata. [MAOONIA.]

tin-gi-dae, s. pl. [Mod. Lat. ting(is); Lat. fem. pl. adj. suff. -idae.] [TINOINÆ.]

tin-gi-nse, s. pl. [Mod. Lat. ting(is); Lat. fem. pl. adj. suff. -inse.] Entom. : A sub-family of Membrancea. The most typical forms are exceedingly depressed, the hemelytra frequently closely reticulated and semi-transparent. They are minute and very delicate bugs found upon various trees and plants, chiefly herbaceous, feeding on their juices. Sometimes elevated to the rank of a family Tiogetia.

tin-gis, s. [Etym. doubtful.] Entom. : The typical genus of Tingine (q.v.). British species sixteen or more.

tin-gle, *tin-gil, v. t. & i. [A freq. from ting (q.v.)] A. Intransitive : 1. To tinkle, to ring, to tinkle. (See example s.v. TINO, v., A.)

2. To feel a kind of thrilling sensation, as in hearing a sharp, ringing sound. "Ten times at least in the Chronicles and Ezra, is the same word doubly used, for tymbals; and the verbs of this root, is the same, whereby God would express the tingling of the ears." Bishop Hall: The Impress of God.

3. To feel a sharp, thrilling pain.

4. To have a thrilling sensation, or a sharp, slight penetrating sensation.

5. To cause a thrilling sensation. "Scarcely conscious what he hears, The trumpets tingle in his ears." Scott: Rokeby, vl. 28.

B. Trans. : To cause to give a sharp ringing sound; to ring, to tinkle.

tin'-gling, s. [TINOLE.] A thrilling, tremulous sensation. "He feels a gentle tingling come Down to his finger and his thumb." Cooper: To Lady Austen.

tin'-gliah, a. [Eng. ting(e); -ish.] Sensitive. "The tempers grow alive and tinglish." Browning: Old Pictures in Florence.

tinik, *tinick, *tynik, v. t. [Of imitative origin; cf. O. Dut. tinge-tangen = to tingle; Lat. tinnio = to tinkle; Fr. tinter.] To make a sharp, shrill noise; to tinkle. "I am maad . . . as a sycbal tynkinge." Wycliffe: I Corinthians xiii. l.

tinik, s. [TINK, v.] A tinkle, a tingle.

tin'-kal, tin'-cal, s. [The Indian name for borax.] Min. : The same as NATIVE-BORAX (q.v.).

tin'-kal-rite, s. [Eng. tinkel; suff. -rite (Min.); Ger. tinkelait.] Min. : A name given to the Ulexite (q.v.) of Africa.

Tin'-kar, s. [See compound.] Tinkar's root, s. Bot. : The root of Tristotum perfoliatum, growing in the United States. It is two to three feet high, with large, oval, acuminate leaves, dull purple flowers, and orange coloured berries. In small doses it is a mild cathartic; given in larger quantity, it produces vomiting. Its dried and roasted berries have been used as a substitute for coffee. It derives its popular name from a Dr. Tinkar, who first used it medicinally.

tin'-ker, *tyn-ker, s. [Eng. tink, v.; -er.] From his making a tinkling sound. I. Ordinary Language : 1. One who mends pots, kettles, pans, or the like. "Or by the sound to judge of gold and brass, What piece is tinkers' metal, what will pass?" Dryden: Persius v. 158.

tin'-nér, s. [Eng. tin, s.; -er.] 1. One who works in the tin-mines. "I cannot take my leave of these tinners, until I have observed a strange practice of them, that once in seven or eight years they burn down (and that to their great profit) their own melting-houses." Fuller: Worthies; Cornwall.

2. A tinman (q.v.). tin'-ní-ent, a. [Lat. tinnens, pr. par. of tinnio = to ring.] Emitting a clear ringing or tinkling sound. "It will make every religious string, so to say, more intense and tinnient." Essay on the Action for the Pulpit, p. 86. (1783.)

tin'-níng, s. [TIN, v.] 1. The art, act, or process of coating other metals with tin for the purpose of protecting them from oxidation or rust. Hollow ware is tinned inside, having been first thoroughly cleaned and heated, by pouring grain tin into the vessel and turning and rolling it about so as to bring it in contact with every part. Powdered rosic is used in the bath to prevent the formation of an oxide, and the surface of the ware is rubbed with cloth or tow to aid the process. In cold tinning an amalgam of tin and mercury is applied to the metal, the mercury being afterwards driven off. Bridle-bits, stirrups, and other small articles are tinned by immersion.

2. The coating or layer of tin so laid on.

3. Canning; packing meat, vegetables, &c., in tins.

tin'-ní-tüs, s. [Lat., from tinnio = to ring.] (See compound.) tinnitus-aurium, s. Pathol. : Ringing in the ears. It may arise from an unnatural state of the circulation in the ear, from disease of the optic nerve, or from sympathy with the stomach when labouring under indigestion.

† tin'-núñ-cy-lüs, s. [Lat = the kestrel.] Ornith. : An old genus of Falconine, resembling Falco, but with the tarsi long and strong, with transverse hexagonal scales. The species are now generally placed under Falco and Cerchneis.

*tin'-ny, a. [Eng. tin, s.; -y.] Pertaining to, consisting of, or containing tin; abounding in or resembling tin. "The lode is six feet wide, and tinnny throughout, and worth 275 per fathom." Standard, Oct. 28, 1881.

ti'-nóc-ér-äs, s. [Gr. réivo (teinó) = to stretch, and képas (keras) = a horn.] Paleont. : A genus of Marsh's Dinocerata (q.v.), said to be synonymous with the Eobasilens and Loxophodon of Cope.

ti'-nó-dés, s. [Mod. Lat. tin(ea), and Gr. eidos (eidos) = form, appearance.] Entom. : A genus of Hydropychide. The larvæ make silken galleries on the surface of submerged stones.

tire is expanded by heat so as to tightly embrace the circle of felles, or the rim of the wheel, on which it shrinks in cooling.

tire-measurer, s. An instrument for measuring the circumference of wheels and the length of the developed tires.

tire-press, s. A machine for driving the wrought-iron or steel tire on to the rim of a driving-wheel.

tire-roller, s. A form of rolling-mill for tires in which the rolls between which the work is performed are made to overhang their bearings and be movable from or to each other, so as to allow the endless tire to be introduced between them and the parts then brought together, so that the pass is complete.

tire-shrinker, s. A device for shortening tires when they have become loose from the shrinkage of the wheel.

tire-smith, s. One who makes tires and other iron work for coaches, &c.

tire (3). ***tyr**, ***tyre**, s. [A contract. of attire (q.v.); cf. Prov. *tiera*, *teira* = a row, attire; O. H. Ger. *ziari*; M. H. Ger. *ziere*; Ger. *zier* = ornament; *ziere* = to ornament.]

* 1. A head-dress.

"On her head she wore a *tyre* of gold."

Spenser: F. Q., I. x. xl.

* 2. Attire, generally.

"In no gay *tyr*." *Alexander & Dindimus*, 383.

* 3. Furniture, apparatus.

"Salut George's worth
Eukindes like desire of high exploit:
Immediate sieges, and the *tyre* of war,
Rowl in thy eager mind." *Philips: Blenheim*.

4. A child's apron without sleeves; a pinafore, a tier.

* **tire-vallant**, ***tire-valliant**, s. A kind of head-dress.

"The *tire-vallant* or any *tyre* of Venetian admittance." *Shakesp.: Merry Wives*, III. 3.

* **tire (1)**, ***tyre**, v.t. [TIRE (3), s.] To attire, to adorn, to dress.

"She painted her face and *tired* her head." *—2 Kings*

ix. 30.

* **tire (2)**, v.i. [Fr. *tirer* = to draw, to snatch, to pluck; Eng. *tear*.]

1. *Falconry*: To seize, pull, and tear prey. The hawk was said to *tire* on her prey when it was thrown to her and she began to tear and pull at it.

"Like an empty eagle,
Tire on the flesh of men."

Shakesp.: 3 Henry VI., I. 1.

2. To seize eagerly; to be fixed or cloacely engaged in or upon anything.

"Upon that were my thoughts *tiring*."

Shakesp.: Timon of Athens, III. 2

tire (3), v.t. & t. [A.S. *teorian* = to be tired, to weary, to tire; *tirigan* = to provoke, to vex, to irritate.]

A. Transitive:

1. To exhaust the strength of by toil or labour; to fatigue, to weary; to wear out physically.

"I have *tired* myself." *Shakesp.: Cymbeline*, III. 4.

2. To exhaust the patience or attention of by dullness or tediousness; to make sick of something; to cause repugnance or sickness in by excessive supply or continuance; to wear out.

"To *tire* the reader with a long preface, when I want his unfatigued attention to a long poem." *—Goldsmith: Deserted Village*. (Prof.)

B. Intrans.: To become weary, fatigued, or exhausted; to have the strength or patience fail.

"Of this sad work when each begins to *tire*,
They sit them down just where they were before."

Thomson: Castle of Indolence, I. 55.

¶ **To tire out:** To weary or fatigue to excess; to wear out; to exhaust thoroughly.

"His cold and unceremonious answers could not *tire* out the royal indulgence." *—Macaulay: Hist. Eng.*, ch. xvii.

tired, pa. par. or a. [TIRE (3), v.]

tired-nèss, s. [Eng. *tired*; -ness.] The quality or state of being tired or fatigued; weariness, exhaustion.

"It is not through the *tiredness* of the age of the earth, but through our own negligence, that it hath not satisfied us bountifully." *—Hawesell: On Providence*.

† **tire-less, a.** [Eng. *tire* (3), v.; -less.] Un-tiring, unwearied.

"The *tireless* and warm-hearted missionary." *—Daily Telegraph*, Nov. 17, 1885.

* **tire-líng**, ***tyre-ling**, a. [Eng. *tire* (3), v.; -ling.] Tired, fatigued.

"The former villain which did lead
Hes *tyreling* jade." *Spenser: F. Q.*, VI. vii. 40.

* **tire-man, s.** [Eng. *tire* (1), v., and *man*.] A man who attends to the dressing of another; a valet.

"By all your titles, and whole style at once,
Of *tireman*, mountebank, and Justice Jones,
I do salute you."

Ben Jonson: Expost. with Inigo Jones.

tí-rés'-ý-ás, s. [Lat., from Gr. *Tepegrías* (*Teiresias*), the name of a Theban who by accident saw Athena bathing, and was struck blind by her throwing water in his face. Repenting of what she had done, she gave him a staff to walk with, and made him a sooth-sayer.]

1. Bot.: A genus of *Conferveae*, now a synonym of *Elaeogonum*. It has a spiral structure in the cell walls.

2. *Falwort*: A genus of *Crustacea*. Known British species one, characteristic of the Lower Silurian.

tire-sóme, a. [Eng. *tire* (3), v.; -some.]

1. Exhausting the strength; wearying, fatiguing, tiring; as, a *tiresome* journey.

2. Exhausting the patience; wearisome, tedious.

"This *tiresome* round of pelting pleasures."

Byron: To a Lady.

tire-sóme-ly, adv. [Eng. *tiresome*; -ly.] In a tiresome or wearisome manner; wearisomely.

tire-sóme-nèss, s. [Eng. *tiresome*; -ness.] The quality or state of being tiresome, fatiguing, or exhausting; wearisomeness, tediousness.

* **tire-wóm-an**, ***tyre-wóm-an**, s. [Eng. *tire* (1), v., and *woman*.]

1. A woman who attends to the dressing or toilet of another; a lady's maid.

"The Lady Anne, at her toilette, on the morning after the council, spoke of the investigation with such scorn as emboldened the very *tirewomen* who were dressing her to put in their jests." *—Macaulay: Hist. Eng.*, ch. ix.

2. A dresser in a theatre.

tír-íng, pr. par. or a. [TIRE (1), v.]

tiring-house, **tiring-room**, s. The room or place in which players dress for the stage.

"This green plot shall be our stage, this hawthorn brake our *tiring-house*." *—Shakesp.: Midsummer Night's Dream*, III. 1.

tírl, s. [A variant of *trill* or *thrill*.] A smart tap or stroke. (*Scotch*.)

tírl, v.t. & t. [TÍRL, s.]

A. Intrans.: To make a slight noise, as by touching some loose or slack object, so as to produce a tremulous motion or sound.

B. Trans.: To uncover; to strip of a covering or roof. (*Scotch*.)

"Whyles on the strong-winded tempest tyrl'
Tyril' the kirks."

Burns: Address to the Deil.

¶ **To tirl at the pin:** To twirl or rattle at the door-latch, as a courteous signal that a person wishes or intends to enter; an old practice which prevailed before bells or knockers were in use. (*Scotch*.)

"And murder *tírl'd* at the door-pin, if he came beu." *—Scott: Antiquary*, ch. xi.

tír-lie-wir-lie, a. & s. [TÍRL.]

A. As adj.: Intricate; trivially ornamental.

"They have contrived queer *tírlie-wir-lie* holes, that go out to the open air." *—Scott: Antiquary*, ch. xxi.

B. As subst.: A whirligig; an ornament consisting of a number of interwolved lines.

* **tír-ó, s.** [TYRO.]

tír-ó-çin-i-úm, s. [Lat.] The first service of a soldier; the first rudiments of any art; a novitiate; hence, used by Cowper as a title for a poem on schools.

tí-ró-lite, s. [TYROLITE.]

T-iron (Iron as *ī-çrn*), s. [See def.] A kind of angle-iron having a flat flange and a web like the letter T, from which it is named.

Tí-ró-ni-an, a. [From Tiro, the freedman, pupil, and amanuensis of Cicero.] An epithet applied to notes, or to a system of shorthand in which they were written, the production of Tiro.

tír, v.t. [Prob. connected with *tear* or *stri* v.] To tear, to uncover, to unroof, to strip; to pare off the sword from with a spade. (*Scotch*.)

tír-ra-lír-ra, s. [See def.] A word intended to represent the note of a lark, a horn, or the like.

"The lark that *tírralírra* chants,
With hey! with hey! the thrush and thajay."

Shakesp.: Winter's Tale, IV. 2.

tír-rét, s. [Etym. doubtful.]

Her.: A manacle.

* **tír-rít, s.** [A word of no derivation.] Fright terror.

"Here's a goodly tnmelt! I'll forewear keeping house, before I'll be in these *tírrits* and frights." *—Shakesp.: 2 Henry IV.*, II. 4.

tír-ri-viçç, a. pl. [Cf. *tírri*.] Tantrums; bursts of passion or ill-humour. (*Scotch*.)

"For that matter when he was in one o' his *tírriçç*." *—Scott: Waverley*, ch. lix.

tír-wít, s. [From the cry of the bird.] The lapping.

tíç, v. [See def.] A common contraction of *it is*.

tí-sar, a. [PTISAN.]

tí-sar, s. [Fr.]

Glass-manuf.: The fireplace at the side of, and heating the annealing arch of, the plate-glass furnace.

tíç-íç, tíç-íç-al, a. [PATHETIC, PATHETICAL.]

tíç-íçk-ý, a. [Eng. *tisic*; -y.] Consumptive, phthisical.

Tíç-ri, s. [Heb. תשרי (*Thishri*), from an obsolete root signifying to begin.]

Jewish Calendar: The first month of the civil, and the seventh of the ecclesiastical year. It corresponded to part of our September and October. The Great Day of Atonement and the Feast of Tabernacles fell within its limits. Called in 1 Kings viii. 2, *Ethanim* (= streaming rivers), because the rivers, swelled by the autumnal rains, were then in flood. The name *tisri* occurs in the Palmyrena inscriptions, and was probably not confined to the Jews.

tiss-ue (as *as sh*), s. [O. Fr. *tissu* = a ribbon, fillet, or head-band of woven stuff; prop. pa. par. of *tistre* (Fr. *tisser*) = to weave, from Lat. *texo*.] [TEXT.]

I. Ordinary Language:

1. Literally:

(1) Tissue-paper (q.v.).

(2) A very fine transparent silk stuff used for veils; white or coloured. It was formerly interwoven with gold or silver threads and embossed with figures.

(3) Cloth interwoven with gold.

"The taste for the spices, the tissues, and the jewels of the East became stronger day by day." *—Macaulay: Hist. Eng.*, ch. xviii.

2. *Fig.:* A connected series; a concatenation; as, The whole story is a *tissue* of falsehoods.

II. Technically:

1. *Histology:* A set of cells modified for the performance of a special function; the fabric of which the organs of plants and animals are composed. The structure of tissues, with very few exceptions, is imperceptible to the unassisted eye, and requires the aid of the microscope for its resolution. Tissues which are absent from plants occur in animals; these are called *Animal Tissues*, and have a relation to movement or to sensation, as the muscles and nerves. But plants preserve, protect, and sustain themselves, and the corresponding tissues in animals are spoken of as the *Vegetable Tissues*; of this kind are epithelium and bone. Tissues always present the same general arrangement in the same organism, but are combined in different ways in different organisms. In the lower forms of life, whether animal or vegetable, the distinctions between tissues become less and less obvious, and there are organisms so extremely simple that the tissue of their bodies is of a uniform cellular character.

(1) *Animal.* The term tissue is used in dealing with (a) the structure of organs, which are composed of various tissues; and (b) specially of the component parts of organs. In the

fâte, fát, fáro, smídst, whát, fáll, father; wê, wêt, hère, camél, hêr, thére; pine, pí, síre, sír, maríne; gô, pô, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, uníte, cûr, rûle, fûll; trý, Sýrian. æ, œ = ê; ey = â; qu = kw.

first and wider sense, the anatomical individual is made up of osseous tissue, or bone; muscular tissue, or flesh; adipose tissue, or fat; cartilaginous tissue, or gristle; connective tissue, serving to bind the whole together; and pigmentary tissue, or colouring matter. In dealing with animal tissues in the strict sense, histological analysis shows them to be much more differentiated and elaborate in structure than those of plants. They may be divided into: (a) Epithelium, consisting of nucleated protoplasmic cells, forming continuous masses, either arranged in a single layer, or stratified and forming several superimposed layers. The lining of the tubes and alveoli of secreting and excreting glands, and the sensory or terminal parts of the organs of sense consist of epithelium. (b) Connective tissue, a name applied to a variety of tissues developed from the same embryonal element, serving more or less as framework or connecting substance for nervous, muscular, glandular, and vascular tissues. In the embryo and in the growing condition one may be changed into the other, and in the adult they gradually shade off one into the other. These tissues are divided into three groups, in all of which the ground substance, matrix, or intercellular substance, is distinguished from the cells embedded therein: (i) Fibrous connective tissue, consisting of microscopic, band-like, or cylindrical bundles of exceedingly fine homogeneous fibrils, sometimes aggregated in groups, and held together by an albuminous, semi-fluid cement substance called glebulin. (ii) Cartilage, consisting of a firm ground-substance with cells embedded therein. Cartilage may be hyaline, having the ground-substance firm and resembling ground-glass; Fibrous, or Fibro-cartilage, consisting of fibrous connective tissue arranged in bundles, and these again in layers; and Yellow, Elastic, or Reticular,

TISSUE.

A. Animal. Striated muscular tissue. B. Vegetable. Cellular tissue, composed of prosoenchymatous cells.

having the ground-work permeated by dense networks of elastic fibrils. (iii) Bone and Dentine, both developed from transformed embryonal connective tissue. (c) Muscular tissue: (i) Non-striated, consisting of nucleated cells, contractile in one definite direction, becoming shorter and thicker during contraction. (ii) Striated, composed of extremely long more or less cylindrical fibres, held together by bundles of fibrous connective tissue so as to form larger or smaller bundles; these again are aggregated together by stronger bands and septa of fibrous connective tissue, and these into the fascicles or divisions of an anatomical muscle. (d) Nervous, consisting of bundles of nerve-fibres held together by fibrous connective tissue, which carries the blood-vessels supplying the nerve-trunk, a plexus of lymphatics, groups of fat cells, and sometimes numerous plasma cells.

(2) Vegetable: Two forms of aggregations of cells, called generally Cellular Tissue, may be distinguished, according to the form and relative position of the cells which compose them: (a) Parenchyma (Areolar, Utricular, or Vesicular Tissue), in which thin-walled cells, of a diameter nearly equal in all directions, are united to one another by broad surfaces; and (b) Prosoenchyma, in which the cells are pointed at both ends, and are much longer than they are broad. When the walls of the cells are much thickened, the tissue is called sclerenchyma: this may be either parenchymatous or prosoenchymatous, according to the form of the cells. When the transverse walls of a row of super-imposed cells are absorbed or perforated, so that they coalesce and form tubes or vessels, the tissue is said to be vascular. When all the cells have ceased to divide, and have assumed their

definite form, the tissue is called permanent; when, on the contrary, the cells are still dividing, it is called generating tissue. When several different tissues occur in one plant, as in all the higher plants, they are arranged into systems. Three such systems of tissues are usually met with: (1) The epidermal, which covers the exterior of the plant, and usually consists of a single layer of cells; (2) the fibro-vascular, which traverses the body of the plant in the form of bundles, and is characterized by the presence of tubes and vessels, and of long, pointed, prosoenchymatous cells—the Wood-fibres; (3) the fundamental tissue, which fills up the rest of the space, and consists principally of parenchyma.

2. Entom. : A British geometer moth, *Scotista dubitata*. The fore wings have numerous transverse wavy lines; the larva feeds on buckthorn.

tissue-paper, s. A very thin gauze-like paper made of several sizes, and used for the protection of engravings, and for wrapping fine and delicate articles.

tiss-ne (ss as sh), v.t. [TISSUE, s.] To form tissue of, to interfere with, to variegate.

"The chariot was covered with cloth of gold **tissned** upon blue."—Bacon.

tiss-ued (ss as sh), pa. pr. or a. [TISSUE, v.]

1. Variegated.
"Playing with thy vesture's **tissued** flowers."
Cooper: *On my Mother's Picture*.
2. Dressed in or adorned with tissue.

tít (1), s. [Icel. *títtr* = a tit, a bird; *títlingr* = a sparrow.]

1. A titmouse (q.v.)
2. A little horse.

"Nay, should the **tít** get on for once,
Each rider is so grave a dunce.
That, as I've heard good judges say,
'Tis ten to one they'd lose their way."
Lloyd: *The Poetry Professors*.

3. A contemptuous term for a woman. (In this sense perhaps from *teat* (q.v.).

"A vast virago or an ugly **tít**."—Burton: *Anat. Melancholy*, p. 524.

4. A bit, a morsel.

tít-warbler, s.
Ornith.: *Sylvicola minuta*.

tít (2), s. [A corrupt. of *tip* (2), s. (q.v.).] A tap, a slight blow.

¶ *Tít-for-tat*: An equivalent in way of revenge or retaliation.

Tí-tan, s. & a. [Lat., from Gr. *Τίτάν* (Titan) = the Sun-god.]

A. As substantive:

1. *Grecian Mythology*:

(1) According to the more modern account, the eldest son of Uranus and Gaia, who relinquished the sovereignty of gods and men to his younger brother Saturn, the latter undertaking to destroy all his children, so that the monarchy might revert to those of Titan. He afterwards recovered the sovereignty from Saturn; but Jupiter, the son of the latter, vanquished him, and restored it to his father.

(2) A name applied to the sun, as the offspring of Hyperion, one of the Titans.

(3) One of the children of Coelus (or Uranus) and Terra. They were six males, Oecenus, Coios, Crios, Hyperion, Iapetus, and Kronos; and six females, Theia, Rheia (or Rhea), Themis, Mnemosyne, Phoebe, and Tethys. These children, according to the commonly-received legend, were hated by their father, who, as soon as they were born, thrust them out of sight into a cavern of Earth, who, grieved at his unnatural conduct, produced the "substance of hoary steel," and, forming from it a sickle, roused her children, the Titans, to rebellion against him. The wars of the Titans against the gods are often confounded with that of the Giants; but the war of the Titans was against Saturn, and that of the Giants against Jupiter.

2. *Astron.*: The sixth of the eight satellites of Saturn. Its mean distance from the centre of the planet is 781,000 miles; its periodic time, 15 days, 22 hours, 41 minutes, and 25.2 seconds.

3. *Chem.*: [TITANIUM].

4. *Min.*: [TITANITE].

B. As adj.: Of or pertaining to the Titans; Titanic.

Titan-like, adv. After the fashion of the

Titans, who piled mountain on mountain in order to reach heaven in their war against Saturn.

"They were gigantic minds, and their steep aim
Was *Titan-like*, on daring doubts to pile
Thoughts which should call down thunder, and the
Saina."
Byron: *Childe Harold*, lll. 104.

tí-tan-ate, s. [Eng. *titan(ic)*; -ate.]
Chem.: A salt of titanate acid.

titanate of iron, s.

Min.: The same as ILMENITE.

* **Tí-tan-éss, s.** [Eng. *Titan*; -éss.] A female Titan; a female personage of surpassing power.

"Truth... *Titaness* among deities."—C. Brown: *Villets*, ch. xxxix.

tí-ta-né-thés, s. [Formed from Lat. *Titan* (q.v.).]

Zool.: A genus of Oniscidae. *Titanethes abius*, from the Mammoth Cave in Kentucky, is blind.

Tí-tá-ní-a, s. [Lat. = a name of Latona, as daughter of the Titan Coius; of Pyrrha, as a descendant of the Titan Prometheus; of Diana as the sister, and of Circe as the daughter of Sol. Shakespeare (*Midsummer Night's Dream*) uses the name for the wife of Oberon.]

Astron.: The third of the four satellites of Uranus. Its mean distance from the centre of the planet is 272,000 miles, its periodic time 8^h7^m59^s7⁴.

tí-tá-ní-an, tí-tán-ít-ic, a. [Mod. Lat. *titan(ium)*; Eng. adj. suff. -ian, -itic.] Pertaining to titanium (q.v.).

Tí-tán-í-o (1), a. [Eng. *Titan*; -ic.] Of, pertaining to, or characteristic of the Titans; hence, gigantic, superhuman; enormous in size or strength.

"Rome—Rome imperial, bows her to the storm,
In the same dust and blackness, and we pass
The skeleton of her *Titan* form."
Byron: *Childe Harold*, lv. 44.

tí-tán-í-o (2), a. [Mod. Lat. *titan(ium)*; Eng. adj. suff. -ic.] Pertaining to or derived from titanium.

titanic-acid, s.

1. *Chem.*: H₂TiO₃. A white powder obtained by adding ammonia to titanate chloride. It is soluble in sulphuric, nitric, and hydrochloric acids, and forms with the metals and alkaline earths salts called titanates.

2. *Min.*: The same as RUTILE, OCTAHEDRITE, and BROOKITE.

titanic-chloride, s.

Chem.: TiCl₄. A colourless, transparent, heavy liquid, prepared by passing chlorine over an ignited mixture of titanate oxide and charcoal. Sp. gr. 1.7609 at 0°; boils at 135°, and emits white fumes on exposure to the air.

titanic-iron, s.

Min.: The same as MENACCANITE.

titanic-oxide, s.

Chem.: TiO₂. Occurs native in three different forms, viz., as rutile and anatase, in which it is dimetric, and as brookite, in which it is trimetric. It is insoluble in water and in all acids, except strong sulphuric acid.

tí-tan-í-f'-ér-óus, a. [Eng. *titanium*, and Lat. *fero* = to bear, to produce.]

Min.: Producing or containing titanium.

titaniferous iron-ore, s.

Min.: The same as MENACCANITE (q.v.).

titaniferous iron-sand, s.

Min.: A variety of Menaccanite (q.v.), occurring in small grains, sometimes in extensive deposits, resulting from the degradation of igneous rocks.

tí-tan-í-te, s. [Eng. *titan(ium)*; suff. -ite (Min.); Fr. *títane silico-calcaire*; Ger. *titanit*.]

Min.: A mineral occurring mostly in crystals, rarely massive. Crystallization, monoclinic; hardness, 5 to 5.5; sp. gr. 3.4 to 3.56; lustre, adamantine to resinous; colour, shades of brown, yellow, green, gray, black; streak, white; transparent to opaque; brittle. *Compos.*: a silico-titanate of lime, with the formula (CaO + TiO₂)SiO₃. Dana distinguishes the following varieties: 1. Ordinary: (1) titanite, brown to black; (2) sphene, yellow, and of light colours, and translucent; 2. Manganesian, greenovite; 3. Crystallographic,

depending upon the direction in which the crystal is elongated, and hemimorphic forms. Occurs in granite, gneiss, mica-schist, syenite, &c., also in beds of iron-ore, and sometimes in volcanic rocks. Enormous crystals of the brown variety (Jederite) have been found (1885) at Renfrew, Canada, sometimes weighing as much as 72 lbs.

tī-tan-it'ic, *a* [TITANIUM.]

tī-tā-nī-ūm, *s.* [Gr. *τίτανος* (*titanos*) = lime, gypsum, a white earth, chalk, marble scrapings.]

Chem.: A very rare metallic element, discovered by Gregor in 1789. Symbol Ti; at. wt. 50. It is never found in the metallic state, but may be obtained by heating the double fluoride of potassium and titanium with potassium in a covered crucible, or by mixing titanic oxide with one-sixth of its weight of charcoal and exposing to the strongest heat of an air-furnace. It is a dark-green, heavy, amorphous powder, having under the microscope the colour and lustre of iron. It dissolves in warm hydrochloric acid, with evolution of hydrogen, and, when heated in the air, burns with great splendour. Like tin, it forms two classes of compounds—the titanite, in which it is quadrivalent, and the titanous, in which it is trivalent. The spectroscopic shows that there is titanium in the sun.

☞ Titanium-oxide = *Anatase, Brookite, Rutile.*

titanium-green, *s.*

Chem.: A pigment produced by adding potassium ferrocyanide to titanic chloride. It is recommended as an innocuous substitute for Schweinfurt and other arsenical greens, but is inferior in colour.

tī-tan-ō-(1), *pref.* [Gr. *Τίταν* (*Titan*), genit. *Τιτάνος* (*Titános*) = a Titan.] Of or pertaining to a Titan; hence, huge, monstrous.

tī-tan-ō-(2), *pref.* [TITANIUM.] Containing, derived from, or resembling the metallic element titanium (q.v.).

tī-tan-ō-fēr'-rite, *s.* [*Pref. titano*-(2), and *ferrite*.]

Min.: The same as *MENACCANITE* (q.v.).

tī-tan-ō-morph-ite, *s.* [*Pref. titano*-(2); Gr. *μορφή* (*morphē*) = form, and suff. *-ite* (*Min.*).]

Min.: A white mineral, isomorphous with titanite (q.v.). Results from the alteration of rutile and menaccanite (q.v.), the grains or crystals of which it encloses. An analysis showed: titanic acid, 74.32; lime, 25.27; protoxide of iron, a trace, which corresponds to the formula, $CaTi_2O_5$. Found in the hornblende schists of the Hohe Eule, Lampersdorf, Silesia.

tī-tān-ō-mūs, *s.* [*Pref. titano*-(1), and Gr. *μῦς* (*mūs*) = a mouse.]

Palæont.: A genus of Lagonyiidae, from the French Miocene, differing chiefly from Lagomys in having one molar less in the lower jaw.

tī-tān-ō-phīs, *s.* [*Pref. titano*-(1), and Gr. *ὄφις* (*ophis*) = a snake.]

Palæont.: A synonym of *Dinophis* (q.v.).

tī-tān-ō-sāu'-rūs, *s.* [*Pref. titano*-(1), and Gr. *σαῦρος* (*sauros*) = a lizard.]

Palæont.: A synonym of *Atlantosaurus*, the type-genus of the family *Atlantosauridae* of Marsh's order *Sauropoda* (q.v.). In the family the ischia are directed downwards, with expanded extremities meeting on the median line; anterior caudal vertebrae with lateral cavities. The species of the type-genus are gigantic Dinosaurians, but the least specialized forms of the sub-class, in some respects approaching Mesozoic Crocodylids. *Atlantosaurus montana*, from the Upper Jurassic of Colorado, according to Marsh, "is by far the largest land-animal yet discovered, its dimensions being greater than was supposed possible in an animal that lived and moved upon the land. It was some fifty or sixty feet in length, and, when erect, at least thirty feet in height. It doubtless fed upon the foliage of the mountain forests, portions of which are preserved with its remains."

tī-tān-ō-thēr'-i-ūm, *s.* [*Pref. titano*-(1), and Gr. *θηρίον* (*thērion*) = a wild beast.]

Palæont.: One of the names given to the

remains of a group of animals of gigantic size from the Eocene and Miocene of the New World. The first known fragment was named *Menodus* by Pomel in 1849; more perfect remains have since been described by Ledy as *Titanotherium* and *Megaceros*, by Marsh as *Brontotherium*, and by Cope as *Symborodon*. Prof. Flower (*Encyc. Brit.* (ed. 9th), xv. 428) says that some of these appear to present generic modifications, but the synonymy is much confused. The head was large and much elongated, as in the Rhinoceros, but they had a pair of stout diverging osseous protuberances, like horn-cases, on the maxillaries in front of the orbits. Their molar teeth were of a simple palæotheriid type, and the incisors and canines were very much reduced. Their fore feet had four and their hind feet three short, stout toes.

tī-tan-ōūs, *a.* [Eng. *titanium*]; *-ous*.] Pertaining to titanium.

titanous-chloride, *s.*

Chem.: Ti_2Cl_6 . Produced by the action of hydrogen on titanic chloride. It forms dark violet scales, having a strong lustre, deliquesces in the air at ordinary temperature, and dissolves in water, forming a violet-red solution.

titanous-oxide, *s.*

Chem.: Ti_2O_3 . A black powder obtained by heating titanic oxide in hydrogen. It is almost insoluble in nitric and hydrochloric acids, but dissolves in sulphuric acid, forming a violet-coloured solution.

tī-tan-ūs, *s.* [Lat. = a Titan.]

Entom.: A genus of Prionineæ, with filiform antennæ. *Titanus gigas*, from Cayenne and the Amazons, is frequently eight inches long, exclusive of the antennæ.

tīt-bit', *s.* [IDRAT.] A nice, delicious, or tender morsel.

"John pampered equire South with tittits till he grew wanion."—*Arbuthnot: Hist. John Bull.*

* **tite**, *v. i.* [TIOE, *v.*] For *tideth* = happens.

* **tīt-or**, *v. i.* [O. Icel. *titra*.] To tell tales; to chatter.

* **tīt-er-er**, * **tīt-er-er-a**, *s.* [TITER.] A chattering.

* **tīt-er-ing**, *s.* [TITER.] Courtship.

tith, *a.* [TIOHT.] Tight, nimble, brisk. (*Beaum. & Flot.: Woman's Prize*, iii. 5.)

tith'-a-ble, **tithe'-a-ble**, * **tyth-a-ble**, *a.* [Eng. *tithe*; *-able*.] Subject or liable to the payment of tithes.

"There were farmers in the Vale of Clwyd renting rich pasture land which was only tithable to the extent of 6d. per acre."—*Daily Chronicle*, Sept. 8, 1886.

tithe, * **tethe**, * **tythe**, *s. & a.* [A.S. *tēðtha* = tenth (for *teonþa*); *tēðthing* = a tithing, a tithe, from *teon* = ten (q.v.).]

A. *As substantives*:

1. *Ord. Lang.*: The tenth part of anything; a tenth.

2. *Specif.*: A tenth of the annual produce of one's industry, or of wealth obtained from any source, given voluntarily or exacted by law, for the support of divine worship. Under the patriarchal dispensation, Abraham gave Melchizedek the tenth part of the spoil taken in battle from the Eastern kings (Gen. xiv. 20). Jacob at Bethel vowed to give tithes to Jehovah if he were divinely permitted to return to his father's tent in safety and prosperity (xxvii. 20-22). Tithes for the support of the Levites were an essential part of the Mosaic economy (Lev. xxvii. 30-33); they, on their part, were to pay tithes for the support of the High Priest (Num. xviii. 21-28). It is probable that, in the Christian Church, tithes were first paid in imitation of the arrangements under the Jewish dispensation. Such tithes are first mentioned in a decree made in a synod held A.D. 786, wherein this payment in general is strongly enjoined. The next authentic mention of them is about the year 900, in the Anglo-Saxon laws, where this payment is not only enjoined, but a penalty added upon non-observance; and this law is seconded by the laws of Athelstan, about the year 930. Upon their first introduction, every man might give them to what priest he pleased, or might pay them into the hands of the bishop, for distribution by him. But, when

dioceses were divided into parishes, the tithes of each were allotted to its own particular minister; first by common consent, or the appointments of lords of manors, and afterwards by the written law of the land. The first step towards this result was taken by Innocent III., about 1200, who, in an epistle to the Archbishop of Canterbury, dated from the palace of the Lateran, enjoined the payment of tithes to the persons of the respective parishes where every man inhabited. "This epistle," says Sir Edward Coke, "bound not the lay subjects of this realm; but, being reasonable and just, it was allowed of, and so became *lex terræ*." Tithes in England are of three sorts, personal, predial, and mixed. [See *extract*.] They are also divided into great and small tithes. Great tithes consist of all species of corn and grain, hay and wood. Small tithes consist of predial tithes of other kinds, together with mixed and personal tithes. Great tithes belong to the rector, and are hence called *parsonage tithes*; small tithes belong to the vicar, and are hence called *vicarage tithes*. Tithes have to a large extent been commuted into rent-charges, which are payable half-yearly, and are recoverable by distress and sale, like ordinary rents. Tithes are due either *de jure* or by custom; to the latter class belong all personal tithes. Exemption from tithes may be by composition, a *modus decimandi*, prescription, or Act of Parliament. A *modus decimandi* (commonly called simply a *modus*) was where there was by custom a particular manner of tithing allowed different from the general law of taking tithes in kind, such as a pecuniary compensation, as twopence an acre, or a compensation in work and labour, as that the parson should have only the twelfth cock of hay, and not the tenth, in consideration of the owner's making it for him. A prescription *de non decimando* was a claim to be entirely discharged of tithes, and to pay no compensation in lieu of them, whence have sprung all the laws which, being in lay hands, do at present claim to be tithe-free. The institution of the tithe belongs to countries to which church and state are united, or which have a recognized national religion. It does not exist in the United States, in which every faith is equally under the support of the law and none are possessed of special privileges, and in which the question of religion has been left out of the Constitution. Tithes have been collected by the Mormons for the support of their Church, and the building of the Temple in Salt Lake City.

3. A very small part in proportion.

"The tithes of a hair was never lost in my house before."—*Shakspeare: 1 Henry IV.*, iii. 2.

* **B.** *As adj.*: Tenth.

"Every tithe soul 'mongst many thousand dimes."—*Shakspeare: Troilus & Cressida*, ii. 2.

☞ *Commutation of tithes*: The conversion of tithes into a rent-charge payable in money and chargeable on the land.

tithe-commissioner, *s.* One of a board of commissioners appointed by Government for arranging propositions for commuting or compounding tithes.

tithe-free, *a.* Exempt from the payment of tithes.

tithe-gatherer, *s.* One who collects tithes.

* **tithe-pig**, *s.* One pig out of ten given to the priest as a church-rate.

"And sometimes comes she with a tithe-pig's tail, Ticking a parson's nose as 'tis a tale."—*Shakspeare: Romeo & Juliet*, I. 4.

* **tithe-proctor**, *s.* A levier or collector of tithes or church-rates, formerly employed by the clergy of the Established Church in Ireland to assess and collect the tithes on farmers' and cottagers' crops.

* **tithe**, * **tythe**, *v. t. & i.* [A.S. *tēðthian*.] [TITHES, *s.*]

A. *Transitive*:

1. To exact tithes from; to levy a tenth part on.

"Ye tithe mint and rue and all manner of herbs."—*Luke* xl. 42.

2. To pay tithes on; to pay the tenth part of.

"Military spoil, and the prey gotten in war, is also tithable, for Abraham tithed it to Melchizedek."—*Speelman: Of Tythes*, ch. xvi.

B. *Intrans.*: To pay tithes.

"For lambs, pig, and calf, and for other the like. Tithe so as thy cattle the lord do not strike."—*Tusser: Husbandry*.

fāte, **fāt**, **fāre**, amidst, what, fall, father; **wē**, **wēt**, here, camel, hēr, thero; pine, pīt, siro, sir, marine; **gō**, **pōt**, or, wōre, wōif, wōrk, whō, sōn; **mūta**, **oūh**, **oūre**, unite, cūr, rūle, fūll; **trȳ**, Syrian. **æ**, **œ** = **ē**; **ey** = **ā**; **qu** = **kw**.

*tithē-lēssa, a. [Eng. *tithe*, s.; *-less*.] The same as TITHED-FREE (q.v.).

tith-ēr, pron. [See def.] The other. (Scotch.)

tith-ēr, s. [Eng. *tith(e)*; *-er*.] One who collects tithes.

"Thus far tithers themselves have contributed to their own confusion."—*Milton: Libelists Means to Remove Heralds*.

tith-ing, *teth-ing, s. & a. [A.S. *tithung*.] [TITHES, s.]

A. As substantive:

*1. A tithe, a tenth.

"Ther tithing and ther offering bothe Thy cleimth by possession."—*Chaucer (D): Plowman's Tale*.

†2. The act of taking or levying tithes.

"When I come to the tithing of them, I will tith them one with another, and will make an Irishman the tithing man."—*Spenser: State of Ireland*.

3. A decennary; a number or company of ten householders, who, dwelling near each other, were sureties or free pledges to the king for the good behaviour of each other. The institution has long ceased, but the name and division are still retained in many parts of England.

"The civil division of the territory of England is into counties, of those counties into hundreds, of those hundreds into tithings or towns."—*Blackstone: Comment*, bk. II, ch. 3

B. As adj.: Pertaining or relating to the payment or levying of tithes.

"In this very year 1886 an elaborate tithing system prevails throughout the territory of Utah."—*Daily Telegraph*, Aug. 27, 1884.

tithing-man, s.

*1. Eng. Law: The chief man of a tithing; the person who presided over the tithing; a head-borough.

"The tithing-men of the neighbouring parishes were busied in setting up gibbets and providing chains."—*Macculay: Hist. Eng.*, ch. v.

2. A peace-officer; an under-constable.

3. A town or church officer formerly elected each year in New England, to preserve good order in the church during divine service, and to make complaint of any disorderly conduct.

tithing-house, s. A house or building in which tithes paid in kind are stored.

*tithing-penny, s.

Eng. Law: A small sum paid to the sheriff by each tithing, &c., for the charge of keeping courts.

tithing-time, s. The time of paying or exacting tithes.

"But oh! it cuts him like a sith, Whoe tithing-time comes near."—*Cowper: Yearly Distress*.

*tith-ing, *tyth-ing, s. [TIDINGS, s.] Tidings.

"Of England and of Flanders brought men him tithing, How Kyrag Harald chased his moder of lond."—*Robert de Brunne*, p. 53.

*tith-ly, adv. [Eng. *tith*; *-ly*.] Tightly, nimbly, briskly.

ti-thō-nī-a, s. [Named by Desfontaines from the colour of its flower, which resembles Aurora (the Morning, Dawn), whose husband was Tithonus.]

Bot.: A genus of Coreopidae. *Thionia tagetiflora* is the Marigold flower, introduced into English gardens from Vera Cruz in 1818, and since cultivated for its beauty.

Ti-thō-nī-an, a. [TITHONIA.]

Geol.: A term applied to an extensive series of rocks in the west of France, the Alps, the Carpathians, Northern Italy, and the Apennines, filling the gap between the Neocomian and the Oolite. Prof. Judd thinks that it may have been of the same age as part of the Wealden. The geologists of France assign it to the lower part of the Cretaceous system, those of Austria to the Upper Jurassic. It is without any marine equivalent in Britain.

ti-thōn-īc, a. [From Gr. *Tithonōs* (*Tithōnos*) the consort of Aurora.] Pertaining to or denoting those rays of light which produce chemical effects; actinic.

ti-thōn-īq-ī-tŷ, s. [Eng. *tithonic*; *-ity*.] A term applied to that property of light by which it produces chemical effects; now termed actinism (q.v.).

ti-thō-nōm-ē-tēr, s. [Eng. *tithonic*], and *meter*.] An instrument for noting the tithonic or chemical effect of the rays of light.

ti-thōn-ō-tŷpe, s. [Eng. *tithon*(ic), and *type*.]

Photog.: A process in which a cast is obtained from an original phototype-plate.

tith-ŷ-mall, s. [Lat. *tithymalus*; Gr. *τιθύμαλος* (*tithumalos*), *τιθύμαλλος* (*tithumallos*) = a spurge.]

Bot.: Spurge; the genus *Euphorbia* (q.v.).

Ti-tian-ēsque' (qŷe as k), a. Resembling the style of the great Venetian painter and colorist, Titian (1477-1576).

tit-il-lāte, v.t. & f. [Lat. *titillatus*, pa. par. of *titillo* = to tickle.]

A. Intrans.: To tickle; to cause a tickling sensation.

"The gnones direct, to every atom just. The pungent grains of tickling dust."—*Pepp: Raps of the Lock*, v. 64.

B. Transitive:

1. Lit.: To tickle.

"The landlady, assisted by a chambermaid, proceeded to vinegar the forehead, beat the hands, *titillate* the nose, and unlase the stays of the spinster aunt, and to administer such other restoratives as are usually applied by compassionate females to ladies who are endeavouring to ferment themselves into hysteria."—*Dickens: Pickwick*, ch. x.

2. Fig.: To excite.

"It is foolish . . . to *titillate* to oneself the shire of superstition."—*Matthew Arnold: Last Essays*, p. 7.

*tit-il-lā-tion, s. [Fr., from Lat. *titillationem*, accus. of *titillatio*, from *titillatus*, pa. par. of *titillo* = to tickle.]

1. The act of tickling.

"Tickling also ceaseth laughter; the cause may be the emission of the spirits, and so of the breath, by a sight from *titillation*."—*Bacon: Nat. Hist.*, § 784.

2. The state of being tickled; a tickling sensation.

"A nerve moderately stretched yields a pleasing *titillation*, when almost ready to break it gives anguish."—*Search: Light of Nature*, vol. II, pt. II, ch. xxii.

3. Any slight pleasure; the state of being tickled or pleased.

"No need for that sort of stimulus which wastes itself in mere *titillation*."—*Blackie: Self-culture*, p. 68.

*tit-il-lā-tive, a. [Eng. *titillat(e)*; *-ive*.] Tending or having the power to titillate or tickle.

"I must not here omit one publick tickler of great emulency, and whose *titillative* faculty must be allowed to be singly confined to the ear; I mean the great Signior Farinelli."—*Chesterfield: Fop's Journal*, No. 371.

tit-i-vāte, tit-ti-vāte, v.t. [Ety. doubtful.] To make tidy or spruce; to dress up; to set in order. (Collog.)

tit-lark, s. [Eng. *tit*, and *lark*. The Editor of Yarrell's *British Birds* (ed. 4th, i. 333, note) suggests that the first syllable of this word and of *titmouse* is possibly cognate with Gr. *τίτις* (*titis*) = a small chirping bird.]

Ornith.: A popular name for any species of the genus *Anthus*; spec., *Anthus pratensis*, the Meadow-pipit, the smallest and commonest species of the genus, found in the British islands throughout the year. It is about six inches long; dark olive-brown, with a wash of green on the upper parts; wings very dark brown, sprinkled with white; tail brown; under-surface brownish-white, with pale rusted tinge on the breast of the male. In the autumn the olive-green on the back becomes more conspicuous, and the under-surface is tinged with yellow. The note is rather a plaintive "cheep" than a true song. It nests on the ground, usually in a tuft of grass, and lays four to six dark-brown eggs, freely speckled with reddish brown.

ti-tle, *ty-tle, s. [O. Fr. *titule*; Fr. *titre*, from Lat. *titulum*, accus. of *titulus* = a superscription on a tomb, altar, &c.; a title of honour; Sp. & Port. *título*; Ital. *titolo*.]

I. Ordinary Language:

*1. An inscription or superscription set over or on anything.

"And Pilat wroote a *titule* and sette on the cross, and it was written Jesus of Nazareth king of Jewis."—*Wycliffe: John* xix.

*2. An inscription put over anything as a name by which it is known or distinguished.

"Tell me once more what *titule* thou [a casket] dost bear."—*Shakespeare: Merchant of Venice*, II, 9.

3. An appellation; a name.

"The ranking of things into species, which is nothing but sorting them under several *titules*, is done by us according to the ideas that we have of them."—*Locke: Human Understanding*, bk. III, ch. vi.

4. An appellation of dignity, distinction, or preëminence given to persons: as, *titles of*

honour, which are words or phrases belonging to certain persons as their right in consequence of certain dignities being inherent in them or conferred upon them, as President, Emperor, King, Czar, &c. The five orders of nobility in England are distinguished by the titles of Duke, Marquis, Earl, Viscount, and Baron. [See these words.] The dignity of Baronet is distinguished by that word placed after the name and surname of the holder of the dignity, and also by the title of Sir prefixed to the name. This title, like that of the peers, is hereditary. The dignity of knighthood, which is not hereditary, is distinguished by the title of Sir prefixed to the name and surname of the holder. Ecclesiastical dignities carry with them the right to certain titles of honour, besides the phrases by which the dignities themselves are designated: thus, an archbishop is styled His Grace the Lord Archbishop of —; a bishop, The Right Reverend the Lord Bishop of —. All persons admitted to the clerical order are entitled to the title of Reverend. Members of the Privy Council are entitled to be styled Right Honourable. In the United States the legally recognized titles are much fewer than in the nations of Europe, there being here no titles of nobility. In American churches an archbishop is entitled Most Reverend, a bishop Right Reverend, and the clergy in general Reverend, much as abroad, but the titles of municipal officials and members of legislative bodies are confined to the simple term Honourable, the "Right Honourable" of certain British officials not having been imported here.

"To me what is *title*!—the phantom of power; To me what is fashion!—I seek but renown."—*Byron: To the Rev. J. F. Boehm*.

*5. A claim, a right.

"Make claim and *title* to the crown of France."—*Shakespeare: Henry V.*, I, 1.

*6. Property; possession, as founding a right.

"To guard a *title* that was rich before."—*Shakespeare: King John*, IV, 2.

7. The inscription in the beginning of a book, containing the subject of the work, and usually the names of the author and publisher, date, &c.; a title-page.

8. A particular section or division of a subject, as of a law, a book, or the like; especially, a section or chapter of a law-book. (*Bouvier*.)

II. Technically:

I. Ecclesiol. & Church Hist.:

(1) A condition precedent to, or a claim in favour of, ordination, such as a sphere of parochial or other spiritual work, always required by a bishop, except in certain specified cases, which are specified in Canon 3. of the Anglican Church. In the Roman Church the title formerly required from every ordinand was that of a benefice (*titulus beneficii*)—i.e., he was bound to show that he had been nominated to a benefice whose revenues were sufficient for his decent maintenance. The Council of Trent (1545-1563) added two other titles (1) of patrimony (*titulus patrimonii*), where the ordinand had sufficient private property to maintain him respectably, and (2) of pensio (*titulus pensionis*), where some solvent person or persons bound themselves to provide for the cleric about to be ordained. The vow of evangelical poverty (*titulus pauperitatis*) in a religious order is a valid title; and the students of Propaganda and certain other Colleges, and candidates for holy orders in missionary countries, have a title from the mission for which they are ordained or the seminary in which they were educated (*titulus missionis vel seminarii*). The acceptance of this last title imposes on the bishop the responsibility of providing for the support of the ordained, should he become incapable of discharging his functions.

(2) A titular church (q.v.), or the district or parish assigned to it.

"Fifty (cardinals) described as priests, holding a corresponding number of *titules* or parishes in Rome."—*Adair & Arnold: Cath. Dict.*, p. 119.

2. Law:

(1) Property or right of ownership, or the sources of such right, or the facts and events which are the means whereby property is acquired; a party's right to the enjoyment of lands or goods, or the means whereby such right has accrued, and by which it is evidenced.

"No title was considered as more perfect than that of the Russells to Woburn, given by Henry the Eighth to the first Earl of Bedford."—*Macculay: Hist. Eng.*, ch. xxiii.

dōl, bōy; pōut, jōwl; cat, çell, çorus, çin, bench; go, gem; thin, çhis; sin, aç; expect, Xenophon, exist. -iŷg. -clan, -clan = çlan. -tion, -sion = çhün; -çion, -çion = çhün. -çious, -çious, -çious = çhiis. -ble, -dle, &c. = çel, çel.

(2) The instrument or instruments which are evidence of a right.

(B) A heading or indorsement: as, the *title* of an Act of Parliament.

¶ 1. *Bastard-title*: [BASTARD, B. II. 2. (α)].

2. *Half-title*:

Printing:

(1) The short title generally occupying the top part of the first page of text in a book.

(2) A bastard-title.

3. *Passive-title*: [PASSIVE].

4. *Running-title*:

Print.: The title at the head of a page, and consisting of the name of the book or the subject of the page.

title-deed, s.

Law: An instrument evidencing a man's right or title to property.

* **title-leaf, s.** A title-page (q.v.).

"Yes, this man's brow, like to a *title-leaf*,"

Foretells the nature of a tragic volume."

Shakespeare: Henry IV., 1. 1.

title-page, s. The page of a book which contains the title. [TITLE, s., 1. 7.]

"The book of all the world that charn'd me meet
Was,—well-a-day, the *title-page* was lost."

Cowper: Hope, 423.

title-rôle, s.

Theat.: The character or part in a play which gives its name to the play: as that of *Hamlet* in the play of that name.

* **title-scroll, s.** A scroll showing titles, as of a nobleman or great family.

tī-tle, v.t. [TITLE, s.]

1. To entitle, to name.

"That sober race of men, whose lives
Religious *titled* them the sons of God."

Milton: P. L., l. 823.

* 2. To set down by name.

"Inasmuch that some of the self same commis-
sioners found of their own wives, *titled* among the
rest."—*Strype: Eccles. Mem. (1536).*

tī-tled (le as el), a. [Eng. *titl(e)*, a.; *ed.*] Having or bearing a title, especially one of nobility.

"The poorest tenant of the Libyan wild,
Whose life is pure, whose thoughts are undefil'd,
In *titled* ranks may claim the first degree."

Pope: Menaides; Fragments.

tī-tle-lēss, *tī-tel-es, a. [Eng. *titl(e), a.*; *less.*] Having no title or name.

"He was a kind of nothing, *tītless*,
Till he had for'd himself a name 'th' fire
Of burning Rome."—*Shakespeare: Coriolanus, v. 1.*

tīt-tēr, s. [Etym. doubtful.] A large truncated cone of refined sugar.

tīt-tīng, s. [Eng. *tīt*; dim. suff. *-tīng*.]

1. *Comm.*: A name formerly given in the custom-house to stockfish. (*Simmonds*.)

2. *Ornith.*: *Anthus pratensis*, called also the Meadow-titling or Meadow-pipit. [TITLARK.]

"Among the local names of the present species, *Titling*, *Moss-cheeper*, *Lug-bird*, *Teetick*, may be mentioned."—*Farrell: British Birds (ed. 4th), 1. 375.* (Note.)

tīt-mōuse (pl. tīt-mīce), *tīt-ty-mōuse, s. [Eng. *tīt*, and A.S. *māse* = a titmouse; Dut. *mees*; Ger. *meise*.] (See extract.)

Ornith.: A popular name for any individual of the sub-family Paridae (q.v.). They are remarkable for the boldly defined colour of their plumage and their quick, irregular movements, running rapidly along branches in quest of insects, and often clinging thereto with their back downwards. They feed not only on insects, but on grain and seeds, and not unfrequently kill young and sickly birds with strokes of their stout, strong bill. They are very pugnacious, and the hens show great courage in defence of their nests. The young are fed chiefly on caterpillars, and a pair of Blue Tits have been observed to carry a caterpillar to their nest, on an average, every two minutes, during the greater part of the day, so that these birds must be extremely serviceable in preventing the increase of noxious insects. The species are found in both the United States and Europe. *Parus atricapillus*, the Chickadee or Black-cap Tit, is very common in the United States, while *P. bicolor*, the Tufted Tit, is the largest American species. Of European species the Blue Tit (*P. ceruleus*) is very common, and is the most pert and fearless of all British birds. It is generally known as the Tomtit. Another common species is *P. ater*, the Coal Titmouse, so named from its black

head and neck. The Penduline Tit (*Aegithalus pendulinus*) builds a flask-shaped nest, suspended, like that of the Oriole, from a twig or branch. *P. major*, the Great Tit, is the largest European species.

"It may be . . . doubted whether the plural of *Titmouse* should be *Titmice*, as custom has it, but the Editor has not the courage to use *Titmouses*, though he believes he has heard East Anglians say *Tit-mouses*."—*Farrell: British Birds (ed. 4th), 1. 490* (Note.)

tīt-trāte, v.t. [Fr. *titre* = standard of fineness.]

Chem.: To submit to the action or process of titration (q.v.).

tīt-trā-tion, s. [TITRATE.]

Chem.: The process of estimating the amount of an element or compound contained in a solution, by the addition to it of a known quantity of another chemical capable of reacting upon it. The end of the process is determined by the complete precipitation of the compound, or by the discharge and production of some definite colour in the mixed solutions. [ANALYSIS, II.]

tīt-tēr, v.i. [OF imitative origin.] To laugh with restraint; to laugh with the tongue striking against the roof of the mouth.

"Thine Sal, with tears in either eye;
While victor Ned sat *tittering* by."

Shenstone: To a Friend.

tīt-tēr (1), s. [TITTER, v.] A restrained laugh.

"The half-suppressed *titter* of two very young persons in a corner was responded to by a general laugh."

titular-bishop, s.

Eccles. & Church Hist.: (See extract.)

"The political condition of the eastern and southern shores of the Mediterranean has for some time been such as to allow of the existence of flourishing Christian communities in many places where formerly Musliman bigotry would have rendered it impossible. These countries are no longer 'partes infidelium' in the full sense of the words. His Holiness Leo XIII. has therefore, by a recent decision, substituted the phrase *Titular Bishop* for Bishop in *Partibus Infidelium*."—*Addis & Arnold: Cath. Dict., p. 797.*

titular-church, s.

Eccles.: A name given to the parish-churches of Rome, as distinct from the patriarchal churches, which belonged to the Pope, and from the oratories. Each titular church was under a cardinal priest, had a district assigned to it, and a font for baptism in case of necessity.

* **tīt-tū-lār-l-ty, s.** [Eng. *titular*; *-ity*.] The quality or state of being titular.

TÍ-títis, s. [Lat., a common Roman praenomen, the most distinguished of those who bore it being the Emperor Titus; Gr. Τίτος (Títos).]

Script. Biog.: A companion of St. Paul, though not mentioned in the Acts of the Apostles. He seems to have been converted by the apostle (Tit. i. 4), probably at Antioch A.D. 50 or 51, and in the same year accompanied him to Jerusalem, and was present at that first council which recognized Gentile converts as part of the Church, and exempted them from the burden of the Mosaic ritual (cf. Acts xv. 1-35 with Gal. ii. 1-3). Paul soon afterwards practically carried out the liberty thus accorded by refusing to require Titus, who by birth was a Greek, to be circumcised (Gal. ii. 3-5). Titus was subsequently with Paul at Ephesus (A.D. 56), whence the former was sent on a special mission to the Corinthians, perhaps carrying with him Paul's second epistle to that Church (2 Cor. viii. 6, 22, 23, xii. 18). When Titus returned (A.D. 57) he found the Apostle in Macedonia (2 Cor. vii. 5-6, 13-15). Subsequently (probably A.D. 65 or 66) he was left in Crete to arrange the affairs of the Church and "ordain elders in every city" (Tit. i. 5). Returning thence to Rome he was dispatched by Paul (A.D. 66 or 67) to Dalmatia (2 Tim. iv. 10). According to tradition Titus returned to his work in Crete, and died a natural death at an advanced age.

¶ The Epistle of Paul to Titus :

New Testament Canon: The third of St. Paul's pastoral epistles. It was written to give Titus directions respecting the organization of the Cretan Church. After an introduction (i. 1-5), the Apostle lays down the qualifications of a scriptural bishop (6-9), gives a warning against Judaizers and other false teachers (1, 10-16), affords directions as to the special duties of aged men and women, young men and women, servants (slaves) (ii. 1-15) and subjects (iii. 1), and on social duties (iii. 2), the whole interspersed with evangelical doctrine and precept (ii. 7-8, 11-15; iii. 3-9). He concludes by instructing Titus how to deal with heretics, and asking him to come to Nicopolis (in Epirus?), where he (Paul) hopes to winter, and sends salutations (10-15). There is a considerable resemblance between some passages in Titus and others in the Epistles to Timothy. The external evidence in favour of the Epistle to Titus is somewhat stronger than for those to Timothy. The three together are called the Pastoral Epistles.

TÍ-tír-ě tít, s. [See def.] From the first line of the first Eclogue of Virgil :

"Tityrus, tu patulae recubans sub tegmine fagi."

A slang term in the time of Charles II., equivalent to Hector, Mohawk, and similar ruffians, whose practice was to scour the streets of London and create disturbances at night.

"I knew the Hectors, and before them, the Muns, and the Tityrus tus; they were brave fellows indeed. In those days a man could not get from the Rose Garden to the Piazza once but he must venture his life twice, my dear Sir Willie."—*Shadwell's The Scourers*.

tí-vér, s. [A.S. *teáfor* = a reddish tint or colour.] A kind of ochre used in some parts of England for marking sheep.

tí-vér, v.t. [TIVER, s.] To mark with tiver, as sheep, for different purposes.

tí-vý, adv. [A contract. of *tantivy* (q.v.)] With great speed. (A huntsman's word.) "In a bright moonshine while winds whistle loud, Tivy, tivy, tivy, we noont and we fly."—*Dryden's Tyrannick Love*, iv. 1.

tíz-rí, s. [TISAR.]

tíz-zéý, tíz-zý, s. [A corrupt. of *tester* (q.v.)] A sixpence. (Slang.)

"Will show you all that is worth seeing . . . for a Hay."—*Lyton's The Coxtons*, bk. v, ch. 1.

T-jóint, s. [See def.] The union of one pipe or plate rectangularly with another, resembling the letter T.

tmě-sis, s. [Gr., from *τέμνω* (temnō) = to cut.]

Gram. : A figure by which a compound word is separated into two parts, and one or more

words inserted between the parts; as, "Of whom be thou ware also" (2 Tim. iv. 15), for "Of whom beware thou also." It frequently occurs in poetry with *whosoever* and *whosoever*, &c.

"We can create and in what place so'er, Thrive under evil."—*Milton's P. L.*, l. 290.

tmě-sí-stěr-ní, s. pl. [Lat., from Gr. *τμήσις* (tmēsis) = a cutting, and *στερνόν* (sternon) = the breast.]

Entom. : A group of Australian Beetles, sub-family Laminae. They have oblique foreheads like the Cerambycine.

tō, prep. & adv. [A.S. to (prep.); cogn. with Dut. *toe*; O. H. Ger. *za, ze, zi, zuo*; M. H. Ger. *zuo, ze*; Ger. *zu*; Goth. *du*; Russ. *do*. Cf. also O. Irish *do* = to; O. Welsh *di*. The A.S. *to* was also used as the sign of the gerund, as distinct from the infinitive mood. It is now the distinctive sign of the infinitiva mood, the gerundial use being lost. *To* and *too* are doublets.]

A. As preposition :

1. Used to denote motion towards a place, person, or thing; to indicate direction towards a place, person, thing, goal, state, or condition. It is generally interchangeable with *unto* or *towards*, but frequently expresses more than the latter, in that it may denote arrival at the place or end stated.

"To her straight goes he."—*Shakespeare's Venus and Adonis*, 264.

2. Used to denote motion towards a work to be done or a question to be treated.

"So! to your pleasures."—*Shakespeare's As You Like It*, v. 4.

3. Used to indicate a point or limit reached in space, time, or degree; as far as; no less than; excluding all omission or exception. (Frequently preceded by *up*.)

"Skipped from sixty years to sixty."—*Shakespeare's Cymbeline*, iv. 2.

4. Used to indicate anything capable of being regarded as a limit to movement or action; denoting destination, aim, design, purpose, or end; for.

"Wherefore was I to this keen mockery born?"—*Shakespeare's Midsummer Night's Dream*, ii. 2.

5. Used to indicate a result or effect produced; denoting an end, result, or consequence.

"I shall laugh myself to death."—*Shakespeare's Tempest*, ii. 2.

6. Used to denote direction, tendency, and application; towards.

"My zeal to Valentine is cold."—*Shakespeare's Two Gentlemen of Verona*, ii. 4.

7. Used to denote addition; accumulation.

"Seek happy nights to happy days."—*Shakespeare's Romeo and Juliet*, i. 2.

8. Used to denote junction or union.

"She bound him to her breast."—*Shakespeare's Venus and Adonis*, 812.

9. Used to denote comparison, proportion, or measure; in comparison of; as compared with.

"I to the world am like a drop of water."—*Shakespeare's Comedy of Errors*, i. 2.

10. Hence used in expressing ratios or proportions; as, Three is to six as four is to eight. (Expressed in symbols, 3 : 6 :: 4 : 8.)

11. Used to denote opposition or contrast generally.

"Face to face, and frowning brow to brow."—*Shakespeare's Richard III.*, i. 1.

¶ Here may be classed such phrases as *To one's face*, *To his teeth* in presence and defiance of.

"Weep'st thou for him to my face?"—*Othello*, v. 2.

12. Hence its use in betting phrases.

"My dukedom to a beggarly denier."—*Richard III.*, i. 2.

13. In proportion to; according to; up to. "The Oreeks are strong and skilful to their strength."—*Shakespeare's Troilus and Cressida*, i. 1.

* 14. Used to denote accord, adaptation, or agreement; in congruity or harmony with.

"This is right to that [saying] of Horace."—*Ben Jonson's Every Man out of his Humour*, ii. 1.

15. Used to denote correspondency, simultaneity, or accompaniment.

"She dances to her lays."—*Shakespeare's Pericles*, v. (ProL)

16. In the place of; as a substitute for; in the character, position, or quality of; as.

"Tunis was never graced before with such a paragon to their queen."—*Shakespeare's Tempest*, ii. 1.

17. Used to denote relation; concerning; as to.

"Few words, but, to effect, more than all yet."—*Shakespeare's Lear*, iii. 1.

* 18. It is sometimes used without any sense of motion for near; by.

"It would unloag my heart Of what lies heavy to it."—*Shakespeare's Coriolanus*, iv. 2.

19. It is used in a variety of cases to supply the place of the dative in other languages, connecting transitive verbs with their indirect or distant objects, and adjectives, nouns, and neuter or passive verbs with a following noun which limits their action; as, What is that to me? To drink a health to a person.

"Meditate upon these things: give thyself wholly to them."—1 Tim. iv. 16.

20. After adjectives it denotes the person or thing with respect to which, or on whose interest a quality is shown or perceived.

"Invisible to every eye-ball."—*Tempest*, i. 2.

21. After substantives it denotes the state of being appertinent; of. [See extract under Throat, s., l. 2. (1).]

22. As regards, towards; especially after adjectives expressing obedience, disobedience, or the like.

"If thou dost find him tractable to us."—*Shakespeare's Richard III.*, iii. 1.

23. A common vulgarism in America for at or in (a place).

24. Used as the sign of the infinitive mood, or governing the gerundial infinitive or gerund. In the English of the First Period to was only used before the dative or gerundial infinitive; in the beginning of the thirteenth century it began to be used before the ordinary infinitive. The simple infinitive with to appears in such sentences as, Tell him to go. To is generally omitted before the infinitive, after the auxiliary verbs *do, can, may, must, will, shall* (with their past tenses), as well as after such verbs as *bid, dare, need, make, see, hear, feel, let, observe, behold, have* (as in, I would have you know), and *know*. For to was commonly used before the gerundial infinitive to denote purpose or design; as, "What went ye out for to see?" (Matt. xi. 9); but it is now only used by the vulgar. To with the gerundial infinitive often comes (1) after an adjectival; as, as quick to hear, slow to speak; (2) after the substantive verb to denote futurity; (3) after *have*, denoting necessity or duty; as, I have to go. To is also employed with the infinitive as a verbal noun in such a sentence as: To see is to believe = Seeing is believing. To was often omitted before the infinitive where we should now use it:

"How long within this wood intend you stay?"—*Shakespeare's Midsummer Night's Dream*, ii. 1.

i. e., to stay. It was also inserted where we should now omit it.

"They would not have you to stir forth."—*Shakespeare's Julius Caesar*, ii. 2.

It is now often used in colloquial language without an infinitive to supply the place of an infinitive already mentioned; as, He bade me go with him, but I did not wish to.

B. As adverb :

* 1. Forward, onward, on.

"To Achilles, to Ajax, to!"—*Shakespeare's Troilus and Cressida*, ii. 1.

2. Used to denote motion towards a thing for the purpose of laying hold of it; particularly applied to food.

"I will stand to and feed."—*Shakespeare's Tempest*, iii. 2.

3. Used to denote junction, union, or the closing of something open or separated.

"Clap to the doors."—*Shakespeare's Henry IV.*, ii. 4.

* 4. Used to denote an aim proposed in doing something.

5. In a certain direction or place; as, To heave to.

¶ For the meanings of such phrases as *To boot, to come to, go to, &c.*, see the main words.

¶ 1. To and again: To and fro.

(2) To and fro:

(1) As adv.: Forward and backward; up and down.

(2) As substantive:

(a) The bandying of a question backward and forward; discussion.

toad, tade, *tode, *toode, s. [A.S. *tādige*, *tādīe*, a word of unknown origin.] [TADPOLE.]

Zool.: The popular name of any species of the family Bufonidae (q.v.), which is almost universally distributed, but is rare in the Australian region, one species being found in Celebes and one in Australia. Two species are British: the Common Toad (*Bufo vulgaris*) and the Natterjack (q.v.) (*B. calamita*), and another species (*B. variabilis*) is found on the Continent. The first is the type of the family. The body is swollen and heavy-looking, covered with a warty skin, head large, flat,

and toothless, with a rounded, blunt muzzle. There is a swelling above the eyes covered with pores, and the parotids are large, thick, and prominent, and secrete an acrid fluid, which probably gave rise to the popular stories about the venom of the toad, or they may owe their origin to the fact that when handled or irritated these animals can eject a watery fluid from the vent. But neither the secretion from the parotids nor the ejected fluid is harmful to man, and there is little doubt but that its effects on the lower animals have been much exaggerated. The toad has four fingers and five partially-webbed toes. The general colour above is a brownish-gray, the tubercles more or less brown; under surface yellowish white, sometimes spotted with black. Toads are terrestrial, hiding in damp, dark places during the day, and crawling with the head near the ground, for their short limbs are badly adapted for leaping. They are extremely tenacious of life, and can exist a long time without food; their hibernation in mud, cracks, and holes has probably given rise to the stories of their being found in places where they must have existed for centuries without food and air. These stories, however, have no foundation in fact, for Dr. Buckland proved, by direct experiment, that no toad can live for two years if deprived of food and air. [PIPA, SCURINAM-TOAD.]

† Toads, like other Batrachians, are absent from most oceanic islands, the reason being that their spawn is immediately destroyed by immersion in salt water. (Darwin: *Orig. of Species*.)

† **Toad in the hole**: A dish composed of meat baked in batter.

"The dish they call *toad in a hole* . . . putting a noble sirloin of beef into a poor, paltry batter-pudding."—Mac. *Barley*: *Diary*, vi. 153.

toad-bag, s. (See extract.)
"A conjuror or 'white-wizard,' who cured afflicted persons by means of the *toad-bag*—a small piece of linen having a limb from a living toad sewn up inside, to be worn round the sufferer's neck and next his skin, the twitching movements of which limb gave, so it was said, a turn to the blood of the wearer, and effected a radical change in his constitution."—*Athenaeum*, Oct. 16, 1866, p. 502.

toad-eater, s. A term applied to a leeching, obsequious parasite; a mean sycophant. (Now shortened to *toady*.)

"A corrupted court formed of miscreant *toad-eaters*."
—Scott: *Spirit of Despotism*, l. 20.

† The original meaning is one who is willing to do any dirty or disgusting act to please a superior, as the sight of a toad is most disgusting. The French equivalent is *aruler des couleurs*, lit. = to swallow adders, hence, to put up with mortifications.

toad-eating, a. & s.
A. *As adj.*: Pertaining to a toad-eater or his practices; servilely or meanly sycophantic.
B. *As subst.*: Servile or mean sycophancy; toadyism.

toad-fish, s.
Ichthy.: A popular American name for any fish of the genus *Batrachus*, from the large head, wide gape, and generally repulsive appearance of the species. The Common Toad-fish (*Batrachus taw*) is from eight inches to a foot long, light brown marbled with black. The Grunting Toad-fish (*B. grunniens*), about the same size, is brownish above, with darker markings, white below, fins white with brown bands. There are about twelve species from tropical and sub-tropical seas.

toad-flax, s.
Bot.: The genus *Litharia*, a genus of plants very closely allied to Snap-dragon, from which it is distinguished chiefly by the spur at the base of the corolla, and the capsule opening by valves or teeth, not by pores. The species are herbaceous perennials or annuals, chiefly natives of the northern portion of the Eastern Hemisphere, there being about 150 species in all. Among these the commonest European species is *L. vulgaris*, the Yellow Toad-flax, a species from one to three feet high, bearing terminal spikes of yellow flowers. It has been introduced into the United States. It has medicinal properties, but is generally looked upon as a troublesome weed.

"By *toad-flax* which your nose may taste,
If you have a mind to cast it."
Drayton: *Muses Elysium*, Nymph. 2.

† Prior thinks that it obtained the name *Toad-flax* because the Lat. *bufonium* (= a plant good for buboes and swellings in the groin), used by Dodoens, in describing it, was mis-

taken for Mod. Lat. *bufonius* (= of or belonging to a toad). [BUFO.]

Toad-fox pug:
Entom.: A geometer moth, *Eupithecia u-nariata*. It is of variegated colour. The larva feeds on the Yellow Toad-flax.

toad-lizards, s. pl.
Zool.: The genus *Phrynosoma* (q.v.)

toad-pipe, toad-pipes, s.
Bot.: *Equisetum limosum*, *E. arvense*, and other species of the genus. (Britten & Holland.)

† **toad-skep, s.**
Bot.: Probably *Polyporus giganteus*. (Britten & Holland.)

toad-spit, s. The same as Cuckoo-spirit (q.v.).

* **toad-spotted, a.** Tainted and polluted with venom, as the toad was popularly supposed to be.

"A most toad-spotted traitor."
Shakespeare: *Lear*, v. 1.

toad-stone (1), s. A popular name for Bufonite (q.v.), from the fact that it was formerly supposed to be a natural concretion found in the head of the Common Toad. Extraordinary virtues were attributed to it; it was held to be a protection against poison, and was often set in rings. That this belief was rife to Shakespeare's time is proved by the lines (*As You Like It*, ii. 1):

"Sweet are the uses of adversity,
Which, like the toad, ugly and venomous,
Wears yet a precious jewel in his head."

According to Sir Thomas Browne (*Vulgar Err.*, bk. iii., ch. xlii.), there were two kinds of toad-stones known in his day: the one "a mineral concretion, not to be found in animals, but in fields"; the other "taken not out of the toad's head, but out of a fish's mouth, being handsomely contrived out of the teeth of the *Lupus marinus*, a fish often taken in our northern seas, as was publicly declared by an eminent and learned physician" (Sir George Ent).

toad-stone (2), s. [From the Ger. *toad-stein* = (lead-stone) the *iodtilliegenen* of the Germans.]

Petrol.: An igneous rock of Carboniferous age, occurring in veins and sheets in limestone. The German name was given because of its barrenness in metalliferous ores. The rock is usually much altered by chemical agencies, but it evidently belongs to the group of dolerites.

toad's back rail, s.
Arch.: A particular kind of hand-rail for stairs. So named from its shape. (*Ogilvie*.)

toad's eye, s. [TOAD'S EYE TIN.]

toad's eye tin, s.
Min.: A variety of Casalterite (q.v.), occurring in aggregated groups of exceedingly small round bodies with radiated structure, supposed by the Cornish miners to resemble the eye of a toad.

toad's mouth, s.
Bot.: *Antirrhinum majus*. (Britten & Holland.)

* **toad'-er-ry, s.** [Eng. *toad*; -*ery*.] A place set apart for or frequented by toads.

"[Toads] are supposed to be poisonous; this is quite a vulgar error. . . . In my country abode, I have attempted to make them a place of retirement and called it a *toadery*."—*Rockland Hill: Journal Through the North of England* (ed. 1769), p. 51. (Note.)

* **toad'-ish, a.** [Eng. *toad*; -*ish*.] Like a toad; venomous.

"A speckled, toadish, or poison fish."—Herbert: *Travels*.

* **toad'-lēt, s.** [Eng. *toad*; dimin. suff. -*lēt*.] A little toad. (*Cotteridge*.)

* **toad'-līng, s.** [Eng. *toad*; dimin. suff. -*līng*.] A little toad; a toadlet.

"I always knew you for a *toadling*."—*Mac. Barley*: *Diary*, l. 187.

toad'-stool, * todo-stool, s. [Eng. *toad*, and *stool*.] So named because toads and frogs were supposed to sit upon them. (*Prior*.) Berkeley, however, thinks the name was given because in the opinion of the old herbalists they derived their origin from toads, as puff-balls were supposed to come from walves, and deer-tails (Elaphomyces) from deer.]

tāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, wōh, sōn; mūte, cūb, cūre, unite, ōir, rūle, fūll; trȳ, Sȳrian. æ, œ = 6; ey = ā; qu = kw.

Bot.: An unsteady Agaricus, Boletus, or other fungus of conspicuous size, as distinguished from a mushroom or edible Agaric.

"The grilly toadstool, grown there might I see, And leaping paddocks loading on the name."
Speaker: *Shepherds Calendar*; Dec., 68.

toad-y, s. & a. [A contract of toad-eater (q.v.).]

A. As substantive:
1. A base, servile flatterer; a sycophant, a lead-eater.

"Boys are not all toadies in the morning of life."
Thackeray: Book of Snobs, ch. v.

"2. A coarse, rustic woman. (Scotch.)

B. As adj.: Having the character of or resembling a toad.

"Vice is of such a toady complexion, that she cannot choose but teach the soul to hate."
Falham: Resolves, oct. 1, 13.

toad-y, v.t. [TOADY, s.] To fawn upon or flatter; to play the toady or sycophant to.

"How these toadies love to be toaded!"
G. Colman the Younger: Poor Gentleman, II, 2.

toad-y-ism, s. [Eog. toady; -ism.] The practices or manners of a toady; servile or mean sycophancy.

"Philosophers, who can behold the state of society, viz. toadyism, organized—base man-and-mummon worship, instituted by command of law; snobblism—a word, periphrastic, and mark the phenomenon calmly."
Thackeray: Book of Snobs, ch. III.

toast, * toast, * tost-en, v.t. & i. [O. Fr. *toster*; Sp. & Port. *tostar*.] [TOAST, s.]

A. Transitive:
1. To dry and scorch by the heat of a fire: as, To toast bread or cheese.

2. To warm thoroughly: as, To toast the feet. (*Colloq.*)

3. To name or propose as one whose health, success, &c., is to be drunk; to drink to the success of or in honour of.

"Five deep he toasts the towering glasses;
Repeats you verses wrote on glasses."
Prior: *Cameleon*.

B. Intransitive:
1. To warm one's self thoroughly at a fire.

"I will slog what I did leera. . .
As we toasted by the fire."
Green: Shepherds Pipe, Ed. I.

2. To give or propose a toast or health; to drink a toast or toasts.

"These insect reptiles while they go on caballing and toasting, only fill us with disgust."
Burke: Fustian of Unitarians.

toast, * toast, * tost, s. [O. Fr. *toeste* = a toast of bread, from Lat. *tostus*, fem. of *tostus*, pa. part. of *torreo* = to parch; Sp. *tostada*; Ita. *Port. tostado*.] [TORRID.]

1. Bread dried and scorched by the fire, or such bread dipped in melted butter or in some liquor; a piece of toasted bread put into a beverage.

"My sober evening let the tankard bless,
With toast embrown'd, and fragrant autumn draught."
Warton: Fanny's Progress on Oxford, &c.

2. A lady whose health is drunk in honour or respect.

"It happened on a publick day a celebrated beauty of those times was in the Cross-Bath, and one of the crowd of her admirers took a glass of the water in which the fair one stood, and drank her health in the company. There was in the place a gay fellow, half-fuddled, who offered to jump in, and swore, though he liked not the liquor, he would have the toast. Tho' he was opposed in his resolution, this whim gave foundation to the modern humor, which is done to the lady we mention in our liquor, who has ever since been called a toast."
Tatler, No. 24.

3. A person who is named in honour in drinking, as a public character or a private friend; anything honoured in a similar manner; anything the success of which is drunk; a sentiment proposed for general acceptance in drinking.

"The toast of the Emperor, proposed by Dr. Stephan, was received with enthusiasm, all the guests standing."
Baily Chronicle, Sept. 7, 1866.

"4. A drinker, a toper.

"When having half din'd, there comes in my host, A catholic good and a rare drunk toast."
Cotton: Voyage to Ireland, II, 11.

¶ To have on toast: To deceive, to take in, to swindle. (*Slang*.) [DONE, ¶ (i).]

"The Judges in the High Court are always learning some new thing. Yesterday it was entered on the record that the court took judicial cognizance of a quiet and pleasing modern phrase. They discovered what it was to be 'And on toast.'"
St. James's Gazette, Nov. 5, 1866.

toast-master, s. An officer who at great public dinners or entertainments announces the toasts and leads or times the cheering.

"Henry Beller was for many years toast-master at various corporation dinners, during which time he drank a great deal of foreign wine."
Dickens: Pickwick, ch. xxxiii.

toast-rack, s. A small rack of metal or earthenware, to hold dry toast.

toast-water, s. Water in which toasted bread has been soaked, used as beverage by invalids; toast and water.

toast-ër, s. [Eng. toast, v.; -er.]

1. One who toasts bread, &c.

2. A fork or cage to hold bread or meat while toasting.

"3. One who drinks a toast."
"We simple toasters take delight
To see our women's teeth look white."
Prior: *Alma*, II, 22.

toast-îng, pr. par. or a. [TOAST, v.]

toasting-fork, s. A three- or four-pronged fork to hold a slice of bread while toasting.

*** toasting-glass, s.** A drinking-glass on which was inscribed the name of a reigning beauty, often accompanied with verses in her honour. Garth (1672-1719) wrote several sets of verses for the toasting-glasses of the Kit-Cat Club.

*** toasting-iron, s.** A toasting-fork. Applied in derision to a sword.

"Put up thy sword betime;
Or I'll so mail you and your toasting-iron,
That you shall think the devil is come from hell."
Shakespeare: King John, IV, 3.

tôat, s. [TORZ.] The handle of a bench plane.

*** tôat-ër, s.** [TOOTER.] A trumpeter.

"Hark! hark! these toasters tell us the king's coming."
Beaum. & Flot.

*** tô-bac-ca-nâ-li-an, s.** [Formed from Eng. tobacco, in imitation of *bachchanalian*.] One who indulges in tobacco; a smoker.

"We get very good cigars for a haljoccho and a half—that is, very good for us cheap tobaccanilians."
Thackeray: Newcomes, ch. xxxv.

*** tô-bac-chi-an, s.** [Eng. tobacco; -ian.] One who smokes tobacco; a smoker.

"You may observe how idle and foolish they are, that cannot travel without a tobacco pipe at their mouth; but such (I must tell you) are no *tobacco-chians* for their manners of taking the fume, they suppose to be generous."
Fenner: Treatise of Tobacco, p. 411.

tô-bac-cô, * ta-bac-cô, s. [Sp. *tabaco* = tobacco, from West Indian *tabaco* = the tube or pipe in which Indians smoked the plant.]

I. Ordinary Language:

1. In the same sense as II. 1.

2. The dried leaves of the plant described under II. 1., used for smoking, chewing, or as snuff. Its use in America is of unknown antiquity. Columbus noticed that the natives of the West India Islands used the leaves in rolls—cigars. The Aztecs had cigar tubes, and also used nostril tubes of tortoise-shell for inhaling the smoke. The Mexicans and North American Indians used pipes. Oviedo speaks in 1526 of the inhaling of the smoke through the forked nostril tube by the Indians of Hispaniola. Lobel, in his *History of Plants* (1576), gives an engraving of a rolled tube of tobacco (a cigar) as seen by Colon in the mouths of the natives of San Salvador. He describes it as a funnel of palm-leaf with a filling of tobacco leaves. Cortez found smoking (by means of a pipe) an established custom in Mexico. Tobacco was introduced into Europe by Hernandez de Toledo, in 1569, and into England by Sir John Hawkins, in 1565. Harrison (*Descript. of England*) fixes on 1573 as the date when the smoking of tobacco became general in England. Its use was extended by Sir Walter Raleigh and Sir Francis Drake in 1586. The practice was made the butt of the wits, the object of denunciation by the clergy, and the subject of a pamphlet, the *Counterblaste to Tobacco*, by King James I. Its use was condemned by kings, popes, and sultans, and smokers were condemned to various cruel punishments. In the canton of Berne the prohibition of the use of tobacco was put among the ten commandments, after the one against adultery. In Turkey smoking was made a capital offence. Spite of all these denunciations and prohibitions, tobacco is the most extensively used luxury in the world. The method of manufacture depends upon the kind of tobacco and the article required. Cigars are made of the best, which is grown on soils peculiarly adapted to produce the delicate flavour; a portion of the northwest of the island of Cuba is the best of all. The Connecticut Valley, some parts of Virginia, a few counties in Ohio and Kentucky, near

Cincinnati and Mayaville, respectively, are noted regions. There is no definite evidence that the use of tobacco in moderation is injurious, but in excess its effects are harmful both to the mental and bodily functions.

"Every thing that is superfluous is very adverse to nature, and nothing more than tobacco."
Fenner on Tobacco, p. 402.

II. Technically:

1. **Bot.**: The genus *Nicotiana* (q.v.), the species of which are natives of tropical America and eastern Asia. American tobacco is *Nicotiana Tabacum* and its varieties. It is called more fully the Common Virginian or Sweet-scented Tobacco. It is a herbaceous plant, three to six feet high, with large, oblong-lanceolate leaves, some of them decurrent. All are covered with minute hairs, glandular and viscid at the tip. The flowers are terminal in panicles; the funnel-shaped corolla, which is roseate or pink, is more than an inch long. It is largely cultivated in Virginia and the Southern States of America, from which it has been introduced into Europe, China, &c. *N. repanda*, a native of Cuba, has white flowers with a slender tube, and is used for making some of the best cigars. Other American species are *N. quadrivalvis*, which grows near the Missouri river, *N. multivalvis*, from the Columbia river, *N. mana*, from the Rocky Mountains, and *N. macrophylla* or *latissima*, which yields the Orinoco tobacco. Of Old World species, *N. rustica*, Syrian or English tobacco, is a native of all continents, though first brought to England from America. It has a square stem, with ovate, entire leaves on petioles, and a greenish corolla with a cylindrical tube. It is cultivated in many countries, and furnishes the Turkish tobacco, the Persian or Shiraz tobacco, *N. persica*, is covered with clammy down; the radial leaves oblong, the calyx ones acuminate; the corolla salver-shaped. It yields Persian tobacco. The quantity of tobacco produced in the United States is nearly 500,000,000 lbs. yearly, of which more than one-third is grown in Kentucky. This is largely exported, the exports of unmanufactured tobacco in 1890 being 255,647,026 lbs., valued at \$1,479,556, and those of manufactured tobacco valued at \$3,876,045. Tobacco pays an internal revenue tax in this country, the revenue from this source being about \$54,000,000.

2. **Chem.**: The leaves of a plant of the genus *Nicotiana*, obtained chiefly for trade purposes from two species, *Nicotiana Tabacum* and *N. rustica*. The chemical composition of the leaves has been investigated by Posselt and Meiman, Grandean, and more recently by Dr. James Bell, who has found in the unfermented leaves and in the fully fermented leaves of Virginia tobacco the following percentage composition calculated on the dry leaves:

	Unfermented	Fermented
Nicotine	220	886
Organic acids—		
Malic	417	906
Citric	120	309
Oxalic	172	158
Acetic	75	80
Tannic	632	154
Nitric acid	14	48
Pectic acid	751	773
Cellulose	1254	1038
Starch	173	—
Saccharine matter	1439	—
Ammonia	68	56
Soluble extractive matter containing nitrogen	1847	1594
Insoluble albuminoid	498	1439
Resins and chlorophyll	341	521
Oil and latex	227	107
Indefinite insoluble matter	1241	1298
Mineral matter	1136	1156

Commercially, the term tobacco applies to a variety of kinds of manufacture known under the names of Roll, Cut, Shag, Cavendish, Cigars, Flake, &c. These are all submitted to more or less secondary fermentation after the addition of from 5 to 25 per cent. of water, and then dried or stoved on a heated open tray, or in a closed oven, steam being sometimes injected into the chamber during the process. It is at this stage that the particular flavor of the tobacco is imparted.

3. **Manuf.**: In the manufacture of cigars the leaves, after being moistened to make them flexible, are stripped from the midrib, the perfect halves being kept for wrappers, the others used as fillers. A quantity of the latter are rolled in the hand to shape, or placed in a mould of the requisite shape. Then a long strip cut from the wrapper leaf is twisted spirally around the compacted mass, and gummed down at the mouth end. The cigar is finished by cutting the lighting end *avoca*. Good cigars should have the same tobacco throughout, but it is a common practice to

bell, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -îng.
-clan, -tian = shan, -tion, -sion = ahün; -tion, -sion = zhün. -cious, -tions, -sious = ahüs. -ble, -dle, &c. = bel, del.

make the filler of inferior material. Cigars are rarely adulterated. They generally contain tobacco, even if it be of a poor kind. Chewing tobacco is made by laying the leaves together and pressing them into cakes of the required size, or by cutting a mass of them into the various "fine-cut" now used. The cigarette, now so much used in smoking, is filled with fine-cut tobacco, covered with specially manufactured and treated paper. Snuff, formerly much used, was in the past made from tobacco leaves, but is now chiefly prepared from the stems and midribs of the leaf. It has now greatly gone out of use, respectable people no longer using it, as formerly.

4. *Pharm.*: Externally tobacco is a powerful irritant. In the form of snuff it is sometimes prescribed as an emetic in affections of the head, or smoked as a sedative and expectorant in asthma. Internally it is a powerful sedative to the heart; it sometimes cures diuresis and has been given in dropsy (*Garrod*.)

tobacco-booking machine, *s.* A machine which arranges the smoothed leaves of tobacco into symmetrical piles.

tobacco-box, *s.* A box for holding tobacco.

tobacco-cutter, *s.*

1. A machine for shaving tobacco-leaves into shreds for chewing or smoking.

2. A knife for cutting plug-tobacco into smaller pieces.

tobacco-knife, *s.* A knife for cutting plug-tobacco into pieces convenient for the pocket. It is usually a sort of guillotine knife worked by a lever, and cutting downwards on to a wooden bed. (*Amer.*) A similar machine is in use in England for cutting cake tobacco for smoking.

* **tobacco-man**, *s.* A tobacconist.

tobacco-paper, *s.* Paper specially made for envelopes for cigarettes, to avoid the flavour of burning cotton or linen. Rice-paper is extensively used.

tobacco-pipe, *s.* An implement used in smoking tobacco. It consists essentially of a bowl, in which the tobacco is placed, and a stem, more or less long, through which the smoke is drawn into the mouth. In form and material pipes vary very much; the principal materials employed are pipe-clay, meerscham, porcelain, and wood.

¶ *Queen's tobacco-pipe*: A jocular designation of a peculiarly-shaped kiln belonging to the Gunpowder, and situated near the London Docks, in which are collected damaged tobacco and cigars, and contraband goods, as tobacco, cigars, tea, &c., which have been smuggled, till a sufficient quantity has been accumulated, when the whole is set fire to and consumed.

Tobacco-pipe clay: (PIPE-CLAY).

Tobacco-pipe fish: (PIPE-FISH).

tobacco-pouch, *s.* A pouch or bag for holding tobacco.

tobacco-root, *s.*

Bot.: The root of *Lewisia rediviva*, one of the Mesembryaceae. The plant has succulent leaves and fugitive, rose-coloured flowers, and the root is eaten by the natives of north-western America.

tobacco-seed sugar, *s.*

Chem.: $C_{12}H_{22}O_{11}$. A sugar of the nature of cane-sugar, or saccharose, observed in the seeds of the tobacco plant by Mr. G. Lewin, of the Laboratory, Sonneret House. Its specific rotatory angle is 73.2j, and it is inverted in the same way as cane-sugar by the action of mineral acids.

tobacco-stopper, *s.* A little plug for pressing down the burning tobacco in the bowl of the pipe.

tobacco-sugar, *s.*

Chem.: A mixture of saccharose, dextrose, and levulose, discovered by Dr. James Bell in tobacco leaves, which have been preserved from any undue fermentative action. The three varieties of sugar exist in such proportions as to have no effect on a ray of polarized light. The sugars, separated as a lime compound, decomposed with oxalic acid, and purified by animal charcoal, yielded results approximating to a cane-sugar, dextrose, and levulose. The first-named differs

from ordinary cane-sugar by refusing to crystallize, and yielding an inverted sugar with an angle of nearly -19°.

tobacco-wheel, *s.* A machine by which leaves of tobacco are twisted into a cord.

* **tô-bác'-côn-êr**, *s.* [*Eng. tobacco*; *n* connect., and suff. -er.] One who uses tobacco; a smoker.

* **tô-bác'-côn-îng**, *s.* [*Tobacco*.] Using tobacco; smoking.

"Neither was it any news upon this guild-day, to have the cathedral, now open on all sides, to be filled with mucketeers waiting for the major's return; drinking and tobacconing as freely, as if it had turned ale-house."—*Bp. Hall: His Hard Measure*.

tô-bác'-côn-ist, *s.* [*Eng. tobacco*; *n* connect., and suff. -ist.]

* 1. One who smokes tobacco; a smoker.

"Let every cobbler, with his dirty fist, Take pride to be a black tobacconist. Let idiot coxcombs swear 'tis excellent gear, And with a whiffle their reputations rear."—*J. Taylor: Pious Proclamation*.

2. A dealer in tobacco; one who sells tobacco, cigars, &c.

"Colonial merchants, grocers, sugar bakers, and tobacconists, petitioned the House and besieged the public offices."—*Macaulay: Hist. Eng., ch. iv.*

Tô-bâ'-gô, *s.* [*See def.*]

Geog.: An island in the West Indies.

Tobago-cane, *s.* The trade name of the slender trunk of *Bacris minor*, imported into Europe and made into walking-sticks.

tô-bêr'-môr'-îte, *s.* [*After Tobermory, Island of Mull, where found; suff. -ite (Min.)*.]

Min.: A massive granular mineral; sp. gr. 2.423; colour, pale-pinkish white; translucent. According to E. S. Dana, the analyses point to its probable identity with gyrolite (q.v.).

tô-bine, *s.* [*Ger. tobir*; *Dut. tabijn*.]

Fabric: A stout, twilled silk, much resembling Florentine, used for dresses.

Tô-bit, *s.* [*Gr. Τοβίτ (Tôbit), Ταβείρ (Tôbeit)*.]

Apocrypha: A book generally placed between 2 Esdras and Judith, and containing fourteen chapters. A pious man, Tobit by name, resident in Thibae in Naphthali, was taken captive by Enemessar (Shalmaneser), king of Assyria, and located in Nineveh. When his countrymen were put to death by the king's order, their bodies were thrown into the streets. Tobit made a practice of burying them, and compromised himself by these acts of humanity. Once, when he had buried a body, and, being in consequence ceremonially unclean, was sleeping outside by the wall of his court-yard, "the sparrow mewed warm dung" into his eyes and made him blind (i. ii.). In the days of his prosperity he had lent ten talents of silver to a countryman, Gabael, who lived at Rages in Media. At another Median city, Ecbatana, was a relative of his called Raguël, whose daughter Sara had been married to seven husbands, all of whom had been killed by Amodeus, the evil spirit, on the marriage-night before they could possess their bride. To recover the lent money, Tobit despatched his son Tobias, having as his companion a man-servant. The two set out for Rages, taking Ecbatana on the way. As Tobias was bathing in the Tigris, a fish leaped out of the water, attempting to devour him; but he caught his assailant, which was cooked and eaten by the travellers, the heart, the liver, and the gall being kept by Tobias, on the advice of his companion, the heart and the liver to be smoked for the expulsion of evil spirits from persons possessed, and the gall to remove whiteness in the eye (iii.-vi.). Arrived at Ecbatana, he married the maiden, smoking out the evil spirit who would have made away with him. During the marriage festivities the companion was despatched to Rages for the lent money, and obtained it, the two ultimately returning with the bride to Nineveh to Tobit, whose blindness was cured by the gall of the fish (vii.-xi.). When the time came for paying the servant, he declined all compensation, and revealed himself to be Raphael, one of seven angels of exalted rank and function (xii.). Sincere thanksgiving followed to God, who had sent the angel (xiii.). By direction of Tobit, Tobias removed from Nineveh, the destruction of which had been prophesied by Jonah (xiv.; cf. Jonah iii. 4, &c.).

Viewed as a tale designed to commend piety and trust in God, the book of Tobit evinces

considerable genius, the plot being well sustained, and some of the scenes, depicting domestic life, being beautifully drawn. It resembles a modern novel in making its virtuous hero struggle with adversity, in having love scenes and a marriage, and a personage apparently of humble rank ultimately proved to be of a very high order, with a general diffusion of happiness at the close. Whether or not there is in it a nucleus of historic truth cannot now be known; the most of it is clearly unhistoric. The expulsion of evil spirits by the smoke of the burning heart and liver of a fish, and the curing of eye-disease by its gall, are mentioned apparently not as miracles, but as parts of the ordinary course of nature. A fish large enough to threaten the life of Tobias is eaten by him and the angel seemingly at a single meal. Finally, as shown by Prof. Sayce (*The Witness of Ancient Monuments*, pp. 88, 89), it was not Shalmaneser, but Tiglath Pileser, who carried the people of Naphthali captive (cf. Tobit i. 2, 3, & 2 Kings xv. 29.); Senacherib's father was not Shalmaneser, but Sargon (Tobit i. 15); it was not fifty-five days, but twenty years, after the return of Senacherib from Palestine that he was murdered by his sons (21). It is doubtful if either Rages or Ecbatana existed at the time when Tobit is said to have lived (i. 14, lii. 7). Those who captured Nineveh were Nyaxares and Nabopolassar, not Nebuchadnezzar and Assuerus (Xerxes), the latter of whom did not live till 150 years after the time when Nineveh fell (xiv. 15). It is believed that Tobit was written about 350 B.C. Opinions differ as to whether or not it was first published in Greek or whether there may have been a Hebrew or an Aramaean original.

tô-bôg'-gan, tô-bôg'-an, *tô-bôg'-gin, *v.t.* [*A corrupt of Amer. Indian odaboggan* = a sled or sledge. The form *toboggan* is etymologically correct, but the form *toboggan* is in almost universal use.]

1. A kind of sled used for sliding down snow-covered slopes in Canada. It is simply a piece of birch or bass-wood, a quarter of an inch thick, from five to eight feet long by one or two broad, bent up in front like the dash-board of a sleigh, and braced by several cross-pieces of hard wood a foot apart, and by two round rods, one on each side, on top of the cross-pieces, all fastened by catgut to the sleigh. The bend at the bow is strengthened by two cross-pieces, and kept in shape by catgut strings at the ends bound to the front cross-piece and rod. Grooves are cut on the under side of the toboggan to let the knots sink below the wood.

2. A sledge to be drawn by dogs over snow.

¶ *On the toboggan*: In a state of degeneration or retrogression, mentally, morally, commercially, or otherwise. (*U.S. Slang*.)

toboggan-slide, *s.* A place specially prepared for coasting with toboggans, or an artificial wooden chute for tobogganing at pleasure resorts.

tô-bôg'-gan, tô-bôg'-an, *tô-bôg'-gin, *v.t.* [*Toboggan, s.*] To slide down snow-covered slopes or artificial chutes on a toboggan.

tô-bôg'-gan-êr, tô-bôg'-an-êr, *s.* [*Eng. toboggan*; -er.] A tobogganist.

tô-bôg'-gan-ist, tô-bôg'-an-ist, *s.* [*Eng. toboggan*; -ist.] One who practices tobogganing.

* **tôc-ca-ta**, *s.* [*Ital., from toccare = to touch, to play upon, to mention.*]

Old Music: (1) A prelude or overture; (2) A composition written as an exercise; (3) A fantasia; (4) A suite.

tôch-er (*ch guttural*), *s.* [*Gael. tochráid*; Irish *tocher* = a portion or dowry.] A marriage portion; the dowry brought by a wife to her husband. (*Scottch.*)

"But I care not a penny for her tocher—I have enough of my own."—*Scott: Bride of Lammermoor*, ch. xxviii.

tôch-êr (*ch guttural*), *v.t.* [*TOCHER, s.*] To give a tocher or dowry to. (*Scottch.*)

tôch-êr-êss (*ch guttural*), *a.* [*Eng. tocher*; -less.] Portionless; without a marriage portion. (*Scottch.*)

"Whilk now, as a landless laird wi' a tocherless daughter, no one can blame me for departing from."—*Scott: Waverley*, ch. lxvii.

tōd-dy, s. [Hind. *tāri*, *tādi* = the juice or sap of the palmyra-tree and of the cocoa-nut, from *tār* = a palm-tree.]

1. The name generally given by Europeans to the sweet, refreshing liquors which are procured in the tropics by wounding the spathes or stems of certain palms, on which the sap and juices exude from the trunks or from the fruit-stalks. In the West India *toddy* is obtained from the trunk of the *Attalea cohune*, a native of the Isthmus of Panama. In South-eastern Asia the palms from which it is collected are the gomuti, cocoa-nut, palmyra, date, and the kittul, or *Caryota urens*. When newly drawn from the tree the liquor is clear and in taste resembles malt. In a very short time it becomes turbid, whitish, and sub-acid, quickly running into the various stages of fermentation, acquiring an intoxicating quality, still retaining the name of *toddy*. It is also distilled into arrack, made into vinegar, and throughout all eastern countries is employed as yeast, as it begins to ferment in a few hours after it is drawn.

2. A mixture of spirit and water sweetened: as, whiskey *toddy*. Strictly speaking, *toddy* differs from *grog* in being always made with boiling water, while *grog* is made with cold water, but the latter word is often used in the same sense as *toddy*.

"First count's for that with divers jugs, To wit, twelve pots, twelve cups, twelve mugs, Of certain vulgar drink, called *toddy*. Said Gull did sluice said Gudgeon's body."—*Anstey: Pleader's Guide*, lect. 7.

toddy-bird, s. [TODDY-SHRIKE.]

toddy-cat, s.

Zool.: *Paradoxurus typus*, common throughout the greater part of India and Ceylon, extending through Burmah and the Malay peninsula to the islands. It is about forty-five inches long, of which the tail occupies about twenty; colour brownish-black, with some dingy yellowish stripes on each side. (See extract.)

"It is very abundant in the Carnatic and Malabar coast, where it is popularly called the *Toddy-cat*. In consequence of its supposed fondness for the juice of the palm, a fact which appears of general acceptance both in India and Ceylon (where it is called the *Palm-cat*), and which appears to have some foundation."—*Jerdon: Mammals of India* (ed. 1874), p. 127.

toddy-drawer, s. A person who draws and sells *toddy*, and makes and sells other spirituous liquors. (*Balfour: Cyclop. India*.)

toddy-shrike, **toddy-bird**, s.

Ornith.: *Artamus fuscus*, the Palmyra Swallow, or Ashy Swallow-shrike, from India and Ceylon. It is about seven inches long, of dusky plumage, and is most abundant in wooded districts, especially where palm-trees abound, more particularly the Palmyra palm, from which it takes several of its popular names. (*Jerdon*.)

tōd-dē-a, s. [Named after Henry Julius Tode, of Mecklenburgh, a mycologist.]

Bot.: A genus of Osmundee. From the Cape of Good Hope, New Zealand, &c.

tō-dī-dae, s. pl. [Mod. Lat. *tod(us)*; Lat. fem. pl. adj. suff. *-idae*.]

Ornith.: *Todies*; a genus of Picarian Birds, with a single genus *Todus* (q.v.).

tō-dī-rhām-phūs, s. [Mod. Lat. *todus*, and Gr. *ῥάμφος* (*ramphos*) = the crooked beak of birds.]

Ornith.: A genus of Alcedinide, with three species, confined to the Eastern Pacific Islands. Bill straight, very much depressed; nostrils basal, fissure oblique, hardly apparent, bordered by the frontal feathers; wings short, rounded; tail long, feathers equal, and twelve in number; tarsi elongated, moderate, and reticulated.

tō-dūs, s. [Latinised from the native name, *tody* (q.v.).]

Ornith.: *Tody*, the type-genus of *Todidae* (q.v.), with five species, from Cuba, Hayti, Jamaica, and Porto Rico. Bill with edges straight and finely notched, short bristles round base; nostrils in a short groove; wings with fourth to sixth quills longest and equal; tarsi with one long scale in front; outer toe united to second joint, inner toe to first joint; claws compressed and curved.

TODUS VIRIDIS.

tō-dy, s. [Native name.]

Ornith.: Any individual of the genus *Todus* (q.v.). They are delicate, bright-coloured insectivorous birds, of small size, and allied to the Motmots, though externally more resembling the Flycatchers, with which they were formerly classed. One of the best-known species is *Todus viridis*, the Green Tody, from Jamaica. The popular name, however, is not confined to the genus *Todus*; the Javan Tody is *Eurylaimus javanicus*, and the Great-billed Tody, *Cymbirhynchus macrorhynchus*.

* **tod-ys-hatte**, s. [Mid. Eng. = toad's hat.] A toad stool. (*Prompt Parv.*)

tōe, * **too** (pl. * **tone**, * **toon**, **toes**), s. [A.S. *tā* (pl. *tān*, *tan*), for *tāhe*; cogn. with Dut. *teen*; Icel. *tā* (pl. *tær*); Dan. *taa* (pl. *taeer*); Sw. *tå*; O. H. Ger. *zehā*; Ger. *zehl*.]

I. Ordinary Language:

1. In the same sense as II. 1.
2. The fore-part of the hoof of a horse, and of other four-footed animals.
3. The member of an animal's foot, corresponding to the toe in man.
4. The fore-part of a boot, shoe, or the like.
5. A projection from the foot-piece of an object, to give it a broader bearing and greater stability.

"Banks of 14in. timber were put in across and beneath the permanent way between the *toes* of the footings, to keep apart the walls."—*Daily Telegraph*, Dec. 16, 1888.

6. A barb, stud, or projection, on a lock-bolt.

II. Technically:

1. Anatomy:

(1) **Human**: One of the five extremities in which the foot terminates anteriorly, as the hand does in five fingers. Its bones are called phalanges. Essentially they correspond with those of the hand; but the phalange of the four outer toes are much smaller than the corresponding bones in the hand, while those of the great toe exceed those of the thumb in size. Sometimes in adults the two phalanges of the little toe are connected by bone into a single piece. The great toe is called the hallux. In the embryo it is shorter than the others, and temporarily projects at right angles to them, as it does permanently in the monkey.

(2) **Compar.**: In the modern order Primates (q.v.) the term *toe* is restricted to the digits of the posterior limbs, but is popularly applied to all the digits of four-footed animals. The normal number of toes is five, though a less number may be present; thus cats and dogs have five toes each on the fore feet and four on the hind; the rhinoceros has three toes on each foot, the camel two, and in the horse the typical five digits are reduced to three, of which only one (the third) is functional, and enclosed in a hoof, the other two (the second and fourth) being reduced to splint-bones. In birds the toes furnish one of the primary characters by which the class is divided into orders, and may be adapted for prehension, perching, climbing, acraping, wading, or swimming.

bēl, **bēy**; **pōūt**, **jōwī**; **cat**, **cell**, **chorus**, **chin**, **bench**; **go**, **gem**; **thin**, **this**; **sin**, **as**; **expect**, **Xenophon**, **exist**. **ph = f**

-cian, **-tian** = **shan**. **-tion**, **-sion** = **shūn**; **-tion**, **-gion** = **zhūn**. **-clous**, **-tious**, **-sious** = **shūa**. **-ble**, **-dle**, &c. = **bēl**, **dēl**

2. Machinery:

(1) The lower end of a vertical shaft, as a mill-spindle which rests in a step. (2) An arm on the valve-lifting rod of a steam-engine. A cam or lifter strikes the toe and operates the valve; such toes are known respectively as steam-toes and exhaust-toes.

To turn up the toes: To die. (Slang.) Several arabelastriers turned their toes up.—Beards: Clotter & Hearts, ch. xxiv.

toe-calk, s. A prong or barb on the toe of a horse's shoe, to prevent slipping on ice or frozen ground.

tōe, v.t. [TOE, a.]

1. To hit or strike with the toe. (Colloq.) 2. To touch or reach with the toes: as, To toe a line.

*3. To border on. Then more meadow-land with a neglected orchard, and then the little grey school-house itself toeing the highway.—Burroughs: Peppercorn, p. 244.

To toe the scratch or mark: To stand exactly at the scratch-line marking the starting-point of a race, or the place where pugilists meet in the ring; hence, to come forward fully prepared for any encounter, struggle, or trial.

tōed, a. [Eog. tō(e); -ed.]

1. Ord. Lang.: Having or being supplied with toes; generally in composition: as short-toed, long-toed, &c.

"Their very feet were toed with scorpions."—Dionet: Parry of Beasts, p. 26.

2. Carp.: A brace, strut, or stay is said to be toed when it is secured by nails driven in obliquely and attaching it to the beam, sill, or joist.

tō-fa'-nā, s. [AQUA TOFANA.]

tōff, s. [Etym. doubtful; prob. a corrupt. of tuft (q.v.).] A dandy, a fop, a swell. (Slang.)

"Persons with any pretensions to respectability were vigorously attacked, for no earthly reason save that they were toffs."—Daily Telegraph, Feb. 9, 1882.

tōf'-fŷ, tōf'-fē, tōf'-fŷ, s. [Etym. doubtful.] A kind of tablet sweetmeat, composed of boiled sugar with a proportion of butter.

tō-fiel'-dī-a, tōf'-fiel'-dī-a, s. [Named after Mr. Tofield, a Yorkshire botanist.]

Bot.: Scottish Asphodel; a genus of Veratrace. Perianth six-partite, with a small three-partite involucre. Stamens six, capsule three- to six-celled, cells united at the base, many-seeded. Known species ten, from the north temperate zone. Tofieldia palustris (or borealis), is an alpine plant, with tufted three- to five-nerved leaves, and a scape of dense racemose flowers of a pale-green colour. Found also in the north of continental Europe, in Northern Asia, and in North America.

*tō-fōre', adv. & prep. [A.S. tōforan.]

A. As adv.: Before, formerly, previously. "And so, as thou hast herle tofore, The fals tunges were lore."—Gower: C. A., II.

B. As prep.: Before. "So shall they depart the manor with the corn and the bacon tofore him that bath won it."—Spectator, (Todd).

*to-for-on, *to-for-n, *to-forne, prep. [A.S. tōforan.] Before.

"Thus is he an aversus man, that loareth his tressor tofor-n God, and an idolater."—Chaucer: Pervous Tale.

tōft, s. [Dan. toft = an inclosed piece of ground near a house. The same word as tuft (q.v.).]

1. Ord. Lang.: A grove or clump of trees. (Prov.)

2. Law: A message, or rather a place where a message has stood, but is decayed; a house and homestead.

It is found frequently as the second element in place names: as, Wigtoft, Langtoft, &c.

tōft-man, s. [Eng. toft, and man.] The owner or possessor of a house and homestead. [Toft, 2.]

*tōft'-stēad, s. [Eng. toft, and stead.] A toft.

"The fields are commonable from the 12th of August to the 12th of November to every burgess or occupier of a toftstead."—Archæologia, xlv. 415.

tōf'-ūs, s. [TOPHUS.]

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, eūb, eūre, ūnite, cūr, rūle, fūll; trŷ, sŷrian. æ, œ = ē; ey = ā; qu = kw.

tōg, v.t. or t. [From Lat. toga; cf. togs.] To dress. (Slang.)

"Scrumptious young girls, you tog out so finely, Adorning the diggings so charming and gay."—Chambers Journal, July, 1879, p. 368.

tō-gā, s. [Lat., from tego = to cover.]

Roman Antiq.: The principal outer garment and characteristic national dress of the Romans, who were hence designated as emphatically the Gens Togata, while the Greek pallium distinguished foreigners. The right of wearing it was the exclusive privilege of citizens, its use being forbidden to Peregrini and slaves. It was, moreover, the garb of peace, in contradistinction to the sagum of the soldier. The shape of the toga and the way in which it was worn are much disputed. In outline it was probably slightly curved. The ordinary mode of wearing it was to throw the whole toga over the left shoulder, leaving one extremity to cover the left arm, and to bring it round the back and under the right arm, which remained at liberty, the second end being carried again over the left shoulder. In this way, the broadest part of the cloth hung down in front, a large bunch or mass of plaits, termed umbo, lay across the breast, and the second extremity, which was carried across, served as a sort of belt to secure the whole. It was a loose robe, made of wool, sometimes of silk. Boys, until they attained to manhood, and girls, until they were married, wore the toga praetexta, a cloak with a purple or scarlet border. When the young Roman was regarded as fit to enter upon the business of life (at what age this was is uncertain, probably it depended on circumstances), he threw off the toga praetexta, and assumed the toga virilis. The toga praetexta was also the official dress of the higher magistrates. The toga picta, an embroidered robe, was worn by a general in his triumphal procession. Candidates for any office wore a toga candida, that is a toga which had been artificially whitened by the application of chalk or other similar substance; so arrayed they were styled candidati (whence our word candidate). Monks wore a toga pulla of naturally black wool.

tōg'-gle, tōg'-gel, s. [Prob. a dimin. from tog or tug.]

I. Ord. Lang.: A button. II. Technically:

1. A short wooden pin, or double cone of wood, firmly fixed in a loop at the end of a rope. By passing the toggle through the eye or bight of another rope, a junction is easily formed and quickly disengaged. It is useful in bending flags for signals, or it is attached to the end of a line to afford a firm hold for the fingers, as in the gunner's lanyard. It is also used in flensing whales, in which a hole is cut in the flubber, the eye of a purchase-strap being passed through and toggled.

"The yard-rope were fixed to the halter by a toggle in the running nose of the latter."—Murray: Frank Milnamy, ch. VIII.

2. Mach.: Two rods or plates, hinged together, and employed to transmit a varying force by lateral pressure upon the hinge, which is called the knuckle or knee.

toggle-bolt, s. The same as TOGGLE, s. (q.v.).

toggle-joint, s. An elbow-joint; a joint formed by two pieces articulating endways. [TOGGLE-PRESS.]

toggle-press, s. A form of press having essential value for many purposes, as the motion of the platen is more rapid at the time when the toggle-bars are starting from the point of their greatest flexion, and, as they straighten out, the power increases and rate diminishes as the point of ultimate pressure on the bale is approached. One of the most familiar forms is the Stanhope printing-press, in which the platen is depressed by a toggle and raised by springs. The movement is variously known as a knuckle, knee, or elbow movement, and is also used for making electrotype moulds from type, and for compressing bales of cotton, hay, &c.

tōgs, s. pl. [Cf. toggery.] Clothes, dress. (Slang.) "Look at his togs, superfine cloth and the heavy swell cut."—Dickens: Oliver Twist, ch. XVI.

tōil, *tōyle, v.t. & t. A word of doubtful origin. Skeat refers it to O. Fr. touiller = to mix filthily together, to beguine, to besmeer; others to O. Dut. tuylen = to fill or manure lands; tūyl = agriculture, labour, toil. A.S. tilian, teolian = to labour, to strive after, is not connected.]

A. Intrans.: To exert strength with pain and fatigue of body or mind, but particularly of the body, with efforts of some continuance or duration; to labour, to work, to struggle.

"But when he toiled those squadrons to array, Who fought like Britons in the bloody game."—Scott: Don Roderick, Concl. XV.

*B. Transitive:

1. To labour; to work at or on: as, To toil the ground.

2. To weary; to exhaust by toil; to over-labour; to wear out. (Sometimes with out.)

"Wearied, toyled, and folled with painful labours and wants."—P. Holland: Plutarch, 1, 513.

3. To puff or tug. "Reuliche toyled to and fro."—Debate between Body & Soul, 365.

tōll (1), *tōyle (1), s. [Toil, v.] Labour with pain and fatigue of body or mind; fighting labour and exertion.

"With these of old to tolls of battle bred."—Pope: Homer; Iliad I, 351.

tök, s. [From the cry of the bird.]

Ornith.: *Rhynchoceros* (or *Tockus*) *erythrorhynchus*, the Red-breasted Hornbill, from the wooded parts of Western, Central, and Southern Africa. It is about eighteen inches in length.

tö-kây, s. [See def.] A rich, highly-prized wine produced at Tokay, in Upper Hungary, from white grapes. It has an aromatic taste. It is not good till it has been kept for about three years, and it continues to improve the longer it is kept. It is produced from grapes grown on the side of a low chain of hills, never more than 700 feet above the sea-level, named the Hegyalya. Inferior Hungarian wines are frequently sold under this name, and many French and German imitations are also in the market.

tö-kên, *to-kene, *tokne, *to-kyn, s. [A.S. *tácan*, *tácn*, from *tæk* (for *ták*), pa. t. of *tácan*, *técn* = to accuse, orig. = to indicate, to point out; cogn. with Dut. *teeken* = a sign, mark, miracle, token; Icel. *tákn*, *teikn*; Dan. *tegn*; Sw. *töken*; Goth. *teikins*; Ger. *zeichen*. From the same root as Lat. *indico* = to point out; *docere* = to teach; Gr. *δεικνυμι* (*deiknumi*) = to show.]

I. Ordinary Language:

1. Something representing, or intended or supposed to represent or indicate another thing or event; a sign, a symbol.

"This token serveth for a flag of truce."

Be'twixt ourselves and all our followers." *Shakesp.: 1 Henry VI.*, III. 1.

2. A mark, sign, indication, symbol, or symptom; specif. in pestilential diseases, a livid spot upon the face, indicating, or opposed to indicate, approaching death.

"Corrupted blood some watery token shows." *Shakesp.: Rape of Lucrece*, 1, 748.

3. A pledge or memorial of love or friendship; a love-token, a keepsake.

"It seems you loved not her to leave her token." *Shakesp.: Two Gentlemen*, IV. 4.

4. A sign by which one proves the authenticity, legitimacy, or good faith of a commission or demand.

"Say, by this token, I desire his company." *Shakesp.: Measure for Measure*, IV. 2.

* 5. A signal, a sign.

"He made a *token* to his knyghtes, whereby they knowynge his mynde fell upon hym and slew hym."—*Fabian: Chronicle*, ch. cxviii.

6. Now, strictly, a piece of money current by sanction, and not coined by authority. Such tokens were largely current in the last century, being coined by several of the corporations, as Bristol, &c., England. In a wider sense the term is applied to coins or substitutes for coins made of inferior metal, or of a quantity of metal of less value than its name would indicate. Owing to the scarcity of small change in England, and the loss occasioned to the poor for want of coin of less value than the silver penny in use down to the time of the Commonwealth, halfpenny and farthing tokens were struck in brass, copper, tin, pewter, lead, and even leather, not only by the Government, but by tradespeople, tavern-keepers, and others, for circulation in their own neighborhood. When copper coinage became sufficiently abundant to meet the wants of the population it was made a criminal offence to issue these private tokens, although they continued to circulate in small quantities down to quite recent times. The modern nickel and bronze small coins of the United States and Britain are a token coinage, as they are worth only a fractional part of their nominal value. The silver coinage consists also of tokens, but their metallic value more nearly approaches their nominal value than do the bronze coins. In order to prevent loss to traders using these token coins, the law of legal tender was passed, so that no one need, unless he choose, accept more than ten dollars in minor silver, or twenty-five cents in nickel coins in one payment. For all sums of larger value he may demand gold or national bank notes. The silver five-franc piece in France is not a token coin; its metallic value is equal to that of the gold five-franc piece, and these both (owing to the Double Standard prevailing in France) are equal to their nominal value. [TAVAN-TOKEN.]

II. Technically:

1. *Church of Scotland, &c.*: A small disc of metal, generally lead or tin, issued prior to the celebration of the Lord's Supper in each Established Church, to every one connected with the congregation who, being in full communion, is entitled to be present at the sacrament. Tokens are now gradually giving place to communion cards. A similar arrangement prevails in most of the non-Established Presbyterian churches.

2. *Mining*: A piece of leather with a distinct mark for each hewer, one of which he sends up with each corf or tuba.

3. *Printing*: Technically, 240 impressions; in practice, generally, 280 impressions, or four tokens for each 1000 sheets printed on one side.

¶ *By token, By this token, By the same token*: Phrases colloquially used in corroboration of some statement and equivalent to: As a proof of what I say; This will prove what I say; as a proof, &c.

token-money, s. Metallic or paper currency, itself valueless in substance, but which derives integrity and exchangeability from a promise of redemption in some other money or commodity, generally gold or silver.

token-sheet, s.

Print.: The last sheet of a token.

* **tö-kên, v.t.** [TOKEN, s.]

1. To make known; to testify, to betoken; to be a sign or memorial of.

"On your finger in the night, I'll put Another ring, that what in time proceeds May *token* to the future our past deeds." *Shakesp.: All's Well that Ends Well*, IV. 5.

2. To give a token or sign to; to mark, as with a token.

"How appears the fight?"

"On our side, like the *tokened* pestilence Where death is sure." *Shakesp.: Antony & Cleopatra*, III. 5.

tö-kên-löss, a. [Eng. *token, s.*; -less.] Without a token.

tōl-ēr-ānce, *tol-ler-ānce, a. [Fr. tolérance, from Lat. tolerantia, from tolerans, pr. par. of tolero = to tolerate (q.v.); Sp. & Port. tolerancia; Ital. tolleranza.]

I. Ordinary Language:

*1. The quality or state of being tolerant; power or capacity of tolerating, enduring, or supporting; endurance.

Diogenes one frosty morning came into the market-place shaking, to show his tolerance.—Bacon.

2. The act or state of enduring or supporting. 3. A disposition to be tolerant, patient, or indulgent towards others whose opinions or practices differ from or are opposed to one's own, provided such opinions or practices spring from sincere and upright motives or convictions; freedom from bigotry or severity in judging the opinions or conduct of others.

The Christian spirit of charity and tolerance which breathes through this work, and appears in the sentiments which the author avowed in a former publication.—Bp. Horley: Sermons, vol. III, ser. 44. (App.)

4. The act of tolerating; toleration. II. Med.: The ability of the constitution to endure doses of medicine during sickness which would injure it in health.

tōl-ēr-ant, *tol-er-ant, a. & s. [Lat. tolerans, pr. par. of tolero = to tolerate (q.v.).]

A. As adj.: Inclined or disposed to tolerate; free from bigotry; favouring toleration; forbearing, enduring.

To decorate with all the splendor of panegyric the tolerant spirit of its votaries.—White: Bampton Lectures, ser. 2

B. As subst.: A person free from bigotry; specif., one who allows the practice of religions differing from or opposed to his own form of belief.

Henry the Fourth was a hero with Voltaire, for no better reason than that he was the first great tolerant.—J. Morley: Voltaire, ch. III.

tōl-ēr-ant-ly, adv. [Eng. tolerant; -ly.] In a tolerant manner; with toleration.

Other inhabitants of the town being more or less strangers within its gates entertained tolerantly, and living there under some sort of unwritten letters of naturalisation.—Daily Telegraph, Aug. 31, 1888.

tōl-ēr-āte, *tōl-lēr-āte, v.t. [Lat. toleratus, pa. par. of tolero = to endure; allied to tolo = to lift, to bear; Sansc. tul = to lift; Gr. ἵσταναι (hísthai) = to suffer; A.S. tholian = to endure; Fr. tolérer; Sp. & Port. tolerar; Ital. tollerare.]

1. To suffer or allow to be or to be done without prohibition, hindrance, or support; to allow or permit negatively by not prevent-

ing or forbidding; not to restrain or forbid; to treat with patience and forbearance.

So that to tolerate is not to prosecute. And the question whether the prince may tolerate divers persuasions, is no more then whether he may lawfully persecute any man for not being of his opinion. Now in this case he is just so to tolerate diversity of persuasions as he is to tolerate public actions: for no opinion is judicable, nor no person punishable, but for a sin.—Sp. Taylor: Liberty of Prophesying, § 16. 2. To put up with; to endure.

tōl-ēr-ā-tion, *tōl-lēr-ā-tion, s. [Fr. tolération, from Lat. tolerationem, accus. of toleratio, from toleratus, pa. par. of tolero = to tolerate (q.v.).]

1. The act of tolerating or enduring; allowance of something not wholly approved.

There is also moderation in toleration of fortune of every sorte, which of Tull is called equalitate.—Elyot: Governour, bk. III, ch. 22

2. Specifically, the recognition of the right of private judgment in matters of faith and worship; the liberty allowed by a government to every individual to hold or publicly teach his own religious opinions, and to worship how, when, and whom he pleases, provided he does not violate thereby the rights of others or infringe laws made for the maintenance of decency, morality, and good order, or for the security of the state.

Toleration is of two kinds: the allowing to the dissenters the unimpeded profession and exercise of their religion, but with an exclusion from offices of trust and emolument in the state, which is a partial toleration; and the admitting them, without distinction, to all the civil privileges and capacities of other citizens, which is a complete toleration.—Paley: Moral Philosophy, bk. vi, ch. 2.

¶ There was no toleration under the Jewish theocracy or the semi-theocratic monarchy; the individual who worshipped false gods, or who induced others to do so, was regarded as a traitor against Jehovah, and received the ordinary punishment of a traitor—death. (Num. xxv. 1-11, Deut. xiii. 1-18, 1 Kings xviii. 40.) The spirit of the New Testament is distinctly in favour of toleration (cf. Acts x. 34, 35). The old Roman empire was, as a rule, tolerant. The images worshipped by the several nationalities constituting it, or with which it was brought in contact as its conquests extended, all received a certain welcome; and one of the chief reasons why Christianity was persecuted was that it was not contented to be one of a number of accepted faiths, but claimed to be the one only true religion, proselytizing from all the rest. Hinduism holds essentially the same position. Muhammadanism recognizes no proper religious liberty, and when it has the power is a most intolerant faith, though it is sometimes compelled to come to terms of accommodation with a rival faith, as was the case in India. A church established or dominant is apt to regard those who dissent from its doctrines or ritual as committing a grave offence, and to treat them intolerantly; they, on the contrary, contend for religious liberty. If, however, the positions of the two were reversed, it would be found that, in many cases, a corresponding change of view would occur. The standpoint of a government is different: its tendency is to toleration. If the members of the several denominations are willing to pay taxes and avoid exciting commotion, the government generally acts tolerantly to them, and is the more moved to do so if it finds that it runs the risk of crushing defeat when it measures its strength against that of the human conscience. The philosophic view was expressed by John Stuart Mill when, in answer to a query put to him in connection with a parliamentary election, he answered: "There should be no religious disabilities." The word toleration does not now figure in controversy so largely as it did, the chief Nonconformists no longer contending for it, but aiming at religious equality.

3. A disposition to tolerate, or not to judge or deal harshly or rigorously in cases of difference of opinion or conduct; freedom from bigotry.

Toleration Act, s. Eng. Hist.: The name given to statute 1 Will. & Mary, c. 18, under which freedom of worship was granted to Protestant dissenters from the Church of England, provided they made a declaration against transubstantiation, and took the oaths of allegiance and supremacy. This act has been so amended and extended from time to time that now all dissenters, Roman Catholics, Jews, and all other sects alike enjoy all the privileges of the constitution.

tōl-ēr-ā-tōr, s. [Eng. tolerat(e); -or.] One who tolerates.

*tōl-ī-bānt, s. [TURBAN.] A turban. "The Turks and Persians to wear great turbans of ten, fifteen, and twenty ellies of linnen specks upon their heads."—Puttenham: Art of Poesie, bk. III, ch. xxiv.

tô-lû, s. [Named from Santiago de Tolu, a seaport of Granada, from which it is believed that tolu was first brought.]
 1. Bot., &c.: A balsam derived from *Myrospermum toluiferum*, the Tolu-tree, an elegant evergreen, so lofty that sometimes the first branch is forty to sixty feet from the ground. The leaves are pinnated and marked with transparent dots; the leaflets membranous, obovate, taper-pointed, the terminal one the largest. It is a native of Venezuela and New Granada. The balsam flows from incisions made in the stem of the tree, and is at first of the consistence of turpentine, but becomes more tenacious when kept for a time. It is yellow or brown, and transparent, and is used as an ingredient in a syrup and in lozenges.
 2. Pharm.: Balsam of Tolu is a stimulant and expectorant, given in chronic bronchitis and rheumatism. It also diminishes excessive discharges in gleet and leucorrhœa. Externally it is used as a stimulant in ulcers, bed sores, &c. (Garrod.)

tolu-tree, s. [TOLU, 1.]
toll-u-âte, s. [Eng. *tolu* (ic); -*ate*.]
 Chem.: A salt of toluic acid (q. v.).
toll-u-ène, s. [Eng. *tolu*; -*ene*.]
 Chem.: C₇H₈ = C₆H₅(CH₃). Tolin. Produced by the action of sodium on a mixture of bromobenzene and methyl iodide, and also occurs in light coal-tar oil. It is a limpid liquid smelling like benzene, and having a nearly similar solvent power; sp. gr. = .882 at 0°, boils at 111°. Passed through a red-hot porcelain tube, it yields various compounds, among which have been observed benzene, naphthalene, dibenzyl, and anthracene.

toluene-sulphamide, s.
 Chem.: C₇H₇SO₂NH₂. Produced by the action of aqueous ammonia on toluene sulphochloride. It crystallizes from hot water in needles or in laminae.

toluene sulpho-chloride, s.
 Chem.: C₇H₇SO₂Cl. Obtained by triturating toluene-sulphate of sodium with an equal weight of phosphoric pentachloride, and several times washing the product with water. It separates from ether in rhombic plates or large prisms, melts at 68°, and boils with decomposition at 250°. It is insoluble in water, but dissolves in alcohol, ether, and benzene.

toluene sulphuric acid, s.
 Chem.: C₇H₇SO₃H. Formed by the action of fuming sulphuric acid on toluene or tolu-balsam. [TOLU, 1.] It crystallizes in small, very deliquescent laminae.

toluene sulphurous acid, s.
 Chem.: C₇H₇SO₂H. This acid is obtained by treating toluene sulpho-chloride, dissolved in ether free from water or alcohol, with sodium amalgam. It crystallizes from water in rhombic tables, having a brilliant satiny lustre, melting at 85°, and dissolving easily in boiling water, alcohol, ether, and benzene. It passes by oxidation into toluene sulphuric acid.

toll-u-ên-yl, s. [Eng. *toluene* (c); -*yl*.] [BENZYL-TOLYL.]

toll-u-glyc-ic, a. [Eng. *tolu*; *glyc* (erin), and suff. -*ic*.] Derived from or containing toluic acid and glycerine.

toluglyclo-acid, s. [TOLUIC-ACID.]

tôl-û-ic, a. [Eng. *tolu*; -*ic*.] Contained in or derived from tolu (q. v.).

toluic acid, s.
 Chemistry:
 $C_6H_5O_2 = C_6H_4 \begin{matrix} \text{CH}_3 \\ \text{CO}_2H \end{matrix} = OH_2 \begin{matrix} \text{C}_6H_5 \\ \text{CO}_2H \end{matrix}$

Four acids are known: ortho-, para-, meta-, and alpha-. The first three are formed by oxidation of the corresponding xylenes, and the last by treating benzyl cyanide with alkalis. Ortho-crystallizes in long slender needles, melting at 102.5°, and is moderately soluble in hot water; para-crystallizes in needles, melting at 178°; meta-yields slender needles, melting at 109°, and more soluble in water than ortho- or para-. The alpha acid crystallizes in broad thin laminae, smella like horse-aweat, melts at 78.5°, and boils at 261°.

toluio-aldehyde, s.
 Chem.: C₇H₇OH = C₇H₇OOH. Produced by distilling a mixture of toluate and formate of calcium. The distillate, treated with acid sulphite of sodium, forms a crystalline compound, which, on addition of carbonate of sodium, yields the aldehyde as an oil. It has a peppery odour, boils at 204°, and when exposed to the air takes up oxygen, and becomes converted into toluic-acid.

toluio-chloride, s.
 Chem.: C₆H₅OCl. Produced by distilling toluic-acid with phosphoric pentachloride. It is a strongly refracting colourless liquid; sp. gr. = 1.175, boils at 214°, and fumes in moist air.

toluio-ether, s.
 Chem.: C₆H₅(C₂H₅)O₂. Ethylic toluate. Prepared by passing hydrochloric acid gas into an alcoholic solution of toluic acid. By the addition of water it separates as a heavy oil which, when washed with ammonia and dried over chloride of calcium, is obtained as a colourless aromatic liquid, having a bitter taste, and boiling at 228°.

toll-u-ide, s. [Eng. *tolu*; -*ide*.]
 Chem. (Pl.): Compounds, homologous with the anilides, derived from toluidine salts of organic acids by abstraction of water. They may be regarded as amides containing the radical tolyl.

toll-û-i-dène, s. [Eng. *toluid* (c); -*ene*.]
 Chem.: C₇H₇. An aldehyde radical, the bromide of which—C₇H₆Br₂—is obtained by the action of phosphoric pentabromide on bitter almond oil, C₇H₆O.

toll-û-i-dine, s. [Eng. *toluid* (c); -*ine*.]
 Chem.: C₇H₇N = C₆H₅(NH₂)CH₃. This base, metameric with benzylamine, exhibits the three modifications of ortho-, meta-, and para-, which are obtained by the action of reducing agents on the corresponding nitro-toluenes. Paratoluidine forms large colourless crystals, sparingly soluble in water, easily in alcohol and ether, melts at 45°, boils at 198°, and has an aromatic taste and odour; the ortho-compound is a colourless neutral liquid having the density of water, and boiling at 199.5°; and the meta- is a colourless liquid of a sp. gr. of .998 at 15°, and boiling at 197°. Commercial toluidine is a mixture of the para- and ortho-compound, and enters into the composition of the aniline dyes.

toll-u-ol, s. [Eng. *tolu*; -*ol*.] [TOLUENE.]

toll-u-ol-ic, a. [Eng. *toluol*; -*ic*.] [TOLUIC.]

toll-u-ol-n-tril, s. [Eng. *toluol* (l), and *nitril*.]
 Chem.: C₆H₅N = C₆H₄(CN)CH₃. Cyanotoluene. Three isomeric modifications of this compound are known, formed by treating the respective tolyl-sulpho-carbinides, N { C₆H₄CH₃ } with finely divided copper to remove the sulphur. The ortho-compound is a colourless liquid boiling at 203°; the para-yields colourless needles, melting at 28.5°, boiling at 218°; the meta- has not yet been obtained in the pure state.

toll-u-ô-säl-i-çyl, s. [TOLUOSALICYLOL.]

toll-u-ô-säl-i-çyl-ôl, s. [Eng. *toluol* (l), and *sälicylol*.]
 Chem.: C₇H₅(C₆H₃O)₂. Toluosalicyl. Prepared by heating together equal volumes of salicylol and tolylic chloride. It crystallizes from alcohol in shining, colourless, easily fusible prisms, insoluble in cold, slightly

bôil, bôy; pout, jowl; oat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f

soluble in hot water, more easily in hot alcohol and in ether.

tōl-ū-ōx-yl, s. [Eng. tolu(ol), and (hydro)xy(l).] Chem.: C₆H₇O. The hypothetical radical of toluic acid and its derivatives.

tōl-ūr-īc, a. [Eng. tol(uric), and uric.] Derived from or containing toluic and uric acids.

toluic-acid, s.

Chem.: C₇H₅O₂(NH₂)C₆H₇O. An acid homologous with hippuric, and obtained by the passage of toluic acid through the animal body. Toluic acid is swallowed in doses of several grammes, and the urine voided evaporated to a syrup and exhausted with alcohol. The solution is mixed with oxalic acid, evaporated, and then exhausted with alcohol ether. The acid obtained is purified by recrystallization of its calcium salt. Toluic acid crystallizes from alcohol in trimetric prisms. It is inodorous, melts at 160°, dissolves easily in boiling water and alcohol, and only sparingly in pure ether. It forms crystalline salts with the alkaline earths and metals, most of which are soluble in water.

* tōl-u-tā-tion, s. [Low Lat. toluaris = trotting; tolutim = st a trot, from Lat. tollo = to lift.] A pacing or ambling; an amble.

"They rode, but anthers having not Determined whether pace or trot (That is to say, whether tolutation, As they do term 's or succussion), We leave it. Butler: Quadrages, I. ll. 45.

tōl-ū-yl, s. [Eng. tolu; suff. -yl.]

Chem.: C₆H₅. The radical of toluenic alcohol and its allied compounds. Free toluyl C₆H₅ obtained by the action of sodium on toluenic chloride, is a thick liquid, boiling at 290°.

tōl-ū-yl-ā-mine, s. [TOLUIDINE.]

tōl-ū-yl-ēne, s. [Eng. tolyl; -ene.]

Chem.: A name sometimes applied to benzylene C₇H₈, and stilbene C₈H₈, but more properly belonging to the hydrocarbon C₈H₈.

tōl-ū-yl-īc, a. [Eng. tolyl; -ic.] Contained in or derived from toluyl (q.v.).

toluyl-alcohol, s.

Chem.: C₈H₁₀O = C₆H₄<CH₂CH₂HO. Xylylic alcohol. The para-compound, the only one known, is obtained from the corresponding aldehyde by the action of nascent hydrogen. It crystallizes in needles, dissolves sparingly in water, melts at 59°, and boils at 217°. Its acetic ether boils at 243°. The above alcohol has also been inappropriately termed tolyl alcohol, but the true tolyl alcohol is cresol, C₆H₄<CH₃HO.

tōl-yl, s. [Eng. tol(u); suff. -yl.] [CRESOL.]

tōl-yl-chloride, s. [CHLORO-TOLUENE.]

tōl-yl-phenylamine, s. [TOLYLANTILINE.]

tōl-yl-thiosinamine, s.

Chem.: A crystalline mass obtained by heating to 100° a mixture of toluidine and oil of mustard. It is inodorous, insoluble in water, soluble in alcohol and ether, and melts at 100°.

tōl-yl-ā-çēt-ā-mide, s. [Eng. tolyl, and acetamide.]

Chem.: C₉H₁₁NO = C₇H₅(C₂H₃O)N₂. Produced by distilling equivalent weights of toluidine and acetic acid, and treating the last portion of the distillate with acidulated water. It is obtained by slow crystallization in long, thick needles, tasteless, inodorous, melting at 145°, and boiling at 310°. It is sparingly soluble in cold water, easily in alcohol and ether.

tōl-yl-ā-mine, s. [Eng. tolyl, and amine.] [BENZYLAMINE.]

tōl-yl-ān-i-line, s. [Eng. tolyl, and aniline.]

Chem.: C₆H₄(C₂H₅)NH₂. Tolyl-phenylamine. A base isomeric, if not identical with phenyl-toluidine, obtained by heating hydrochlorate of toluidine and aniline. It is separated

rated from other bases formed at the same time by fractional distillation. Boils at about 330°.

tōl-yl-bēn-zā-mide, s. [Eng. tolyl, and benzamide.]

Chem.: C₇H₅(C₂H₃O)NH₂. Prepared by treating chloride of benzoyl with toluidine, washing the resulting mass with acidulated water, and dissolving in boiling alcohol. It crystallizes therefrom in long, colourless, inodorous needles, insoluble in water, and easily soluble in alcohol and ether; melts at 100°, and volatilizes at 232°.

tōl-yl-car-bā-mide, s. [Eng. tolyl, and carbamide.]

Chem.: CO(C₇H₇)H₃N₂. Benzyl urea. Obtained on mixing a hot solution of toluidine sulphate with a solution of potassium cyanate. It separates in white needles, which have a sweetish taste, dissolves sparingly in cold, easily in hot water, in alcohol, and ether.

tōl-yl-ēne, s. [Eng. tolyl; -ene.] [XYLENE.]

tolylene-chloride, s.

Chem.: C₆H₄(CH₂Cl)₂. Xylylic chloride. Obtained by the action of chlorine on paraxylene. It crystallizes in colourless laminae, boils at 240°, and melts at 100°.

tolylene-diamine, s.

Chem.: (C₇H₇)H₄N₂. A base prepared by distilling dinitrotoluene with iron filings and acetic acid. It forms needle crystals, which melt at 99°, and dissolve in boiling water, in alcohol, and in ether.

tolylene-glycol, s.

Chem.: C₁₄H₁₄O₂ = C₆H₅CHHO } A diatomic alcohol formed by the action of zinc and hydrochloric acid on benzaldehyde. It crystallizes in large rhombic plates, melting at 132.5°, and sublimes with decomposition. It is sparingly soluble in water, easily in alcohol.

tōl-yl-sāl-x-çyl-ā-mide, s. [Eng. tolyl, and salicylamide.]

Chem.: C₁₄H₁₃NO (?). Jaillard's name for a compound obtained by heating to 50° a mixture of toluidine and salicyl. It forms yellow, inodorous crystals, insoluble in water, soluble in alcohol and ether, and melts at 100°, volatilizing at a higher temperature.

tōl-yl-sūc-çin-i-mide, s. [Eng. tolyl, and succinimide.]

Chem.: C₁₁H₁₁NO₂ = C₇H₅(C₄H₄O₂)·NH₂. A compound formed by heating a mixture of succinic acid and toluidine, and crystallizing the cooled mass from boiling water. It is soluble in hot water, in alcohol, and ether, and volatilizes without decomposition.

† tōl-yl-peū-tēs, s. [Gr. τολυπειω (tolupeio) = to wind into a ball.]

Zool.: A genus of Armadillos, with one species, Dasypus tricinctus (Linn.), apex (Geoff.), to which Illiger gave generic distinction.

tōm, s. [See def.]

1. A contraction of the common Christian name Thomas. It is used like the name Jack—

(1) To denote the male of an animal; as, a tom cat.

(2) Generically to imply some degree of slight or contempt: as, a tom-fool, a tom-noddy, &c.

2. A male cat, a tom-cat.

"The rarity of a tortoiseshell tom is well known."—Daily Telegraph, Oct. 21, 1855.

* 3. The knave of trumps at glee (q.v.).

4. Mining: A wooden trough used by Californian miners to wash what is known as "pay-dirt."

Tom Bontrin's bush, s. Bot.: Picramnia Antidesma.

tom-cat, s. A male cat.

* tom-double, s. A shuffler.

"He may play the tom-double under it."—Harl. Miscell., ll. 255.

tom-noddy, s. 1. A sea-bird; the puffin. 2. A blockhead, a dunce, a dolt.

tom-norry, s. [A corrupt. of tom-noddy (q.v.).] The puffin. (Shetland.)

tōm-ā-hāwk, s. [Algonkin Indian tomahagen; Mohegan tumahagan; Delaware tomahocan = a war-hatchet.]

1. An Indian hatchet or axe used in war and in the chase, not only in hand-to-hand combats, but also by being thrown to a considerable distance as to strike the object with the sharp edge. The native tomahawks have heads of stone attached by thongs, &c., but steel tomahawks are supplied to the Indians by the governments and traders with whom they deal, and a pipe is usually attached to the poll. A hole is drilled through the bottom of the bowl and the poll of the axe, to meet one passing through the length of the handle. The illustration is from a specimen in the Franks collection in the British Museum.

"They might as well have represented Washington brandishing a tomahawk, and girl with a string of soap."—Macaulay: Hist. Eng., ch. xiii.

2. Navul: A poleske (q.v.).

To bury the tomahawk: To make peace; it being the custom of the Indians to bury the tomahawk during time of peace: as, To dig up the tomahawk = To go to war, to fall into diapute.

tōm-ā-hāwk, v. t. [TOMAHAWK, s.] To kill, cut, or strike with a tomahawk.

tō-māl-leŷ, tō-māl-līne, s. [Elym. doubtful.] The liver of the lobster, which becomes green on boiling.

tō-man', tō-māun, s. [Pers.] A Persian gold coin, varying in value according to locality and the temporary necessities of the government, but generally taken as equal to about 9s. 6d. sterling. It is divided into 100 shakias or shakis.

"The band-roll strung with tomans, Which proves the veil a Persian woman's." Browning: Flight of the Duchess.

tō-mā-tō, tō-mā-tō, s. [Sp. & Port. tomate, from Mexican tomali = a tomato.]

Bot.: Lycopersicum esculentum, the Love-apple or Wolf-peach; a solanaceous annual, with a herbaceous, hairy stem, unequally pinnate leaves with out leaflets, numerous flowers, and red or yellow fruit. It is a native of the warmer parts of America, but has now been introduced into southern Europe, India, and many other countries. The fruit, technically a nuculanium, is often irregular in form, owing to the adhesion of some adjacent fruits into one. The normal, cherry-like, globose fruit constitutes the variety cerasiforme; the large, irregular, pyriform one the variety pyriforme. When unripe, the fruit is green, and makes a capital pickle; as it ripens it usually turns red or yellow, and becomes filled with an orange, somewhat acid, pulp. In this state it is eaten raw, or cooked in various ways; or employed in the preparation of sauces, &c. The tomato is very wholesome, and may be eaten without danger, although suspicion sometimes attaches to it on account of the poisonous properties of some of its allies.

* tōm-axe, s. [See def.] A corrupt. of tomahawk (q.v.).

"If he carry the scalping-knife and tomaxe."—Idler, No. 40.

tōmb (silent), *tombe, *tounge, *tumble, s. [O. Fr. tumber; Fr. tombe, from Lat. tumba = s tomb; Gr. τύμβος, τύμβος (tumba, tumbos) = a tomb. Prob. allied to Lat. tumulus.]

1. A grave; a vault for the dead; a pit in which a dead body is deposited.

"To paint the gloomy horrors of the tomb; The appointed place of rendezvous, where all These travellers meet." Blair: Grass.

2. A chamber or vault formed wholly or in part in the earth, with walls and a roof, for the reception of the dead.

3. A monument erected to enclose and preserve the memory of the dead; any sepulchral structure.

"The marble tombs that rise on high Whose dead in vaulted arches lie, Adorn the rich, or praise the great." Farnell: Night Piece on Death.

tomb-bat, s.

Zool.: Taphozous perforatus. It is about three inches long, exclusive of the tail; is body covered with short dark-brown fur, which extends over the bases of the wings, and down

the interfemoral membrane as far as the point where the tail emerges therefrom. It was discovered by Geoffroy in the chambers of

TOMB-BAT

the Pyramids, and in other tombs in Egypt, and is said to inhabit Sennar and Senegal. It passes the day in the darkest places it can find, coming out at dusk, and feeding exclusively on insects.

tomb (b silent), v.t. [TOMB, s.] To bury, to entomb.

"Dying shall beseech the honour To be tomb'd beneath thy clay." Blackie: *Lays of Highland & Islands*, p. 20.

tomb'-bác, tomb'-bák, s. [Fr. *tombac*, from Malay *tambaga* = copper; Sp. *tumbaga*; Port. *tambaguá*.] An East Indian alloy for cheap jewellery. Compos.: Copper, 16; tin, 1; zinc, 1. Red tombak: copper, 11; zinc, 1. Arsenic is added to make white tombac.

tomb'-ba-zite, s. [Eng. *tombac*(s); s connect., and snuff. -ite (Min.); Ger. *tombacit*.]

Min.: A name given by Breithaupt to a Geradorite (q.v.) because of its tombac-brown colour.

*tombestere, s. [A.S. *tumbestra* (?).] A dancing-girl.

tomb'-lées (b silent), *tomb-lesse, a. [Eng. *tomb*; -less.] Without a tomb.

"And some long winter's night hath shed Its frost o'er every tombless head." Byron: *Mazeppa*, 12.

tomb'-boy, s. [Eng. *tomb*, and *boy*.]

- 1. A rude, rough, bolsterous boy.
2. A worthless woman; a strumpet, a prostitute.
3. With tomboyish hired with that self exhibition. Which your own coffers yield! with diseased ventures." Shakespeare: *Cymbeline*, I. 6.

tomb'-stone (b silent), s. [Eng. *tomb*, and *stone*.] A stone erected over a grave to preserve the memory of the person interred; a sepulchral stone.

"On the tombstones of the truly great it is certainly right that no inscription should be written consistent with their dignity." Knox: *Essay* 98.

tomb'-cod, s. [Eng. *tomb*, and *cod*.] Ichthy.: *Gadus tomcodus*, from six to twelve inches long, brownish above, with spots of darker hue, lighter beneath. It is found along the American coast from New York northward to Nova Scotia and New Brunswick at all seasons of the year, frequently ascending rivers. (Ripley & Dana.)

tóme, s. [Fr., from Lat. *tomus*, accus. of *tomus* = a volume, from Gr. *τόμος* (*tomos*) = a section, hence a volume; *τέμνω* (*temnō*) = to cut.] As many writings as are contained in a volume, forming part of a larger work; a volume, usually a ponderous volume.

"A volume old and brown, A huge tome, bound In brass and wild-beast's hide." Longfellow: *Golden Legend*, II.

*to-medes, adv. [Eng. *to*, and *mede* = meed.] For reward; in return.

*tôme-lét, s. [Eng. *tome*; dimin. suff. -let.] A little tome or volume.

tō-mént, s. [TOMENTUM.]

tō-mén-tōse, tō-mén-toús, a. [TOMENTUM.] Covered with hairs so close as scarcely to be discernible, or with a whitish down-like wool; downy, nappy. (Used chiefly in botany.)

tō-mén-túm, s. [Lat. = a stuffing for cushions, of wool, hair, &c.] Bot., &c.: Dens, close hair.

tomentum-cerebri, s. Anat.: The inner surface of the pia mater,

which has a flocculent structure, produced by numerous small vessels.

tóm'-foól, s. [Eng. *tom*, and *fool*.] A ridiculous fool; a trifler.

tóm'-foól'-ér-ý, s. [Eng. *tomfool*; -ery.] 1. Foolish trifling; ridiculous behaviour; nonsense.

"O'er Fawkes's Day would cease to be one of the recognised seasons for tomfoolery in England." Daily Telegraph, Nov 8, 1882.

2. Silly trifles; absurd ornaments or knick-knacks.

*tóm'-foól'-ish, a. [Eng. *tomfool*; -ish.] Like a tomfool; apt to indulge in tomfoolery. "A man he is by nature merry Somewhat tomfoolish and comical, very." Southey: *Non-descript*, vii.

tóm'-ý-cús, s. [Gr. *τομήσις* (*tomēsis*) = of or for cutting. (Used of teeth, &c.)]

Entom.: A genus of Beetles, sub-tribe Xylophagi, family Bostrichidae. Of these, that named in science *Tomiscus typographus*, is called the Typographic Beetle, because the galleries which it makes in the soft wood on which it feeds bear some faint resemblance to printed characters.

tō'-mín, s. [Ety. doubtful.] A Jeweller's weight of ten grains.

†tō'-míp'-ar-óús, a. [Gr. *τομή* (*tomē*) = a cutting, and Lat. *pario* = to produce.] Bot.: Producing apores by division.

tō'-mís'-tō-ma, s. [Gr. *τόμος* (*tomos*) = cut in pieces, and *στόμα* (*stoma*) = the month.]

Zool.: A genus of Gavialidae, with two species, from the forests of Borneo and some of the neighbouring islands. It differs from the type-genus in having a more conical snout, thick at the back; the side teeth are erect, and the nostrils expanded.

tóm'-jóhn, s. [Prob. s corrupt. of *jampan*, the native name.] The same as JAMPAN (q.v.).

*tóm'-líng, s. [Eng. *tom*; dimin. suff. -ling.] A little tom-cat. "We are promised a black tomking." Southey: *Letters*, III. 244.

tóm'-mý, s. [TOM.]

1. Orig., a penny roll; hence, bread, provisions; gooda given to a workman in lieu of wages.

"There'll be plenty o' tommy an' work for us." When this Merica bother gets o'er." Harland: *Lancashire Lyrics*, p. 292.

2. A tommy-shop (q.v.).

3. The system of paying workmen in gooda instead of money; the truck system.

† British slang in all sense.

tommy-noddy, s. [TADPOLE-NAKE.]

tommy-shop, tommy-store, s. A shop or store conducted on the truck system; a truck-shop. (Slang.)

tóm'-mý, v.t. [TOMMY, s.] To enforce the tommy or truck system; to oppress or defraud by the tommy system. (Slang.)

tóm'-ō-sito, s. [Gr. *τόμος* (*tomos*) = a cut, a slice; suff. -ite (Min.).] Min.: The same as PHOTIZITE (q.v.).

tóm'-pí'-ón, s. [Fr. *lampon* = a stopper or stopple.]

I. Ord. Lang.: A stopper, a plug.

"The gigantic genius kept the oracle within him muzzled, nor condensed once to draw the tompon of his lips." Observer, No. 8.

II. Technically:

1. Ordnance: (1) A plug fitted to the bore of a gun at the muzzle, to protect it from injury by the weather.

(2) The iron bottom of a charge of grape-shot.

2. Lithog.: The inking-pad of the lithographic printer.

3. Music: The plug to a flute or organ-pipe, which is adjusted toward or from the mouth-piece to modulate the tone.

*tóm'-píp'-ér, s. [Eng. *tom*, and *piper*.] The piper at the ancient morris dances.

tóm'-pō-kér, s. [Eng. *tom*, and *poker*.] A hngbear to frighten children. (Prov.)

TOMPON OF A FLUTE.

tóm'-pón, s. [Fr. *lampon* = a stopper.] The same as TOMPION, II. 2. (q.v.).

*tóm'-ríg, *tóm'-ríg, s. [Eng. *tom*, and *ríg*.] A wild, bolsterous girl; a romp, a hoyden, a tomboy.

"In the very next canto she appears an arrant romp and tomrigger." Dennis: *On Pope's Rape of the Lock*, p. 16.

tóm'-tít, s. [Eng. *tom*, and *tít*.] The Titmouse (q.v.).

tóm'-tóm, a. [From the sound made.] [TAM-TAM.]

*tón (1), s. [Fr.] [TONE.] The prevailing fashion; high mode.

"If things of ton their harmless lays indite, Most wisely deemed to shun the public sight." Byron: *English Bards & Scotch Reviewers*.

tón (2), *tonne, s. [A.S. *tunne* = a barrel; cogn. with Dut. *tun* = a tun; Isl. & Sw. *tunna*; Dan. *tónde* = a tun, a cask; Ger. *tónns* = a cask, a heavy weight; Irish & Gael. *tunna*; Irish *tonna*; Wel. *tynell* = a tun, a barrel; Low Lat. *tunna, tonna*; Fr. *tonneau*.] 1. A weight equal to 20 cwt. or 2,240 lbs. avoirdupois. In America the usual ton is 2,000 lbs. avoirdupois, 20 cwt. of 100 lbs. each. In the Eastern States 2,240 lbs.—20 cwt. of 112 lbs each—is usual with coal, and some other things, and is called the long ton. The mining ton of Cornwall is 21 cwt. of 112 lbs.

2. A wine measure of capacity equal to two pipes or 252 gallons. (In this sense generally written *tun*.)

3. A certain weight or space—in the latter case about 4 cubic feet—by which the burden of a ship is reckoned; as a vessel of 500 tons. [TONNAGE.]

4. A certain quantity of timber, as 40 feet of rough or round timber, and 50 feet of hewn.

5. The quantity of 8 sacks or 10 barrels of flour.

6. The quantity of 10 bushels of potatoes.

-tón, suff. [A.S. *tún* = a fence, a town.] A frequent suffix in place names, as Southampton, Wolverton, Merton, &c.

tó'-nal, a. [Eng. *ton*(e); -al.] Pertaining to tone.

tón'-nal-ite, s. [After Tonal, south of Monte Adameilo, Southern Tyrol, where first found; suff. -ite (Petrol.).] Petrol.: A variety of quartz-diorite rich in magnesia-mica.

tó-nál'-ý-tý, s. [Fr. *tonalité*.] [TONE, s.]

Music: (1) Correctness of pitch; as when a singer or violinist is said to exhibit correct or doubtful tonality; signifying the production of sounds in tune or out of tune. (2) Quality of tone, intonation, as when a singer or violinist is said to possess pure tonality, that is, to produce a pure quality of tone. (3) Key-relationship; as when a melody or passage in harmony is said to be of uncertain tonality, that is, to be wanting in definiteness of key or scale.

"On the other hand, in some of the settings the frequent changes of measure and tonality produce an uneasy and laboured effect." Athenæum, Dec. 27, 1884.

tón-dí'-nō, s. [Ital.] Arch.: The same as ASTRALAG (q.v.).

tóne, *toone, s. [Fr. *ton* = a sound, a tune, from Lat. *tonum*, accus. of *tonus* = a sound, from Gr. *τόνος* (*tonos*) = a thing stretched, a rope, sinew, note, tone, from the sound of a stretched string; *τένω* (*teinō*) = to stretch; Sp. *tono, ton*; Port. *ton*; Ger. & Sw. *ton*; Dan. *tone*; Dut. *toon*; Ital. *tuono, tono*.] I. Ordinary Language: 1. In the same sense as II. 1.

2. Modulation, inflection, or accent of the voice, as raised to express sentiment, emotion, or passion.

"He paused awhile, and then went on With low and confidential tone." Scott: *Katey*, vi. 7.

3. An affected or whining style of intonation in speaking or reading; a mournful or artificial mode of utterance; a whine, a drawl, a singsong.

"Every appearance of singsong and tone must be carefully guarded against." Blair: *Rhetoric*, lect. xxxiii.

4. Tenor, character, spirit, strain; specifically the general or prevailing character or style, as of morals, manners, sentiments, or

the liks: as, The tone of society was very low; the tone of his letter was friendly.

5. Disposition, inclination, temper.

"I cannot deny such a precept is wise; But retirement accords with the tone of my mind." Byron: To the Rev. A. T. Becker.

6. State or temper of mind; disposition, mood.

"Drag the mind down by perpetual interruptions, from a philosophical tone, or temper, to the drudgery of private and public business." Boettingbrooke: Letter to Pope.

7. The state of a body in which the animal functions are healthy and performed with due vigour; the state in which all the parts and organs are well-strung or in due tension—strength and activity of the organs.

"The melancholic friend (that worst despair Of physic) hence the rust-complexion'd man Pursues, whose blood is dry, whose fibres pale Too stretch'd a tone." Armstrong: On Health, l.

II. Technically:

1. Music:

(1) A sound: as, high tone, low tone, tone of an instrument.

(2) Quality of a sound (Fr. timbre; Ger. Klang): as, sweet tone, harsh tone. Any ordinary sound is compound, being made up of a combination of sounds called partial-tones; the sound which the ear recognizes and names is called the primary, or first partial; those combined with it, upper partials. It is found by experiment that the character or quality of tone of any given sound is dependent on the sort of partial-tones which constitute it. It is difficult to produce a simple sound, i.e., a sound without upper partials, and its character is poor and insipid.

(3) A chant: as, a Gregorian tone.

(4) A mode or scale: as church-tones, the ancient ecclesiastical notes.

(5) The interval consisting of two mean semitones in equal temperament. But in just intonation there are two kinds of tone, the major tone (9 : 8) and the minor tone (10 : 9).

2. Paint: The prevailing colour of a picture or its general effect, denominated dull tone, bright tone, &c. It depends first, upon the right relation of objects in shadow to the principal light; secondly, upon the quality of colour, by which it is felt to owe part of its brightness from the hue of the light upon it.

"All in a tone: Unanimous.

"All were in a tone." Richardson: Sir C. Grandison, III, 281.

tone-syllable, s. An accented syllable.

*tone, v.t. [TONE, s.]

1. To utter in an affected tone.

2. To tune (q.v.).

¶ 1. To tone down:

(1) Lit.: In painting, to soften or subdue the colour of, as of a picture, so as to produce an undisturbed harmony of tint, and avoid all undue glare.

"Until time and gas have conveniently toned down the brilliancy of the colour."—Daily Telegraph, Sept. 7, 1888.

(2) Fig.: To reduce or lower in tone; to moderate or reduce the characteristic expression of; to render less pronounced or decided; to soften.

"Sir De Lacy having toned down his original phrases."—Punch, Feb. 15, 1858.

2. To tone up: To give a higher tone or character to; to raise in tone; to make more expressive, pronounced, or decided; to heighten, to strengthen.

*tone, s. or pron. [Eng. one, with the final t of A.S. ðrot = that, the neuter definite article, prefixed.] The one, corresponding to tother (q.v.). Generally with the: as, the tone = that one.

"Tone doth enforce, the other doth entice." Sir P. Sidney.

toned, a. [Eng. ton(e), s.; -ed.]

1. Having a tone; used in composition: as, sweet-toned, &c.

2. Having a tone of body or mind; in a state of due tension; strung.

"It may be doubted whether there ever existed a human being whose mind was quite as finely toned at eighty as at forty."—Macaulay: Hist. Eng., ch. xiv.

toned-paper, s. Paper having the glaring white taken off by a creamy tint.

tone-less, a. [Eng. tone, s.; -less.] Having no tone; unmusical.

"Gravecourt's toneless drawl."—G. Elliot: Daniel Deronda, ch. xxix.

*tóng (1), *tonge, s. [TONOS.]

tóng (2), s. [TONOVS.] A tongue; the catch of a buckle.

"Their bills were burnished gold, and handle strong. Of mother pearl, and buckled with a golden tong." Spenser: Todd.

*tóng, v.t. [TONG (1), s.] To seize or take with tongs.

"Tonging clams with the hinged oyster-tongs is also somewhat practised, but is exceedingly laborious, and does not pay, as a rule."—Field, Oct. 16, 1886.

tón-ga, s. [TONKA.]

tóng-káng, s. [Native word.]

Naut.: A Malay or Chinese boat or junk.

Tón-grí-an, a. [See def.]

Geog.: Of or belonging to Tongres, in Belgium.

Tongrian-beds, s. pl.

Geol.: Beds constituting the Lower Oligocene of Belgium, developed around Tongres. They are marine, and are contemporaneous with the Headon series of England.

tóngs, s. pl. [A.S. tonge, tang; cogo, with Dut. tang; Icel. tóng (tangir); Dan. tang; Sw. tång; Ger. zange; O. H. Ger. zanga.] An implement or tool consisting of two parts joined by a pivot, and used for grasping objects, generally those that are hot, as blacksmiths' tongs, crucible-tongs, and fire-tongs.

tóngue, *tong, *tonge, *tunge, s. [A.S. tunge; cogn. with Dut. tong; Icel. & Sw. tunga; Dan. tunge; Ger. zunge; O. H. Ger. zunga; Goth. tuggo; O. Lat. dingua (Lat. lingua, whence Fr. langue); Ir. & Gael. teanga = a tongue, a language.]

* I. Ordinary Language:

1. In the same sense as II. 1.

"Sende Lazarus that he maye dypp of his finger in water, and cole us in tongs: for I am tormented in this flame."—Luke xvi. 21. (1851.)

2. Regarded as the instrument of speech.

"Keep a good tongue in your head."—Shakspeare: Tempest, III, 2.

3. A medium of speech, or of expressing thoughts.

"The man to solitude accustomed long, Perceives in everything that lives a tongue." Cooper: The Nestled Alarm.

4. Speech, discourse, talk; sometimes fluency of speech.

"Much tongue and much judgment seldom go together; for talking and thinking are two quite different faculties."—L'Escurage.

5. Manner of speaking.

(1) With respect to sound = voice.

"With soft low tongue." Shakspeare: Taming of the Shrew, Induct. 1.

(2) With respect to meaning or expression.

"Mince not the general tongue." Shakspeare: Antony & Cleopatra, I, 2.

6. The whole body of words used by a nation; a language.

"And whanne summe herden, that in Ebrew tunge he spak to hem, thei ghaue the mure alleue."—Wycliffe: Genesis xxii.

* 7. A nation, as distinguished by its peculiar language.

"I will gather all nations and tongues."—Isaiah lxvi. 18.

8. Words or declaration only; mere speech or talk, as opposed to thoughts or actions.

"Let us not love in word, neither in tongue, but in deed and in truth."—John III, 18.

* 9. A vote, a suffrage.

"Your suet for tongues." Shakspeare: Coriolanus, II, 6.

10. The clapper of a bell.

"The midnight bell, Did, with his iron tongue and brazen mouth, Sound on." Shakspeare: King John, III, 8.

11. Something more or less resembling the tongue of an animal.

(1) The pin in a buckle which pierces and holds the strap.

(2) The movable arm of a bevel, the principal member being the stock, which forms the case when the instrument is closed. [BEVEL.]

(3) The pointer of a balance.

(4) A tapering jet of flame.

(5) A piece of leather stitched to the front of a laced shoe or boot.

(6) A point, or long narrow strip of land running into a sea or lake; a long, low promontory.

II. Technically:

1. Anatomy:

(1) Human: A muscular organ in the mouth, covered with mucous membrane, the muscular

structure rendering it of use in mastication, deglutition, and the articulation of speech, while the mucous membrane, which is endowed with common and tactile sensibility, constitutes it the seat of the sense of taste. The tongue occupies the concavity of the arch of the lower jaw; its basal or hinder part is connected with the hyoid bone, while beneath it is attached by means of the genio-glossus muscle to the lower jaw. The tongue is marked along the middle for nearly its whole length by a slight furrow called the raphe, often terminating behind in a depression called the foramen cœcum, within which mucous glands open. The upper surface of the tongue in front of the foramen is covered with small eminences called papillæ, some circinnulate, others fungiform, and the rest filiform, the last being the most numerous. Behind these are numerous small racemose glands, called lingual glands.

(2) Compar.: The tongue of the lower mammals is essentially on the same model; that of most birds is small, thin, cartilaginous, or cased in horn, like the mandibles, and is an organ of prehension rather than of taste, there being, however, some exceptions, as the Parrots, which have soft and fleshy tongues, which is perhaps the reason why they can imitate the human voice. A horny tongue is a prolongation of the hyoid bone. The tongue of the snakes consists of two muscular cylinders, united at the base, but free towards the tip. Three types of tongue exist among the lizards. In most of the order it is long, protrusible, and forked; in a second division it is thick, fleshy, and not protrusible, and in a third, containing the chameleons, it is long, protrusible, and clavate at the tip. In fishes the tongue is often covered with teeth, and is an organ of prehension rather than of taste. There is a distinct tongue constituted by the central part of the ligula in bees. The Cephalopoda have a muscular tongue, part an organ of taste, and in part developed into a lingual ribbon or odontophore. The Gastropoda in many cases have a tongue, a lingual ribbon, odontophore, or radula.

2. Carpentry:

(1) A fin on the edges of a plate or board, adapted to fit into a groove of an adjacent board. Also used in sailing parts of machinery.

(2) The tapering, projecting end of a timber, worked down to lay upon an edge, or scarf to another timber.

3. Music: The vibrating, metallic reed in instruments like the harmonium, concertinas &c.

4. Nautical:

(1) The upper main piece of a built mast.

(2) A rope spliced into the upper part of a standing back-stay.

5. Pathol.: The tongue is liable to hæmorrhage, hypertrophy, inflammation, abscess, cancer, &c.

6. Railway: The short movable rail of a switch, by which the wheels are directed to one or the other lines of rail. [SWITCH.]

7. Vehicles: The single shaft or pole which, in two-horse vehicles, is attached to the fore-carriage, and is the means of guiding and drawing.

¶ 1) Confusion of Tongues:

Script. Hist.: The penalty inflicted on the builders of Babel when God so confounded their language that they could not understand each other, though up to that time there had been among them only one language. The result was that the building of the tower was abandoned, and those who had been engaged in its erection were dispersed over various lands (Gen. xi. 1-9).

(2) Gift of tongues:

Theol. & Church Hist.: A gift bestowed in connexion with the Pentecostal descent of the Holy Spirit. When the members of the church had assembled with one accord on the Jewish day of Pentecost, suddenly a mighty, rushing wind entering pervaded the building, in which they had assembled, cloven tongues as of fire descended on each, and those on whom they were bestowed began to speak with "other tongues, as the Spirit gave them utterance,"—the Parthians, Medes, Elamites, and others, who repaired to the place when news of the miracle reached them, bearing testimony to its reality (Acts II, 1-21). Three explanations of this mysterious gift have been offered: (1) That on the day of Pentecost the disciples re-

fâto, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôt, or, wôre, wôlf, wôrck, whô, sôn; müte, oùb, cûre, ûnite, cûr, rûle, fûll; trÿ, Sÿ-rian. æ, œ = ê; ey = â; qu = kw.

ceived a supernatural knowledge of all such languages as were needed for their work as evangelists; (2) that the gift consisted in the impression produced on the hearers, and that the words uttered by the disciples in Aramsio were heard by those who listened as in their native speech; (3) that the "tongues" consisted of ecstatic bursts of praise which the disciples might have heard uttered at previous feasts of Pentecost by foreign pilgrims. In this case there would be a supernatural exaltation of memory, not a miraculous knowledge of words never heard before; and (4) that they were cries of ecstatic devotion of no definite significance except to those who uttered them.

(3) To have on (or at) the tip (or end) of the tongue: To be on the point of uttering or telling. (Richardson: Pamela, i, 205.)

(4) To give tongue: To bark as hounds after the animal pursued.

(5) To hold one's tongue: To keep silence.

(6) To keep one's tongue: To keep silence.

(7) To wag one's tongue: To speak out of season.

tongue-and-groove joint, s.

Carp.: A mode of joining wood-stuff in which a long fin on the edge of one board is made to fit into a corresponding groove on the edge of the other board.

TONGUE-AND-GROOVE JOINT.

tongue-banger, s. A scold. (Tennyson: Northern Cobbler.)

*** tongue-battery, s.** A flood of talk. (Milton: Samson Agonistes, 404.)

tongue-bit, s.

Manège: A bit having a stiff mouth, to which is attached a plate or shield so placed as to prevent the horse getting his tongue over the mouth-piece.

† tongue-bleeder, s.

Bot.: *Galium Aparine*. So called because its stiff bristles lacerate the tongue if drawn across it.

tongue-chains, s. pl. The chains by which the fore-end of the tongue is supported from the hames of the wheel-horses. They may be distended by the spreader-stick.

tongue-compressor, s. A clamp for holding down the tongue during dental operations on the lower jaw.

tongue-depressor, s.

Surg.: An instrument which has a socket to go beneath the lower jaw and form a fulcrum for the pivoted spatula which rests upon and holds down the tongue during oral, laryngeal, and œsophageal examinations and operations. A tongue-spatula.

*** tongue-doughty, a.** Boasting, bragging. (Milton: Samson Agonistes, 1, 180.)

*** tongue-fence, s.** Debate, discussion, argument. (Carlyle: Life of Sterling, ch. v.)

tongue-grafting, s.

Hort.: A mode of grafting by inserting the end of a scion in a particular manner.

*** tongue-man, s.** A speaker.

"I am no tongue-man."—Hist. Edward II, p. 55.

*** tongue-pad, s.** A great talker, a chatterer.

"She who was a celebrated wit at London, is in that dull part of the world, called a tongue-pad."—Tatler.

tongue-shaped, a.

I. Ord. Lang.: Shaped like a tongue.

II. Technically:

1. Anthropol.: A term introduced to denote a class of pointed flint implements which bear a general resemblance in shape to a tongue.

"I would rather follow the nomenclature of the French quarrymen, who have given the name *langues de chat* to these implements; and term them *tongue-shaped*."—Brewster: Ancient Stone Implements, p. 364.

2. Bot.: Long, fleshy, plano-convex, obtuse, as the leaf of *Sempervivum tectorum* or of some aloes.

*** tongue-shot, s.** The reach of the

tongue; the distance to which the sound of words uttered by the tongue can reach; ear-shot.

"She would stand thimble aloof, out of tongue-shot."—O. Beade: Cloister & Hearth, ch. liii.

tongue-spatula, s. The same as TONGUE-DEPRESSOR (q. v.).

tongue-support, s. A device on the tongue-hounds of a wagon to keep the forward end of the tongue elevated and prevent its weight bearing on the necks of the horses.

*** tongue-tacked, a.** Tongue-tied (q. v.).

tongue-test, s.

1. Elect.: A familiar test consisting in the application of a wire to the tongue, which gives a sensation, sharp or otherwise, according to the condition of the line.

2. Eng.: A test of pyroligneous or nitric acid, used in determining the strength of an etching solution.

tongue-tie, s.

Pathol.: A common congenital defect in children, in which the anterior part of the tongue is attached to the floor of the mouth by a mucous-fibrous band (the *frenum linguae*). It is easily remedied by dividing the band.

"A too-high palate, *tongue-tie*, &c., each tends to cause its own special articulatory defect."—Foster, Field, & Brisbane: Management of the Eye, Ear, and Throat, p. 283.

*** tongue-tie, v. t.** To deprive of speech or the power of speech, or of distinct articulation.

"That extreme modesty and bashfulness which ordinarily *tongue-ties* us all in good company."—Goodman: Winter Evening Conference, pt. 1.

tongue-tied, * tongue-tacked, a.

1. Lit. & Pathol.: Having the anterior part of the tongue attached to the floor of the mouth by the *frenum linguae*.

"If an infant cannot suck, it must not be forgotten that the reason may be that it is *tongue-tied*."—Butlin: Diseases of the Tongue, p. 22.

2. Fig.: Unable to speak freely from any cause; allenced. (Shakespeare: Sonnet, 66.)

*** tongue-valiant, a.** Valiant or bold in speech or words only; brave in words, not in action.

tongue-worm, s.

Zool.: Any individual of the genus *Pentastoma* († *Linguatula*). They are found in the frontal sinuses, lungs, and viscera of some mammals, and in the lungs of some birds and reptiles.

tongue, v. t. & i. [TONGUE, s.]

A. Transitive:

*** I. Ordinary Languages:**

- To speak; to utter. "Such stuff as madmen tongue."—Shakespeare: Cymbeline, v. 4.
- To accole, to chide.
- To brand, to denounce publicly. "But that her tender shame Will not proclaim against her maiden loss, How might she tongue me!"—Shakespeare: Measure for Measure, iv. 4.

II. Technically:

- Carp.*: To connect, as boards, by means of a tongue and groove.
- Music*: To modify, as tones or sounds with the tongue, in playing, as in the flute and some other wind instruments.

B. Intransitive:

- Ord. Lang.*: To talk, to prate. "Let his clack be set a-going, and he shall tongue it as impudently as the arrantest hero of the play."—Dryden: Grounds of Criticism.
- Music*: To use the tongue for the purpose of modifying sounds in playing the flute and some other wind instruments. [DOUBLE-TONGUING.]

tongued, a. [Eng. *tongue*], s.; -ed.] Having a tongue. (Usually in composition, or qualified by an epithet.)

"Fame was a har, too long and loud tongued."—Beaumont & Fletcher: Loyal Subject, iv. 3.

tongued-chisel, s. A boring-chisel which has a long, downwardly projecting blade, and shoulders which form reamers.

tongue'less, * tongue'lesse, a. [Eng. *tongue*; -less.]

- Having no tongue; destitute of a tongue.
- Speechless.

"Which blood, like sacrificing Ahele's, cries, Even from the tongueless caverns of the earth."—Shakespeare: Richard II, l. 1.

*** 3. Unnamed; unspoken of.**

"One good deed dylog *tonguesless*, Slaughters a thousand, waiting upon that."—Shakespeare: Winter's Tale, l. 2.

*** tongue'let, s.** [Eng. *tongue*; dimin. aff.-let.] A little tongue; a little tongue-shaped process.

*** tongue'sore, s.** [Eng. *tongue*, and *sore*.] An evil tongue; wicked speech, ill-speaking. "Imputing his *tonguesore*, not unto his malice, but unto the default of right knowledge."—Vulgate: Aposch. of Erasmus.

† tongue'ster, s. [Eng. *tongue*; suff. -ster.] A talkative person; a chatterer.

"The *tonguessters* of the court."—Tennyson: Last Tournament.

*** tongue'ney, * tongue'u'y, a.** [Eng. *tongue*; -y.] Voluble or fluent in speech; loquacious, garrulous. (Wycliffe: Ecclesi. viii. 4.)

tōn'yo, a. & s. [Lat. *tonicus*, from Gr. *τονικός* (*tonikos*) = relating to stretching; *τόνος* (*tonos*) = a thing stretched; Fr. *tonique*; Sp. & Ital. *tonico*.] [TONE, s.]

A. As adjective:

I. Ordinary Languages:

- Of or pertaining to tones or sounds. "To the judicious performance upon this solemn instrument [the organ] my observations now naturally recur. In point of *tonic* power, I presume it will be allowed preferable to all others."—Mason: On Church Music.
- Of or pertaining to tension; increasing tension.

II. Technically:

- Music*: Pertaining to, or founded on the key-note or tonic; as, the *tonic* chord (the notes c, e, and g sounded simultaneously).
- Pharm.*: Increasing the tone, health, and strength of the body or of its organs; corroborative, bracing.

B. As substantive:

- Music*: (1) The key-note of any scale; the ground-tone or basis of a scale or key. (2) The key-chord in which a piece is written and with which it concludes.
- Pharm. (Pl.)*: Medicines which increase the tone of any part of the bodily frame. Garrod enumerates four classes of them:

- (1) *Blood Tonics*, called also Anæmic Tonics or Blood Restoratives, as various salts of iron, cod-liver oil, &c.
- (2) *Nervine Tonics*, as nitrate of silver, oxide of silver, sulphate of zinc, salts of iron, strychnia, &c.
- (3) *Stomachic Tonics*, as calumba, gentiana, quassia, boys, sulphate of quinine, &c.
- (4) *Vascular Tonics*, called also Vascular Stimulants, as various salts of ammonia, oil of turpentine, camphor, &c.

tonic sol-fa, s.

Music: A system of musical notation by which the staff, clefs, key-signatures, and time-signatures of music are dispensed with, and the sounds are represented by initial *alleggio*-letters, placed between upright bars, subdivided as required for the various rhythms. In modern music there is but one diatonic scale, and "key" may be defined as the position of a scale, and "modulation" as the shifting of a scale in pitch. Many attempts have been made from time to time since the seventeenth century to provide aids with a notation by means of which the diatonic scale could under one form be used for all keys. Miss Glover, of Norwich, suggested the use of a movable *doh*, and the representation of the sounds by initial letters. The value of the idea was at once seen by the late John Curwen, who devoted his life to the development and propagation of the system and method of teaching it. The scale stands thus (*te* representing the Italian *si*):

d r m f s l t d, &c.

By writing at the head, Key c, Key c♯, Key n, &c., the singer finds a true representation of the scale in any key. For example, the tune "God save the Queen" may be written in fifteen different keys (each with a different signature) on the staff, whereas it can only be written one way in tonic sol-fa, the direction for key being simply written above and altered when required:

d d r t; d r m f m r d, &c.

As modulations occur, one note of the old scale is linked to a note of the new scale, thus forming a "bridge"—e.g., to modulate from key c into key o, the s of the old key becomes the d of the new; from key c into key f, the f of the old becomes the d of the

new, and so on. The minor scale starts from the note *la*. The time-notation of the tonic sol-fa goes back also to first principles—2, 7, by dividing the upright bars by a colon thus, | : |, any duplie time is represented, from two semibreva in a bar to two demisemiquavers. Similarly, | : : | is all that is required for the triple time, | : : : | for the quadruple time, and so on. It will be at once seen that the "up and down" of pitch is not represented to the eye as on the staff, but, on the other hand, the tonic sol-fa signs display the relationship of every note to the scale from which it is taken; this is not necessarily expressed on the staff. The value of tonic sol-fa as a basis of musical education is now generally acknowledged.

tonic sol-faist, s. One who teaches or who learns music on the tonic sol-fa system; one who advocates the tonic sol-fa system of teaching music.

tonic-spasm, s.

Pathol.: A convulsion in which the muscular contractions are partial, of considerable duration, and without unconsciousness, the affected muscles themselves being hard.

***tôn-ic-al, a.** [Eng. *tonic*; -al.] Tonic.

"One kind of motion relating unto that which physicians do name extensive or tonical."—*Browne's Vulgar Errors*, bk. iii. ch. 1.

tô-nig'-i-tÿ, s. [Eng. *tonic*; -ity.]

Physiol.: That property of the muscles by which they preserve a certain degree of firmness and slight contraction, best seen in the sphincters. Tonicity appears to be under the influence of the nervous system, since it is lost as soon as the nerve distributed to a muscle is divided, the muscle immediately becoming flaccid and relaxed.

tôn-ing, s. [Eng. *ton(e)*; -ing.]

Photog.: The treatment of a positive photographic print with a weak solution of gold, in conjunction with other modifying chemical salts, by which the whole or a portion of the deposit of metallic silver is replaced by metallic gold in fine division. The effect is to give permanency to the print, and to modify the disagreeable colour, and substituting various shades of purple, black, blue, brown, and gray.

***tôn-ish, *tôn-nish, a.** [Eng. *ton* (1); -ish.] In the ton; fashionable.

"A pretty, languid, tonish young man."—*Mad. D'Arblay's Diary*, i. 20.

***tôn-ish-néss, s.** [Eng. *tonish*; -ness.] Fashion. (*Mad. D'Arblay's Diary*, i. 350.)

tôn-ite, s. [Eng. *gun-cotton*; -ite.]

Chem.: An explosive, originally called Cotton-powder (said to have been invented by a Mr. Mackie, and manufactured at Faversham in the year 1873. It consisted of a mixture of gun-cotton and barium nitrate in about equal proportions. Its explosive force is somewhat less than that of either gun-cotton or dynamite.

***tôn-i-trant, a.** [Lat. *tonitrus* = thunder.] Thundering.

"With tonitruous tones and redundancy of action."—*All the Year Round*, v. 167. (1874.)

***tôn-i-troüs, a.** [Lat. *tonitrus* = thunder.] Thundering. (*Z. Brown's Works*, iii. 142.)

tôn-ka, tôn-ga, tôn-gô, tôn-quin, s. [From the Guianan name of the tree.] (See compound.)

tonka-bean, s.

Bot., &c.: *Dipterix odorata*, called also *Coumarouna odorata*. It is a tree from Guiana, much branched at the top, with large, alternate, pinnate leaves, racemes of flowers, and almond-like legumes. The kernels are very fragrant, and used in the manufacture of annif, and are put into chests to communicate a pleasant odour to the clothe and to drive away insects. They are sold ordinarily under the corrupted name of Tonquin-beans, as if they came from Tonquin.

Tonka-bean wood:

Bot.: *Alyria buxifolia*.

tôn-nage (age as ig), s. [Eng. *ton* (2); -age.]

1. The weight of goods carried in a boat or ship.

2. **Naut.:** The carrying capacity of a vessel.

It is actually equivalent to the difference between the weight of the water displaced by the vessel when light, and that displaced by her when loaded to the greatest safe depth of immersion. Different rules for calculating the tonnage have been legally established in different countries, some of which have frequently given results varying widely from the true amount which might be safely carried. In deep, full-built ships the actual capacity was always largely in excess of the government-registered tonnage. The ton measurement upon which freight is charged is calculated at 40 cubic feet; the difference between that and the ton of 100 cubic feet, or that of the register, represents the dead weight or displacement of the ship when light, or 60 per cent. of the whole, 40 per cent. only being available for the power for cargo. By the old law it was provided that from the extreme length of the vessel there should be deducted three-fifths of the breadth; the remainder was multiplied by the breadth, and the product by the depth, which, in the case of a double-decked vessel, was arbitrarily assumed as being equal to one-half the breadth; the latter product was then divided by 95, and the quotient was taken as the legal tonnage on which tonnage dues were to be paid. It was thus made the interest of owners to build excessively deep ships, the law in this way discriminating in favour of clumsy, slow, and inefficient ships, and discouraging attempts at improvements in model. Under the system which is at present used vessels are, for the purpose of ascertaining their tonnage, divided as follows: Not exceeding 50 ft. in length into 4 parts; 120 ft. into 6 parts; 180 ft. into 8 parts; 225 ft. into 10 parts, and over 225 ft. into 12 parts. In steam-vessels the length, breadth, and height of the engine-room are multiplied together, the product divided by 100, and the result deducted from the gross tonnage. The space occupied by a propeller-shaft is considered as a part of the engine-room. The actual depths between decks are measured and taken as factors, and any closed-in space on or above the upper deck, and capable of receiving cargo, &c., is included in the measurement. The dimensions are all taken in feet and decimals of a foot, and the number 100 is used as the final division for ascertaining the capacity of the ship in tons.

¶ **Tonnage and Poundage:** [TUNNAGE, ¶.]

tonne, s. [Fr., a nautical term = a weight of a thousand kilogrammes.] A measure of weight or of force on the C.G.S. system of units. [C. G. S.]

¶ In measuring work, a tonne-metre is = 9.81 x 10¹⁰ ergs nearly. (*Ibid.*)

tôn-nér, s. [Eng. *ton* (2); -er.] A vessel of a certain tonnage. (Used in composition.)

"The allowance between an 80-tonner and a 40-tonner."—*Field*, April 4, 1885.

***tôn-nish, a.** [TONISH.]

***tôn-nish-néss, s.** [Eng. *tonnish*; -ness.] The quality or state of being in the ton or prevailing fashion; fashionableness.

tô-nôm-ê-ter, s. [Gr. *τόνος* (tonos) = a tone, and *μέτρον* (metron) = a measure.] An instrument, invented in 1834 by Scheibler and improved by König, for determining the exact number of vibrations per second which produce a given tone, and for tuning musical instruments.

tô-nôm-ê-trÿ, s. [Eng. *tonomet(er)*; -ry.] The act of measuring vibrations of tones by means of a tonometer.

"Tonometry was first placed on a scientific basis by a badly written, but extremely valuable, little pamphlet of 80 pages and 4 lithographic plates, published at Essen, 1834, and entitled 'The Physical and Musical Tonometer (Tonometer), which proves by the pendulum, visible to the eye, the absolute vibrations of tones, and of the principal genera of combination tones, as well as the most definite exactness of equally tempered and mathematical chords, invented and executed by Heinrich Scheibler, silk-ware manufacturer in Crefeld.'"—*A. J. Ellis, in Athenæum*, Dec. 2, 1876, p. 731.

***tôn-ôüs, a.** [Eng. *ton(e)*, a.; -ous.] Full of tone or sound; sonorous.

***tôn-sôr'-i-al, a.** [Lat. *tonsorius*, from *tonsor* = a barber.] Pertaining to a barber or his art.

"The tonsorial operation is happily not performed on the stage."—*Queen*, Sept. 28, 1884.

tôn-sure (s as sh), s. [Fr., from Lat. *tonsurâ* = a shearing, clipping, or pruning, from *tonsurâ*, pa. par. of *tondeo* = to shear, to clip, to shave.]

I. Ordinary Language:

1. The act of clipping or shaving.

"They were forbidden to use a particular tonsure of the hair; because a neighbouring nation used it in honour of a dead prince whom they worshipped."—*Sp. Horley: Sermons*, vol. III, ser. 33.

2. The state of being clipped or shaved.

II. Eccles. & Church History:

1. The shaving of the crown in a circle, which is a distinguishing mark of clerics in the Roman Church. Most of the mendicant and cloistered orders allow only a narrow strip of hair to grow round the head, all above and below being shaved; the tonsure of secular clerics is small. The tonsure is a necessary preliminary to entering the clerical state, whether secular or religious; in the former case it is conferred by the bishop of the diocese, in the latter by the head of the religious house, if a nited abbot. It invests the receiver with all the privileges of a cleric, and furnishes a means to distinguish the higher from the lower clergy, as the extent of tonsure increases with the rank till the priesthood is reached. Writers of the seventh and eighth centuries distinguish three kinds of

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôl, or, wôre, wôlf, wôrk, whê, sôn; mûte, cûb, eûre, unîte, cûr, râle, fâll; trÿ, Sÿrian. æ, œ = ê; ey = â; qu = kw.

tonsure: (1) The Roman, or St. Peter's, in which only a circle of hair was left, common in France and Spain; (2) St. Paul's, which was entire, usual in the Eastern Church; and (3) the Celtic, or St. John's, adopted by the British and Irish Churches, in which the head was shaved in front of a lobe drawn from ear to ear. A violent controversy arose in the seventh century as to the comparative merits of the Celtic and Roman tonsures, but was eventually decided in favour of the latter, though its introduction nearly led to a schism.

2. The act of admission to the clerical state. At first it was never given without some minor order being conferred at the same time, but this practice ceased in the seventh century.

3. That portion of a priest's head which is made bare by shaving.

tôn-sure (s as sh), *v.t. & t.* [TONSURE, s.]

A. Trans.: To confer the tonsure on; to admit to the clerical state.

B. Intrans.: To confer the tonsure; to admit a person to the clerical state.

"It was only gradually that the right to tonsure was limited to bishops, abbots, &c. Till the tenth century it was given by simple priests, or even by laymen to one another."—*Addis & Arnold: Cash. Dict.*, p. 798.

tôn-sured (s as sh), *a.* [Eng. tonsure], *ed.*

1. Having received the tonsure; shaven; hence, clerical.

* 2. Having a bald spot on the head like a tonsure. (*Tennyson: Brook*, 200.)

tôn-tine, *s. & a.* [Fr. (See def.)]

A. As subst.: A species of annuity devised by an Italian named Lorenzo Toni. They were adopted in the first place by governments as a means of raising a loan. In return for a sum paid down the government engaged to grant annuities to a certain number of persons. When one died, his share was divided among all the survivors, and this process went on till only one was left, and he enjoyed the benefit of all the annuities himself, until his death, when the transaction ceased.

tonnage plan of insurance, phr. In the United States the tonnage system, as applied to life insurance, is less popular than formerly, although the policies still existing cover very large figures. Under a tonnage policy no dividends or returns of any kind are given the policy-holder for a certain number of years, termed the tonnage period, at the expiration of which the entire fund, with its accumulations, is divided amongst those who have kept their policies in force.

B. As adj.: Pertaining or relating to a tonnage; built by a subscription with the benefit of survivorship.

"It is a sort of Tontine colony—all for the benefit of survivors."—*Book: Gilbert Gurney*, vol. iii, ch. v.

* **tō-nŷ**, *s.* [An abbrev. of *Autony*.] A simpleton.

"When a man plays the fool or the extravagant presently he's a tony. Who drew this or that ridiculous piece? tony. Such or such a one was ever well taught: No, he had a tony to his master."—*L. Extrange: Translation of Quevedo*.

took, *s.* [TUCK (3), s.]

toól, * **tol**, * **tole**, * **toole**, *s.* [A.S. *tól* = a tool; cogn. with Icel. *tól* = tools.]

I. Literally:

1. An implement adapted to be used by one person, and depending for its effect upon the strength and skill of the operator; any instrument of manual operation, such as hammers, punches, chisels, planes, saws, drills, files, &c. It is, however, exceedingly difficult to define the line separating tools from machines, and of late it has become usual to embrace in the general term machine tools, such machines as the lathe, planer, slotting machine, and others employed in the manufacture of machinery; specif., applied—(1) in bookbinding, to the stamping and letter appliances of the finisher, known as hand, hand-letter, lettering, roller, edge, fillet, pallet, &c., according to purpose, construction, or pattern. (2) To the smaller sizes of the painter's brushes, as sash-tools, &c.

"Carpenter's art was the invention of Dredalus, as also the *tooles* thereto belonging, to wit, the saw, the chip, axe, hatchet, the plumb-line, the auger and winch, the strout giew, as also fish-giew, and stone sandre."—*P. Holland: Pilgrimage*, bk. viii, ch. lvi.

* The use of tools is nearly, but not quite, peculiar to man. Monkeys use stones as missiles and to break nuts, and elephants break off branches of trees to drive away flies. (*Darwin: Descent of Man*, pt. i, ch. ii.)

* 2. A weapon, a sword.

"Draw thy tool." *Shakesp.: Romeo & Juliet*, l. 1.

II. Fig.: A person used by another as an instrument to accomplish certain ends. (A word of reproach.)

"Such still to guilt lost Alla sends— Slaves, *toole*, accomplices—no friends!" *Byron: Bride of Abydos*, ll. 18.

* For the difference between tool and instrument, see INSTRUMENT.

* A poor tool: A bad hand at anything.

tool-car, *s.*

Rail.: A car carrying an equipment for repairing, replacing on the rails, or removing debris in case of accident.

tool-chest, *s.* A chest or box in which tools are kept.

tool-coupling, *s.* A screw coupling by which a drill, for instance, is connected to the bar, rod, haft, or whatever the handle may be properly called in a given case.

tool-extractor, *s.* An implement for recovering from drilled holes broken tools or portions of rods which may have become disconnected and fallen to the bottom.

tool-holder, *s.* A tool-handle; specif.,

1. **Lathe**: A device for holding lathe-cutters and similar tools firmly.

2. **Grind**: A device for accurately facing grindstones, and for uniformly holding tools while being ground.

tool-post, tool-stock, *s.*

Lathe: A device on the upper part of a slide-rest by which the cutter is held.

tool-rest, *s.*

Lathe: The portion of the lathe to which the tool is attached, and which has usually several adjustments; longitudinally and transversely of the shears, and vertically.

tool-stock, *s.* [TOOL-POST.]

tool-stone, *s.*

Anthrop.: The name given to oval or egg-shaped stones, more or less indented on one or both surfaces. Their use is not at present thoroughly understood. Some antiquaries suppose that they were held between the finger and thumb, and used as hammers or chippers. If, however, a large series is obtained, it will be found that the depression varies greatly in depth, and that sometimes the stone is completely perforated, which favours the view of those who regard these implements as sinkers for nets, or small hammer-heads. (*Lubbock: Prehistoric Times*, ch. iv.)

"An oval tool-stone, with a perforated hole at the centre, which had been drilled from side to side."—*Greenwell: British Burrows*, p. 248.

toól, *v.t.* [TOOL, s.]

1. To shape or dress with a tool. [TOOLING.]

2. To drive, as a mail coach or other vehicle.

"The crack coaches . . . were *tooled* by expert knights of the bench."—*Daily Telegraph*, Nov. 18, 1885.

toóled, *pa. par. or a.* [TOOL, v.]

I. Ordinary Language:

1. *Lit.*: In the same sense as 11.
2. *Figuratively*:
(1) Taste; palate. (*Dryden: Persius*, iii. 229.)
(2) Any projection resembling or corresponding to the tooth of an animal in shape, position, or office; a small, narrow, projecting piece, usually one of a set; as, (a) The tooth of a comb, a saw, a file, a card, a rake; (b) A cog of a wheel; (c) A tine or prong of a fork. In a mechanical sense, a term applied to a projecting lug, whose function is to tear, crumble, cut, or mash the object to which it is applied.

II. Technically:

1. *Anat. (Pl.)*: Bony developments of the skin appearing in the jaws of man and most other vertebrates. They are used for mastication. Man has two sets of teeth, the temporary, deciduous, or milk teeth, and the permanent teeth. The former are twenty in all, viz., ten in each jaw; and the permanent ones are thirty-two, viz., sixteen in each jaw. The temporary teeth in each jaw consist of:—1. 4; 2. 1; 3. 2; the permanent teeth of 1. 4; 2. 1; 3. 2; 4. 2; 5. 2; 6. 4. Of the deciduous teeth, the central incisors appear from the sixth to the eighth month; the lateral incisors from the seventh to the tenth; the first molars from the twelfth to the fourteenth, the canines from the fifteenth to the twentieth, and the second molars from the twentieth to the thirtieth. The first permanent molar appears at the age of six, the central incisors at seven, the lateral incisors at eight, the anterior premolars at nine, posterior ones at ten, the canines at eleven or twelve, second molars at twelve to thirteen; the third, or wisdom-teeth, at seventeen to twenty-five. The roots of the teeth are implanted in the alveoli of the jaws, which they fit accurately. The teeth of the upper jaw

slightly overhang those of the lower. A tooth consists of three portions, viz., a crown, a root, with a fang or fangs, and a neck. On making a section of a tooth, the hard substance of which it is composed is hollow within. The cavity is called the pulp-cavity, as it is filled by a soft, highly vascular, and sensitive substance called the dental pulp. The hard part of a tooth is composed of three substances—ivory or dentine, enamel, and a cement, or *crusta petrosa*. A tooth is formed in the same way as a hair. Among the lower vertebrates the teeth are so varied in number and character, and these variations are so correlated with other parts of the structure, that they are of primary value for the purpose of classification. For details, see the various orders (as Carnivora, Rodentia, Ruminantia, &c.). Recent birds have no teeth properly so-called (ODONTORHIS), but the name is applied to a notch in the bill of the more predatory species. It is large and conspicuous among the birds of prey, and one of the tribes of Percheria is called Dentirostrea. In Reptilia the character of the teeth, and especially the fact whether or not any of them constitute poison fangs, is of great importance. Among the Amphibia and Fishes the teeth greatly vary, but the differences are not so important for the purpose of classification as in the mammals. Among invertebrates, the word tooth is often employed for a notch in some organ or other; but in this case it is not homologous to the teeth of the vertebrates.

2. *Bot. (Pl.)*: Projections separated by indentations on the margin of a leaf, and resembling serrations, but with concave instead of straight edges.

¶ (1) *In spite (or despite) of one's teeth*: In open or direct defiance of; in opposition to every effort.

* (2) *In the teeth*: In direct opposition; directly in front.

"Dost thou jeer, and flout me in the teeth?"
Shakesp.: Comedy of Errors, ii. 2.

(3) *To cast (or throw) anything in one's teeth*: To taunt or reproach one with anything; to retort reproachfully.

"The thieves also, which were crucified with him, cast the same in his teeth."—*Matt.* xxvii. 41.

(4) *To one's teeth*: To one's face; in open opposition; openly.

"It warms the very sickness in my heart,
That I shall live and tell him to his teeth,
Thus diest thou." *Shakesp.: Hamlet*, iv. 7.

(5) *Tooth and nail* (Lit. = by biting and scratching): With all one's power; by all possible means of attack and defence.

(6) *To set the teeth on edge*: To cause a tingling or grating sensation in the teeth.

(7) *To cut one's eye-teeth*: To become shrewd and cunning, especially through experience.

It is often called the Miller's Dog and Penny Dog, though, according to some authorities, the first name is properly applicable only to young fish.

tōpe (3), s. [Pali *s'hapo*; Sansc. *s'hupa*.]

Archæol.: The popular name for a particular kind of Buddhist monument common in India and the south-east of Asia. The word *tope* has reference to the general form of the monument, which is a particular form of or development from the *tumulus* (q.v.), and may be (1) Memorial, built upon celebrated spots; (2) Dedicator, consecrated to the Supreme Buddha; or (3) Sepulchral, containing remains or relic, in which case they are properly

termed *Dagobas*, and are frequently found in temples. The other forms are usually independent structures. From Pali Buddhist writings it appears that *tope* were in existence before the time of Sakya, and were objects of reverence to the people. The oldest *tope* are in the shape of cupolas, generally spherical, but sometimes elliptical, resting on a cylindrical, quadrangular, or polygonal base, rising either in a straight or in an inclined line; or in terraces. The top, surrounded by a balcony of pillars, is generally crowned by a structure, generally quadrangular, but sometimes having the shape of an inverted pyramid, and over this is a roof in the shape of an inverted umbrella. Sometimes several umbrellas are present, placed one over the other, as is the case in a rock-out *tope* in Ajunta, where they assume somewhat the character of a spire. The largest *tope* were probably dedicatory; the most numerous are the sepulchral *tope*, built of all sizes, and of all kinds of material, according to the rank of the deceased. The cupola was intended to represent the water-bubble, the Buddhist symbol of the hollowness of the world; and the extended umbrella probably typified the royal dignity possessed by a Buddhist saint. The number of terraces and stories had likewise a symbolical import. The illustration represents a *tope* at Manikyala, in the Punjab.

TOPE.

was south-east of Jerusalem (Jer. xix. 3), and had been prepared of old for some king of Israel, or for Moloch (q.v.) (Isa. xxx. 33). Whatever its primary design, "high places" were erected there, and it became the chief seat of the worship of Moloch in Palestine (2 Kings xxiii. 10; Jer. vii. 31). Josiah not merely stopped that cruel form of idolatry, but defiled the place (2 Kings xxiii. 10; Jer. xix. 13), apparently by making it the receptacle of the filth of the capital. It became a burial ground, ultimately overcrowded with bodies (Jer. vii. 31, 32; xix. 6, 11). [GEBENNA, MOLOCH.]

"The pleasant valley of Hinnom, *Tophet* thence And black Gehenna called, the type of hell." Milton: *P. L.*, l. 404.

* His lord . . . delivered him to the tormentors, till he should pay all.—Matthew xviii. 34.

3. A large iron flesh-fork, used by cooks at sea.

II. Agric.: A heavy harrow with cutting teeth, used in English husbandry for breaking down stiff clods, or tearing up the surface-turf. It resembles a harrow, but runs on wheels, and each tine is a hoc or cutting-share.

* tor'-mēnt-rēss, * tor'-ment-resse, s. [Eng. torment; -ress.] A female who torments.

* The scourge and tormentress of glorie and honour.—P. Holland: Plinie, bk. xxviii., ch. lv.

* tor'-mēnt-rŷ, * tour'-ment-rie, s. [Eng. torment; -ry.] A torment, a torture.

* Than sayst thou, that it is a tourmentrie. Chaucer: C. T., 5,762.

tor'-mīn-ā, s. pl. [Lat.]

Pathol.: Severe gripping pains in the stomach, particularly in dysentery and kindred affections.

* tor'-mīn-ōūs, a. [TORMINA.] Suffering from or affected with tormina; characterized by tormina; gripping.

tōrn, pa. par. or a. [TEAR, v.]

1. Ord. Lang.: (See the verb).

2. Bot.: Irregularly divided by deep incisions.

tor-nā'-dō, s. [Sp. tornada = a return, from tornar = to return; Lat. torno = to turn (q.v.), with reference to the rotatory character of the storm.]

Meteor.: A whirlwind or rotating storm of extreme violence, usually coming on suddenly, extending over a width of a few hundred yards or less, and travelling rapidly, so that it remains but a brief time over any locality, but frightfully destructive in its effects. It appears to be a secondary result of a cyclone, but is far more violent than the latter within its limited area. It is generally accompanied by rain and lightning. Tornados occur in many countries, but are most frequent in the region west of the upper Mississippi, where large trees are uprooted or twisted off, towns occasionally obliterated, and many lives destroyed within a minute of time. Water-spouts, sand-whirls, &c., are of the same character.

tor-na-tēl'-lā, s. [Mod. Lat., dimin. from Lat. tornus = a turner's wheel, a lathe.]

Zool. & Paleont.: The type-genus of Tornatellidae (q.v.). Shell solid, ovate, with a conical, many-whorled apire; aperture long, nar row, rounded in front; outer lip sharp; columella with a strong, tortuous fold; operculum horny, elliptical, lamellar. Recent species sixteen, widely distributed in deep water. Fossil, seventy, from the Trias onward. Used also of any individual of the genus.

tor-na-tēl-lī-dōē, s. pl. [Mod. Lat. tornatella(l); Lat. fem. pl. adj. suff. -ide.]

Zool. & Paleont.: A family of Tectibranchista (q.v.). Shell external, solid, spirals or convoluted; sub-cylindrical; aperture long and narrow; columella plaited; sometimes operculated. Animal with a flattened, disc-like head, and broad, obtuse tentacles; foot ample, with lateral and opercular lobes. The shells of this family are chiefly extinct; they commence in the Coal-measures and attain their maximum in the Chalk.

tor-nā-tēl-lī-na, s. [Dimin. from Mod. Lat. tornatella (q.v.).]

Zool.: A genus of Helicidae, with twenty species, from Cuba, South America, the Pacific Islands, and New Zealand. Shell imperforate, ovate, or elongated, with a semi-lunar aperture, a twisted and truncated columella, and a one-plaited inner lip. (Woodward.)

tor-na-tī-nā, s. [TORNAELLA.]

Zool. & Paleont.: A genus of Tornatellidae (q.v.). Shell cylindrical or fusiform, apire conspicuous, suture channelled, columella plaited. Animal with broad head, rounded in front, with triangular tentacular lobes, eyes at their base; foot truncated in front. Twenty-four recent species, widely distributed on sandy bottoms, ranging to thirty-five fathoms. Thirteen fossil species, from the Tertiary.

* torne, v.t. or i. [TURN, v.]

* tor-ne-a-ment, s. [TOURNAMENT.]

† tor-nōg'-ra-phŷ, s. [Eng. &c., tornado, and Gr. γραφή (graphē) = a description, a delineation.] A description of tornadoes.

tōr'-ōse, tōr'-ōūs, a. [Lat. torosus, from torus = a round swelling place, a protuberance.]

1. Anat. & Zool.: Swelling into knobs, as the veins and muscles.

2. Bot.: Uneven, alternately elevated and depressed.

* tōr-ōs-i-tŷ, s. [Eng. torose(e); -ity.] The quality or state of being torose or torous.

bōll, bōy; pōūt, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, ðis; sin, aç; expect, Xenophon, exist. ph = f -elan, -tian = shan. -tion, -sion = shün. -tion, -gion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bel, dpl

tor-pé-din-í-dæ, a. pl. [Mod. Lat. *torpedo*, genit. *torpedinis*(æ); Lat. fem. pl. adj. suff. -í-dæ.]

1. *Ichthy.*: Electric Rays; a family of Batoidel, with six genera, chiefly from tropical and sub-tropical seas. The trunk is a broad, smooth disc; tail with a longitudinal fold on each side; a rayed dorsal generally, and a caudal fin always, present; anterior nasal valves confluent into a quadrangular lobe; an electric organ composed of vertical hexagonal prisms between the pectoral fins and the head.

2. *Palæont.*: A large fish of the general appearance of a Torpedo has been found in the Eocene of Monte Bolca; and Cyclobatis, from the upper cretaceous limestone of Lebanon, is probably another extinct representative of this family.

*tor-pé-din-oús, a. [Lat. *torpedo*, genit. *torpedinis* = a torpedo (q.v.).] Of or pertaining to the torpedoes; resembling s torpedoes; exerting a numbing influence.

tor-pé-dō, s. [Lat., from *torpeo* = to be numb or torpid q.v.]

I. *Ichthyology*: (1) The type-genus of Torpedinidæ (q.v.), with the characters of the family. There are six species distributed over the Atlantic and Indian oceans; three of these occur in the Mediterranean, and two, *Torpedo marmorata* and *T. hebetans*, are sometimes found on the British coast. The electric organs consist of many perpendicular prisms, mostly hexagonal, the whole forming a kidney-shaped mass. Each column in the living fish appears like a clear trembling jelly. Hunter counted 470 of these columns in a specimen of *T. marmorata*, and says that the partitions between them are full of arteries, which bring the blood direct from the gills. These organs convert nervous energy into electricity. Each organ receives one branch of the trigeminal and four branches of the vagus, the former and the three anterior branches of the latter being each as thick as the spinal cord. The fish gives the electric shock voluntarily, to stun or kill its prey or in self-defence; but to receive the shock the object must complete the circuit by communicating with the fish at two distinct points, either directly or through the medium of some conducting body. The force of the discharge varies with the size and vigour of the fish; large and healthy specimens can inflict severe shocks sufficient to disable a man. The electric currents generated in these fish possess all the other known powers of electricity: they render the needle magnetic, decompose chemical compounds, and emit sparks.

TORPEDO MARMORATA.

(2) The common name of any individual of the genus. One of the best known species is *Torpedo marmorata*. (See illustration.) It is dark brown in colour, lighter round the eyes. Specimens have been taken weighing a hundred pounds, but they usually average about half that weight, with the disc about thirty inches broad. *T. hebetans*, more rarely met with, is dark chocolate-brown above, white beneath. *Torpedo occidentalis* is a well-known American species.

*Torpedoes deliver their opium at a distance, and stately beyond themselves."—*Brownie: Vulgar Errors*, bk. III, ch. vii.

2. *Ordn.*: A vessel or engine charged with an explosive which is fired by contact, by concussion, or by electricity. Torpedoes are divided into—

(1) *Naut.*: These may be sub-divided into five classes: (a) drifting, (b) anchored, (c) boom, (d) locomotive, (e) manœuvred.

(a) The drifting preceded the boom and manœuvred, and was adapted for circumnavigation and positions where it might be allowed to drift with the stream or tide against a vessel in a river or channel or lying at anchor.

(b) The anchored torpedo is, in fact, the submarine mine, and is a caisson charged with gunpowder, gun-cotton, or dynamite, that may be exploded either by concussion or by electricity. Anchored torpedoes are firmly attached to submerged structures, or to a cable or swaying boom which allows them some lateral play.

(c) The boom or spar torpedo is a mine affixed to a boom which projects from the bows of a small swift vessel. It is depressed and exploded when in contact with the vessel which it is sought to destroy. It is of sheet-copper with brazed joints, and has a sensitive primer, with a cylindrical-conical head communicating with the magazine. The head is in contact with and protected from the water by a thin hemispherical cap of soft, well-annealed copper. The charge is usually fired by contact, but sometimes by electricity.

(d) The locomotive torpedo is adapted to be propelled usually beneath the surface of the water, its course and depth being determined and regulated by various devices to bring it into contact with the ship against which it is

directed. Of locomotive torpedoes, the Whitehead, or fish torpedo, which is impelled by means of compressed air, and which carries a charge of gun-cotton in its head, is the best known example. Several other forms of torpedo have been invented.

(e) Manœuvred torpedo, so called because its course can be directed from a ship or from the shore. The Sims-Edison torpedo is the most effective example of this class. It is propelled by electricity, and is steered and the charge fired by the same agent.

¶ Several terms used in practice are rather broadly than accurately technical. Such are:

Can torpedo: A torpedo in a metallic caisson.

Lanyard torpedo: A torpedo discharged by pulling a lanyard, &c.

Magnetic torpedo: A torpedo exploded by electro-magnetism, by spark or wire, in contradistinction to one fired by clockwork, &c.

Submarine torpedo: A torpedo placed beneath the surface of the water, in a similar manner to a subterranean mine. [(2).]

(2) *Mil.*: A subterranean mine or counter-mine to destroy a work, a storming column, or a working party. In this sense a petard may be considered as a torpedo. Torpedoes for land defence are usually shells of small calibre, six and twelve-pounders, provided with a percussion or friction device which causes an explosion when the ground over the torpedo is stepped on. Sometimes several are laid in a row, and a piece of board placed over them to increase the chances of explosion.

torpedo-anchor, s. An anchor or fastening to hold a submarine mine to its selected bed. A serviceable form is that of a ship's anchor, to which the mine is attached by a chain with a universal joint.

torpedo-boat, s. A vessel carrying a torpedo, and either exploding it against the side of another vessel beneath the water-line, or launching it against the enemy's vessel from a point wherever it may be trusted to reach its destination by the force of the impulse, or by the aid of a motor within the body of the weapon.

torpedo-boom, s.

1. A spar bearing a torpedo on its upper end, the lower end swivelled and anchored to the bottom of the channel. The boom sways backwards and forwards, and is difficult to catch by any form of drag or grapple.

2. A boom or spar, supporting a torpedo in front of the bows of a vessel.

3. A spar, of wood or iron, supporting a steel crinoline designed for the protection of a ship against torpedo attack.

torpedo-catcher, s.

1. A forked spar or boom extending under water, ahead of a vessel, to displace or explode torpedoes.

2. A swift vessel, designed to catch and destroy hostile torpedo-boats.

torpedo-drag, s. A cabin bearing grappling-hooks to catch torpedoes. The ends of the cabin are generally carried in boats, which are propelled up and down the channel some distance apart. Sometimes the drag-rope is thrown ahead of a vessel by a shell from a small mortar, and is drawn in by the windlass.

torpedo-fuse, s.: One adapted for torpedo service, and classed as either percussion, friction, chemical, or electric.

torpedo-net, s. A movable crinoline of iron or steel, designed for the protection of a ship against torpedo attack.

torpedo-raft, s. A raft pushed ahead of a vessel, with hooks or grapples underneath, to clear the channel of torpedoes. The raft sometimes carries its own torpedo in front, to blow up obstructions or hostile shipping.

torpedo-ram, s. A war-vessel which is provided with a ram and with tubes for the discharge of torpedoes.

tor-pé-dō-íst, s. [Eng. *torpedo*; -íst.] A naval officer appointed to torpedo service.

"Captain Loug and the other torpedoists."—*Globe*, June 11, 1867.

*tor-pé-nt, a. & s. [Lat. *torpens*, pr. par. of *torpeo* = to be numb.]

A. As *adj.*: Having no motion or activity; incapable of motion; numb, benumbed, torpid.

"Let the earth be still and stupid;—anou an universal soul flow into the torpent mass."—*More: Songs*, &c., Notes (ed. 1647), p. 342.

B. As *substantive*:

Med.: A medicine that diminishes the exertion of the irritative motions.

*tor-pés-gence, s. [TORPESCENT.] The quality or state of being torpescent; a becoming torpid, insensible, or benumbed.

*tor-pés-çent, a. [Lat. *torpens*, pr. par. of *torpeo*, inceptive from *torpeo* = to be numb.] Becoming torpid or numb, or incapable of motion or feeling.

"Of gold tenacious, their torpescent soul Clenches their coil."—*Shenstone: Economy*, l.

tor-píd, a. & s. [Lat. *torpidus*, from *torpeo* = to be numb.]

A. As *adjective*:

1. Having lost motion or the power of motion or feeling; numbed, benumbed.

"Without heat all things would be torpid, and without motion."—*Ray: On the Creation*.

2. Dull, stupid, sluggish, inactive.

"Even now the stimulants which he applied to his torpid and feeble party produced some faint symptoms of returning animation."—*Macaulay: Hist. Eng.*, ch. xlii.

3. Of or belonging to a torpid. [B. 1.]

"Twenty-six torpid eights were out at Oxford, in training for the races."—*Fall Mall Gazette*, Feb. 12, 1884.

B. As *substantive*:

1. A second-class racing-boat at Oxford.

2. One of the crew of a torpid.

"An undergraduate who is one of their best torpids."—*Fall Mall Gazette*, Feb. 26, 1884.

¶ *The Torpids*: The races rowed by the torpid boats.

tor-píd-í-tý, s. [Eng. *torpid*; -ity.]

1. The quality or state of being torpid; numbness.

2. Dulness, stupidity, sluggishness, inactivity.

"Lost in obscurity, or chilled to torpidity, in the cold atmosphere of extreme indigence."—*Knox: Remarks on Grammar Schools*.

tor-píd-ly, adv. [Eng. *torpid*; -ly.] In a torpid manner.

tor-píd-néss, s. [Eng. *torpid*; -ness.] The quality or state of being torpid; torpidity.

"A man hath this advantage by the exercise of this faculty about it, that it keeps it from rust and torpidness."—*Hale: Orig. of Mankind*, p. 8.

*tor-pí-fý, v. t. [Eng. *torpid*; -ify. -fy.] To make torpid, dull, insensible, or stupid; to be numb, to stupefy. (*Southey: Doctor*, ch. xxvi.)

fâte, fât, fáre, amidst, whât, fáll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pít, síre, sír, marine; gô, pôť, or, wôre, wôlf, wôrk, whô, sôn: mûte, cûb, cûre, qnîte, ôür, rûlo, fûll; trý, Sýrian. æ, œ = ô; ey = â; qu = kw.

*tor-pi-tude, s. [As if from a Lat. torpidus, from torpidus = torpid (q.v.)] The quality or state of being torpid; torpidity, torpor.

"A kind of torpitude or sleeping state."—Derham: Physico-Theology, bk. viii, ch. v.

tor-por, *tor-pour, s. [Lat. torpor.]

1. Loss of motion or of the power of motion or feeling; torpidity, numbness, inactivity. It may amount to a total loss of sensation or complete insensibility.

"Motion doth disperse the torpor of solid bodies."—Bacon: Nat. Hist., § 743.

2. Dulness, sluggishness, stupidity, laziness.

*tor-por-if-ic, a. [Lat. torpor = torpor, and facio = to make.] Tending to produce torpor.

tor-quāt-ēd, a. [Lat. torquatus, from torques = a twisted neck-chain.] Having or wearing a torque (q.v.).

tor-qua-tē-lī-a, s. [Mod. Lat., from torques.] [TORQUE.]

Zool.: The sole genus (with a single species, Torquattella typica), of the family Torquattellidae, founded on a specimen discovered by Prof. Ray Lankester at Naples. Body elongate-ovate, nearly twice as long as broad, rounded posteriorly; the anterior membranous frill highly expansible, its front margin abruptly truncate or emarginate, its surface obliquely plicate; dimensions unrecorded.

tor-qua-tē-lī-dae, s. p. [Mod. Lat. torquattell(a); Lat. fem. pl. adj. suff. -idae.]

Zool.: A family of Peritricha (q.v.). Animals free-swimming, without a lorica, more or less ovate; the anterior ciliary wreath replaced by a membranous extensible and contractile collar-like structure, perforated centrally by the oral aperture. (Kent.)

torque (que as k), s. [Lat. torques = a twisted neck-chain, from torqueo = to twist.]

Archaeol.: A twisted collar of gold, or other metal, worn around the neck in ancient times by the people of Asia and the north of Europe, and apparently forming a great part of the wealth of the wearer. Among the ancient Gauls gold torques appear to have been so abundant that about 225 B.C. Flaminius Nepos erected to Jupiter a golden trophy made from the torques of the conquered Gauls. (Florus, l. ii, ch. iv.)

The name of the Torquati, a family of the Manlian gens, was derived from their ancestor, T. Manlius, having in B.C. 361 slain a gigantic Gaul in single combat, whose torque he took from the dead body and placed on his own neck. Many examples of gold torques have been found in Britain and Ireland; the commonest form is that known as funicular, in which the metal is twisted, with a plain, nearly cylindrical portion at both ends, which are turned back in opposite directions, so that each end terminates in a kind of hook by which the torque was fastened. Bronze torques are, as a rule, thicker and bulkier in their proportions than those of gold, and the ends are usually left straight, or but slightly hooked over so as to interlock.

TORQUE FOUND AT WEDMORE, SOMERSET.

torqued (que as k), a. [Lat. torqueo = to twist.]

Her.: Wreathed, bent. (Said of a dolphin hairnet, twisted into a form nearly resembling the letter S reversed.)

TORQUED.

tor-quēs, s. [Lat.] The same as TORQUE (q.v.).

tor-rē-a-dor', s. [TORREADOR.]

tor-rē-fac-tion, s. [Fr.] [TORREFY]

I. Ord. Lang.: The act or operation of torrefying, or of drying or parching by a fire; the state of being dried or torrefied.

"If it be sunned too long, it suffereth a torrefaction, and descendeth somewhat below it."—Browne: Vulgar Errors, bk. ii, ch. vi.

II. Technically:

1. Metall.: The operation of roasting ores.

2. Pharm.: The drying or roasting of drugs on a metallic plate till they become friable to the fingers, or till some other desired effect is produced.

tōr-rē-fied, pa. par. of a. [TORREFY.]

torrefied-grain, s.

Chem.: Cereals such as barley, maize, rice, &c., which have been submitted for a short time to a relatively high temperature, by which the natural moisture of the grain is suddenly expelled, and in the act of escaping distends each corn to a greater or less extent. On a large scale it is prepared by heating the cereals in a rotating cylinder over a gas-fire, and is used both for brewing purposes and for feeding cattle. Torrefied barley is sometimes called white malt.

tōr-rē-fy, v.t. [Fr. torréfier, from Lat. torrefacio, from torreo = to dry by heat, and facio = to make.]

*I. Ord. Lang.: To dry, roast, scorch, or parch by a fire.

"For to bring it into ashes, it must be torrefied in an oven, and so continue until the bread be baked and ready to be drawn."—P. Holland: Pliny, bk. xxiii.

II. Technically:

1. Metall.: To roast or scorch, as metallic ores.

2. Pharm.: To dry or parch, as drugs, on a metallic plate till they become friable to the fingers or are reduced to any desired state.

tōr-rē-lite, s. [After Dr. J. Torrey; I connect, and suff. -ite (Min.).]

Min.: A name given by Thomson to the Columbite (q.v.) found at Middletown, Connecticut.

tōr-rēt, a & a. [Fr., from Lat. torrentem, accus. of torrens = (a.) hot, boiling, raging, impetuous; (s.) a torrent, a raging stream, orig. pr. par. of torreo = to parch, dry up; Sp., Port., & Ital. torrente.]

A. As substantive:

1. Lit.: A violent stream, as of water, lava, or the like; a violent and rapid stream or current.

"Like torrents from a mountain's source."—Tennyson: The Letters, 39.

2. Fig.: A violent or rapid flow or stream; a flood.

"With no other force but a torrent of arguments and demonstration of the spirit."—Bp. Taylor: Liberty of Prophesying, § 13.

*B. As adj.: Rolling, rushing, or flowing in a rapid stream.

"Fierce Phlegmon Whose waves of torrent fire inflame with rage."—Milton: P. L., li, 581.

torrent-bow, s. A bow often seen over cascades and waterfalls, under conditions similar to those that render the rainbow (q.v.) visible. It is caused by the decomposition of solar rays by the spray.

"Four currents . . . floating as they fell, Lit up a torrent bow."—Tennyson: Palace of Art, 86.

*tōr-rēn-tial (tl as sh), a. [Eng. torrent; -ial.] Of the nature of a torrent; flowing violently; violent.

"Torrential rains have carried away a large portion of the buildings in course of construction at Obok, the damage done being very considerable."—Daily Telegraph, Feb. 13, 1875.

*tōr-rēn-tine, a. [Eng. torrent; -ine.] Pertaining to or resembling a torrent; torrential.

*tor-rēt, s. [TURRIT.]

tōr-rey-a, s. [Named after Dr. John Torrey, author of an American Flora.]

Bot.: A genus of Taxaceæ. Evergreen gymnospermous trees from North America, China, and Japan. Leaves in two ranks, linear or lanceolate; flowers dioecious, the males solitary, the females in two or threes. Torreya laxifolia is called the Stinking Cedar, from the unpleasant smell when burnt. The kernels of T. nucifera yield an oil.

Tōr-rī-cē-lī-an, a. [See def.] Pertaining or relating to Torricelli, an Italian physicist and mathematician (1608-47), and a pupil of Galileo; used in the following compounds.

Torricellian-experiment, s.

Physics.: The experiment by which Torricelli (in 1643) ascertained the exact measure

of the weight of the atmosphere. A glass tube (now known as the Torricellian tube), about a yard long and a quarter of an inch internal diameter, is sealed at one end and filled with mercury. The aperture being closed by the thumb, the tube is inverted, the open end placed vertically in a small vessel of mercury, and the thumb removed. The column of mercury sinks till it comes to rest at a height which, at the level of the sea, is about 30 inches above the mercury in the trough, leaving a space in the tube which is called the Torricellian vacuum. The mercury is raised in the tube by the pressure of the atmosphere on the mercury in the trough. There is no contrary pressure on the mercury in the tube, because it is closed. But if the end of the tube be opened, the atmosphere will press equally inside and outside the tube, and the mercury in the tube will sink to the level of that in the trough. By this experiment Torricelli showed that the reason why water would rise in a suction-pump to a height of only about thirty-two feet, was due to the pressure of the atmosphere on the open surface of the fluid.

Torricellian-tube, s. [TORRICELLIAN-EXPERIMENT.]

Torricellian-vacuum, s. [TORRICELLIAN-EXPERIMENT.]

tōr-rīd, a. [Fr. torride, from Lat. torridus, from torreo = to parch, to d.y up; Sp., Port., & Ital. torrido.]

1. Dried up with heat; parched, scorched. "And I will sing at Liberty's dear feet. In Afric's torrid clime, or India's fiercest heat."—Cooper: Table Talk, 217.

2. Burning; violently hot; scorching, parching. "This with torrid heat, And vapours as the Libyan sky adust, Begun to parch that temperate clime."—Milton: P. L., xii, 684.

torrid-zone, s.

Phys. Geog.: That space or broad belt of the earth included between the tropics, over every part of which the sun is vertical at some period, twice every year (being always so at the equator), and where the heat is always great.

tōr-rīd-ī-tŷ, s. [Eng. torrid; -ity.] The quality or state of being torrid; torridness.

tōr-rīd-nēss, s. [Eng. torrid; -ness.] The quality or state of being torrid; the state of being very hot or parched.

Tōr-rī-dōn, s. [See def.]

Geog.: An inlet, thirteen miles long by three broad, divided by peninsulas into an upper and a lower part, on the west coast of Scotland, in the county of Ross.

Torridon-sandstone, s.

Geol.: A series of rocks, probably of Laurentian age, well seen at Torridon. They are about 300 feet thick, the lowest bed being a conglomerate, extending over a considerable area on the North-west of Scotland.

*tōr-rī-fŷ, v.t. [Eng. torri(f); suff. -fy.] To scorch, to parch, to dry up. [TORREFY.]

*tōr-rīl, s. [Etyim. doubtful.] A worthless woman or horse.

tōr-rōck, s. [TARROCK.]

tōr-rōn-tēs, s. [Sp.] A kind of white grape grown in Spain.

tor-sal, tor-sel, s. [Etyim. doubtful.]

Carp.: A short beam under the end of a ginder, where it rests on a block wall.

"When you lay any timber on brickwork, as torsets for mantle trees to tie on, or lintels over windows, lay them in loam."—Mason: Mechanical Exercises.

torse (1), s. [O. Fr., from tors, torse = twisted, from Lat. tortus, pa. par. of torqueo = to twist.] Her.: A wreath; a twisted scroll.

torse (2), s. [Ital. torso.] A torso (q.v.).

"Though wanting the head and the other extremities, if dug from a ruin the torse becomes inestimable"—Goldsmith: Polite Learning, ch. iv.

tor-sel (1), s. [TORSAL.]

tor-sel (2), s. [A dimin. from torse (1), s.] Anything in a twisted form.

*tōr-sī-bil-ī-tŷ, s. [TORSION.] The tendency to untwist after being twisted; as, the torsibility of a rope or fibre.

tor-sion, s. [Fr., from Lat. *torionem*, accus. of *torio* = a twisting, from *torqueo* (pa. t. *torisi*) = to twist.]

I. Ord. Lang. : The act of twisting; the twisting, wrenching, or straining of a body by the exertion of a lateral force tending to turn one end or part of it about a longitudinal axis, while the other is held fast or twisted in an opposite direction.

II. Technically :

1. Mech. : The force with which a body, as a thread, wire, or slender rod, resists a twist, or the force with which it tends to return to its original state on being twisted. Such machines as capstans and windlasses, also axles, which revolve with their wheels, are, when in action, subjected to be twisted, or undergo the strain of torsion. If a slender rod of metal be suspended vertically, so as to be rigidly fixed at the point of suspension, and then twisted through a certain angle, it will, when the twisting force ceases to act, untwist itself or return in the opposite direction with a greater or less force or velocity, until it comes to rest in its original position. The limits of torsion within which the body will return to its original state depend upon its elasticity, and the force with which it tends to recover its natural state is termed the Elasticity of torsion. This force is always proportional to the angle through which the body has been twisted. If a body is twisted so as to exceed the limit of its elasticity, its particles will either be wrenched asunder, or it will take a set, and will not return to its original position on the withdrawal of the twisting force.

2. Surg. : The twisting of the cut end of a small artery in a wound or after an operation, for the purpose of checking hæmorrhage. The bleeding vessel is seized by an instrument called a torsion-forceps, drawn out for about a quarter of an inch, and then twisted round several times, until it cannot untwist itself.

torsion-balance, s. [BALANCE, s., B. II.] ¶ This balance is called the Torsion electrometer, galvanometer, or magnetometer, according as it is adapted to measure electric, galvanic, or magnetic forces.

torsion-forceps, s. [TORSION, II. 2.]

tor-sion-al, a. [Eng. *torsion*; -al.] Of or pertaining to torsion.

torsional-rigidity, s. The stiffness of a cylindrical bar of material to resist twist. The rigidity of cylinders of the same substance and of equal length varies as the diameter in the fourth power.

tor-sive, a. [TORSION.]

Bot. : Twisted spirally.

torsk, s. [Swed. & Dan., = a codfish, a torsk.]

Ichth. : *Brosmius brosme* (or *vulgaris*); a valuable food-fish of the family Gadidae, abundant in the northern parts of the Atlantic Ocean. It is from eighteen inches to two, rarely three, feet long; head dusky, back and sides yellow, passing into white on the belly. It lives in deep water, and approaches the land early in the year to spawn among the seaweed on the coast. Its flesh, when dried and salted, is generally considered to furnish the best stock-fish, and forms a considerable article of trade.

tor-sò, s. [Ital., from Lat. *thyrsus*, accus. of *thyrsus* = a stalk, a stem.]

Sculpt. : The trunk of the human body. The term is usually applied to mutilated statues, from which the head and limbs are broken off.

tort, s. [Fr., from Lat. *tortus*, pa. par. of *torqueo* = to twist.]

1. Zool. : A name formerly taken to include all the Cheloniens, but now, unless qualified by an adjective, confined to the individuals of the family Testudinidae. [TESTAPIN, TURTLE.] Tortoises, in the wider sense, are sluggish reptiles, long-lived, and extremely tenacious of life under adverse surroundings, and have survived from remote antiquity while higher animal types, formerly contemporaneous with them, have become extinct, and have been succeeded by very different forms. They have an osseous exoskeleton, which is combined with the endoskeleton to form a kind of bony case or box in which the body of the animal is inclosed, and which is covered by a coriaceous skin, or, more usually, by horny epidermic plates. [TORTOISESHELL.] The exoskeleton consists essentially of two pieces: a dorsal piece, generally convex (the carapace), and a ventral piece, usually flat or concave (the plastron), by some regarded as an abnormally developed sternum, while others consider the bones of which it is composed as integumentary ossifications. In the endoskeleton the dorsal vertebrae are immovably joined together, and have no transverse pro-

cesses, the heads of the ribs uniting directly with the bodies of the vertebrae; the scapular and pelvic arches are placed within the carapace, so that the scapular arch is thus inside the ribs, instead of being, as it normally is, outside them. All the bones of the skull except the lower jaw and the hyoid bone, are anchylosed. There are no teeth, and the jaws are cased in horn, so as to form a kind of beak. Tongue thick, and fleshy; heart three-chambered, ventricular septum imperfect. The lungs are voluminous, and respiration is effected by swallowing air. All will pass prolonged periods without food, and will live and move for months after the removal of the entire brain. [TESTUDINIDE, TESTUDO.] There are two sub-orders of Cheloniens, Athecata, in which the carapace is flexible, and Testudinata, in which it is rigid. The former is represented by a single species, the Trunk-back or Leather Turtle (*Sphargis coriacea*), but this is the largest existing Chelonia, sometimes attaining a length of six feet and a weight of over a thousand pounds. Of the Testudinata one of the best known representatives is the Green Turtle (*Chelone mydas* or *viridis*), found along the Atlantic coast from Cape Hatteras to Brazil. It grows to a very large size, sometimes weighing 850 pounds, and is a favorite article of food, being the most esteemed of the large edible Turtles. Of the small ones the Terrapins (q.v.) are highly valued by epicures. The Hawsbill Turtle (*Caretta imbricata*) is a carnivorous form found along the United States coast, and furnishing most of the commercial tortoise shell. It, with the Loggerhead, another large Atlantic Turtle, is of little value for food. The Trionychidae or Soft

shelled Turtles are fresh-water forms, covered with a soft skin, and possessing webbed but partly clawed feet. Among these is *Apalone* *terrestris*, which is found in the rivers flowing into the Gulf of Mexico, and is noted for its activity, voracity and fierceness. It is over a foot in length, and is very palatable as food. The Testudinidae are terrestrial Cheloniens, including a well known European form, the Greek Tortoise (*Testudo graeca*), which is found along the Mediterranean coast from Greece to southern France. It is about a foot in length, and is valued as an article of food in the south of Europe, its flesh being considered very palatable, while its eggs are regarded as delicacies. Of the Testudinidae, however, the most notable forms are the Gigantic Tortoises formerly found in great numbers in the Mascarene and Galapagos Islands. When discovered these islands were uninhabited by man or any large wild animal; the Tortoises therefore enjoyed perfect security, and this, joined to their extraordinary longevity, accounts for their enormous size and their vast number. They can be readily recognized by the black shell, the thinness of the bony carapace, and by the absence of the front plate, allowing the long neck to be raised up and carried above the level of the body. Five species of this group are known, two of them being *Testudo elephantina*, the Gigantic Land Tortoise of Aldabra, and *T. abingdoni*, the Abingdon Island Tortoise. Best known among the small forms is the familiar Land Turtle or Box Turtle, so widely distributed. There are also various small fresh-water species, and one of larger size and much ferocity, the Snapping Turtle (*Chelydra serpentina*), common in the streams of the United States, and which snaps fiercely at everything which comes within its reach.

Turtles are remarkable for their longevity and tenacity of life.

* 2. *Mil.*: A method of defence, used by the ancients, formed by the troops arranging themselves in close order and placing their bucklers over their heads, make a cover resembling a tortoise-shell; a testudo (q.v.).

tortoise-beetle, s.

Entom.: Any individual of the Cassididae or Cassidiidae (q.v.). So named from their form, the body being margined all round with dilatations of the thorax and the elytra.

tortoise-enchrinite, s.

Zool.: The genus Marsuptes (q.v.), from presenting some resemblance to a tortoise in their appearance.

tortoise-flower, s. [CHELONE, 2.]

tortoise-plant, s.

Bot.: *Testudinaria elephantipes*. [TESTUDINARIA, HOTTENTOT-BREAD.] It resembles the yam in its netted leaves and its flowers; but while the yam bears its thin-skinned tubers underground, the tortoise-plant has its huge rootstocks or rhizomes above ground. They are globular, and sometimes four feet in diameter, with a soft corky bark, which after a time cracks, so as to produce protuberances; its aspect being supposed to resemble the back of a tortoise, whence its Latin and English names. The stems, which are forty feet high, rise from the rootstock, bearing entire leaves, with small, greenish-yellow flowers in their axils. It grows at the Cape of Good Hope.

tortoise-wood, s.

Comm.: A variety of Zebra-wood (q.v.).

tor-toise-shell (1 as ū), s. & a. [Eng. tor-toise, and shell.]

A. As substantive:

I. Ordinary Language:

- 1. A tortoiseshell butterfly (q.v.).
- 2. A tortoiseshell cat (q.v.).

II. Technically:

1. *Zool.*: A popular name for the partial or entire outside covering of the carapace and plastron present in many of the Chelonina. It is in the form of thin plates, united together at their edges, and corresponding, to a certain extent, with the underlying bones of the shell. The number, size, position, colouring, and ornamentation of these plates differ greatly even in genera and species.

2. *Comm.*: The same given to the horny epidermic plates of *Chelonia imbricata*, the Hawk's-bill Turtle (q.v.). The largest of these plates are about eighteen inches long by six broad, and rarely exceed one-eighth of an inch in thickness. Tortoiseshell is semitransparent, and mottled with various shades of yellow and brownish-red. Its value depends on the brightness and form of the markings, and, if taken from the animal after death and decomposition, the colour of the shell becomes clouded and milky. Hence the cruel expedient is resorted to of seizing the turtles as they repair to the shore to deposit their eggs, and suspending them over fires till the heat makes the plates on the dorsal shields start from the bone of the carapace, after which they are permitted to escape to the water. [Tennent: *Ceylon* (ed. 3rd), i. 190.] But, according to the *Journal of the Indian Archipelago* (iii. 227), "dry heat is only resorted to by the unskillful, who frequently destroy the tortoiseshell in the operation. At Celebes, whence the finest tortoiseshell is exported to China, the natives kill the turtle by blows on the head, and immerse the shell in boiling water to detach the plates." Tortoiseshell is used for making combs, snuff-boxes, and many fancy articles; as a material for inlaying ornamental furniture, as a veneer, and as a ground-substance in which the precious metals and mother-of-pearl are inlaid. It becomes soft at a temperature of 212°, and retains when cold any form given to it when in a plastic state. Pieces can also be joined together by the pressure of hot irons. Tortoiseshell is now successfully imitated by stained horn and by a composition of gelatine with various metallic salts. The Indian islands furnish the largest supply for the European and Chinese markets, the chief seats of the trade being Singapore, Manilla, and Batavia, from which are exported yearly about 20,000 lbs., of which Singapore sends about a half.

B. As adj.: Made of, resembling, or of the colour of tortoiseshell.

"They only fished up the clerk's tortoiseshell spectacles." *Barham: Ing. Leg.; Sir Rupert.*

tortoiseshell-butterfly, s.

Entom.: The name given to two British butterflies. The Small Tortoiseshell, *Vanessa urticae*, one of the commonest of British butterflies, is of a bright red brown, and has on its costal margin three large black spots, beyond the third of which is a white one. The space between the first and third spots is yellow. Larva with eleven spines, its colour yellowish gray, with lines and stripes of black, brown, and yellow; it feeds on the nettle. The Large Tortoiseshell, the larva of which feeds on elm, is much rarer. It is deep fulvous, with a broad, dark border. It has no white spot on the costa of the fore wings.

tortoiseshell-cat, s. A variety of the domestic cat, of a colour resembling tortoiseshell. Males of this variety are extremely rare.

tor-tō-zōn, s. [Sp.] A large Spanish grape.

tor-trīc-ī-dæ, s. pl. [Mod. Lat. *tortrix*, genit. *tortricis*]; Lat. fem. pl. adj. suff. *-idæ*.]

1. *Entom.*: Leaf-rollers; the typical family of Tortricina (q.v.). Anterior wings broad, the costa arched but not folded. Larvæ rolling up or uniting leaves, and feeding within the sheath, tube, or case thus formed. Many species.

2. *Zool.*: A family of Innocuous Colubri-form Snakes, with three genera, one of which (Cylindrophis) ranges from India through the Malay Islands, while Charina is found in California, British Columbia, and Tortrix in Tropical America. Body cylindrical, scales smooth; tail conical, stumpy, head short and indistinct; they have a rudimentary pelvis with horny spines projecting close to the vent, and there are vestiges of the hind limbs.

tor-trī-qi-næ, s. pl. [Mod. Lat. *tortrix*, genit. *tortricis*]; Lat. neut. pl. adj. suff. *-ina*.]

Entom.: A tribe of Heterocera, with nine families and numerous species. Antennæ setaceous, much longer than the thorax; body moderately thick, with the apex blunt; the anterior pair of wings somewhat truncate behind; the posterior pair trapezoidal, unmarked. Larvæ with sixteen legs.

tor-trīc-ō-dæ, s. [Mod. Lat. *tortrix*, genit. *tortricis*], and Gr. εἶδος (*eidōs*) = form.]

Entom.: The sole genus of Tortricodidæ (q.v.). Anterior wings more than twice as long as wide; costa in the male nearly straight, in the female arched at the base. Only known species, *Tortricodes hyemana*, a moth with semi-transparent wings, grayish brown, with a darker blotch and fascia. It is abundant in oak woods.

tor-trī-cō-di-dæ, s. pl. [Mod. Lat. *tortriccōd(es)*; Lat. fem. pl. adj. suff. *-idæ*.]

Entom.: A family of Moths nearly intermediate between the groups Tortricina and Tineina. [TORTRICONES.]

tor-trīx, s. [Mod. Lat., from Lat. *tortus* = twisted, pa. par. of *tortuus* = to twist.]

1. *Entom.*: The typical genus of Tortricidæ (q.v.). Palpi longer than the head, fore wings about twice as long as broad, costa arched abruptly at the base. British species ten. A very common and pretty species is *Tortrix viridana*, the Green Oak moth, the fore wings of which are pale green, the costal ridge sulphur-yellow, the hind wings gray. The larva, which is green with a brown head, feeds on the oak and hornbeam, &c., in May and June, and the perfect insect abounds on the oak in July. *T. ribeana* and *T. coryliana* are also not uncommon.

2. *Zool.*: The type-genus of Tortricidæ 2, with one species, *Tortrix scytale*, from Guiana. It lives above ground in boggy places, preying on worms, insects, and small reptiles.

* **tor-tu, s.** [O. Fr. *tortuē*.] A tortoise.

tor-tū-la, s. [Mod. Lat., from *tortus* = twisted; *tortuus* = to twist. Named from the manner in which the teeth of the peristome are twisted together.]

Bot.: A large genus of Trichostomei (q.v.). Teeth of the peristome thirty-two, filiform, twisted into a common fascicle. They are found, most of them at all seasons, on rocks,

walls, banks, riversides, housetops, &c. *Tortula ruralis* is often seen on the roofs of thatched cottages.

* **tor-tū-loūs, a.** [Lat. *tortus* = twisted. Bulged out at intervals, like a cord with knots on it. (Used chiefly in describing objects in natural history.)

* **tor-tū-ōse, a.** [TORTUOUS.]

Bot. (Of a stem)

Forming angles alternately from right to left, as in *Banisteria rotundifolia* (see *ilius*) and others of the Malpighiaceæ (q.v.). It differs from flexuous in bending more angularly.

TORTUOSE STEM.

tor-tū-ōs-ī-tŷ, s. [Eng. *tortuos(e)*; *-ity*.] The quality or state of being tortuous, twisted, or wreathed; wreath, flexure.

"As for the tortuosity of the body and branches."—*P. Holland: Plutarch*, p. 562.

* **Tortuosity** is the angle turned by the osculating plane per unit distance travelled along the curve. If 4 stands for length, then it is equal to. (Everett: *C. G. S. System of Units*, ch. I, p. 7.)

tor-tū-ōūs (1), * **tōr-tū-ōs, a.** [Fr. *tortueux* = full of crookedness, from Lat. *tortuosus*, from *tortus*, pa. par. of *tortuus* = to twist.]

I. Ordinary Language:

- 1. *Lit.*: Twisted, wreathed, winding, crooked.

"Did not find the labyrinths of gaping and gruesome bog-ruts too tortuous."—*Field*, April 4, 1888.

2. *Fig.*: Proceeding in a roundabout or underhand manner; not open and straightforward.

II. Bot.: Having an irregular bending and turning direction.

* **tor-tū-ōūs** (2), a. [Eng. *tort*, s.; *-uous*.] The same as TORTUOUS (q.v.).

tor-tū-ōūs-lŷ, adv. [Eng. *tortuous*; *-ly*.] In a tortuous or winding manner.

tor-tū-ōūs-nēss, s. [Eng. *tortuous*; *-ness*.] The quality or state of being tortuous.

* **tor-tū-ra-ble, a.** [Eng. *tortur(e)*; *-able*.] Capable of being tortured.

tor-ture, s. [Fr., from Lat. *tortura* = torture, from *tortus*, pa. par. of *tortuus* = to twist; Sp., Port., & Ital. *tortura*. From the same root come *torment*, *torsion*, *tortoise*, *contort*, *distort*, *extort*, &c.]

1. Excruciating pain; extreme anguish of mind or body; agony, torment.

"Better be with the dead, Than on the torture of the mind to lie In restless ecstasy." *Shakespeare: Macbeth*, iii. 2.

2. Severe pain inflicted judicially either as a punishment for a crime or for the purpose of extorting a confession from an accused or suspected person. It was inflicted for the last time in England in May, 1640. It was practiced in parts of Europe till within the present century, and is still practiced in China. [RACK, SCAVENGER'S DAUGHTER, THUMB-SCREW.]

"In the Scottish Claim of Right, the use of torture, without evidence, or in ordinary cases, was declared to be contrary to law."—*Macaulay: Hist. Eng.*, ch. xiii.

3. The act, operation, or process of inflicting excruciating physical or mental pain.

tor-tūre, v. t. & i. [TORTURE, s.]

A. Transitive:

1. To pain excruciatingly; to pain to extremity; to torment bodily or mentally.

"The tortured savage turns around, And flings about his frown impatient of the wound." *Dryden: Ovid: Metamorphoses* viii.

2. To punish with the torture; to put to the torture.

3. To put to a severe strain; to wrest from the right meaning; to put a wrong construction on.

"So that it is to no purpose that this place had been so tortured by interpreters."—*Bp. Taylor: Rule of Conscience*, bk. iii., ch. li.

* 4. To keep on the stretch, as a bow.

"The bow *tortureth* the string continually, and thereby holdeth it in a continual trepidation."—*Bacon: Nat. Hist.*, § 187.

tör-ū-la, s. [Lat. = a tuft of hair.]

Bot.: The typical genus of *Torulaceae* (q.v.). Spores in beaded chains, simple, readily separating, placed on a short, continuous, or septate pedicel. Microscopic fungals causing mouldiness. *Torula casei* is cheese-mould. *T.* (or *Saccharomyces cerevisiae*) is the cause of fermentation when yeast is brought in contact with ascorharine matter. That this is so is proved by the fact that fermentation is prevented by passing the yeast through a fine filter which strains out the torule, or by boiling either the yeast or the saccharine fluid, and then keeping it from all air, except such as has been passed through cotton wool, which prevents their re-entering it from the atmosphere in which they are believed to be continually floating about in a dry state. A torula is about 0.003 of an inch in diameter. It consists of a cell, generally containing a vacuole, but not a nucleus. Sometimes the cells are single, at others they are in heaps or strings. Their ordinary mode of reproduction is by budding. (*Huxley*). [YEAST.]

tör-ū-lā-qō-ī, s. pl. [Mod. Lat. *torula*(a); Lat. masc. pl. adj. suff. -acell.]

Bot.: A sub-order of Coniomyces. Mycelium very slightly developed, inconspicuous; spores simple or septate, naked, generally united together in chains. In the typical genus the spores are of a dark colour. [TORULA.]

tör-ū-lōso, tör-ū-loūs, a. [Lat. *torulus*, dimin. of *torus* = a protuberance.]

Bot.: Cylindrical, with several swells and contractions, knotted, as the pod of *Chelidonium*. Nearly the same as *Moniliform*.

tör-ūs, s. [Lat. = a round swelling or protuberance.]

1. **Arch.**: A semicircular projecting moulding, occurring in the base of a column of certain orders. It differs from the astragal only in size, the astragal being smaller. Also called a *Tore*.

TORUS.

2. **Bot.**: The same as RECEPTACLE and THALAMUS (q.v.).

torus bead-plane, s. A certain form of plane for making the semicircular convex moulding known as a torus.

***torve**, a. [Lat. *torvus* = stern, piercing.] Sour, stern.

"With a *torve* and tetrick countenance."
Pulter: *Worthies*; *Lincolshire*.

***torved**, a. [TORVE.] Stern, grim, torvous. "Yesterday his breath
Aw'd Rome, and his last *torved* frown was death."
Webster.

***tor-vi-tý**, s. [Lat. *torvitas*.] Sourness, sternness; grimness or severity of countenance.

***torv-oūs**, a. [Lat. *torvus*.] Sour, stern, grim; of a severe countenance.

"That *torvuous* sour look produced by anger, and that gay and pleasing countenance accompanying love."
Derham: *Physico-Theology*, bk. v., ch. viii.

Tör-ý, s. & a. [Ir. *toiridhe*, *tor*, *toratigheoir*, *toratighe* = a pursuer; *toir*, *torachd* = pursuit, search; Gael. *toir* = pursuit, a pursuer.]

A. As substantive:

*1. An appellation originally given to Irish moss-troopers, who, during the civil wars of the sixteenth century, plundered people in the bogs of that island, being in arms nominally for the royal cause, but really to afford a colourable pretext for their own lawless proceedings. About A.D. 1680 those who contended for the extreme prerogatives of the Crown had this contemptuous term applied to them by their opponents on the popular side, and thus the word ultimately acquired its present meaning.

"Moss-troopers, a sort of rebels in the northern part of Scotland, that live by robbery and spoil, like the *tories* in Ireland, or the *banditti* in Italy."
Phillips: *New World of Words* (ed. 1769).

2. Originally applied as a political term to those who were supposed to be abettors of the Popish Plot, and hence extended to those who refused to concur in excluding a Roman Catholic from the throne. The term was afterwards extended to members of one of the great political parties in Britain, consisting of those who think it wiser to conserve the laws and institutions already existent in the country than to incur peril by attempting to remodel them; the party of immobility as opposed to that of movement. In modern times the term has been largely superseded by *Conservative* (q.v.). [LIBERAL, WHO.]

"At this time were first heard two nicknames which, though originally given in insult, were soon assumed with pride, which are still in daily use, which have spread as widely as the English race, and which will last as long as the English literature. It is a curious circumstance that one of these nicknames was of Scotch, and the other of Irish, origin. Both in Scotland and in Ireland, misgovernment had called into existence bands of desperate men, whose ferocity was heightened by religious enthusiasm. In Scotland, some of the persecuted Covenanters, driven mad by oppression, had lately murdered the prince, had taken arms against the Government, had obtained some advantages against the king's forces, and had not been put down till Monmouth, at the head of some troops from England, had routed them at Botwell Bridge. These zealots were most numerous among the ruins of the western lowlands, who were vulgarly called *Whigs*. Thus the appellation of *Whig* was fastened on the Presbyterian zealots of Scotland, and was transferred to those English politicians who showed a disposition to oppose the court, and to treat Protestant nonconformists with indulgence. The bogs of Ireland, at the same time, afforded a refuge to Popish outlaws, much resembling those who were afterwards known as *Whitboys*. These men were then called *Tories*. The name of *Tory* was therefore given to Englishmen who refused to concur in excluding a Roman Catholic prince from the throne."
Macaulay: *Hist. Eng.*, ch. II.

3. A name given during the American war of independence to a member of the Loyalist party, or any one who favoured the claims of Great Britain against the colonists.

B. As adj.: Pertaining to the Tories; constituted by or originating from the Tories; as, *Tory* measures, the *Tory* party.

***tory-rory**, a. Wild.

"Your *tory-rory* jades."
Dryden: *Kind Keeper*, IV. 1.

Tör-ý-ism, s. [Eng. *tory*; -ism.] The principles or practices of the Tories.

"A short history of *toryism* and *whiggism* from their cradle to their grave."
Boilingbroke: *Dissertation upon Parties*, let. 2.

tös-qa, tös-ka, s. [Sp. *tasca* (*roca*) = coarse (rock).] (See etym. and compound.)

tosca-rock, s.

Geol.: The name given by the inhabitants of Buenos Ayres to a hard, cavernous, massy, arenaceous rock, imbedded in layers and nodular masses among the argillaceous earth or mud of the Pampas. It constitutes a part of the Pampean formation, and is probably of Pleistocene age. The adoption of the local term *tosca* by Darwin has given it general currency.

tōse, *v.t.* [TEASE, TOUSE.] To tease or comb wool. (Prov.)

tōsh, a. [O. Fr. *tonsé* = shorn, clipped, pared round, from Lat. *tonsus*, *ps. par. of tondeo* = to shear, to clip.] Neat, trim.

tōsh-ach (ch guttural), s. [TOISECH.]

tó-tém, tó-tam, s. [See extract.]

Anthrop.: Some entity, usually an animal or a plant, with which the members of a tribe connect themselves, calling themselves by its name, and deriving a mythic pedigree from it. Thus among the Algonquin Indians of North America, the name Bear, Wolf, Tortoise, Deer, or Rabbit, serves to designate each of a number of clans into which the race is divided, a man belonging to such a clan being himself actually spoken of as a bear, a wolf, &c., and the figures of these animals indicating the clan in the native picture-writing.

"The name or symbol of an Algonquin clan and an all is called 'totem,' and this word, in its usual form of totem, has become an accepted term among ethnologists to describe similar customary surnames over the world."—Tyler: Prim. Cult. (ed. 1871), II. 212.

totem-animal, s.

Anthrop.: An animal which gives its name to a tribe or family, of which it is usually regarded as the ancestor and protector.

"Some accounts describing the totem-animal as being actually the sacred object."—Tyler: Prim. Cult. (ed. 1871), II. 212.

totem-clan, s.

Anthrop.: A clan having a totem, from which it derives its name, and which is regarded as an ancestor and protector.

totem-pole, totem-post, s. A pole or post, upon which images of totems are hung or engraved.

totem-stage, s.

Anthrop.: That stage of mental development, through which it has been assumed all people have passed, during which animals, trees, &c., are regarded with religious reverence.

tó-tém-íó, a. [Eng. totem; -ic.] Of or belonging to a totem or totemism (q.v.).

"Tribes who are organized on the totemic principle."—Schoolcraft: Indian Tribes, I. 320.

tó-tém-ísm, s. [Eng. totem; -ism.]

1. Anthrop.: The division of a race of people into clans and families, each having its particular totem, with the differences of rank, marriage customs, and other social arrangements arising therefrom.

2. Comparative Religions:

(1) A name primarily used to denote the form of religion widely prevalent among the North American Indians, though by no means confined to them. It consists in the adoration of certain objects and animals believed to be related to each separate stock or blood-kindred of human beings.

(2) A stage in religious progress usually succeeding Fetichism, the objects of worship being generally of a higher nature. In totemism as practised among the Algonquins the totem is actually regarded as the sacred object and protector of the family bearing its name and symbol. Among certain Australian tribes each family has some animal or vegetable as its "kobong," its friend or protector, and a mysterious connexion subsists between a man and his kobong, which he is reluctant to kill if it is an animal, or to gather if it is a vegetable. Similar customs exist in Asia and Africa. Lubbock and Spencer have favoured the idea that totemism sprang from the very general practice of naming individual men after animals, Bear, Deer, Eagle, &c., these becoming in certain cases hereditary tribe-names. Commenting on their opinions, Tyler (Prim. Cult., ed. 1871, II. 215) remarks that "while granting such a theory affords a rational interpretation of the obscure facts of totemism, we must treat it as a theory not vouched for by sufficient evidence, and within our knowledge liable to mislead if pushed to extremes."

tó-tém-íst, s. [Eng. totem; -ist.]

Anthrop.: A member of a totem-clan.

"That the Saline woodpecker has been a totem may be pretty certainly established by the evidence of Pitarach. The people called by his name (Péini) declined, like totemists everywhere, to eat their holy bird. In this case the woodpecker."—A. Lang: Myth, Ritual, & Religion, II. 71.

tó-tém-íst-ic, a. [Eng. totemist; -ic.] Totemic (q.v.).

"It seems scarcely possible to deny the early and prolonged existence of totemistic practices in Egyptian religion."—A. Lang, in Nineteenth Century, Sept., 1885, p. 430.

*tót-ér, s. [Eng. tot(er) (3), v.; -er.] One who toots or plays a pipe or horn.

tō-tŷ, s. [Etyrn. doubtful.] A name given in some parts of the Pacific to a sailor or fisherman. (*Simmonds*.)

tōu-oan, **tōu'-can**, s. [Fr., from Sp. and Port. *tucano*, from the cry of the bird.]

Ornith.: The popular name of any bird of the genus *Rhamphastus*, often applied to the whole family *Rhamphastidae* (q.v.). They are all natives of tropical America, and are easily distinguished by their enormous bill, irregularly toothed along the margin of the mandibles. All the species live in pairs in the shade of the forests, occasionally congregating in small parties, but never approaching the human habitations. In the true Toucana (*RHAMPHASTOS*) the ground colour of the plumage is generally black; the throat, breast, and rump adorned with white, yellow, and red; the body is short and thick; tail rounded or even, varying in length in the different species, and capable of being turned up over the back when the bird goes to roost. Toucans have been described as carnivorous; in captivity they will readily devour small birds, but probably in a state of nature their diet consists almost exclusively of fruit. They are remarkable among birds for a regurgitation of food, which, after being swallowed, is brought up to undergo mastication, an operation somewhat analogous to the chewing of the cud among ruminants. They are easily tamed, and bear confinement well, even in cold climates.

tōu-cā-nā, s. [Mod. Lat. = a toucan.]

Astron.: A small circumpolar constellation, situated on the Antarctic Circle, nearly opposite to *Cruz australis*, in relation to the South Pole, the intervening space between the two constellations being nearly devoid of stars. (2) The peculiar manner in which a player presses the keyboard, whether light, pearly, heavy, clumsy, firm, &c.

4. *Obstetrics*: The examination of the mouth of the womb by actual contact of the hand or fingers.

5. *Physiology*:

(1) *Human*: The sense through which man takes cognizance of the palpable properties of bodies. In a wide application, it is sometimes called the general sense, because by it we become conscious of all sensory impressions which are not the objects of smell, sight, taste, or hearing, which are called the special senses: even these, however, are held by modern biologists to be highly specialised forms of touch, which is often called the "mother of all the senses." In a more limited application, touch is applied to that modification of general sensibility which is restricted to the tegumentary surface or to some special portion of it, and which serves to convey definite ideas as to the form, size, number, weight, temperature, hardness, softness, &c., of objects brought within its cognizance. These sensations are received by the terminations of the cutaneous nerves, and thence conveyed to the brain. The sense of touch is distributed over the surface of the body, but is much more acute in some parts than in others, e.g., in the hand. It is also capable of great improvement and development; and the blind, who have to depend largely on the sense of touch for guidance, acquire extraordinarily delicate and accurate powers of perception with the fingers; difference of form, size, consistence, and other characters, being readily recognised that are quite inappreciable to those who possess good vision, without special education.

(2) *Compar.*: The lower Anthropidæ have both the hands and feet thickly set with tactile papillæ (q.v.), and the surface of the prehensile tail which some possess is furnished with them in abundance. Other organs of touch exist in the vibrissæ, or whiskers, of the cat, and of certain rodents. In the Uogulata, the lips and nostrils are probably the chief seat of tactile sensibility, and this is especially so with the Proboscidea. In Birds, tactile papillæ have been discovered in the feet, and they are also present in some lizards. A papillary apparatus appears to be absent from Serpents, Chelonians, and Fishes, though in many of these its want is compensated by tentacles, having a high degree of sensibility. Descending still lower in the scale of animal life, organs of touch are found in the tentacles of the Cephalopoda and Gastropoda, the palpi and antennæ of insects, and the palpi of the Arachnida.

6. *Shipbuild.*: The broadest part of a ship's plank worked top and but.

Found in Europe. It derives its popular name from the sudden bursting of its seed vessels on being touched. Called also the Yellow Balsam.

2. *Cardamine hirsuta*, which also shoots out its seeds on being touched. (*Britten & Holland*.)

touch-needle, s.

Assay: A small bar composed of an alloy of gold and silver, gold and copper, or of gold alloyed with a proportion of both metals, employed in assaying by the touchstone. A number are employed; one being of pure gold, a second composed of 23 gold and 1 copper, a third of 22 gold and 2 copper, and so on; these are rubbed upon the stone, and the color of the streak compared with that made by the metal to be tested. A further means of comparison is afforded by moistening the streaks with nitric acid, or by heating the stone. Silver is similarly tested by touchneedles composed of lead and silver.

* *touch-piece*, s. A coin given by the sovereigns of England to those whom they touched for the cure of scrofula or the king's evil.

"Before the reign of Charles II. no coins were struck specially for *touch-pieces*, the gold 'angel' having been used for the purpose. The *touch-pieces* are all similar in design. Those of the Pretenders, however, which were struck abroad, are of much better work than those made in England. . . . These *touch-pieces* (all of them perforated) are curious relics of a superstition which had existed for many centuries, and was only stamped out on the accession of the Brunswick dynasty."—*Altenaum*, Oct. 28, 1882.

tour'-ma-line, *s.* [From the Cingalese *turamali*, under which name it was first introduced into Europe in 1708.]

Min.: A widely-distributed mineral, the transparent coloured varieties being used as gem-stones. Crystallization, rhombohedral, hemimorphic, prisms often triangular. Hardness, 7 to 7.5; sp. gr. 2.94 to 3.3; lustre, vitreous; colour, shades of black the most frequent, but also blue, green, red, often of rich shades, sometimes red internally and shades of green externally; crystals sometimes varying in colour towards the extremities, occasionally but rarely colourless; markedly dichroic; transparent to opaque; fracture, uneven, sometimes sub-conchoidal; pyroelectric. Compound; very variable, the oxygen ratio for the proto- and sesquioxides, and also for the boric acid, varying considerably. Dana distinguishes the following varieties: (1) Rubellite; shades of red, frequently transparent. (2) Indicolite; of an indigo-blue colour. (3) Brazilian sapphire of jewellers; Berlin blue. (4) Brazilian emerald, Chrysolite (or Peridot); green and transparent. (5) Peridot of Ceylon; honey-yellow. (6) Achromite; colourless. (7) Aphrizite; black. (8) Colmanar and black, without cleavage or trace of fibrous texture. A series of analyses and sp. gr. determinations, made by Rammeisberg, has suggested the following subdivisions: (1) Magnesia tourmaline, sp. gr. 3 to 3.07; (2) iron-magnesia tourmaline, mean sp. gr. 3.11; (3) iron-tourmaline, sp. gr. 3.13 to 3.25; (4) iron-manganese-lithia tour-

tato, fát, fárc, amidst, whát, fáll, father; wé, wét, hère, oamel, hër, thère; píne, pít, síre, sír, marine; gô, pôt, or, wóre, wolf, wörk, whò, sôn; müte, öüb, cüre, únite, cür, rüle, fáll; trý, Sýrian. æ, œ = é; oy = ä; qu = kw.

maline, mean sp. gr. 3.083; (5) Lithic tourmaline, mean sp. gr. 3.041. The blowpipe reactions vary with the composition, which is essentially a borosilicate of proto- and sesquioxide. Occurs in granites, notably the albitic varieties, schists, and dolomite. Two remarkable and unique specimens of the variety Rubellite are exhibited in the national collection in the Natural History Museum at South Kensington. [TOURMALINE-PLATE.]

tourmaline-granite, s.
Petrol.: A granite in which tourmaline (q.v.) is a prominent constituent. [LUXULIANITE.]

tourmaline-granulite, s.
Petrol.: A variety of granulite (q.v.) in which tourmaline is a prominent constituent.

tourmaline-plates, s. pl.
Crystal.: Sections of crystals of tourmaline cut parallel to the axis. Such sections have the property of polarising light, and though now largely superseded by Nicol's prisms, are still convenient for some purposes, in spite of their colour, owing to their large angular field of vision.

tourmaline-rock, s.
Petrol.: A rock consisting principally of tourmaline and quartz, varying much in texture.

tourmaline-schist, s.
Petrol.: A schistose variety of tourmaline rock (q.v.).

tour-ma-lin-ite, s. [Eng. *tourmaline*; suff. -ite (Pérol).]
Petrol.: Tourmaline-granite (q.v.).

tour-ma-lite, s. [TOURMALINITE.]

***tourn, s.** [TOUR (1), s.]
1. *Law*: The turn or circuit anciently made by the sheriff twice every year for the purpose of holding in each hundred the great court leet of the county.

"This is the origin of the sheriff's *turn*, which decided in all affairs, civil and criminal, of whatever importance, and from which there lay no appeal but to the Wittenagemote."—*Barks: Abridgment English History*, bk. ii, ch. vii.

tour-na-méant, *tor-ne-men, *tor-nem-en, *tur-ne-ment, s. [O. Fr. *tournoiment* = a tournament, from *tournoier* = to joust, from *tornei*, *tornei* = a tourney, a joust; prop. = a turning about, from *turner* = to turn (q.v.); Ital. *torneo*, *torneo*, *torneo*.]
1. An encounter between armed knights on horseback in time of peace, as an exercise of skill (which was rewarded by honorary distinctions), and usually an adjunct of some great event, as a royal marriage, &c. The tournament was one of the most cherished institutions of the middle ages, furnishing, as it did, an exciting show, and giving the combatants an opportunity of exhibiting their skill, courage, and prowess before their friends. The regulations which governed these displays were propounded by the sovereign and enforced by kings-at-arms and heralds. They were usually held by the invitation of some prince, which was proclaimed throughout his own dominions, and frequently also at foreign courts, so that parties from different countries might join. They differed from jousts, in that the latter were merely trials of military skill between one knight and another. The arms employed were usually lances without heads, and with round braces of wood at the extremity, and swords without points and with blunted edges. Occasionally, however, the ordinary arms of warfare were used, and it not infrequently happened that angry passions were aroused, so that the tournament ended in a hostile encounter. Certain qualifications of birth were required for admission to the tournaments. The place of combat was the lists, a large open space surrounded by a rope or railing, and having galleries erected around for the spectators, the heralds, and the judges. The tilting armour was of light fabric, and generally adorned with some device of a lady's favour. The prizes were delivered to the successful knights by the queen of beauty, who had been chosen by the ladies. On the second day there was often a tournament for the esquires, and on the third a *mêlée* of knights and esquires in the lists.

2. Encounter; shock of battle.
"With cruel tournament the squadrons join."
Milton: P. L., xl. 652.

3. A competition or contest of skill, in which a number of individuals take part.

"The game of lawn tennis has also prospered there, and only last year an open tournament . . . proved a great success."—*Field*, Aug. 30, 1887.

town-clerk, s.

1. Ord. Lang.: In New England the town-clerk is an officer of some importance, his duty being to keep a record of all votes passed in the town meetings, and of the names of candidates and the number of votes for each in county and state elections. The marriages, births, and deaths in the township are recorded by him, descriptions of the public roads are kept, and all matters of town-record attended to. In England his duties comprise the keeping the records of the borough and the lists of burgesses, and the taking charge of voting-papers at municipal elections, &c. In Scotland he has a variety of duties imposed upon him. He is the adviser of the magistrates and the council in the discharge of their judicial and administrative functions, attends their meetings, and records their proceedings. He is the custodian of the burgh records, from which he is bound to give extracts when required.

2. Scripture: The translation, in Acts xix. 35 (A. V. & R. V.), of Gr. ὑπαμαρτυρεῖς (ho grammateus) = the keeper of the city records.

town-council, s.

The governing body in a municipal corporation elected by the people. Their principal duties are to manage the property of the municipality, impose taxes for public purposes, pass by-laws for the proper government of the town, for the prevention of nuisances, &c. In many of the cities of the United States, as in those of Pennsylvania, a double municipal legislature exists, consisting of a Select and Common Council, each measure proposed being required to pass both chambers and be signed by the mayor to become effective. In English towns the council is a single legislative body.

town-councillor, s. A member of a town-council, who is not an alderman.

town-cress, s.

Bot.: Lepidium sativum, the Garden Cress.

town-crier, s.

A public crier; one who makes proclamation of public meetings, auc-

tions, losses, &c., generally with sound of a bell.

"If you mouth it, as many of your players do, I had as lief the town-crier spoke my lines."—Shaksp.: Hamlet, iii. 1.

town-hall, s. A large hall or building belonging to a town or borough, in which the meetings of the town-council are usually held, and which is also frequently used as a place of public assembly; a town-house.

"These came together in the new town-hall."—Longfellow: Poet's Tale.

town-house, s.

1. A town-hall; an hôtel de ville.

"A town-house halted at one end will treat the church that stands at the other."—Addison: On Italy.

2. A private residence or mansion in town, in opposition to one in the country.

town-meeting, s. The mode of township government in vogue in New England, through which the people directly govern themselves. Annual town-meetings are held, at which all the voters of the township are expected to be present and to vote, while any one is privileged to offer motions or to discuss those offered. Appropriations for the town expenses are made, town-officers elected, and measures relating to town affairs adopted or rejected. The institution of the town-meeting has not been widely adopted outside of New England. It is the most complete form of democracy now existing, the people directly governing themselves. The system could not well be applied in large cities.

*town-rake, s. A man living loosely about town; a raker.

town-talk, s.

The common talk of a town, or the subject of general conversation.

2. An instrument like a stylus for tracing drawings, &c., on a superimposed sheet of paper, &c.

3. A simple kind of pantograph (q.v.).

4. *Comm.*: A form of inquiry forwarded from place to place of transfer, to ascertain the disposal of goods previously forwarded by freight, express, or mail. (U. S.)

trāc-ēr-y, s. [Eng. trace; -ry.]

Arch.: The species of pattern-work formed or traced in the head of a Gothic window by the mullions being continued, but diverging into arches, curves, and flowing lines enriched with foliations. The styles varied in different ages and countries, and are known as geometrical, flowing, flamboyant, &c. Also the subdivisions of groined vaults, or any ornamental design of the same character for doors, panelling, ceilings, &c.

"The traceries and construction do not agree with the rude arts of such a barbarous and early period." - Warton: *Hist. of Kildington*, p. 11.

trāch-, trāch-y-, pref. [Gr. *τραχύς* (*trachús*) = rough, harsh, savage.] A prefix used in natural history to denote roughness or hirsuteness.

trā-chō-a, trā-chō-a, s. [Mod. Lat., from Lat. *trachia*; Gr. *τραχία* (*trachia*) = the windpipe.]

1. *Anatomy*:

(1) In the air-breathing vertebrates the windpipe, the air-passage common to both lungs. It is an open tube commencing above the larynx, and dividing below into right and left bronchi, one for each lung. In man it is usually from four to four and a half inches long by three-quarters to an inch broad. In front and at the sides it is rendered cylindrical, firm, and resistant by a series of cartilaginous rings. These, however, are absent from its posterior portion, which is, in consequence, flattened and wholly membranous. The trachea is nearly everywhere connected by loose areolar tissue, abounding in elastic fibres, and readily moves on the surrounding parts. (*Quain*.)

(2) (*Pl.*): The air, respiratory, or breathing tubes ramifying throughout the body of Insects, Arachnida, and Myriapoda. They are long and sub-cylindrical, broadest at their origin from the spiracles, and consist of two coats, with a spiral fibre between them. Sometimes there are air-sacs destitute of spiral fibre.

2. *Bot. (Pl.)*: [SPIRAL-VESSELS.]

3. *Entom.*: A genus of Orthosida. British species one, *Trachea piniperda*, the Pine-beauty, the larva of which, a long, smooth caterpillar of bright colour, feeds on fir trees.

trachea-forceps, s.

Surg.: A long, curved forceps for extracting articles which may have accidentally intruded themselves into the windpipe or throat.

trā-chē-al, a. [Mod. Lat. *trache(a)*; Eng. adj. suff. -al.] Of or pertaining to the trachea, or windpipe.

* tracheal-animals, s. pl.

Entom.: Oken's name for insects.

tracheal-artery, s.

Anat.: An artery, or rather a series of arteries, branching off from the inferior thyroid, ramifying over the trachea, and anastomosing below with the bronchial arteries.

trā-chē-ā-lī-a, s. [Mod. Lat., from Lat. *trachea* = the windpipe.] [TRACHITIS.]

* trā-chē-ār-i-a, s. pl. [Mod. Lat., from *trachea* (q.v.).]

Zool.: A sub-division of the class Arachnida, breathing by tracheal tubes. There are two orders, Adelschrosmata and Monomerostomata (q.v.).

* trā-chē-ār-i-an, a. & s. [TRACHEARIA.]

A. *As adj.*: Of or belonging to the Trachearia (q.v.).

B. *As subst.*: Any individual of the Trachearia (q.v.).

trā-chē-ār-y, a. & s. [TRACHEA.]

A. *As adjective*:

1. *Bot.*: Designed as air-passages.

2. *Zool.*: Breathing by means of tracheæ.

B. *As subst.*: An arachnid belonging to the division Trachearia (q.v.).

tracheary-vessels, s. pl. [TRACHENCHYMA.]

† trā-chē-ā-ta, s. pl. [Mod. Lat., from Lat. *trachia* = the windpipe.] [TRACHEA.]

Zool.: A group of Arachnida, comprising those which breathe by tracheæ. These are sometimes merged in a larger group of the

bōil, bōy; pōit, jōwī; cat, cēll, chorus, çhin, bench; go, gēm; thin, thīs; sin, aç; expect, Xēnophon, exist. -īng. -cian, -tian = shān. -tion, -sion = shūn; -tīon, -sion = zhūn. -cious, -tious, -sious = shūs. -ble, -dle, &c. = bēl, dēl

same name comprising Insecta, Myriapoda, and Arachnida.

trāch-ō-īde, s. [Lat. *trachea*, and Gr. *είδος* (*eidos*) = form.]

Bot. (Pl.): Pitted cells, furnished with spiral, reticulate, or annular thickening layers. They occur abundantly in the yew, the lime, and viburnum. (Thomé.)

trā-chē-ī-tis, s. [TRACHEITIS.]

trā-chē-lī-a, s. pl. [TRACHELIUS.]

Entom.: A group of Heteromera, founded by Westwood. They comprise all but the Tenebrionidae (q.v.), and are distinguished by the head being exerted, soft integuments, and varied coloration.

trā-chē-lī-ī-dæ, s. pl. [Mod. Lat. *trachelius*(us); Lat. fem. pl. adj. suff. -īdæ.]

Zool.: A family of Holotrichous Infusoria, with three genera, two entirely and one chiefly freshwater in habitat. Animalcules, free-swimming, ovate or elongate, highly-elastic, ciliate throughout; oral cilia slightly larger than those of the general surface; oral aperture at its base of an anterior prolongation.

trā-chē-lī-pōd, s. [TRACHELIPODA.] Any individual of the order Trachelipoda (q.v.).

***trā-chē-līp-ō-dæ**, s. pl. [Gr. *τράχηλος* (*trachelos*) = the neck, and *πούς* (*pous*), genit. *πόδος* (*podos*) = the foot.]

Zool.: An order of Mollusca, established by Lamarck, and divided into two groups: (1) Carnivorous, (2) Feeding on plants. The order was approximately equivalent to the Proso-branchiata (q.v.) of Milne Edwards.

***trā-chē-līp-ō-dou**, s. [Eng. *trachelipod*;-ous.] Pertaining or belonging to the Trachelipoda; having the foot united with the neck.

trā-chē-lī-ūm, s. [Gr. *τράχηλος* (*trachelos*) = the throat. From its supposed efficacy in diseases of the trachea.]

Bot.: Throatwort; a genus of Campanulaceæ. The species are from the Mediterranean and the Cape of Good Hope. Two species, both with blue flowers, are cultivated in British gardens in borders.

trā-chō-lī-ūs, s. [Gr. *τραχήλια* (*trachēlia*) = scraps of meat and gristle about the neck; offal.]

Zool.: The type-genus of Trachelidæ (q.v.), with one species, from bog-water.

trā-chē-lō, *pref.* [Gr. *τράχηλος* (*trachelos*) = the throat or neck.]

Anat.: A prefix used in words of Greek origin, and meaning, of, belonging, or relating to the throat or neck.

trachelo-mastoid, a.

Anat.: Of or belonging to the mastoid process and to the neck. There is a *trachelo-mastoid* muscle.

trā-chē-lō-cēr-cæ, s. [Pref. *trachelo*-, and Gr. *κερκος* (*kerkos*) = a tail.]

Zool.: The type-genus of Trachelocercidæ (q.v.), with four species. *Trachelocerca olor* (= *Vibrio proteus*, V. *olor*, P. *cygnus*, Müll.) is from pond-water, *T. versatilis*, *T. phenicopterus*, and *T. tenuicollis* inhabit salt-water.

trā-chē-lō-cēr-çī-dæ, s. pl. [Mod. Lat. *trachelocera*(a); Lat. fem. pl. adj. suff. -īdæ.]

Zool.: A family of Holotrichous Infusoria, with six genera. Animalcules free-swimming, flask-shaped or elongate, soft and flexible, ciliate throughout; oral aperture terminal or sub-terminal.

trā-chē-lō-mōn-ās, s. [Pref. *trachelo*-, and Mod. Lat. *monas* (q.v.).]

Zool.: A genus of Euglenia (or, as the family is now generally called, Euglenidæ), with several species, mostly from fresh water. Animalcules with one flagellum, plastic, and changeable in form, enclosed within a free-floating sheath or lorica; endoplasm green, usually with a red pigment-spot at the anterior extremity.

trā-chē-lō-phyl-ī-dæ, s. pl. [Mod. Lat. *trachelophyllum*(um); Lat. fem. pl. adj. suff. -īdæ.]

Zool.: A family of Holotrichous Infusoria, with three genera. Flask-shaped, free-swimming animalcules; ciliate throughout; oral aperture perforating the extremity of the anterior region.

trā-chē-lō-phyl-lūm, s. [Pref. *trachelo*-, and Gr. *φύλλον* (*phullon*) = a leaf.]

Zool.: The type-genus of Trachelophyllidæ, with two species, from pond and stagnant water.

trā-chēn-chy-ma, s. [Pref. *trach(eo)*-, and Gr. *εγχυμα* (*engchuma*) = infusion.]

Bot.: Vascular tissue consisting of simple membranous, unbranched tubes, tapering to each end, but often ending abruptly, either having a fibre generated spirally in the inside, or having their walls marked by transverse bars arranged more or less spirally. It is divided into three kinds: spiral, annular, and reticulated.

trā-chē-ō, *pref.* [TRACHEA.] Of or pertaining to the trachea or tracheæ.

tracheo-branchia, s. pl.

Biol.: The names given to processes in the larvae of some aquatic insects, projecting laterally from the somites, and containing tracheæ, which communicate with those which traverse the body. They are in no sense branchiæ, but simply take the place of stigmata. (Huxley: *Anat. Invert. Anim.*, p. 252.)

trā-chē-ō-cæle, s. [Mod. Lat. *trachea* = the trachea, and Gr. *κύλη* (*kylē*) = a tumour.] An enlargement of the thyroid gland, bronchocele, or goitre.

trā-chē-ō-tōme, s. [TRACHEOTOME.]

Surg.: A kind of lancet with a blunt and rounded point, used for making an opening to remove foreign substances, or to permit the passage of air to the lungs.

trā-chē-ōt-ō-my, s. [Mod. Lat. *trachea* = the trachea, and Gr. *τομή* (*tomē*) = a cutting.]

Surg.: The operation of making an opening into the trachea or windpipe, as in case of suffocation. The operations of laryngotomy, tracheotomy, and bronchotomy are essentially similar, the terms being derived from the name of the part whose walls are penetrated to remove foreign bodies or permit passage of air to the lungs.

tracheotomy-tube, s.

Surg.: A tube to be placed in an opening made through the walls of the trachea to permit passage of air to the lungs in case of stricture of the larynx, or the presence of foreign bodies to the air-duct.

trāch-īoh-thys, s. [Pref. *trach*-, and Gr. *ίχθυς* (*ichthys*) = a fish.]

Ichthy.: A genus of Berycidæ, with four species from New Zealand and Madeira. Snout very short and obtuse; eye large; a strong spine at the scapula and at the angle of the præoperculum; scales rather small; abdomen serrated; one dorsal, with from three to six spines; ventral with six soft rays; caudal forked.

trā-chin-ī-dæ, s. pl. [Mod. Lat. *trachin*(us); Lat. fem. pl. adj. suff. -īdæ.]

1. **Ichthy.**: A family of Acanthopterygii Cotto-Scobriformes. Body elongate, low, naked, or covered with scales; one or two dorsal fins, the spinous portion being always shorter and much less developed than the soft; development of anal fins that of soft dorsal; ventrals with one spine and five rays; gill-openings more or less wide. The family is divided into five groups, widely distributed: Uranoscopina, Trachinina, Piogupedina, Pseudochromidæ, and Nototheniina.

2. **Palæont.**: Three fossil genera are known: Callipteryx, scaleless, from the Eocene of Monte Bolca; Trachinopsis, from the Upper Tertiary of Lorca, Spain, and Pseudocolegus, from the Miocene of Licata, Sicily.

trā-chin-ī-na, s. pl. [Mod. Lat. *trachin*(us); Lat. neut. pl. adj. suff. -īna.]

Ichthy.: A group of Trachinidæ, with numerous genera, one of which, Bathydracon, is the only deep-sea fish of the family. Eyes more or less lateral; lateral line continuous.

trā-chin-ōps, s. [Mod. Lat. *trachin*(us), and Gr. *ὄψ* (*ops*) = the eye, the face.]

Ichthy.: A genus of Pleiopinæ (q.v.), from the coast of Australia.

trā-chin-ōp-sis, s. [Mod. Lat. *trachin*(us), and Gr. *ὄψις* (*opsis*) = appearance.] [TRACHINIDÆ, 2.]

trā-chin-ūs, s. [Mod. Lat., from Gr. *τράχυν* (*trachus*) = rough.]

Ichthy.: Weevers; the type-genus of Trachinina. Mouth-cleft oblique; eyes lateral, directed upwards; scales very small, cycloid; two dorsals, the first short; ventrala jugular, lower pectoral rays simple; villiform teeth in jaws, on vomer, and palatine bones; præorbital and præoperculum armed. Several species, common on the European coasts, absent from the Atlantic, but re-appearing on the coast of Chili. They are of small economic value, and are armed with opercular spines capable of inflicting severe wounds.

trā-chī-tis, s. [Eng. *trachea*; suff. -itis, denoting inflammation.]

Pathol.: Inflammation of the trachea or windpipe. Called also Tracheitis and Tracheia.

trā-chle, **trāu-chle**, v.t. or t. [Cf. *draggle*.] To draggle; to exhaust with long exertion; to wear out with fatigue. (Scott.)

trā-chō-mæ, s. [Gr. *τράχυμα* (*trachōma*) = a roughness.]

Pathol.: A roughness of the eyelids, especially on their inner parts, from scabs, arising from an obstruction of the sebaceous glands. There is a heaviness in the eye, a swelling of the eyelids, with a pain and itching in their corners and in the conjunctiva, and the flow of a viscid humour, which sometimes agglutinates the eyelids.

trā-chō-mē-dū-sæ, s. pl. [Gr. *τράχυν* (*trachus*) = rough, and Mod. Lat. *medusa*.]

Zool.: An order of Hydrozoa, sub-class Hydromedusæ, with the families: Petasida, Trachyneidæ, Aglauridæ, and Geryoniidæ. They are Medusæ related to Hydra, and have modified tentacles as sense-organs. No hydra-form stage is known in any member of the group, and in one genus (Geryonia) there is direct development from the egg into the medusa form.

† trā-ohūr-ūs, s. [Gr. *τράχυν* (*trachus*) = rough, and *οὐρά* (*oura*) = tail.]

Ichthy.: An old genus of Carangidæ, now generally merged in Scomber (the type-genus of Scombridæ). *Trachurus trachurus* is the Horse-mackerel. It is about a foot long, or about the length of the common mackerel, and is found in the European seas, at the Cape of Good Hope, in the Indian Ocean, on the coasts of New Zealand and Western America. It appears off the shores of Cornwall and Devon in immense shoals, which are preyed on by a large number of marine birds. Its flesh is far inferior to that of the common mackerel.

trā-chy-bæ-salt, s. [Pref. *trachy*-, and Eng. *basalt*.]

Petrol.: Boricky's name for a group of basalts which he regards as of the latest origin. They are very fine-grained; colour, shades of gray; and contain zeolitic substances resembling those occurring in the trachytic phonolites of Bohemia.

† trā-chy-dēr-mæ, s. [Pref. *trachy*-, and Gr. *δέρμα* (*derma*) = skin.]

Palæont.: A genus of Annelids, proposed by Phillips for the casts of membranous flexible tubes from the Silurian. They are transversely wrinkled or plaited, and though the tube itself has disappeared, there can be little doubt that they were made by Annelids.

trā-chy-dēr-mōch-ōl-ys, s. [Pref. *trachy*-, Gr. *δέρμα* (*derma*) = skin, and *χέλος* (*chelos*) = a tortoise.]

Palæont.: A genus of Chelonis, with one species, from the Upper Greensand.

trā-chy-dī-ōr-ite, s. [Eng. *trachyte*(s), and *diorite*.]

Petrol.: A name given to a trachyte (q.v.) which contains hornblende.

trā-chy-dō-lēr-ite, s. [Eng. *trachyte*(s), and *dolerite*.]

Petrol.: A name given by Abich to a rock resembling a trachyte, but intermediate in composition between trachyte and dolerite.

trā-chy-lō-bī-ūm, s. [Pref. *trachy*-, and Gr. *λοβός* (*lobos*) = a lobe.]

Bot.: A genus of Cæsalpinidæ, akin to *Hymenæa* (q.v.). [COPAL, ¶ (1).]

fāto, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, there; pine, pīt, sirc, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, oūre, ūnite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā; qu = kw.

trā-chy' nō-ma, s. [Pref. trachy-, and Gr. νημα (nēma) = yarn.]

Zool.: The typical genus of Trachynemidae (q.v.).

trā-chy' nō-mī-dōe, s. pl. [Mod. Lat. trachynem(a); Lat. fem. pl. adj. snif. -īdōe.]

Zool.: A family of Trachomedusae (q.v.).

trā-chy' nō-tūs, s. [Pref. trachy-, and Gr. νῶτος (nōtos) = the back.]

Ichthy.: A genus of Acronuridae, with ten species, from the tropical Atlantic, and Indo-Pacific. Body more or less elevated, covered with very small scales; mouth rather small, with short convex snout; opercula entire; no flukes; first dorsal consisting of a few free spines. To this genus belong some of the commonest marine fishes; Trachynotus ovatus ranges over the whole tropical zone.

trā-chy' ōps, s. [Pref. trachy-, and Gr. ὄψ (ōps) = the face.]

Zool.: A genus of Vampyri (q.v.) with one species, Trachyops cirrhosus, from Pernambuco. Muzzle shorter than in Vampyrius, with numerous conical warts; nose-leaf well developed.

trā-chy' ō-gōn, s. [Pref. trachy-, and Gr. μάγρον (māgron) = a beard.]

Bot.: A synonym of Sorghum (q.v.).

trā-chy'p-tēr-i-dōe, s. pl. [Mod. Lat. trachypter(us); Lat. fem. pl. adj. suff. -īdōe.]

Ichthy.: A family of fishes constituting the division Tamiiformes of the order Acanthopterygii. Body ribbon-shaped, with the dorsal extending its whole length, anal absent, caudal fin rudimentary, or not in the longitudinal axis of the fish; ventrals thoracic, either composed of several rays or reduced to a single long filament; coloration generally silvery, with gray fins.

trā-chy'p-tēr-ūs, s. [Pref. trachy-, and Gr. πτερόν (pteron) = a wing, a fin.]

Ichthy.: The type-genus of Trachypteridae (q.v.). Ventrals consisting of several more or less branched rays. Specimens have been taken in the Mediterranean, the Atlantic, round the Mauritius, and in the Eastern Pacific. Trachypterus arcticus, the Deal-fish, is often met with in the North Atlantic, and specimens are frequently washed ashore on the northern coasts of Britain after the equinoctial gales.

trā-chy' sō-ma, s. [Pref. trachy-, and Gr. σῶμα (sōma) = body.]

Palaeont.: A genus of Macrurus Crustacea, with one species from the London Clay.

trā-chy'te, s. [Gr. τραχύς (trachys) = rough.]

Petrol.: A name originally given by Italy to a light-colored porous rock, containing glassy-felspar (sanidine) crystals, with small amounts of other minerals; a well-known type being that of the Drachenfels, Bonn, Rhine. Subsequently other rocks, having a similar mineral composition, were referred to the original type, but with subordinate names. These were designated by terms which indicated the predominant mineral constituent, hence sanidine-trachyte, oligoclase-trachyte, &c. With the exception of the rocks of a few localities, this word is now used as the name of a group of rocks having certain physical and chemical resemblances in common, but differing considerably in their mineralogical composition. For their mineralogical composition, structure and classification, see Rosenbusch, Mikroskopische Physiographie d. massigen Gesteine (Stuttgart, 1877), and other petrological works.

trachyte-porphyr, s.

Petrol.: The same as QUARTZ-FELSITE (q.v.).

trachyte-tuff, s.

Petrol.: A tuff (q.v.), consisting of either fragmentary or loosely-compacted earthy, volcanic materials, having the composition and structure of trachyte (q.v.).

trā-chy'tēl-la, s. [Gr. τραχύτης (trachutēs) = roughness. See def.]

Bot.: A genus of Delimeae. Sepala four to five, petals four to five, stamena indefinite, carpela one or two, baccate, many-acceded. The leaves of Trachytella Actaea are so rough that they are used in Canton for polishing both wood and metal.

trā-chy't-ō, a. [Eng. trachyt(e) -ō.] Pertaining to, consisting of, or resembling trachyte.

"Here and there, a trachytic spur projected from the hills."—Chambers' Journal, Feb. 27, 1866.

trāg' līng, pr. par., a., & s. [TRACE (1), v.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As substantive:

- 1. The act of one who traces.
2. Course; regular tract or path.
3. A mechanical copy of an original design or drawing, made by following its lines through a transparent medium, such as tracing-paper (q.v.).

tracing-lines, s. pl.

Naut.: Lines in a ship passing through a block or thimble, and used to hoist a thing higher.

tracing-paper, s. A tissue-paper of even body treated with oil, solution of resin or varnish, to render it transparent.

trāck, * tracke, s. [O. Fr. trac = a beaten way or path, a trade or course, from O. Dut. track; Dut. trek = a draught, from trekken = to draw, to pull, to travel, to march; M. H. Ger. trecken = to draw; O. H. Ger. trechen, trekhan = to scrape, to shove, to draw; O. Fries. trekka = to draw. Track and tract were formerly confused, but are really quite distinct.]

I. Ordinary Language:

- 1. A mark left by something that has passed along.
2. The mark or impression left by the foot, either of a human being or of one of the lower animals; a footprint, a trace.
3. A road, a beaten path.

"Wild were the walks upon those lonely downs, Track leading into track." Wordsworth: Excursion, bk. III.

"The track in impression left by the foot, either of a human being or of one of the lower animals; a footprint, a trace." Neither track of beast Nor foot of man. Beaumont & Fletcher: Sea Voyage, iv.

"Behold, down yonder hollow track." Scott: Rokeby, iv. 96.

4. A course followed; a path in general. "From the Spanish trade in the South-seas running all in one track from north to south." Anon: Voyages, bk. I., ch. ix.

5. A course or line generally. "To quit the beaten track of life, and soar Far as she finds a yielding element." Wordsworth: Excursion, bk. III.

6. The rails on which the locomotives, carriages, &c., of a railway run; the permanent way of a railway.

7. A course laid out for foot-races, bicycle races, and the like. "The six-lap grass track on which the above sports were held." Field, Aug. 20, 1887.

* 8. A tract of land. "As little do we intend to touch on those small tracks of ground, the county of Poole, and the like." Palter: Worthies; General.

II. Palaeont.: A collective term used for a number of markings from the older rocks, probably made by Annelids. They are often grouped under the following heads:—

(1) Burrows of Habitation: Shafts or burrows made in the sand or mud of a bygone age between tide-marks or in shallow water, and communicating with the surface. Abundant in the Cambrian and Silurian.

(2) Wandering Burrows: Long, irregular, tortuous burrows beneath the surface, such as are made by the living Arenicola piscatorum. From the Paleozoic Rocks.

(3) Tracks and trails: Markings formed by the animal dragging its soft body over the surface of wet sand or mud, between tide-marks or in shallow water.

Authorities are not agreed as to the Annelidan character of all these vermiform fossils. Mr. Hancock advocates the view that many of them were formed by Crustacea, and Principal Dawson suggests that Algae, and also land-plants, drifting with tides and currents, often make the most remarkable and fantastic trails, which might easily be mistaken for the tracks of Annelids.

To make tracks: To go away in haste; to leave, to quit, to depart, to start. "On joining my friend, we at once made tracks for the camp, ready for what was to follow." Field, Feb. 28, 1887.

track-boat, s. A boat pulled by a towing-line, as on a canal. "I remember our glad embarkation towards Paisley by canal track-boat." Carlyle: Reminiscences, I. 181.

track-harness, s.

Saddlery: A very light breast-collar single harness.

track-layer, s.

Rail.-eng.: A carriage provided with apparatus for placing the rails in their proper positions on the track as the machine advances over a portion of the track already laid down.

track-rail, s.

Rail.-eng.: A rail for the tread of the wheel, in contradistinction to a guard-rail, for instance.

track-raiser, s. A lifting-jack for raising rails which have become sprung below the proper level.

track-road, s. A towing-path.

track-scale, s. A scale which weighs a section of railway-track with the load thereupon.

track-scout, s. [TRACKSCOUT.]

track-way, s. A tramway (q.v.).

trāck (1), v. t. [TRACE, s.]

I. Ordinary Language:

1. To follow, when guided by a trace, or by the footprints or marks of the feet. "His tawny muzzle tracked the ground, And his red eye shot fire." Scott: Lay of the Last Minstrel, III. 18.

2. To follow when guided by signs of something which has passed along; to trace. "It was often found impossible to track the robbers to their retreat." Macaulay: Hist. Eng., ch. III.

II. Naut.: To tow or draw, as a vessel or boat, by means of a rope.

"The bodily trawling obtained by rowing, tracking, and portaging." Standard, Nov. 18, 1855.

* track (2), v. t. [For tract, v. (q.v.)] To protract, to delay.

"By delays the sootier was always tracked, & put over." Strype: Eccles. Mem. Henry VIII. (Orig.), No. 12.

trāck' age (age as īg), s. [Eng. track (1), v.; -age.] The drawing or towing of a boat; towage.

trāck' ēr, s. [Eng. track (1), v.; -er.] One who tracks or traces; one who pursues or hunts by following the tracks or traces of a person or animal. "A staff of first-class black trackers were imported from Queensland." Leisure Hour, March, 1856, p. 193.

trāck' lēss, a. [Eng. track, a.; -less.] 1. Having no track; unmarked by foot-steps or tracks; untrdden, untravelled. 2. Leaving no trace; that cannot be tracked. "I see my way, as birds trackles way." R. Browning: Paracelsus, I.

* trāck' lēss-ly, adv. [Eng. trackless; -ly.] In a trackless manner; without a track.

* trāck' lēss-nēss, s. [Eng. trackless; -ness.] The quality or state of being trackless or without a track.

trāck' man, s. [Eng. track, a., and man.] A man employed to look after the track or permanent way of a railway. "The trackmen on the railroads constantly find them with broken necks lying along the track." Scribner's Magazine, Aug., 1887, p. 425.

* trāck' scōut, * trāck' scōute, s. [Dut. trekschuit, from trekken = to draw, and schuit = a boat.] A boat or vessel employed on the canals in Holland, and usually drawn by a horse. "It would not be amiss if he travelled over England in a stage-coach, and made the tour of Holland in a trackscout." Arbutnot & Pope: Martinus Scribnerus.

trāck' wāy, s. [Eng. track, a., and way.] A beaten path; an open track or road. "Their anxious followers commenced to ride the broad trackways." Field, Jan. 23, 1886.

trāct (1), * trāctt, * trācte, s. [Lat. tractus = a drawing out, the course of a river, a tract or region; prop. pa. par. of trahō = to draw. Tract was often confused both with trace and track; it is really related to the former only.] [TRAIT.]

* 1. A protracting or extending. "By tract of time to wear out Hannibal's force and power." North: Plutarch, p. 152.

* 2. Continued duration; process, length, extent. "This in tracts of time made hym welthy." Fabyan: Chronycle, ch. IV.

"The discovery of a man's self by the tract of his countenance is a great weakness."—Bacon.

¶ (1) Olfactory tract:

Anat.: A nerve-like process extending from the front of the anterior perforated spot on the cerebrum. It is lodged in a hollow in the under surface of the frontal lobe, close to the longitudinal fissure, and ends anteriorly in an oval swelling called an olfactory bulb.

(2) Optic tracts: [OPTIC TRACTS].

(3) Respiratory tract: [RESPIRATORY CENTRE].

tract (2). s. [An abbrev. of tractate (q.v.).]

1. Ord. Lang. A written discourse or dissertation, usually of short extent; a treatise, and particularly a short treatise on practical religion.

"She must needs write a tract about certain miracles that were or were not for I'll not answer for either—performed by a saint that for many years back nobody had paid any attention to."—Læzer: *Do I Family Abroad*, let. lxviii.

¶ Frequently used adjectively: as, a Tract Society—that is, a society established for the printing and distribution of tracts; a tract distributor, &c.

2. Roman Ritual: Verses of Scripture said, instead of the Alleluia, after the Gradual, in all masses from Septuagesima to Holy Saturday. Le Brun (*Épique de la Messe*, i. 205), says that the name meant something sung *tractim*—i.e., without breaks or interruption of other voices, as in responsories and antiphons—by the cantor alone. (*Addis & Arnold*.)

"With Mr. Newman's secession, the Tractarian movement terminated."—*Chambers' Encyc.*, ix. 505.

Trac-tar'-i-an-ism, s. [Eng. tractarian; -ism.]

Church Hist.: The name given to the Catholic revival in the Church of England which commenced at Oxford in 1833, whence it is sometimes called the Oxford Movement. Two influences prepared the way for Tractarianism, and secured for it a measure of success: (1) the tendency to Rationalism brought about by the study of German theology, (2) the perfunctory way in which a large number of the clergy performed their duties. From the desire to revive the authority of the Church, and to make her once again national in the widest and deepest sense of the term. The leaders of the movement were two celebrated Fellows of Ori-el—John Keble (1792-1856) and John Henry (afterwards Cardinal) Newman (b. 1801), with whom were joined Richard Hurrell Froude (1803-36), Arthur Philip Perceval (d. 1853), Frederick William Faber (1814-63), William Palmer of Magdalen (1811-79), and William Palmer of Worcester (c. 1800-85), Edward Bouverie Pusey (1800-82), and Isaac Williams (1802-65); and one celebrated Cambridge man, Hugh James Rose (1795-1838). On July 14, 1833, Keble preached an Assize Sermon, entitled the *National Apostasy*, at Oxford, which so moved Newman, that he arranged a meeting of the clergy named above at Rose's rectory at Huddleigh. Faber, Pusey, and Williams were not present; but Newman broached the idea of *Tracts for the Times*, which was adopted, and urged that they should be supported and supplemented by higher pulpit teaching. Of the ninety Tracts published in the following eight years, Newman wrote twenty-eight, including the famous Tract XC. (*Remarks on Certain Passages in the XXXIX. Articles*), published in 1841. Pusey contributed notes on Fasting and Baptism, and H. E. (now Cardinal) Manning wrote No. 3 of the *Cælena Patrum* (*Quod semper. Quod ubique. Quod ab omnibus Traditum est*). Tract XC. raised a tremendous storm in Oxford, and was censured by the Heads of Houses; Dr. Bagot, Bishop of Oxford, wrote to Newman requesting that the series should come to an end, and no more were published. In 1843 Newman resigned the incumbency of St. Mary's, Oxford, and the chaplaincy of Littlemore, and in September, 1845, was received into the Roman Church, as were others of the tract-writers about the same time. With Newman's secession Tractarianism came to an end, and more properly speaking, developed into a Catholic section of the Anglican Establishment, with which Pusey and Keble, who remained in the Church of England, were identified. The general teaching of the Tractarians included Apostolic Succession, Baptismal Regeneration, Confession, the Real Presence, the Authority of the Church, and

the value of Tradition. The effects of the movement were (1) a revival and strengthening of the High Church section of the Establishment; (2) an increase of learning, piety, and devotedness among the clergy; (3) the establishment of sisterhoods and other religious and charitable institutions; (4) the development of ritual, as symbolic of Catholic doctrine; (5) the revival of Gothic architecture; and (6) a large secession of English clergy and laity to Rome.

* trac-tate, s. [Lat. tractatus = a handling, a treatise, a tract, from tracto = to handle, frequent. of traho = to draw.] A treatise, a tract.

"Having written many tractates in that faculty."—Putter: *Worthies*; *Willshire*.

* trac-ta-tion, s. [Lat. tractatio = a handling.] [TRACTATE.] Handling or treatment of a subject; discussion.

"In my tractation of antiquities."—*Bohn's*: *Descript. Britaine*, ch. ix.

* trac-ta-tor, s. [Lat.] [TRACTATE.] A writer of tracts; specifically, a tractarian, one who favours tractarianism.

"Talking of the tractators—so you still like their tone!"—*Keble*, in *Life*, l. 54.

trac-ta-trix, s. [Lat.]

Geom.: The same as TRACTRIX. [TRACTOR.]

tract-ile, a. [Lat. tractus, pa. par. of traho = to draw.] Capable of being drawn out or extended in length; ductile.

"The consistencies of bodies are very diverse; fragile, tough; flexible, inflexible; tractile, or to be drawn forth to length, intractile."—*Bacon*: *Nat. Hist.*, § 839.

* tract-il-i-ty, s. [Eng. tractile; -ity.]

The quality or state of being tractile; ductility.

"Silver, whose ductility and tractility are much inferior to those of gold."—*Berham*.

tract-ion, s. [Fr. from Lat. tractus, pa. par. of traho = to draw.]

1. The act of drawing; the state of being drawn.

"The traction of the annexed muscles."—*Paley*: *Natural Theology*, ch. x.

2. The act of drawing a body along a plane, usually by the power of men, animals, or steam, as when a vessel is towed upon the surface of water, or a carriage upon a road or railway. The power exerted in order to produce the effect is called the force of traction; the line in which this force acts is called the line of traction; and the angle which this line makes with the plane along which the body is drawn by the force of traction is called the angle of traction.

* 3. Attraction; a drawing towards.

4. The adhesive friction of a wheel on the rail, a rope on a pulley, &c. The tractional surface of a driving-wheel is the face of its perimeter.

traction-engine, s. A locomotive engine for drawing heavy loads upon common roads, or over arable land, as in agricultural operations. Some of the earliest locomotive engines, as Murdoch's, were designed for this very purpose. The use of traction-engines upon public roads is only permitted under proper regulations.

traction-gearing, s. An arrangement for turning a wheel and its shaft by means of friction or adhesion.

traction-wheel, s. The driving wheel in a self-propelled vehicle.

tract-ion-ql, a. [Eng. traction; -al.] Of or pertaining to traction.

* trac-ty-lious, a. [Lat. tracto = to handle.] Treating of; handling.

Math. : A curve whose tangent is always equal to a given line. It may be described by a small weight attached to a string, the other end of which is moved along a given straight line or curve. The evolute of this curve is the common catenary.

tráde, *tred, *trod, s. & a. [Originally a path *trádon*, from A.S. *trédan* = to tread (q.v.).]

A. As substantive :

* 1. A path, a passage, a way.

"A postern with a blinde wicket thers was,
A common *trade* to passe through Fritam's house."
Surrey: Virgils; Eccl. II. 408.

* 2. A track, a trace, a trail. (See extract under *TRACT*, v. (1), 2.)

* 3. Way, course, path.

"The Jews, among whom alone and no moe, God hitherto sendd for to reigne, by reason of their knowledge of the law, and of the authorize of being in the right *trade* of religion."—*Udat: Luke xix.*

* 4. Frequent resort and intercourse; resort.

"Some way of common *trade*."
Shaksp.: Richard II. III. 2.

* 5. A particular course of action or effort; effort in a particular direction.

"Long did I love this lady;
Long my travail, long my *trade* to win her."
Shaksp.: Measure for Measure, III. 1.

* 6. Custom; habit; practice of long standing.

"Thy sin's not accidental but a *trade*."
Shaksp.: Measure for Measure, III. 1.

* 7. Business of any kind.

"Have you any further *trade* with us?"
Shaksp.: Hamlet, III. 2.

* 8. The business which a person has learnt, and which he carries on for subsistence or profit; occupation; particularly employment, whether manual or mercantile, as distinguished from the liberal arts or the learned professions and agriculture; a handicraft. Thus we say the *trade* of a butcher or baker, but the *profession* of a lawyer or doctor.

"What *trade* are you of?"
Shaksp.: Measure for Measure, II. 1.

* 9. The act, occupation, or business of exchanging commodities for other commodities or for money; the business of buying and selling; dealing by way of sale or exchange; commerce; traffic. Trade, in the commercial sense of the term, includes all those departments of business which relate to the production and exchange of commodities embodied in some material or corporeal product; and excludes those professions whose services result in the production of incorporeal wealth. It is chiefly used to denote the barter or purchase and sale of goods, wares, and merchandise, either by wholesale or retail. Trade is either domestic or foreign. Domestic trade, also called Home trade, is the exchange or buying and selling of commodities within a country; foreign trade consists in the exportation and importation of commodities to or from foreign countries. Wholesale trade is the dealing by the package or in large quantities; retail, in small parcels. The carrying trade is that of transporting goods from one place to another by sea, &c.

"Here is no *trade* of merchandize used, for that the people have no use of money."—*Hackluyt: Voyages, I. 227.*

* 10. The amount of business done in any particular place or country, or in any particular branch.

* 11. Persons engaged in a particular occupation or business: as, Publishers and book-sellers speak of the customs of the *trade*.

* 12. A trade-wind (q.v.).

* 13. Instruments of any occupation.

"The shepherd bears
His house and household goods, his *trade* of war,
His bow and quiver, and his trusty cur."
Dryden: Virgil; Georgic III. 535.

B. As adj.: Pertaining to or characteristic of trade, or of a particular trade.

"An association of shipowners might be successfully used for dangers, if it could be shown that their object was to secure a *trade* monopoly."—*Field, Aug. 15, 1887.*

¶ The leading idea in *trade* is that of carrying on business for purposes of gain. The *trade* may be altogether domestic, and betwixt neighbours; the *traffic* is that which goes forward betwixt persons at a distance: in this manner there may be a great *traffic* betwixt two towns or cities, as betwixt

New York and the seaports of the different countries. Hence, though these terms are often used interchangeably, *traffic* has a more extended meaning than *trade*.

1. *Balance of Trade:* [BALANCE, B. 6.]

2. *Board of Trade, America:* In the United States there is no national control of trade matters, comparable with that of England, but the various cities of this country have organized civic Boards of Trade, or Chambers of Commerce, as they are called in some instances, their purpose being to consider all questions relating to the commercial and other material interests of the respective cities. The earliest of these was organized in New York in 1768, followed by New Haven in 1794, and Philadelphia in 1833. All the other large cities of this country and many of the smaller ones have since then organized Boards of Trade, while many European cities possess similar institutions. In 1863 a National Board of Trade was organized in the United States, composed of the Boards of the various cities. This national body holds annual meetings.

3. *Board of Trade, English:* A committee of the Privy Council, presided over by a member of the Cabinet, and divided into seven departments, each having its separate staff: (1) The Harbour Department, which exercises a supervision over lighthouse, pilotage, fore-shores, wrecks, quarantine, &c. Included in this department are the standard weights and measures offices. (2) The Marine Department, to which is entrusted the supervision of the registration, condition, and discipline of merchant ships; the superintendence of mercantile marine offices, and the prevention of crimping; the carrying out of the regulations with regard to the engagement of men and apprentices; the examination of officers; the investigation into cases of gross misconduct and wrecks, and generally the carrying out of the business imposed on the Board by the various Shipping Acts. (3) The Railway Department, which has the supervision of railways and railway companies, and which must be supplied with notices of application for railway acts, and with plans, before the relative bill can be brought before Parliament. Before a line is opened for traffic it must be inspected and approved by an inspector of this department, and the consent of the Board obtained; and notice of the occurrence of any accident must be sent to the department, when, if necessary, an enquiry is held into the cause of the accident. This department has also to keep a register of joint-stock companies, of the accounts of insurance companies, and to prepare provisional orders relating to gas, water, tramways, and electric lighting. It also deals with patents, designs, and trade-marks, copyright, art-unions, industrial exhibitions, and the Explosive Acts (1875). (4) The Financial Department, which has to keep the accounts of the Board, controlling its receipts and expenditure. This department has also to deal with Greenwich pensions, seamen's savings banks, the proper disposal of the effects of seamen dying abroad, wreck and salvage accounts, and the accounts of estates in bankruptcy. (5) The Commercial Department, whose duty it is to advise the Treasury and the Colonial and Foreign Offices on matters relating to tariffs and burdens of trade, to superintend the carrying out of the Acts relating to bankruptcy, and bills of sale; and to prepare the official volumes of statistics periodically issued, and also special statistical returns for the information of Parliament, chambers of commerce, and private individuals. (6) The Fisheries Department, to which is entrusted the carrying out of the various Acts relating to salt and freshwater fisheries, and the pollution of rivers. (7) The Establishment Department, which deals with establishment questions, copying, postage, &c., and has the care of the library of the Board.

4. *Fair Trade:* A title chosen in England by those who object to the Free Trade policy of that country, and desire a certain degree of protection, particularly against imports from

protectionist countries.

¶ Used also adjectively.

5. *Free Trade:* [FREE-TRADE.]

trade-allowance, s. A discount allowed to dealers in or retailers of articles to be sold again.

trade-dollar, s. A silver dollar of 420 grains (.900 fine), formerly coined by the United States Mint for employment in trade

with silver-using countries. It was never legal tender.

* **trade-fallen, a.** Fallen or brought low in one's trade or business.

* **trade-hall, s.** A large hall in a city or town where manufacturers, traders, &c., meet; also a hall devoted to meetings of the incorporated trades of a town, city, or district.

trade-mark, s. An arbitrary symbol affixed by a manufacturer or merchant to particular goods or classes of goods. In all civilized communities trade-marks are protected by law, and nearly all nations have treaties or conventions securing reciprocity of protection. A trade-mark must consist of:

(1) A name of an individual or firm printed, impressed, or woven in some particular and distinctive manner; or (2) A written signature or copy of a written signature of the individual or firm applying for registration thereof as a trade-mark; or (3) A distinctive device, mark, brand, heading, label, ticket, or fancy word or words not in common use.

No any one or more of these particulars there may be added any letters, words, or figures; but no trade-mark must be identical with one already registered for the same class of goods.

In the United States copyright is not granted upon such marks, upon names of companies or articles, upon an idea or device, or upon prints or labels intended to be used for any article of manufacture. But protection can be obtained for such names or labels by applying for registry at the Patent Office, the fee for registering being \$6.00 in the case of prints and labels and \$25.00 in that of trade-marks.

The "International Convention for the Protection of Industrial Property," held in Paris in 1883, which formed an International Union since joined by many countries, extends its protection to trade-marks, an applicant for registration in any of the countries concerned being protected in the others, if applying to them within the fixed limit of time. The earliest trade-marks appear to have been those used in the manufacture of paper, and now known as watermarks. Under English law the registration of a person as first proprietor of a trade-mark is to be taken as *prima facie* evidence of his right to its exclusive use, and after a number of years as conclusive evidence to that effect. The Merchandise Marks Act, 1875, was passed, extended, and made much more stringent to protect the public from being defrauded by means of false trade descriptions or trade-marks. Every person guilty of an offence against this act is liable on conviction on indictment to imprisonment, with or without hard labor, for a term not exceeding two years, or to a fine, or to both imprisonment and fine. Also to forfeit every chattel, article, instrument, or thing, by means of or in relation to which an offence has been committed. No proceedings can be taken to prevent the infringement of a trade-mark, unless such trade-mark has been duly registered according to law. [WATER-MARK.]

trade-name, s. A name invented or adopted to specify some article of commerce, or as the style of a business house.

trade-price, s. The price charged to dealers in articles to be sold again.

trade-sale, s. A sale or auction of goods suited to a particular class of dealers.

trade-wind, s.

Meteor. (Pl.): Certain ocean winds which blowing constantly in one direction or very nearly so, can be calculated on beforehand by the mariner, and are therefore beneficial to trade. They exist on all open oceans to a distance of about 30° north and south of the equator, blowing from about the north-east in the northern, and from south-east in the southern hemisphere. Where they meet they neutralise each other, creating a region of calm north, and the same distance south of the equator. Atmospheric air expands by heat, and, expanding, naturally ascends, its place being supplied by a rush of colder, and consequently of denser air beneath. The process is continually in progress, to a great extent, everywhere throughout the tropics, but especially above the land. If the globe consisted solely of land, or solely of water, and had no rotation, the cold currents would travel directly from the north and south poles to the equator; but the rotation of the earth deflects them from their course. The

atmosphere lags behind the moving planet, especially at the equator, where the rotation is about a thousand miles an hour. Neither the direction nor the area of the trade-winds remains fixed. Since they supply the place of rarefied air, which is ascending, they must follow the movement of the sun, blowing to the point of greatest rarefaction, as a cold current coming through a keyhole goes to the fire. Hence, the area of the trade-winds extends from the Tropic to four degrees farther north than usual when the sun is at the Tropic of Cancer, and the same number of degrees farther south than usual when he is at the Tropic of Capricorn. In the former case the south-east trade-wind declines further from the east from its northern limit, sometimes passing the equator, while the north-east trade-wind approaches an easterly direction, more than at other times. The region of calms also changes its position. As the difference of pressure is not great, the trade-wind is generally moderate in strength, especially in the opposite hemispheres from that in which the sun is at the time. The trade-winds were not known till Columbus's first voyage. They are most marked on the Atlantic and Pacific Oceans, where they occur between 9° and 30° north, and between 4° and 22° south, in the former, and between 9° and 26°, north and between 4° and 23° south in the latter ocean, but become modified in the vicinity of land, so as to lose their distinctive character. In the Indian Ocean, and in south-eastern Asia they become altered into monsoons. [MONSOON.]

"A constant trade-wind will surely blow,
And gently lay us on the spicy shore."
Dryden: Annus Mirabilis, ecclv.

trades-people, s. pl. People engaged in various trades.

trades-union, trade-union, s.

Hist.: An organized body of workmen in any trade, manufacture, or industrial occupation associated together for the promotion of their common interests. Specific aims may vary in different unions; but the following extract from the rules of the Amalgamated Society of Engineers, one of the most powerful trades-unions in England, will give a fair idea of their general objects:—

"The society shall be a trade society, and the objects for which it is established are: by the provision and distribution of funds, and by other means hereafter mentioned, on the conditions set forth in these rules, to regulate the conditions of labour in the trades included in the society, and the relation of its members with them; to promote the general and material welfare of its members; to assist them when out of work and in distressed circumstances; to support them in case of sickness, accident, superannuation, and loss of tools by fire; to provide for their burial and the burial of their wives; and to aid other trade societies having for their objects, or one of them, the promotion of the interests of workmen."

The Trade Union is the lineal descendant of, and legitimately succeeds, the ancient guild, particularly the craft guild, the medieval form of workmen's associations. The gradual disappearance of the guilds was followed by a tendency to form workmen's combinations, which was strongly frowned upon by the authorities, yet grew in their despite. After the establishment of the factory system of industry these crude combinations developed into the Trade Union, of the Nineteenth Century, which during much of the earlier portion of the century sustained a severe struggle for existence against the hostile force of the law. In the United States, in England, and on the continent of Europe, the history of the Trade Union has been one of combat with repressive laws, and the gradual passage of favoring edicts, until now they have as full protection under the law as any other trade corporations. This story of struggle particularly applies to England, in which country combinations of workmen were illegal previous to 1824, and where they did not obtain full legal protection till 1876. At present the organization of Trade Unions in Great Britain is superior to that of any other country, though the spirit of Trade Unionism has long been active in the United States, and numerous organizations, of greater or less scope, have been formed. At present the tendency in this country is strongly in the direction of the formation of great combinations of industry, many of the separate societies having united to form the Federation of Trade Unions, while the Knights of Labor is an organization made up of members from all trades. Efforts are being made by the leaders of the workmen's associations to combine all the artisans of the United States into one

grand association, of irresistible power in the event of a strike. Though these efforts do not seem likely to succeed, the strength of general combination is annually increasing. The Trade Union associations in Europe have been political rather than industrial, their efforts being strongly directed towards Socialism; but the International Labor Congresses which have been held have resulted in the formation of some excellent examples of the modern Trade Union in several of the European nations.

trades-unionism, s. The practices or principles of the members of trades-unions.

trades-unionist, s. A member of a trades-union; one who favours the system of trades-unions.

"It is gratifying to observe that the trades-unionists are under no delusions as to possible remedies for the existing depression."—*Daily Telegraph, Sept. 9, 1885.*

trades-woman, s. A woman engaged or skilled in trade.

"Every one of these colleges have in like manner their professors or readers of the tomes and general sciences, as they call them, which daily trade by the youth there sitting private in their halls."—*Holmshead: Descrip. Eng., bk. ii., ch. 111.*

4. To pass, to spend.

† To trade on: To take advantage of, to avail one's self of.

*** trad-éd, a.** [TRADE, v.] Practised, versed, skilled, experienced.

"My will enkindled by mine eyes and ears,
Two traded pilots 'twixt the dangerous shores
Of will and judgment."
Shakesp.: Troilus & Cressida, II. 2.

*** trade-fùl, a.** [Eng. trade, a.; -ful(l).] Full of trade or business; engaged in trade; busy in traffic; commercial.

"Through the naked street,
Once baunt of tradeful merchants, springs the grass."
Warton: Pleasures of Melancholy.

*** trade-léss, a.** [Eng. trade, a.; -less.] Destitute of trade; not busy in trade.

"O'er generous glebe, o'er golden mines
Her beggared, famished, tradeless native roves."
Young: The Merchant, strain 6.

träd-ër, s. [Eng. trade, v.; -er.]

1. One who is engaged in trade or commerce; a merchant, a tradesman.

"All the rich traders in the world may decay and break; but the poor man can never fail, except God himself turn bankrupt."—*Barrow: Sermons, vol. I., ser. 31.*

2. A vessel employed regularly in any particular trade, whether foreign or coasting; as, an East Indian trader.

träd-és-cân-tí-ä (or **tí as shí**), s. [Named after the elder John Tradescant, apparently a Dutchman, appointed gardener to Charles I. in 1620. The younger Tradescant, son of the former, was also a botanist.]

Bot.: Spiderwort; an extensive genus of Commelinaceae, from America and India. Sepals three, petals three, filaments covered with jointed hairs, capsule three-celled. About thirty species are often cultivated in nower-gardens. *Tradescantia virginica* is the Common Spiderwort. It is an erect lily-like plant, about a foot high, with lanceolate, elongated smooth leaves, and a crowded um-

bel of sessile and pubescent blue flowers. In Virginia it grows in shady woods. It has been given for snake bite, but is apparently only an emollient. *T. malabarica*, boiled in oil, is taken for itch and leprosy. In Brazil the rhizome of *T. diuretica* are given in dysuria, atrangury, &c. Plants of this genus have served as material for important observations on the physiology of plants, Mr. Robert Brown having observed the rotation of the cell-contenta in the hairs of the stamens, though they have since been discovered in many other plants. The stems, petioles, &c. also afford beautifully visible spiral, annular, and reticulated vessels.

† **trädés-fôlk** (t silent), s. pl. [Eng. trade, s., and folk.] People engaged in trade; trades-people.

"By his advice victuallers and tradesfolk would soon set all the money of the kingdom into their hands."—*Saef.*

trädés-man, s. [Eng. trade, s., and man.]

Fly, stemming ugly toward the Pole."
Milton: P. L., II. 610.

träd-ít-tí-ôn, * tra-di-ci-ôn, s. [Lat. traditio = a surrender, a delivery, a tradition, from traditus, pa. par. of tradere = to deliver, to hand over; Fr. tradition; Sp. tradiccion; Ital. tradizione. Tradition and treason are doublets.]

I. Ordinary Language:

1. The act of handing over or delivering something in a formal or legal manner; delivery.

"... deed takes effect only from this tradition or delivery."—*Blackstone: Comment., bk. II., ch. 20.*

2. The handing down of events, opinions, doctrines, practices, customs, or the like, from father to son, or from ancestors to posterity; the transmission of any opinions, practices, customs, &c., from forefathers to descendants, by oral communication, without written memorial.

3. That which is handed down from father to son, or from ancestor to posterity by oral communication without written memorial; knowledge or belief transmitted from forefathers to descendants without the aid of written memorials.

II. Scripture & Church History:

1. A doctrine of divine authority, orally delivered. (See 1 Cor. xi. 2; 2 Thess. ii. 15; R. V.)

2. The oral law, said to have been given by God to Moses on Mount Sinai; in reality based on Rabbinical interpretations of the Mosaic Law.

"Making the Word of God of none effect through your tradition."—*Mark vii. 9.*

3. A term used in Article xxiv. of the Anglican Church to denote customs, rites, forms, and ceremonies which have been transmitted by oral communication. Among these are the custom of bowing in the Creed at the name of Jesus, the postures customary in various church offices, and many other matters of long usage, which, though unwritten, are held to be obligatory as standing customs of the Church.

4. In the Roman Church tradition is used in the same sense as II. 1. The Council of Trent (Sess. iv., de Canonis Scripturis) teaches that the truth of Christ is contained partly in

Ète, fât, fâre, amidst, whât, fáll, father; wê, wêt, hère, camêl, hër, thère; pine, pít, sire, sir, marine; gô, pôt, or, wóre, wolf, wòrk, whô, sòn; müte, cûb, cûre, unite, cûr, râle, fûll; trÿ, Sÿrian. æ, œ = ô; ey = ä; qu = kw.

the sacred writings (thereafter enumerated), and partly in unwritten tradition received by the Apostles from Christ or from the Holy Ghost, and entrusted by them to the Church, and that Scripture and Apostolic tradition are alike to be revered.

5. *Muhammadanism*: A recital containing a sentence or declaration of Muhammad regarding some religious question, either moral, ceremonial, or theological.

"To prevent the manufacture of spurious traditions, a number of strict rules were laid down."—Contemp. Review, June, 1877, p. 58.

¶ *Tradition of the Creed*: Eccles. & Church Hist.: The instruction formerly given on certain days to the catechumens upon the Creed at mass. The time and place varied in different Churches. In the Mozarabic Missal it still retains its place before the Epistle on Palm Sunday. At Rome it took place on the Wednesday in Mid-Lent.

Tradition-Sunday, s. Eccles. & Church Hist.: Palm Sunday, from the fact that on that day the Creed was in many places formerly taught to candidates for baptism on Holy Saturday.

* *tra-di-tion, v.t.* [TRADITION, s.] To transmit or hand down by way of tradition.

"This I may call a charitable curiosity, if true what is traditioned; that about the reign of king Henry the seventh, the owner thereof built it to a dear year, on purpose, to play the more poor people thereupon."—Purser: Worthies; Somersetshire.

tra-di-tion-al, a. [Eng. tradition; -al.]

1. Of, pertaining to, or handed down by tradition; derived from tradition; communicated or transmitted from ancestors to posterity by oral communication only, without written memorial; founded on reports not having the authenticity or value of historical evidence.

"The traditional commentary upon this ballad."—Scott: Thomas the Rhymer. (Note.)

2. Based or founded on tradition; containing or consisting of traditions.

"We shall see its importance when we deal with the traditional legends of drought and darkness."—Cox: Intro. to Mythology, p. 110.

* 3. Observant of tradition; attached to old customs. (Shakspeare: Richard III., iii. 1.)

tra-di-tion-al-ism, s. [Eng. traditional; -ism.] [TRADITION.]

I. *Ord. Lang.*: Adherence to tradition. "Has given special strength to what was previously the weakest side of the Romanist position, its traditionalism."—Athenaeum, Dec. 20, 1884.

II. *Philos.* (in this sense from Mod. Lat. traditionalismus): A system, founded by De Bonald (1754-1840), a French statesman and philosopher, which for some time had numerous adherents in France and Belgium. So far as the human mind is concerned traditionalism reduces intellectual cognition to belief in truth communicated by revelation from God, and received by traditional instruction through the medium of language, which was originally itself a supernatural gift. According to Ueberweg (Hist. Philos., Eng. ed., ii. 389) "the whole philosophy of Bonald is controlled by the triadic formula: cause, means, effect. In cosmology the cause is God; the means is motion; the effect is corporeal existence. In politics these three terms become: power, minister, subject; in the family: father, mother, child. De Bonald applied these formulas to theology, and deduced from them the necessity of a Mediator. Hence, the following proposition: God is to the God-man what the God-man is to man." Traditionalism was condemned by the Congregation of the Index in 1855, and by the Vatican Council (1870) in the Constitution Dei Filius.

tra-di-tion-al-ist, s. [Eng. traditional; -ist.] One who holds to tradition or traditionalism.

tra-di-tion-al-ist-ic, a. [Eng. traditionalist; -ic.] Of or pertaining to traditionalism (q. v.).

"De Bonald was the chief of the so-called traditionalist school."—Ueberweg: Hist. Philos. (Eng. ed.), ii. 389.

* *tra-di-tion-al-i-ty, s.* [Eng. traditional; -ity.] That which is handed down by tradition; tradition.

"Many a man doing loud work in the world stands only on some thin traditionality, conventionality."—Carlyle.

tra-di-tion-al-ly, adv. [Eng. traditional; -ly.]

1. In a traditional manner; by oral transmission from father to son, or from age to age.

"In fragments and pieces traditionally preserved in subsequent authors."—Hale: Orig. of Mankind, p. 138.

"That contempt for traditional custom . . . which had gone far to bring about the ruin of the Roman empire."—Gardiner & Mullinger: Intro. to Eng. Hist., ch. iii.

B. *As subst.*: Among the Jews, one who acknowledges the authority of traditions and explains the Scriptures by them.

*tra-di-tion-er, *tra-di-tion-ist, s.* [Eng. tradition, s.; -er.] One who adheres to or acknowledges tradition.

"To ascertain who the Masorites or traditionists were."—Pittkin: Rem. on Scripture, p. 15.

* *trad-i-tive, a.* [Fr. traditif, from Lat. traditus, pa. par. of tradere = to hand down.] Of or pertaining to tradition; based on tradition; traditional.

"A constant catholic traditio interpretation of scriptures."—Bp. Taylor: Episcopacy Asserted, § 2.

trad-i-tor (pl. trad-i-tor-es), s. [Lat. = one who surrenders.] One who gives up or surrenders; a traitor, a surrenderer. Specif., in church history, a term of infamy applied to those Christians who, in the early ages of the church during the persecutions, handed over the copies of the Scriptures or the goods of the church to their persecutors to save their lives.

"There were in the church itself traditors, content to deliver up the books of God by composition, to the end their own lives might be spared."—Hooker: Eccles. Pol., bk. v., § 62.

tra-duce, v.t. [Lat. traduco = to lead across, to derive, to convict, to prove guilty, from trans = across, and duco = to lead; Fr. traduire; Sp. traducir; Ital. tradurre.]

* 1. To translate from one language into another.

"Ofentimes the saviours and writers are displeas'd, not of them that can traduce and compose works: but of them that cannot understand them."—Golden Bore. (Prol.)

* 2. To continue by deriving one from another; to propagate or reproduce, as animals; to distribute by propagation.

"From these only the race of perfect animals were propagated and traduced over the earth."—Hale: Orig. of Mankind.

* 3. To transmit; to hand on.

"It is not in the power of parents to traduce holiness to their children."—Ep. Hall: Contempt; The Angel & Zacharie.

* 4. To draw aside from duty; to seduce.

"I can never forget the weakness of the traduced soldiers."—Beaumont & Fletcher.

* 5. To represent, to exhibit, to display; to make an example of.

"For means of employment that which is most traduced to contempt."—Bacon: Advance of Learning, bk. i.

6. To represent as blamable; to slander, to defame, to calumniate, to vilify; to misrepresent wilfully.

"I am traduced by tongues, which neither know My faculties, nor person."—Shakspeare: Henry VIII., i. 2.

* *tra-duc-ent, a.* [Lat. traducens, pr. par. of traduco.] [TRADUCE.] Slandering, slanderous, calumniating.

tra-duc-er, s. [Eng. traduce(e); -er.]

* 1. One who derives or deduces.

"One who traduces, slanders, or calumniates; a slanderer.

"He found both spears and arrows in the mouths of his traducers."—Bp. Hall: Balm of Gilead.

† 3. A seducer.

"The traducer is taken back in the good graces of religion when he is found to have made the mistake of legally marrying the girl whom he thought he had only seduced."—Athenaeum, Dec. 4, 1887, p. 742.

† *tra-du'-cian, s.* [TRADUCIANISM.]

tra-du'-cian-ism, s. [Mod. Lat. traducianismus, from tradux, genit. traducus = a vine-branch, a layer.]

Church Hist.: The doctrine that the human soul, as well as the body, is produced by natural generation. St. Augustine seems to have inclined to this belief, without committing himself to it, or, on the other hand, pronouncing in favour of the opinion that the soul was immediately created by God and infused into the embryo when sufficiently organized.

"These theses seem to involve . . . the doctrine of Traducianism to which Augustine was in fact induced on account of his doctrine of original sin."—Ueberweg: Hist. Philos. (Eng. ed.), i. 244.

tra-du'-cian-ist, tra-du'-cian, s. [Eng. traducian(ism); -ist.]

Church Hist.: One who held that souls were transmitted by parents to their children, and that the stain of original sin was transmitted at the same time.

"The orthodox party were called Traducianists by the Pelagians, in connection with the doctrine of the transmission of original sin."—Blunt: Dict. Sects, p. 418.

* *tra-duc'-i-ble, a.* [Eng. traduce(e); -able.]

1. Capable of being derived, transmitted, or propagated.

"Not orally traducible to so great a distance of ages."—Hale: Orig. of Mankind.

2. Capable of being traduced.

tra-duc'-ing, pr. par. or a. [TRADUCE.]

* *tra-duc'-ing-ly, adv.* [Eng. traducing; -ly.] In a traducing or slanderous manner; slanderously, calumniously.

* *trad'-uct, s.* [Lat. traductum, neut. sing. of traduco = to translate.] [TRADUCE.] A translation.

"The traduct may exceed the original."—Howell: Letters, bk. ii., let. 46.

* *tra-duct, v.t.* [TRADUCE, s.] To derive, to deduce, to transmit, to propagate.

"For how this newly-created soul is infused by God, no man knows; nor how, if it be traduced from the parents, both their souls contribute to the making up a new one."—More: Immort. of the Soul, bk. ii., ch. xiii.

tra-duc'-tion, s. [Lat. traductio, from traduco, 1st. par. of traduco.] [TRADUCE.]

* 1. Translation from one language to another.

"I confess to deserve no merites for my traduction or any false."—Golden Bore. (Prol.)

* 2. Tradition; transmission from one to another.

"Touching traditional communication and traduction of truths comatural and engraven, I do not doubt but many of them have had the help of that derivation."—Hale: Orig. of Mankind.

* 3. Derivation from one of the same kind; propagation, reproduction.

"If by traduction came thy mind, Our wonder is the less to find, A soul so charming from a stock so good."—Dryden: To the Mem. of Mrs. Anne Killigrew, 23.

4. The act of giving origin to a soul by procreation. (Opposed to *infusion*.) [TRADUCIANISM.]

"There may be perhaps who will say, that the soul, together with life, sense, &c., are propagated by traduction from parents to children."—Wollaston: Relig. of Nature, § 5.

* 5. Transition.

"The reports and figures have an agreement with the figures in rhetoric of repetition and traduction."—Bacon. (Todd.)

* 6. Conveyance, transportation; the act of transporting or transferring.

"You'll see a dragged damsel here and there From Billingsgate her fishy traffic bear." *Gay: Trivia, li. 18.*

¶ For the difference between traffic and trade, see TRADE.

traffic-manager, s. The manager of the traffic on a railway, canal, or the like.

traffic-return, s. A periodical statement of the receipts for goods and passengers on a railway-line, canal, tramway, or the like.

"English railways closed generally $\frac{1}{2}$ to $\frac{1}{3}$ lower, the weekly traffic-returns being disappointing." *Economic Standard, Aug. 29, 1897.*

traffic-taker, s. A computer of the returns of traffic on a particular railway line, canal, tramway, or the like.

traf-fic, *traf-fick, *traf-ficke, v. & t. [*Fr. trafiquer; cf. Ital. trafficare, trafficare; Sp. trafficar, trafagar; Port. traficar, trafiquar.*] [TRAFFIC, s.]

A. Intransitive:

1. To trade; to pass goods and commodities from one to another for an equivalent in goods or money; to carry on trade or commerce; to buy and sell goods; to deal.

"As soon as he came on board he gave leave to his subjects to traffic with us." *Dampier: Voyages (an. 168).*

2. To have business; to deal; to have to do. [TRADE, v.]

B. Transitive:

1. To exchange in traffic; to trade, to barter.

"We shall at the best but traffic toys and baubles." *Dr. H. More.*

• 2. To bargain, to negotiate, to arrange.

"He trafficked the return of King James." *Drummond.*

"Money . . . is, in some cases, a trafficable commodity." *Sp. Hall: Cases of Conscience, Dec. 1, case 1.*

traf-fick-er, *traf-fiq-uer, s. [*Eng. traffic, v.; -er.*] One who traffics, trades, or deals; one who carries on trade or commerce; a trader. (Often used in a derogatory sense.)

"Let these to some fell trafficker in slaves We sold." *Gozer: Athenist, bk. xlii.*

• **traf-fic-less, a.** [*Eng. traffic, s.; -less.*] Destitute of traffic or trade.

trag-a-cánth, s. [*Lat. tragacanthum, from tragacantha; Gr. τραγακάνθα (tragacantha) = Astragalus creticus; tráγος (tragos) = a goat, and ακάνθα (akantha) = a thorn.* (See def.)]

1. *Bot., &c.*: A kind of gum obtained from various species of Astragalus. Formerly *Astragalus Tragacantha* was considered the chief; but it is now known that this species yields only a gummy juice employed in confectionery. Most of the real tragacanth comes from *Astragalus verus*, a bush about two or three feet high, with pinnate leaves having six, seven, or eight pairs of pointed leaflets. The midrib of the leaves terminates in a sharp, yellowish point; the flowers, which are yellow, are in axillary clusters, with cottony bracts. It is a native of northern Persia, Armenia, and Asia Minor. The gum exudes during summer in tortuous streams, which are allowed to dry on the plant. Other species that furnish it are *A. creticus* and *A. arizonicus*, from Greece, the Alps, and the Pyrenees, &c.; *A. gummifer*, from Mount Lebanon and Kurdistan; and *A. strabliciformis*, from the latter locality. Senegal Tragacanth is obtained from *Sterculia Tragacanth*, called also *S. pubescens*. It is a tree about thirty

feet high, with deciduous leaves and reddish-brown flowers. It is a native of Sierra Leone and the regions adjacent. It was introduced into Britain in 1793 as a stove-plant. Hog tragacanth is the produce of *Prunus Amygdalus*, and is imported into Bombay from Persia.

2. *Chem., Arts, &c.*: When the true Tragacanth (that from the genus *Astragalus*) reaches England, it presents the appearance of dull-white, semi-transparent flakes, waved concentrically. It is tasteless and odorless, sparingly soluble in water, and is difficult to powder unless raised to a temperature of 120°. It contains two distinct gums, gum arabic and bassorin. It is used in the arts as a glue. Formerly it was much employed in Britain to stiffen calico, and in France to stiffen and glaze silk: Shoemakers use the inferior kinds to glaze the margins of the soles of boots and shoes. It was formerly called Gum-dragon (q. v.).

3. *Pharm., &c.*: Tragacanth is used as an emollient and demulcent to suspend heavy powders, the water containing it being more viscous than if gum arabic were employed. There is a compound tragacanth-powder which may be given in irritation of the mucous membranes of the genito-urinary organs, pulmonary affections with tickling cough, &c. A thick layer of tragacanth placed over burns is useful in excluding the air.

trag-a-cán'-thine, s. [*Eng. tragacanth; -ine.*] A generic name sometimes applied to gums resembling Tragacanth (q. v.). (*Brande.*)

• **trag'-al-ism, s.** [*Gr. tráγος (tragos) = a he-goat.*] Goatishness from high feeding; salaciousness, sensuality.

tra-gó-dí-an, s. [*Fr. tragedien, from Lat. tragedius; Gr. τραγῳδία (tragōidia) = lit., a goat-singer; hence a tragic poet and singer; tráγος (tragos) = a he-goat, and ὄδιος (ódios), for αὐδός (aúdōs) = a singer; ᾠή (ōhē) = a song, an ode (q. v.).*]

1. A writer of tragedy.

"The first tragedians found that serious style Too grave for their uncivilized age." *Rossonson: Horace; Art of Poetry.*

2. An actor of tragedy; a tragic actor. (Sometimes applied to an actor generally.)

"Tut, I can counterfeit the deep tragedian; Speak, and look back, and pry on every side." *Shakesp.: Richard III., lii. 5.*

tra-gó-dí-énne, s. [*Fr.*] A female actor of tragedy; a tragic actress.

• **tra-gó-dí-óus, *tra-gé-dy-ous, a.** [*Eng. tragedy; -ous.*] Tragic, tragical.

"The tragiculous troubles of the most chaste and innocent Joseph." *Wood: Athena Oxon., vol. 1.*

trag'-e-dý, *trag-e-die, *trag-e-dye, s. [*Fr. tragedie, from Lat. tragœdia; Gr. τραγῳδία (tragōidia) = lit., the song of the goat, from tráγος (tragos) = a he-goat, and ᾠή (ōhē), a song, an ode. Why called the song of the goat is uncertain, "whether because a goat was the prize for the best performance of that song in which the germs of the future tragedy lay, or because the first actors were dressed, like satyrs, in goatskins, is a question which has stirred abundant discussion, and will remain unsettled to the end." (French: Study of Words, lect. v.) "A third theory (yet more probable) is that a goat was sacrificed at the singing of the song; a goat, ns being the spoiler of vines, was a fitting sacrifice at the feast of Dionysus. In any case the etymology is certain." (Skeld.) Sp. & Ital. tragedìa.]*

1. A dramatic poem representing an important event, or a series of events, in the life of some person or persons, in which the diction is elevated, and which has generally a tragic or fatal catastrophe; that species of drama which represents a tragical situation or a tragical character. Tragedy originated among the Greeks in the worship of Dionysus. Thespis first introduced dialogue in the choral odes, and made one entire story occupy the pauses in the chorus. His first representation was in B. C. 535. He was succeeded by Phrynichus and Chærilus, and is said to have written 150 pieces, none of which has come down to us. Eschylus (A. C. 525-456), added a second actor, diminished the parts of the chorus, and made the dialogue the principal part of the action. He also introduced scenery, and masks for the actors, and is also said to have introduced the custom of contending with trilogies, or three plays at a time. In his later years he

added a third actor. Sophocles (A. C. 495-406), further improved the scenery and costume. In the hands of Euripides (A. C. 480-406) tragedy deteriorated in dignity; one of his peculiarities was the prologue, or introductory monologue, in which some god or hero opens the play, telling who he is, what has already happened, and what is the present state of affairs. He also invented tragi-comedy. The first Roman tragic poet was Livius Andronicus, a Greek by birth, who began to exhibit in A. C. 240. He was succeeded by Naevius (died B. C. 204), and Ennius (A. C. 239-169). The only complete Roman tragedies that have come down to us are the ten attributed to Seneca (A. D. 2-65). The first English tragedy is *Gorboduc, or Ferrex & Porrex*, acted in 1562. [DRAMA.]

2. Tragedy personified, or the Muse of Tragedy.

"Sometimes let gorgons Tragedy In sceptred pall come sweeping by." *Milton: Il Penseroso, 97.*

3. A fatal and lamentable event; any event in which human lives are lost by human violence, more particularly by unauthorised violence.

"I look upon this now done in England as another act of the same tragedy which was lately begun in Scotland." *King Charles: Eikon Astutis.*

trag'-él-a-phí-nos, s. pl. [*Mod. Lat. tragelaph(us); Lat. feni. pl. adj. suff. -inos.*]

• **tragetry, *tregetry, *tragetrie, s.** [TRAJECT, s.] Trickery, cheating.

"I did hem a tragetry; They know not all my tretetrie." *Romance of the Rose.*

trag'-i-a, s. [*From Tragus, the Latinised name of an old German botanist, Hieronymus Bock. Ger. bock and Gr. tráγος (tragos) both = goat.*]

Bot.: A genus of Aclypheæ. Herbs or undershrubs, often climbing, found in the sub-tropical parts of both hemispheres. Leaves serrate or lobed; male flowers numerous, with a tripartite calyx and three stamens, females with a six-partite calyx and a three-celled, three-seeded ovary. Some species straggling like nettles. *Tragia involucrata*, a shrubby twiner, with the flowers in leaf-opposed racemes, *T. cannabina*, with hemp-like leaves, and *T. Mercatoria*, an annual erect plant, named from its resemblance to the Dog's Mercury (q. v.), are Indian species, and like the *T. robusta* of America, are solvent, diaphoretic, and diuretic. The root of *T. involucrata* is used in India as an alterative in venereal diseases; the fruit, made into a paste, is applied to boils to promote suppuration.

trag'-ic, *trag'-iok, *trag-ik, a. & s. [*Fr. tragique, from Lat. tragicus; Gr. τραγικός (tragikos) = goatish, tragic; from tráγος (tragos) = a goat; Sp. & Ital. tragico.]*

Anat.: The Muscle of the Tragus. [TRAGUS, ¶.]

trag-oc'-er-as, s. [Gr. τραγος (tragos) = a goat, and κρας (keras) = a horn.]

Palaeont.: A genus of Antelopes, with goat-like horns, from the Upper Miocene of Greece.

trag-o'-pan, s. [Lat., from Gr. τραγοπαν (tragopan) = a Goat-Pan, a fabulous bird, said to inhabit Ethiopia (Plin. x. 70).]

Ornith.: A popular name for any species of Coriaria, a genus of Lophophorinae. The head is crested, but naked on the cheeks and round the eyes, a horn-like caruncle projecting backwards from behind each eye, and a loose, inflatable wattle hanging beneath the bill. The tarsi are spurred in the males. There are five species from the forests of the Himalayas, from Cashmere to Bhootan and Western China. They are birds of beautiful plumage, somewhat resembling pheasants, but more bulky in form, and with rounded tails of moderate length. It is probable that they might be acclimatized, and, with a little care, domesticated in America.

trag-o'-po'-gon, s. [Gr. τραγος (tragos) = a goat, and γωνιον (gonion) = a beard. Named from the beautifully-bearded fruit.]

Bot.: Goat's-beard; a genus of Scorzoneraceae. Heads solitary, yellow or purple. Involucre single, of eight to ten coarcted scales; pappus feathery, receptacle naked; fruit, slender, muciculate, with a long beak. Known species about twenty, from Europe, North Africa, and Western Asia. One species, salsify or salsify (T. porrifolium), a native of Europe, is cultivated as a garden vegetable in the United States and elsewhere for the sake of its root, which is delicate and pleasant in its flavor, and cooked in a certain way has a taste resembling that of the oyster, whence it is popularly known as Oyster Plant. The root is long and tapering. T. pratensis, the Yellow

Goat's Beard, was formerly cultivated in England for its roots, which resemble salsify in quality. [SALSIFY.]

trag'-ops, s. [Gr. τραγος (tragos) = a goat, and οψ (ops) = the eye.]

Zool.: A genus of Whip-snakes (q.v.), with four species, ranging from Bengal to China, the Philippines, Java, and Celebes. Body and tail exceedingly slender, slightly compressed; head depressed, very long, with the snout long and pointed.

tra-gu'-li-dae, s. pl. [Mod. Lat. tragul(us); Lat. fem. pl. adj. snff. -idae.]

1. Zool.: Chevrotains; the sole family of the section Tragulina, intermediate in structure between the Cervidae and the Suidae. Owing to the absence of horns and the prominence of their canine teeth, these animals are often, wrongly, called Pigny Musk Deer, though they have no musk-secreting gland, nor, except the trivial characters noted above, any special affinities with the genus Moschus (q.v.), with which they were formerly grouped to form the family Moschidae. Of this classification Prof. Flower (Encyc. Brit., ed. 9th, xv. 430) says: "There has scarcely been a more troublesome and obstinate error in zoology than in this association of animals so really distinct." There are two genera, Tragulus (q.v.) and Hyemoschus. [WATER-CHEVROTAIN.]

2. Palaeont.: Hyemoschus crassus, differing only in size from the modern species, has been found in Miocene deposits at Sansan, Gers, France.

trag-u'-li-na, s. pl. [Mod. Lat. tragul(us); Lat. neut. pl. adj. suff. -ina.]

Zool.: A section of Seleceodont Artiodactyles. Upper canines well-developed, especially in males, narrow and pointed; four complete toes on each foot; no frontal appendages. They resemble, but the stomach has only three distinct compartments, the manubria, or third stomach, of the Pecora being absent.

trag-u'-lus, s. [Mod. Lat., dimin. from Gr. τραγος (tragos) = a he-goat.]

Zool.: The type-genus of Tragulidae (q.v.). They are the smallest of the recent Ungulates, and in outward appearance resemble the Agoutis rather than the rest of the order. The best known species are Tragulus javanicus, T. napu, T. kanchil, and T. stanleyanus, from the Malay Peninsula, or the islands of the Indo-Malayan Archipelago; and T. memina, from Ceylon and Hindustan.

trag'-us, s. [Gr. τραγος (tragos) = a he-goat.]

Anat.: A conical prominence, usually covered with hairs in front of the concha of the external ear, and projecting backwards over the meatus auditorius.

¶ Muscle of the Tragus:

Anat.: A flat bundle of short fibres, running nearly vertically, and covering the outer surface of the tragus. Called also Tragicus.

trám-wáy, s. [Eng. tram, and way.]

1. A wooden or iron way adapted for trams, that is, coal-wagons; a tram-road.

2. A railway laid along a road or the streets of a town or city, on which cars for passengers are propelled by horses, steam, electricity or other mechanical means. [TRAM-ROAD.]

"Little, if anything, was said as to the suitability of the plan for the purpose of a tramway." Daily Telegraph, Sept. 5, 1857.

The tramway of England is known under the title of street railway in the United States, where its first development took place. The earliest example was in the stone tramways laid in 1830 in the Commercial Road, in London, and afterwards in other streets. The iron track tramway or street railway began with the Fourth Avenue Railway in New York in 1831. In 1857 Philadelphia and Boston established street railways, and since that date they have rapidly developed until they are now possessed by every city in the United States, the total length of lines being over 12,000 miles. Horses were long used on these roads, but they have been partly superseded by cable power, and now are being rapidly set aside in favor of electric traction, while the railway is extending into the country roads. England and Europe were slow in adopting this improvement, and are only now becoming fully aroused to its advantage and convenience. Electric trolley lines seem destined to a great future.

tramway-car, s. A car or carriage for passengers running on a tramway, a tramcar.

tramway-man, s. A man employed upon a tramway (q. v.).

"The strike of tramway-men at Boston (U.S.) has ended, an arrangement having been come to between the men and their employers." St. James's Gazette, Jan. 11, 1857.

* trāng-kh'ŷ-māte, v.t. [Pref. trans., and Eng. *animate* (q.v.).] To animate by the conveyance of a soul to another body.

"Not men; for what spark of humanity? nor dogs; but, by the strangest metamorphosis that ever was felt by roots, very incarnated, transmigrated devils."—Dean King: *Sermon on the Fifth of November* (1603), p. 21.

* trāng-kh'ŷ-mā-tion, s. [TRANSMANIMATE.] The conveyance of the soul from one body to another.

"I forbear to speak of the erroneous opinions of these Jewish masters concerning that Pythagorean transmigration or passage of the souls from one body to another."—Sp. Hall: *Pharisaism & Christianity*.

trāng-at-lānt'ŷo, a. [Pref. trans., and Eng. *Atlantic* (q.v.).]

1. Lying or being beyond or on the other side of the Atlantic to that on which the speaker or writer is.

"Those Transatlantic treasures sleep," Scott: *Robbery*, l. 21.

2. Crossing or across the Atlantic; as, a Transatlantic cable.

transatlantic-province, s.

Zool. & Geog.: One of the provinces established for the distribution of marine mollusca. Prof. Edward Forbes divided it into two divisions: the Virginian, from Cape Cod to Cape Hatteras; and the Carolinian, from Cape Hatteras to Florida. The southern division comprises the genera *Conus*, *Oliva*, *Fasciolaria*, *Avicula*, and *Lutria*; the northern one, *Nassa*, *Columbella*, *Ranella*, *Scalaria*, *Calyptrea*, *Bulla*, *Arca*, and *Solemya*. Called also Pennsylvania Province. (*English*.)

* trāng-cā-len'cŷ, s. [Eng. *transcendent* (t); -cy.] The quality or state of being transcendent.

* trāng-cā-lent, a. [Lat. *trans* = through, and *calens*, *genit. calentis*, pr. par. of *calere* = to grow warm.] Pervious to heat; allowing the passage of heat.

trān-scēnd, v.t. & i. [Lat. *transcendō* = to climb over, to surpass; *trans* = across, and *scandō* = to climb, whence *ascend*, *descend*, &c.; O. Fr. *transcender*; Sp. *transcender*, *trascender*; Ital. *transcendere*.]

A. Transitive:

* 1. To climb, pass, or go over.

"The shore let her transcend, the promont to descry, And view about the point the unnumber'd fowl that fly." Drayton: *Poly-Olition*, s. 1.

* 2. To rise above; to surmount.

"Make disquisition whether the unusual lights be meteorological impressions not transcending the upper region, or whether to be ranked among celestial bodies."—Dowse.

* 3. To pass over; to go beyond.

"And bids the Christian hope sublime Transcend the bounds of Fate and Time." Scott: *Robbery*, vt. 1.

4. To surpass, to outgo, to excel, to exceed.

"With wondering eyes our martial bands Behold our deeds transcending our commands." Pope: *Homer*; *Iliad* xii. 384.

B. Intransitive:

* 1. To climb, to mount.

"To conclude, because things do not easily sink they do not drown at all, the fallacy is a frequent addition in human expressions, which often give distinct accounts of proximity, and transcend from one unto another."—Brown.

2. To be transcendent; to excel, to surpass.

"The coexistence of grace and free-will, in this sense, is no such transcending mystery, and I think there is no text in scripture that sounds any thing towards making it so."—Hammond.

3. For the difference between to transcend and to excel, see EXCEL.

trān-scēn-dence, trān-scēn-den'cŷ, s. [Lat. *transcendētia*, from *transcendens* = transcendent (q.v.).]

1. Superior excellence; preeminence.

"Nature shows me the greatness of death; faith shows me the transcendēcy of heavenly glory."—Sp. Hall: *Select Thoughts*, § 53.

* 2. Exaggeration; elevation above truth.

"It is true greatness to have in one the frailty of a man, and the security of a God: this would have done better in poetry, where transcendēcies are more allowed."—Bacon: *Essays*.

trān-scēnd'ent, a. & s. [Fr. *transcendant*, from Lat. *transcendens*, pr. par. of *transcendō* = to transcend (q.v.); Sp. & Ital. *transcendente*.]

A. As adjective:

1. Ord. Lang.: Very excellent; superior or supreme in excellence; surpassing all others.

"But the glory of these men, eminent as they were, is cast into the shade by the transcendent lustre of one immortal name."—Macaulay: *Hist. Eng.*, ch. iii.

2. Metaphysics:

(1) A term applied by Duns Scotus and the Schoolmen to any concept of wider signification than the categories of Aristotle, and consequently containing them under it. [CATAGORV.]

"This concept [of Being] . . . is a transcendēnt concept, for not only the substantial is, but also the accidental is, in like manner it is more general than the concrete God and the World, for being is a proleptic of both."—Vebering: *Hist. Philos.* (Eng. ed.), l. 433.

(2) Applied by Kant to that which goes wholly beyond experience, or deals with or treats of matters wholly beyond experience.

"But another road leads to the same transcendēnt questions—transcendent because they treat the forum of human thought not merely as logically antecedent to the products of experience, but because they apply these forms to problems where experience wants data."—Wallace: *Kant*, p. 150.

B. As substantive:

1. Ord. Lang.: That which surpasses or excels; something supremely excellent.

2. Metaph.: A transcendēnt concept; a transcendental (q.v.).

trān-scēn-dent'al, a. & s. [Eng. *transcendent*; -al.]

A. As adjective:

I. Ordinary Language:

1. Surpassing all others; transcendent; supremely excellent; supereminence.

"Though the deity perceiveth not pleasure nor pain, as we do; yet he must have a perfect and transcendēnt perception of these, and of all other things."—Grew: *Cosmology*.

2. Abstrusely speculative; beyond the reach of ordinary everyday, or common thought and experience; hence, vague, obscure, fantastic, extravagant.

II. Technically:

1. Math.: Applied to a quantity which cannot be expressed by a finite number of algebraic terms—that is, by this ordinary operations of algebra—viz., addition, subtraction, multiplication, division, raising to powers denoted by constant exponents, and extraction of roots indicated by constant indices. Transcendental quantities are of three kinds, logarithmic, exponential, and trigonometrical. The first are expressed in terms of logarithms, as: $\log \sqrt{1-x}$, a $\log x$, &c.; the second are expressed by means of variable exponents, as: ax , eax , bax^x , &c.; the third are expressed by means of some of trigonometrical functions, as: $\sin x$, $\tan \sqrt{2-x^2}$, $\text{versin}(ax-b)$, &c.

2. Metaphysics:

(1) A term used by the Schoolmen in the same sense as TRANSCENDENT, A. 2. (1) (q.v.).

"Being is transcendēnt . . . As being cannot be included under any genus, but transcends them all, so the properties or affections of Being have also been called transcendēnt."—Fleming: *Vocabulary of Philos.* (ed. Calderwood), p. 504.

(2) Applied by Kant to that which deals with or constitutes a category or categories of thought,

"A transcendēnt inquiry, then, is an inquiry not into things in general, or any particular sort of things, but into the conditions in the mental constitution which make us know or estimate things in the way we do."—Wallace: *Kant*, pp. 159, 160.

B. As substantive:

Metaphysics:

1. The same as TRANSCENDENTALIST (q.v.).

2. A concept transcending the Aristotelian categories. [CATEGORY.]

"The three properties of Being commonly enumerated are *unum*, *verum*, and *bonum*. To these some add *aliquid* and *res*; and these, with *ens*, make the six transcendēntia. But *res* and *aliquid* mean only the same as *ens*. The first three are properly called transcendēntia, as these only are passions or affections of being, as being."—Fleming: *Vocabulary of Philos.* (ed. Calderwood), p. 504.

transcendental-anatomy, s.

Anat.: The highest department of anatomy; that which, after details have been ascertained, advances to the consideration of the type or plan of structure, the relations between the several parts, and the theoretical problems thus suggested.

transcendental-curve, s.

Math.: A curve such as cannot be defined by any algebraic equation, or of which, when it is expressed by an equation, one of the terms is a variable quantity.

transcendental-equation, s.

Math.: An equation expressing a relation between transcendental quantities. [TRANSCENDENTAL, A. II. 1.]

transcendental-function, s.

Math.: A function in which the relation between the function and variable is expressed by means of a transcendental equation.

transcendental-line, s. A line whose equation is transcendental.

transcendental-truths, s. pl.

Philos.: A term proposed by Stewart for what the Scotch philosophers call "principles of common sense"—the moral law, human liberty, the existence of God, and the immortality of the soul. (*Reid: Works* (ed. Hamilton), note A, § 5.)

trān-scēn-dent'al-izm, s. [Eng. *transcendent*; -ism.]

I. Ord. Lang.: The quality or state of being transcendental.

II. Technically:

1. Philosophy:

(1) A term applied to the Kantian philosophy from the frequent use of the term transcendental by Kant, who gave it a meaning quite distinct from that which it till then bore. The Transcendentalism of Kant inquires into, and then denies, the possibility of Knowledge respecting what lies beyond the range of experience. Kant distinguished knowledge into *a priori* (not originating in experience) and *a posteriori* (derived from experience), thus giving to the phrase *a priori* knowledge a meaning different from that which it had borne in philosophy since the days of Aristotle; and he applied the epithet transcendental to the knowledge that certain intuitions (such as Time and Space) and conceptions, to which he gave the Aristotelian name of Categories [KANTIAN PHILOSOPHY], were independent of experience. Necessity and strict universality are for Kant the sure signs of non-empirical cognition. Transcendental philosophy is a philosophy of the merely speculative pure reason; for all moral practice, so far as it involves motive, refers to feeling, and feeling is always empirical.

"Kant's philosophy describes itself as *Transcendentalism*. The word causes a shudder, and suggests things unutterable. Not less terrible is the term *a priori*. But in either case a little care carries the student safely past these lions in the way. He must first of all dismiss the popular associations that cling to the words."—Wallace: *Kant*, p. 153.

(2) Applied also to the philosophy of Schelling and Hegel, who assert the identity of the subject and object. Their transcendentalism claims to have a true knowledge of all things, material and immaterial, human and divine, so far as the human mind is capable of knowing them. [IDENTITY, ¶ 3.]

(3) Often used in a depreciatory sense of any philosophy which the speaker considers vague and illusory.

2. Theol.: The name given to a religious movement in New England in 1839, in which Emerson and Channing took a prominent part. It is thus described in the *Memoirs of Margaret Fuller Ossoli* (ii. 181, 182):

"Transcendentalism was an assertion of the inalienable integrity of man; of the immensity of divinity in himself. . . . On the somewhat stunted stock of Unitarianism, whose characteristic dogma was trust in human reason as correlative to Supreme Wisdom, had been grafted German Idealism, as taught by masters of most various schools—by Kant and Jacobi, Fichte and Novalis, Schelling and Hegel, Schleiermacher and de Wette; by Madame de Staël, Cousin, Coleridge, and Carlyle; and the result was a vague yet exciting conception of the godlike nature of the human spirit. *Transcendentalism*, as viewed by its disciples, was a pilgrimage from the idolatrous world of creeds and rituals to the temple of the Living God in the soul."

trān-scēn-dent'al-ist, s. [Eng. *transcendent*; -ist.] One who believes in transcendentalism (q.v.).

"In religion the typical transcendentalist might be a sublimated theist: he was not, in any accepted sense, a Christian. He believed in no devil, in no hell, in no evil, in no dualism of any kind, in no spiritual authority, in no Saviour, in no Church. He was humanitarian and optimist. His faith had no backward look; its essence was aspiration, not contrition."—Herzog: *Relig. Encyclop.* (ed. Schaaf), iii. 2, 382.

* trān-scēn-dēn-tāl-i-t'ŷ, s. [Eng. *transcendent*; -ity.] The quality or state of being transcendental.

trān-scēn-dent'al-ly, adv. [Eng. *transcendent*; -ly.] In a transcendental manner or degree; supereminently, preeminently.

"The law of Christianity is eminently and transcendently called the word of truth."—Dr. Searson.

trān-scēn-dent-ly, adv. [Eng. *transcendent*; -ly.] In a transcendental manner or

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pit, sire, sir, marīns; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, oūb, cūre, quite, cūr, rāle, fūll; trŷ, Sŷrian. œ, œ = ē; ey = a; qu = kw.

degree; supereminently; by way of excellence; preeminently.

"The average Englishman is a highly imaginative, delicately æsthetic, subtly critical, and transcendently philosophical being."—Daily Telegraph, Jan. 2, 1886.

*trān-spēn-dent-nēss, s. [Eng. transcendent; -ness.] The quality or state of being transcendent; or superior or supreme excellence.

"If I cannot obtain the measure of your transcendentness."—Montagu: Appeals to Cæsar, ch. viii.

*trān-scēnd-ī-ble, a. [Eng. transcend; -ible.] Capable of being climbed, leaped, or passed over.

"It appears that Romulus slew his brother because he attempted to leap over a sacred and inaccessible place, and to render it transcendible and profane."—Translation of Plutarch's Morals, li. 84.

*trān-spēn-sion, s. [Lat. transcensus, pa. par. of transcendō = to transcend (q.v.).] The act of passing; or passage.

"An echoing valley, many a field Pleasant, and wishful, did his passage yield Their safe transcension."—Chapman: Homer; Hymns to Hermes.

*trān-sō-lāte, v.t. [Lat. trans = through, and colō = to strain.] [COLANDER.] To strain, to cause to pass through a sieve or colander.

"The lungs are, unless pervious like a sponge, unfit to imbibe and transcolate the air."—Harvey: On Consumption.

*trān-sō-lā-tion, s. [TRANSCOLATE.] This act of transcolating or straining.

trān-cōn-ti-nēnt-al, a. [Pref. trans-, and Eng. continental (q.v.).] Passing or going across a continent.

"No such grant as one hundred million acres of fine land was ever made by the promoters even of a transcontinental railway within the confines of the United States."—Daily Telegraph, Nov. 11, 1885.

*trān-scor-pōr-āte, v.t. [Pref. trans-, and corporate (q.v.).] To pass from one body to another.

"The Pythagorians and transcorporating philosophers."—Browne: Urne Burial, ch. iv.

*trān-scrib-blōr, s. [Pref. trans-, and Eng. scribbler (q.v.).] One who transcribes hastily or carelessly; hence, a mere copier; a plagiarist.

"Thirdly, he [Aristotle] has suffered vastly from the transcribers, as all authors of great brevity necessarily must."—Gray: To Dr. Wharton, Dec., 1746.

trān-scribe, v.t. [Lat. transcribo, from trans = across, over, and scribo = to write; Fr. transcrire; Sp. transcribir.] To write over again, or in the same words; to copy.

"So was the most audacious of literary thieves, and transcribed without acknowledgment, whole pages from authors who had preceded him."—Macaulay: Hist. Eng., ch. xix.

¶ For the differences between to transcribe and to copy, see COPV.

trān-scrib-ēr, s. [Eng. transcrib(e); -er.] One who transcribes or writes from a copy; a copier; a copyist.

"The addition of a single letter (and that a letter which transcribers have been very apt to omit) to the word that now occurs in the Hebrew, will give it that plural form which the seventy have expressed."—Sp. Horsey: Sermons, vol. II, ser. 26.

trān-script, s. [Lat. transcriptum, neut. sing. of transcriptus, pa. par. of transcribo = to transcribe (q.v.); Ital. trascritto.]

1. A writing made from and according to an original; a writing or composition consisting of the same words as the original; a copy from an original.

"Episcopius replied, that he had none handsomely written; if the synod would have patience, he would cause a fair transcript to be drawn for them."—Hales: Letter from Synod of Dert, Dec., 1618.

2. A copy of any kind; an imitation.

"Gaze on creation's model in thy breast Unveiled, nor wonder at the transcript more."—Young: Night Thoughts, ix.

trān-scrip-tion, s. [Lat. transcriptio, from transcriptus, pa. par. of transcribo = to transcribe (q.v.); Fr. transcription; Ital. trascrizione.]

I. Ordinary Language: 1. The act of transcribing or copying from an original.

"Exempt from the avocations of civil life, incapable of literary exertions from the want of books and opportunities of improvement, they devoted the frequent intervals of religious duty to the transcription of authors whom they often little understood."—Knox: Essay, ix.

2. A transcript, a copy.

"By their transcription they fell into the hands of others."—Watson: Life of Hooker.

II. Music: The arrangement or modification of a composition for some instrument or voice other than that for which it was originally written.

trān-scrip-tion-al, a. [Eng. transcription; -al.] Of or pertaining to transcription.

"[He] flouts at transcriptional probability."—Academy, April 4, 1884, p. 24.

*trān-scrip-tive, a. [Eng. transcript; -ive.] Done as from a copy; having the character of a transcript, copy, or imitation.

"Excellent and useful authors, yet being either transcripts, or following common relations, their accounts are not to be swallowed at large, or entertained without all circumspection."—Browne: Vulgar Errors.

*trān-scrip-tive-lý, adv. [Eng. transcriptive; -ly.] In a transcriptive manner; in manner of a copy.

"Not a few transcrip-tively subscribing their names to other men's endeavors, transcribe all they have written."—Browne: Vulgar Errors, bk. I, ch. vi.

*trān-scūr, *trān-curre, v.t. [Lat. transcurro: trans = across, and curo = to run.] To run or rove to and fro.

"By fixing the mind on one object, it doth not spallate and transcurre."—Bacon: Nat. Hist., § 720.

*trān-scūr-rence, s. [Lat. transcurrere, pr. par. of transcurro = to transcur (q.v.).] A running or roving hither and thither.

*trān-scūr-sion, s. [Lat. transcurio, from transcurro, pa. par. of transcurro = to transcur (q.v.).] A rambling or roving; a passage beyond certain limits; a deviation.

"Which cohesion may consist in . . . transcurio of secondary substances through this whole sphere of life which we call a spirit."—More: Immort. of the Soul, bk. I, ch. vi.

*trān-scūr-sive, a. [TRANSCUR.] Rambling.

"In this transcur-sive repository."—Nash: Lenten Stuff.

*trān-dī-a-lōct, v.t. [Pref. trans-, and Eng. dialect (q.v.).] To translate or render from one dialect into another.

"But now the fragments of these poems, left us by those who did not write in Doric, are in the common dialect. It is plain then, they have been trans-dialect."—Harrison: Divine Legation, bk. II, § 11.

*trān-duc-tion, s. [Lat. transductus, pa. par. of transduco = to lead across or over; trans = across, over, and duco = to lead.] The act of leading or carrying over.

*trānse, s. [TRANSE.]

*trān-sē-arth, v.t. [Pref. trans-, and Eng. earth (q.v.).] To transplant.

"Fruits of hotter countries transarched in colder climates have vigour enough in themselves to be fructuous according to their nature."—Foltham: Resolves, 19.

*trān-sē-ē-mēnt, *trān-sē-ē-mēnt-āte, v.t. [Pref. trans-, and Eng. element.] To change or transpose the elements of; to transubstantiate.

"Theophylact used the same word: he that eateth me, liveth by me; while he to a certain manner mingled with me, and is trans-elemented or changed into me."—Jeremy Taylor: Real Presence, § 12.

*trān-sē-ē-mēn-tā-tion, s. [TRANSELEMENTATE.] The change of the elements of one body into those of another, as of the bread and wine into the actual body of Christ; transubstantiation.

"The name of trans-elementation, which Theophylact did use, seems to approach nearer to signify the propriety of this mystery, because it signifies a change even of the first elements; yet that word is harder, and not sufficiently accommodate; for it may signify the resolution of one element into another, or the resolution of a mixed body into the elements."—Jeremy Taylor: Real Presence, § 12.

trān-sēn-na, s. [Lat. = a net, reticulated work.]

Christ. Antiq.: A name given to a kind of carved lattice-work or grating of marble, silver, &c., used to shut in the shrines of martyrs, allowing the sacred coffer to be seen, but protecting it from being handled, or for similar protective purposes.

trān-sēpt, *trān-sēpt, s. [Lat. tran, for trans = across, and septum = an enclosure, from septus, pa. par. of sepio = to enclose; sepes = a hedge.]

Arch.: That part of a church which is placed between the nave and the choir, extending transversely on each side, so as to give to the building the form of a cross. The transept was not originally symbolical, but

was derived from the transverse hall or gallery in the ancient basilicas, at the upper end of the nave, its length being equal to the united breadth of the nave and aisles. This accidental approximation to the form of a cross was perceived by later architects, who accordingly lengthened the transept on each side so as to make the ground plan of the church completely cruciform.

GROUND PLAN OF ST. PAUL'S CATHEDRAL, LONDON. A. South Transept; a. North Transept; c. Choir; d. Nave; e. Dome.

"The pediment of the southern transept is finialed, not inelegantly, with a Goussier cross."—Hutton: Hist. of Kid-dington, p. 2.

*trān-sex-iōn (x aa ksh), s. [Pref. trans-; Eng. sex, and suff. -iōn.] Change from one sex to another. (See extract under trans-feminate.)

*trān-sēm-i-nāte, v.t. [Lat. trans = across, over, and femina = a woman.] To change, from a male to a female.

"It much impeacheth the learned transision of herbs, if that be true which some physicians affirm, that transmutation of sexes was only so in opinion, and that those trans-feminated persons were really men at first."—Browne: Vulgar Errors.

trān-sēr, v.t. [Lat. transero = to transport, to carry across or over; trans = across, over, and sero = to bear, to carry; Sp. transferir, trasferir; Ital. trasferire, trasferire; Fr. transférer.]

I. Ordinary Language:

1. To convey from one place or person to another; to transport or remove to another place or person; to pass or hand over. (Generally with to, into, or unto, rarely with on.)

"Or here to combat, from their city far, Or back to Ilion's walls transfer the war."—Pope: Homer; Iliad x. 485.

trān-sēr, s. [TRANSFER, v.]

I. Ordinary Language:

1. The removal or conveyance of a thing from one person or place to another; transference.

"He would not, however, part with it till he had the cloth in his possession, and as there could be no transfer of property, if with equal caution I had insisted upon the same condition, I ordered the cloth to be handed down to him."—Cook: First Voyage, bk. II, ch. ii.

2. The act of conveying right, title, or property, whether personal or real, from one person to another, by sale, deed, or otherwise.

"Cheques, Bills of Exchange, Promissory Notes, are all transfers, as they all transfer a right due to one party from a second in favour of a third. But in the money market and Stock Exchange, the term has a more strictly technical meaning, and by transfer is understood the surrender by one party in favour of another of the right to dividends, annuities, &c., derived from the shares of public companies, Government funds, foreign stocks, and the like."—Lithell: Counting-house Dict.

3. The deed or document by which right, title, or property in anything is conveyed from one person to another.

4. That which is transferred.

5. A scheme of conveyance from one transportation line to another, for passengers, baggage, or freight. (U. S.)

II. Technically:

1. Lithog.: An impression taken on paper, cloth, &c., and then laid upon an object and caused to adhere thereto by pressure. In engraving, a tracing may be made in pencil and transferred to the ground by running through the plate-press.

2. Mil.: A soldier transferred from one troop or company to another.

¶ Transfer of Land Acts: Law: Various enactments designed to regu-

bōll, bōy; pōūt, jōwl; cat, cēll, chorus, chīn, bēnch; go, gēm; thīn, thīs; sīn, aš; expect, Xēnophon, exist. ph = ſ -clan, -tlan = shām. -tion, -sion = shūn; -tion, -sion = zhūn. -cious, -tious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

late changes in the ownership of land. Various such acts have been passed from time to time by the legislatures of the several states, each state having its own system, so that considerable diversity of method exists. Efforts to simplify land transfer have been made, with more or less success, the most radical change from old methods being that adopted in some of the Australasian colonies, in which a complete government registry is kept of all transfers and charges against land, so that a sale can be consummated without the labor and expense of searches and a clear title be obtained in little time and at a small cost. In England improved methods of transfer have been adopted to some extent.

transfer-book, *s.* A register of the transfers of property, stock, or shares from one person to another.

transfer-days, *s. pl.* Days fixed by the Bank of England for the transfer, free of charge, of Consols and other Government stocks. These days are Monday, Tuesday, Wednesday, Thursday, and Friday, before three o'clock. On Saturday transfers may be made, but a transfer-fee of 2s. 6d. is then charged.

transfer-paper, *s.* Prepared paper used by lithographers, or for copying in a press.

transfer-printing, *s.* A name applied to anastatic printing (q.v.), and similar processes.

trans-fër-a-bil-i-tÿ, *s.* [Eng. *transferable*; -*ity*.] The quality or state of being transferable.

trans-fër-a-ble, ***trans-fër-ra-ble**, ***trans-fër-ri-ble**, *a.* [Eng. *transfer*; -*able*.] 1. Capable of being transferred or conveyed from one person or place to another.

"We have taken notice in the chapter on Judgment of the *transferable* nature of assent, and how it passes from the premises to the conclusion."—*Search: Light of Nature*, vol. 1, pt. II, ch. xviii.

2. Capable of being legitimately passed or conveyed into the possession of another, and conveying to the new owner all its claims, rights, or privileges; as, A note, bill of exchange, or other evidence of property, is *transferable* by endorsement.

trans-fër-cé, **trans-fër-reó**, *s.* [Eng. *transfer*; -*ee*.] The person to whom a transfer is made.

trans-fër-ence, †**trans-fër-rence**, *s.* [Eng. *transfer*; -*ence*.]

1. *Ord. Lang.*: The act of transferring; the act of conveying from one person or place to another; transfer.

"By the mere *transference* of the concerns of Tonquin, along with those of Madagascar, from the Department of the Colonies to the Department of Foreign Affairs."—*Standard*, Jan. 18, 1884.

2. *Scots Law*: That step by which a defending action is transferred from a person deceased to his representatives.

***trans-fër-ög-ra-phÿ**, *s.* [Eng. *transfer*; o connect, and Gr. *γραφω* (*graphō*) = to write.] The act or art of copying inscriptions from ancient tombs, tablets, &c.

trans-fër-rör, *s.* [Eng. *transfer*, *v.*; -*er*.]

1. One who transfers; one who executes a transfer.

2. A base-plate for an air-pump receiver, which enables the exhausted receiver to be removed from the air-pump.

***trans-fër-ri-bil-i-tÿ**, *s.* [TRANSFERABILITY.]

***trans-fër-ri-ble**, *a.* [TRANSFERABLE.]

trans-fër-rör, *s.* [Eng. *transfer*; suff. -*er*.] [TRANSFERER.]

Law: The person who makes a transfer.

***trans-fig-ür-äte**, ***trans-fig-ür-räte**, *v.t.* [Formed from *transfiguration* (q.v.).] To transfigure.

trans-fig-ür-ä-tion, **trans-fig-ür-rä-tion**, ***trans-fig-ür-a-cl-on**, *s.* [Fr. *transfiguration*, from Lat. *transfiguratio*, accus. of *transfiguratio* = a transfiguring, from *transfiguratus*, pa. par. of *transfigurare* = to transfigure (q.v.); Sp. *transfiguración*, *transfiguración*; Ital. *transfigurazione*, *transfigurazione*.]

* 1. A change of form.

"For some attribute immortality to the soul; others devise a certain *transfiguration* thereof."—*P. Bolland: Pinitis*, bk. vii, ch. 17.

2. Specific, the supernatural change in the personal appearance of our Lord on the Mount. (Matt. xvii. 1-9; Mark ix. 2-9.)

"We are told by St. Paul, that, in the future state, our vile bodies shall be transformed into the 'likeness of his glorious body,' and how glorious it is in heaven, we may guess by what it was at his *transfiguration* here on earth, during which the scripture relates, 'that his face did shine as the sun, and his raiment was white as the light.'"—*Boyle: Works*, v. 557.

3. A feast held by certain branches of the Christian Church on August 6, in commemoration of such supernatural change.

trans-fig-üre, ***tran-fyg-üre**, *v.t.* [Fr. *transfigurer*, from Lat. *transfigurare* = to change the figure of: *trans* = across (hence, implying change), and *figura* = figure, outward appearance; Sp. *transfigurar*, *transfigurar*; Ital. *transfigurare*, *transfigurare*.]

1. To transform; to change the outward appearance of.

"Then the birds again *transfigured*, Resumed the shape of mortals."—*Longfellow: Hiawatha*, xii.

* 2. To give an elevated or glorified appearance or character to; to elevate and glorify; to idealize.

trans-fix, *v.t.* [Lat. *transfixus*, pa. par. of *transfigo* = to thrust through: *trans* = through, and *figo* = to fix.]

1. To pierce through, as with a pointed weapon.

"Quite through *transfixed* with deadly dart, And in her blood yet steaming fresh embayd."—*Spenser: F. Q.*, III. xii. 21.

2. To impale.

"The butcher bird *transfixes* its prey upon the spike of a thorn, whilst it picks its bones."—*Paley: Nat. Theology*, ch. xii.

trans-fix-ión (*x* as *ksh*), *s.* [TRANSFIX.]

1. The act of transfixing or piercing through.

2. The state of being transfixed.

"Six several times do we find that Christ shed blood; in his circumcision, in his ascension, in his crowning, in his scourging, in his affixing, in his *transfixion*."—*Sp. Hall: Sermon on Gal. i. 20*.

trans-flü-ent, *a.* [Lat. *transfluens*, pr. par. of *transfluo* = to flow across: *trans* = across, and *fluo* = to flow.]

* 1. *Ord. Lang.*: Flowing or running across or through; as, a *transfluent* stream.

2. *Her.*: A term used of water represented as running through the arches of a bridge.

***trans-flüx**, *s.* [Lat. *transfluens*, pa. par. of *transfluo*.] [TRANSFLUENT.] A flowing through or beyond.

***trans-för-äte**, *v.t.* [Lat. *transforatus*, pa. par. of *transforo* = to bore or pierce through: *trans* = through, and *foro* = to bore.] To bore through, to perforate.

trans-form, ***trans-forme**, ***trans-form**, *v.t. & i.* [Fr. *transformer*, from Lat. *transforma* = to change the form of: *trans* = across (hence, implying change), and *forma* = form; Sp. *transformar*, *transformar*; Ital. *transformare*, *transformare*.]

A. Transitive:

I. Ordinary Language:

1. To change the form or appearance of; to change in shape or appearance; to metamorphose.

"A strange nervous convulsion which sometimes *transformed* his countenance, during a few moments, into an object on which it was impossible to look without terror."—*Macaulay: Hist. Eng.*, ch. xviii.

2. To change into another substance; to transmute; as, To *transform* lead into gold.

3. To change; to alter to something else; to convert.

"But ah! by constant heed I know, How oft the saddest that I show, *Transforms* thy smiles to looks of woe."—*Conover: To Mary*.

* 4. To change in nature, disposition, character, or the like.

"Be ye *transformed* by the renewing of your mind."—*Romans* xii. 2.

* 5. Amongst the mystics, to change, as the contemplative soul into a divine substance by which it is lost or swallowed up in the divine nature.

II. Math.: To change the form of; as,

(1) To change the form of a geometrical figure or solid without altering its area or solidity.

(2) To change the form of an algebraic equation without destroying the equality of its members.

(3) To change the form of a fraction without altering its value.

* **B. Intrans.**: To be changed in form or appearance; to be metamorphosed.

"His hair *transforms* to down, his fingers meet In skinny films, and shape his curly foot."—*Addison: [Faint]*

trans-form-a-ble, *a.* [Eng. *transform*; -*able*.] Capable of being transformed.

trans-for-mä-tion, ***trans-for-mä-cl-on**, *s.* [Fr. *transformation*, from Lat. *transformatio*, accus. of *transformatio*, from *transformatus*, pa. par. of *transformo* = to transform (q.v.); Sp. *transformación*, *transformación*; Ital. *trasformazione*, *trasformazione*.]

I. Ordinary Language:

1. The act of changing the form or appearance of; the act or operation of changing the external appearance of.

"Upon whose dead corpse there was such mimes, Such beastly shameless *transformation*, By those Welchmen done, as may not be, Without much shame, retold or spoken of."—*Shakespeare: 1 Henry IV.*, l. 1.

2. The state of being changed in form or appearance; a change in form, appearance, nature, disposition, character, or the like; metamorphosis.

"What beast couldst thou be that were not subject to a beast? And what a beast art thou already, and seemst not thy loss in *transformation*!"—*Shakespeare: Timon of Athens*, iv. 3.

3. The change of one metal or substance into another; as, the *transformation* of lead into gold; transmutation.

* 4. A conversion from sinfulness to holy obedience.

"Thus it must be in our *transformation* onwards; the Spirit of God doth thus alter us through grace, whilst we are yet, for essence, the same."—*Sp. Hall: The Estate of a Christian*.

* 5. The change of the soul into a divine substance, as amongst the mystics.

* 6. The shape or appearance to which one has been changed.

"My *transformation* hath been washed and called."—*Shakespeare: Merry Wives*, iv. 5.

II. Technically:

1. *Biol.*: The series of changes which every germ undergoes in reaching the embryonic condition, either in the body of the parent or within the egg, as distinguished from those which species born in an imperfectly developed state present in the course of their external life, and which are more generally known as metamorphosis (q.v.).

2. *Chem.*: A term applied to those chemical changes whereby an entirely new set of compounds is produced, as when sugar is converted by the aid of a ferment into alcohol and carbonic anhydride, or where complex compounds are resolved by the aid of destructive distillation into simpler substances, usually called transformation products.

3. *Math.*: The operation or process of changing in form or expression; as,

(1) The change of a given geometrical figure into another of equal area, but of a different number of sides, or of a given solid into another of equal solidity, but having a different number of faces.

(2) The operation of changing the form of an equation without destroying the equality of its members. All the operations performed upon equations, in order to simplify them or to solve them, are transformations.

(3) The operation of changing the form of a fraction without changing its value. The operations of reducing to simplest terms, of changing the fractional unit, &c., are transformations.

4. *Pathol.*: The morbid change of one structure into another, as when muscle is transformed into fat, or ossification of the heart takes place.

5. *Physiol.*: The change which takes place in the blood in its passage from the arterial to the venous system. This change is of three kinds: (1) contributing to the growth of non-vascular tissue; (2) contributing to the growth of the organized substance of the various organs; and (3) the separation of mucus, urine, bile, &c., from the blood.

6. *Theatre*: A transformation-scene (q.v.).

transformation-myth, *s.*

Anthrop.: A myth which represents a human

fäte, fät, färe, amidst, whät, fäll, father; wä, wët, hère, camél, hër, there; pine, pit, sire, sir, marine; gö, pöt, or. wöre, wolf, work, whö, sön; müte, cüb, cüre, unite, cür, rüle, füll; try, Sÿrian. so, ce = ö; ey = ä; qu = kw.

being as changed into an animal, a tree or plant, or some inanimate being.

"The ethnographic student finds a curious interest in transformations—myths like Ovid's, keeping up as they do to testify to the philosophy of archaic types."—Taylor: *Prim. Cult.*, (ed. 1873), II, 220.

transformation of energy, s.

Physics: (See extract).

"It has been found by experiment that when one kind of energy appears or is expended, energy of some other kind is produced, and that, under proper conditions, the disappearance of any one of the known kinds of energy can be made to give rise to a greater or lesser amount of any other kind. One of the simplest illustrations that can be given of this transformation of energy is afforded by the oscillations of a pendulum. When the pendulum is at rest in its lowest position it does not possess any energy, for it has no power of setting either itself or other bodies in motion or of producing in them any kind of change. In order to set the pendulum oscillating, work must be done upon it, and it thereafter possesses an amount of energy corresponding to the work that has been expended. When it has reached either end of its path, the pendulum is for an instant at rest, but it possesses energy by virtue of its position, and can do an amount of work while falling to its lowest position which is represented by the product of the weight into the vertical height through which its centre of gravity descends. When at the middle of its path the pendulum is passing through its position of equilibrium, and has no power of doing work by falling lower; it now possesses energy by virtue of the velocity which it has gained, and this energy is able to carry it up on the second side of its lowest position to a height equal to that from which it has descended on the first side. By the time it reaches this position the pendulum has lost all its velocity, but it has regained the power of falling; this, in its turn, is lost as the pendulum returns again to its lowest position, but at the same time it regains its previous velocity. Thus during every quarter of an oscillation, the energy of the pendulum changes from potential energy of position into actual energy or energy of motion, or vice versa."—Gantt: *Physics* (ed. Atkinson), § 64.

transformation—products, s. pl. [TRANSFORMATION, II, 2.]

transformation—scene, s.

Theatre: A gorgeous scene at the end of the opening of a pantomime, in which the principal characters were formerly supposed to be transformed into the chief characters in the harlequinade which immediately follows. The transformation—scene still forms a special feature of the pantomime, and introduces the characters of the harlequinade, but there is no longer any change. [RALLY.] The name has nothing to do with the gradual unfolding and development of the scene.

*trans-for-ma-tive, a. [Eng. transform; -ative.] Having the power or tendency to transform.

trans-form-ism, s. [Fr. transformisme.]

Biol.: The hypothesis that all existing species are the products of the metamorphosis of other forms of living beings; and that the biological phenomena which they exhibit are the results of the interaction, through past time, of two series of factors: (1) a process of morphological and concomitant physiological modification; (2) a process of change in the condition of the earth's surface.

"And there are two forms of the latter [evolution] hypothesis: for, it may be assumed, on the one hand, that crinoids have come into existence independently of any other form of living matter, which is the hypothesis of spontaneous generation, or abiogenesis; or, on the other hand, we may suppose that crinoids have resulted from the modification of some other form of living matter; and this is what to know a useful word from the French language is known as transformism."—Huxley: *The Crinoid*, p. 518.

*trans-freight (freight as frät), v. i. [See def.] A corruption of transfrete (q.v.).

"These are, and transfreight, and about the year 650 obtain the rule over us."—Waterhouse: *Apology for Learning*, p. 52. (1655).

*trans-fré-tā-tion, s. [Lat. transfretatio, from transfretatus, pa. par. of transfreto = to cross the sea; Sp. transfretacion, transfretacion.] [TRANSFRETARE.] A passing over or crossing a strait or narrow sea.

"She had a rough passage in her transfretation to Dover Castle."—Howell: *Letters*, bk. I, let. 22.

*trans-fré-te, v. t. & l. [Fr. transfretar, from Lat. transfreto, from trans = across, over, and fretum = a strait, the sea; Sp. transfretar, transfretar.]

A. Trans.: To cross or pass over, as a strait or narrow sea.

"So transfreting the Illyrian sea." *Lochner*, I, 1.

B. Intrans.: To pass over a strait or narrow sea.

"Being transfreted and passed over the Hircanian sea."—Urbhart: *Habelas*.

*trans-füge, *trans-fü-gi-tive, s. [Lat. transfugio = a deserter, from trans = across, and fugio = to fly.] A deserter; a soldier

who goes over to the enemy in time of war; hence, a turncoat, an apostate.

"The protection of deserters and transfuges is the luxurious rule of every service in the world."—Lord Stanhope: *Miscell.*, Second Series, p. 13.

*trans-fünd, v. t. [Lat. transfundo = to pour out of one vessel into another, to transfuse: trans = across, and fundo = to pour.] To transfuse.

"[A] [gratitude] best instrument therefore is speech, that most natural, proper, and easy mean of conveyance, of signifying our conceptions, of conveying, and as it were transfusing our thoughts and our passions into each other."—Barrow: *Sermons*, vol. I, ser. 8.

trans-füge, v. t. [Lat. transfusio, pa. par. of transfundo = to transfund (q.v.); Fr. transfuser.]

I. Ordinary Language:

1. To pour out of one vessel into another; to transfer by pouring.

"Where the juices are in a morbid state, if one could suppose all the unskinned juices taken away and sound juices immediately transfused, the sound juices would grow morbid."—Arbuthnot.

2. To cause to pass from one into another; to instil; to cause to be imbued.

"The virtue of one generation was transfused, by the magic of example, into several; and a spirit of heroism was maintained through many ages of that commonwealth."—Göteborg: *Study of History*, let. 1.

II. Surg.: To transfer from the veins or arteries of one animal to those of another.

*trans-füs-i-ble, a. [Eng. transfuse(-); -able.] Capable of being transfused.

trans-fü-gion, s. [Lat. transfusio, from transfusio, pa. par. of transfundo = to transfuse (q.v.); Sp. transfusion, transfusion; Ital. transfusione, trasfusione.]

1. Ord. Lang.: The act or process of transfusing, or of pouring, as a liquor, out of one vessel into another; and causing to pass from one into another; the state of being transfused.

"It is with languages as 'tis with liquors, which by transfusion use to take wind from one vessel to another."—Howell: *Letters*, bk. II, let. 47.

2. Surg.: The operation of transmitting blood from the veins of one living animal to those of another, or from those of a man or one of the lower animals into a man, with the view of restoring the vigour of exhausted subjects. The idea of renewing vital power by the transfusion of the blood seems to have been familiar to the ancients, and is found in the works of the alchemists of the Middle Ages, who imagined that it might be the means of perpetuating youth. The operation is now frequently resorted to in cases of extreme loss of blood by hæmorrhage, especially when connected with labour. Modern experiments, particularly those of Prevost and Dumas, show that the blood of calves or sheep injected into the veins of a cat or rabbit is fatal, and mammals into whose veins the blood of birds is transfused die. The experiments of Milne-Edwards and Lafond indicate that this result does not take place when the animals belong to nearly allied species; thus an ass, whose blood was nearly exhausted, recovered when the blood of a horse was transfused into its veins.

"The experiment of transfusion proves, that the blood of one animal will serve for another."—Paley: *Natural Theology*, ch. xxv.

*trans-fü-give, a. [Eng. transfuse(-); -ive.] Tending or having power to transfuse.

*trans-gän-gët-ic, a. [Pref. trans, and Eng. Gangesic.] On the opposite side of the Ganges; pertaining or relating to countries on the other side of the Ganges.

trans-gress, *trans-gresse, v. t. & i. [Lat. transgressus, pa. par. of transgredior = to step over, to pass over; trans = across, over, and gradior = to step, to walk; Fr. transgresser (O. Fr. transgradir); Sp. transgradir, trasgradir; Ital. transgredire, trasgredire.]

A. Transitive:

*I. Lit.: To pass over or beyond; to overstep.

"Apt to run riot and transgress the goal." *Dryden*, (Todd).

II. Figuratively:

1. To overpass or overstep, as some law or rule prescribed; to break, to violate, to infringe.

"Human laws oblige only that they be not despised, that is, that they be not transgressed without a reasonable cause."—Sp. Taylor: *Rule of Conscience*, bk. III, ch. I.

*2. To offend against; to thwart, to vex, to cross.

"Why give you peace to this Intemperate beast That hath so long transgressed you?" *Beaumont & Flute*, (Webster).

B. Intrans.: To offend by violating a law or rule; to sin.

"Achaë transfressed in the thing occurred."—1 *Chronicles* II, 1.

¶ For the difference between to transgress and to infringe, see INFRINGE.

*trans-gress-i-ble, a. [Eng. transgress; -ible.] Capable of being transgressed; liable to be transgressed.

trans-gress-ión (ss as sh), *trans-gres-sy-on, s. [Fr. transgression, from Lat. transgressionem, accus. of transgressio, from transgressus, pa. par. of transgredior; Sp. transgression, trasgression; Ital. transgressione, trasgressione.] [TRANSORRESS.]

1. The act of transgressing; the act of breaking or violating any law or rule, moral or civil, prescribed, expressed, or implied.

"Sin is a transgression of some law."—Sp. Taylor: *Rule of Conscience*, bk. II, ch. I.

2. A breach or violation of any law or rule; an offence, a crime, a fault, a trespass, a misdeed.

"Forgive thy people all their transgressions."—1 *Kings* VIII, 50.

*trans-gress-lón-al (ss as sh), a. [Eng. transgression; -al.] Pertaining or relating to transgression; involving transgression.

"Forgive this transgressional nature: receive my thanks for your kind letter."—Burnet: *Hist. Own Times*.

*trans-gress-ive, a. [Eng. transgress; -ive.] Inclined or apt to transgress; faulty, sinful, culpable.

"Adam perhaps would have sinned without the suggestion of Satan, and from the transgressive infirmities of himself might have erred alone."—Brosset: *Vulgar Errours*, bk. I, ch. 2.

*trans-gress-ive-lý, adv. [Eng. transgressive; -ly.] In a transgressive manner; by transgression.

trans-gress-ór, *trans-gress-our, s. [Fr. transgresseur, from Lat. transgressoreus, accus. of transgressor, from transgressus, pa. par. of transgredior.] [TRANSGRESS.] One who transgresses; one who violates or infringes a law, rule, or command; a sinner, an offender.

"And albeit that this riot was yett greuously shewyd agayne the commonns of the cytie, yett it passyd vnynguarded for the great comynure of the transgressours."—Fabyan: *Chronycle* (an. 1180).

*trans-shápe, v. t. [Pref. trans = across, hence implying change, and Eng. shape.] To alter the shape or form of; to transform.

"By a gracious influenced transhaped Into the olive, pomegranate, mulberry." *Webster*, (1623).

trans-ship, v. t. & i. [Pref. trans, and Eng. ship.]

A. Trans.: To convey or transfer from one ship to another.

"Cargo (pig iron) being transhipped to steamer."—*Daily News*, Feb. 1, 1886.

*B. Intrans.: To pass or change from one ship to another.

"Transhipping from steamer to steamer."—*Daily Telegraph*, Nov. 18, 1885.

trans-ship-mént, s. [Pref. trans, and Eng. shipment.] The act of transhipping, or of transferring from one ship to another.

*trans-hü-man, a. [Pref. trans, and Eng. human (q.v.).] Beyond or more than human; superhuman.

*trans-hü-man-ize, v. t. [Pref. trans, and Eng. humanize (q.v.).] To elevate or transform to something beyond or above what is human; to change from a human into a higher, nobler, or celestial nature.

*trans-si-ence *trans-si-en-çy (or si-en as shen), s. [Eng. transient(-); -or, -cy.]

1. The quality or state of being transient; transiency.

"Here, from time and transience won, Beauty has her charms resigned." *Brooke & A. Ant. Am.*

2. Something transient, or not durable or permanent.

"Poor sickly transiencies that we are, covering we know not what."—*Carlyle*: *Reminiscences*, I, 218.

trans-si-ent (or si-ent as shent), a. & s. [Lat. transiens, pr. par. of transeo = to go

across, to pass away: *trans* = across, and *eo* = to go.]

A. As adjective:

I. Ordinary Language:

* **1. Passing on from one to another.**

"For we grow sick many times by incautiously conversing with the diseased; but no man grows well by accompanying the healthy: thus indeed it is with the healthiness of the body: it hath no transient force on others, but the strength and healthiness of the mind carries with it a gracious kind of infection; and common experience tells us, that nothing profits evil men more than the company of the good."—*Bales: Remains; Sermon on Rom. xiv. 1.*

* **2. Passing over or across a space or scene in a short period of time, and then disappearing; not stationary; not lasting or durable; transitory.**

"How soon hath thy prediction, seer blest, Measured this transient world, the race of time, Till time stand fixed."—*Milton: P. L., xii. 64.*

* **3. Hasty, momentary, passing, brief.**

"This vale he might have seen With transient observation."—*Wordsworth: Excursion, bk. vii.*

* **4. Brief, short.**

"At length his transient respite past."—*Comper: Casaway.*

II. Music: Applied to a chord introduced for the purpose of making a more easy and agreeable transition between two chords belonging to unrelated keys.

* **B. As subst.:** That which passes away in a short space of time; that which is temporary or transitory; anything not permanent or durable.

"For before it can fix to the observation of any one the object is gone; whereas, were there any considerable inward in the motion; it would be a kind of stop or arrest, by the benefit of which the soul might have a glance of the fugitive transient."—*Glanville: Vanity of Dogmatizing, ch. ix.*

transient-effect, s.

Paint: A representation of appearances in nature produced by causes that are not stationary, as the shadows cast by a passing cloud. The term *accident* has often the same signification.

transient-modulation, s.

Music: The temporary introduction of chords or progressions from an unrelated key.

* **trān-si-ent-ly** (or **si-ent** as **shent**), *adv.* [*Eng. transient; -ly.*] In a transient manner; in passing; for a short time; not with continuance, permanence, or durability.

"But the greatest and the noblest objects of the human mind are very transient; at best, the object of theirs."—*Bolingbroke: Essay 4: Authority on Matters of Religion.*

* **trān-si-ent-ness** (or **si-ent** as **shent**), *s.* [*Eng. transient; -ness.*] The quality or state of being transient; speedy passage; shortness of duration or continuance.

"It were to be wished that all words of this sort, as they resemble the wind in fury and impetuosity, so they might do also in transiency and sudden expiration."—*Deacy: Piety.*

* **trān-sil-i-ency**, **trān-sil'-i-en-cy**, *s.* [*Lat. transiliens, pr. par. of transilio = to leap across: trans = across, over, and silio = to leap.*] A leap or spring from one thing to another.

"By an unadvised transiency leaping from the effect to its remotest cause, we observe not the connection of more immediate causalities."—*Glanville: Scopia, ch. xii.*

* **trāng-in-cor-pōr-ā-tion, s.** [*Prof. trans., and Eng. incorporation (q.v.).*] Change made by the soul into different bodies; metempsychosis.

"Curious information . . . on the transincorporation of souls."—*W. Taylor of Norwich (Memoir II. 205).*

* **trāns-ir-ē, s.** [*Lat. = to go through.*] [*TRANSIENT.*] A custom-house warrant, giving free passage for goods to a place; a permit.

* **trān-sit, s.** [*Lat. transitus = a passing over; a passage, from transeo = to pass over; Ger. (comm.) transit; Fr. (comm.) transit; Ital. transitio.*] [*TRANSIENT.*]

I. Ordinary Language:

* **1. A passing over or through; conveyance; a passage.** (Used of things more frequently than of persons.)

"A handy gap on the left provided a very safe means of transit for the division."—*Field, Feb. 13, 1886.*

* **2. The conveyance of goods; the act or process of causing to pass.**

"Arrangements have been made for transit of goods and passengers to and from the docks over all the leading lines."—*Daily Telegraph, Jan. 21, 1885.*

* **3. A line of passage or conveyance through a country.**

II. Technically:

I. Astronomy:

(1) The passage of a heavenly body over the meridian.

(2) The passage of one of the inferior planets, Mercury or Venus, over the sun's disc. Mercury being so near the sun, and so difficult to observe with accuracy, its transits are not nearly so important to astronomers as those of Venus. In 1716 Dr. Halley published a paper in the *Philosophical Transactions*, advising that the transits of Venus over the sun's disc which would occur in A.D. 1761 and 1769 should be taken advantage of for the purpose of ascertaining the sun's distance from the earth.

Though he was dead long before these dates arrived, the government of the day acted on his suggestion. In 1769 the celebrated Captain Cook was sent to Otaheite for the purpose of noting the transit, another observer being despatched to Lapland. The observations of the latter being erroneous the distance of the sun was exaggerated by about three millions of miles. In 1874, when the next transit occurred, all civilized nations sent forth scientific men to observe it. It was known that it would be invisible at Greenwich, but expeditions were sent out by the British Government to the Sandwich Islands, to New Zealand, Egypt, Rodriguez, and Kerguelen Island. Other nations occupied other stations, and the weather proved suitable at most places for accurate observation. Transits of Venus come, after long intervals, in pairs, eight years apart; and another transit took place on the afternoon of Dec. 6, 1882. In the British Isles the weather was generally unfavourable, clouds with occasional snowflakes obscuring the sky at Greenwich, and through nearly all Great Britain, except on the western coast. At Dublin, partial observations were obtainable; and of various British expeditions sent abroad, complete success was obtained in Madagascar and at the Cape of Good Hope. Observers from the United States and other countries were also successful. The observation of the distance the planet moves to the right and left of the sun, in describing its orbit, enables an astronomer to ascertain the relative distance of the two luminaries. The relative breadth of the sun's diameter as compared with his distance from the earth, is also easily ascertained. If then two observers on the surface of our sphere take their stations at judiciously selected points, as widely apart as possible, and note a transit of Venus, the planet will have a lesser line to traverse at the one place than the other, and will do it in a shorter time. From accurate notation of the difference in time taken in connection with the difference in length it is possible to calculate, first the breadth of the sun, and secondly his distance from the earth. When the materials obtained in connection with the two transits were worked out, it was found, as Hansen had suspected, that the sun's distance had been over-estimated, and it was reduced from 95,300,000 to 92,700,000. The scientific importance of these phenomena can scarcely be over-estimated. The next transits of Venus will occur on June 7, 2004, and June 5, 2012. [SUN.]

"As the day of observation now approached, I determined in consequence of some hints which had been given me by Lord Morton, to send out two parties to observe the transit from other situations."—*Cook: First Voyage, bk. i., ch. xiii.*

(3) A transit-instrument (q.v.)

* **2. Engin.:** A portable instrument resembling a theodolite, designed for measuring both horizontal and vertical angles. It is provided with horizontal and vertical graduated circles, one or two levels, and a compass, and is mounted upon a tripod-stand.

* **transit-circle, s.** An instrument for ascertaining at the same observation the right ascension and declination of a heavenly body at its transit over the meridian. It unites the functions of the mural circle and the transit instrument.

* **transit-compass, s.** The same as TRANSIT, s., II. 1. (3) (q.v.).

* **transit-duty, s.** Duty paid upon goods in passing through a country.

* **transit-instrument, s.** An instrument designed accurately to denote the time when a heavenly body passes the meridian. It consists of a telescope supported on a horizontal axis, whose extremities terminate in cylindrical pivots resting in metallic supports, shaped like the upper part of the letter Y,

and hence termed the "Y's," and imbedded in two stone pillars. In order to relieve the pivots from friction and facilitate the turning of the telescope, counterpoises are provided operating through levers, carrying friction-rollers, upon which the axis turns. When the instrument is in proper adjustment, the telescope should continue in the plane of the meridian when revolved entirely round upon its axis, and for this purpose the axis must lie in a line directly east and west. To effect

TRANSIT INSTRUMENT.

its ends are provided with screws by which a motion, both in azimuth and altitude, may be imparted. The telescope has a series of parallel wires crossing its object-glass in a vertical direction. When a star, designed to be the subject of observation, is seen approaching the meridian, the observer looks at the hour and minutes on a clock placed at hand for the purpose. He then notes the passage of the star across such wire, listening at the same time to the clock beating seconds. The exact time at which the star passes each wire is then noted, and the mean between the time of passing each two wires equidistant from the centre being taken, gives a very close approximation to the truth. The transit-instrument is the most important of what may be called the technical astronomical instruments. The smaller and portable kinds are used to ascertain the local time by the passage of the sun or other object over the meridian, while the larger and more perfect kinds, in first-class observatories, are used for measuring the positions of stars, for forming catalogues; its special duty being to determine with the greatest accuracy the right ascension of heavenly bodies.

* **transit-trade, s.** Trade arising from the passage of goods across a country.

* **trān-sit, v.t.** [*TRANSIT, s.*] To pass over the disc of, as of a heavenly body: as, Venus transits the face of the sun.

* **trān-si-tion, s.** [*Lat. transitio, from transitum, sup. of transeo = to pass over or across; Fr. transition; Sp. transicion; Ital. transizione.*] [*TRANSIENT.*]

I. Ord. Lang.: The act, state, or operation of passing from one place or state to another; passage from one place or state to another; change.

"Indeed this sudden transition from warm, mild weather, to extreme cold and wet, made every man in the ship feel its effects."—*Cook: Second Voyage, bk. i., ch. ii.*

II. Technically:

* **1. Arch.:** The period between one style and another.

* **2. Music:**
(1) A modulation (q.v.).
(2) A passing-note (q.v.).

* **3. Rhet.:** A passing from one subject to another.

"He with transition sweet new speech resumes."—*Milton: P. L., xii. 4.*

* **¶** Used often adjectively, as equivalent to, changing from one state to another, transitional: as, a transition state, a transition stage, &c.

* **transition-beds, s. pl.**
Geol.: Certain beds constituting the passage from the Upper Silurian to the Devonian. They are about 350 feet thick near Downton, in Herefordshire, and are associated with the Downton sandstone and Ledbury shales.

* **transition-rocks, * transition-strata, s. pl.**
Geol.: An exploded geologic term introduced by Werner, the founder of the Neptunian school of geologists. Erroneously supposing all rocks to have been precipitated from water, he fancied that the primitive or crystalline rocks were first laid down. Thea

âte, fât, fâre, amidst, whât, fâll, fâther; wê, wêt, hêre, camêl, hêr, thêre; pine, pît, sire, sir, marine; gô, pôť, or, wôre, wolf, wôrk, whô, sôn; mûte, cûb, cûre, ûnite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â; qu = kw.

followed strata of a mixed character, partly crystalline, and yet here and there exhibiting marks not of a chemical but of a mechanical origin, and possessing besides some organic remains. These rocks constituting, according to this hypothesis, the passage between the primitive and the secondary rocks, were called transition (in German Übergang). They consisted chiefly of clay-slate, graywacke, and certain calcareous beds. (Lyell: Manual of Geology, ch. viii.)

transition-tint, s.

Polarization: A purplish-gray tint caused by a plate of quartz of a certain thickness when examined by polarized light, which in a certain position of the analyzer, gives the tint between the red of one order of colours and the blue of the next. Hence, the least variation converts the tint to either reddish or bluish, making it a sensitive test in the saccharometer.

trán-si-tion-al, *trán-si-tion-ar-ý, a. [Eng. transition; -al, -ary.] Containing, involving, or denoting transition or change; changing; in process of passing from one state or stage to another.

"The difficulty is not to conceive of the transitional form, but of the transitional mind. . . . The savage is in no transitional state; the mental faculties are dormant, not undeveloped."—British Quarterly Review, viii. 244. (1874.)

trán-si-tive, s. & s. [Lat. transitivus, from transitum, sup. of transeo = to pass over or across; Sp., Port., & Ital. transitivo; Fr. transitif.]

A. As adjective:

* I. Ordinary Language:

- 1. Having the power or property of passing on, or of making transition; passing on. "Gold is active and transitive into bodies adjacent, as well as heat."—Bacon: Nat. Hist., § 70.
2. Effected by, or existing as, the result of transference, or extension of signification; derivative, secondary, metaphorical.
3. Acting as a medium.
"An image that is understood to be an image can never be made an idol; or if it can it must be by having the worship of God passed through it to God; it must be by being the analogical, the improper, the transitive, the relative for what shall I call it object of divine worship."—Bp. Taylor: Rules of Conscience, bk. II, ch. II.

II. Gram.: Taking on object after it; denoting action which passes on to an object which is expressed; as a transitive verb. A transitive verb denotes an action which passes on from the subject, which does, to the object to which the action is done.

B. As subst.: A transitive verb.

trán-si-tive-ly, adv. [Eng. transitive; -ly.]

- * 1. In a transitive manner; not directly; indirectly; by transference.
"Vasquez, and I think he alone of all the world, owns the worst that this argument can infer, and thinks it lawful to give divine worship relatively or transitively to a man."—Bp. Taylor: Rules of Conscience, bk. II, ch. II.
2. As a transitive verb; with a transitive sense or force.

"Words are often used promiscuously, and employed transitively in this very case by the apostle."—Waterland: Works, vii. 58.

trán-si-tive-néss, s. [Eng. transitive; -ness.] The quality or state of being transitive.

trán-si-tör-i-ly, adv. [Eng. transitory; -ly.] In a transitory manner; with short continuance.

trán-si-tör-i-néss, s. [Eng. transitory; -ness.] The quality or state of being transitory; speedy evanescence; shortness of duration; transiency.

"Heedful observation may satisfy a man of the vanity of the world, and the transitoriness of external, and especially sinful, enjoyments."—Boyle: Works, vi. 792.

* trán-si-tör-i-ous, * tran-sy-tor-y-ouse, a. [Lat. transitorius.] The same as TRANSITORY (q.v.).

"Saynt Eanswyde, abbess of Folkstane in Kent, luppied of the deuyll, dyffined christen marriage to be barren of all vertues, to have but transitoryouse frutes, and to be a fyltipe corruptyon of virginite."—Bala: Eng. Vocabulary, pt. I.

trán-si-tör-ý, * tran-si-tor-le, a. [Fr. transitoire, from Lat. transitorius = liable to pass away, passing away; Sp., Port., & Ital. transitorio.] [TRANSIENT.] Passing without continuance; speedily vanishing; continuing

but a short time; not durable; not permanent; transient; unstable and fleeting.

"What is my life, my hope? he said: Alas! a transitory shade."—Scott: Robbery, l. 30.

transitory-action, s.

Law: An action which may be brought in any county, as actions for debt, detinue, slander, or the like. Opposed to local action (q.v.).

tráns-lát-a-ble, a. [Eng. translát(e); -able.] Capable of being translated or rendered into another language.

* tráns-lát-a-ble-néss, * tráns-láté-a-ble-néss, s. [Eng. translát(e); -ness.] The quality or state of being translatable; fitness or suitability for translation.

"We owe to a certain scepticism as to La Fontaine's translatableness."—Athenaeum, March 4, 1852.

tráns-láté, v. t. & i. [O. Fr. translater = to translate, to reduce, to remove, from Low Lat. translato = to translate, from Lat. translatus, pa. par. of transfero = to transfer (q.v.); Sp. transladar, trasladar; Ital. translatare.]

A. Transitive:

- * 1. To bear, carry, remove, or transfer from one place or person to another.
"I will translate the kingdom from the house of Saul, and set up the throne of David."—1 Samuel III. 10.
2. To remove from one office or charge to another; specif., in episcopal churches, to transfer, as a bishop, from one see to another, and in the Scottish Church, to transfer, as a minister, from one parish to another.
"Fisher, bishop of Rochester, when the king would have translated him from that poor bishoprick to a better, he refused, saying, He would not forsake his poor little old wife, with whom he had so long lived."—Camden: Remains.
* 3. To remove or convey to heaven without death.
"By faith Enoch was translated, that he should not see death."—Hebrews XI. 5.
* 4. To cause to remove from one part of the body to another: as, To translate a disease.
* 5. To deprive of consciousness; to entrance.
* 6. To change into another form; to transform.
"Bottom, thou art translated."—Shakespeare: Midsummer Night's Dream, III. 1.
* 7. To alter; to change.
"New no doubt, yet the priesthood was translated, then necessity must the law be translated also."—Hebrews VII. 12. (1851.)
8. To render into another language; to express the sense of in another language.
"That speech he actually prepared and had it translated."—Macaulay: Hist. Eng., ch. xxiv.
* 9. To explain; to interpret.
"There's matter in these elghe; these profound heaves You must translate; 'tis it we understand them."—Shakespeare: Hamlet, IV. 1.
10. To manufacture, as boots or shoes, from the material of old ones. (Slang.)
"Great quantities of second-hand boots and shoes are sent to Ireland to be translated there."—Maguire: London Labour & London Poor, II. 40.

B. Intrans.: To be engaged in or practise translation.

tráns-lá-tion, * trans-la-ci-oun, s. [Fr. translation, from Lat. translationem, accus. of translatio = a transferring, removing, from translatus, pa. par. of transfero = to transfer; Sp. translacion, traslacion; Ital. traslazione, traslazione, traslazione.] [TRANSLATE.]

I. Ordinary Language:

- * 1. The act of translating, removing, or transferring from one place or person to another; transfer; removal.
* 2. A causing to remove from one part of the body to another: as, the translation of a disease.
3. The removal or transference of a person from one office or charge to another; specif., in episcopal churches, the transfer of a bishop from one see to another, and in the Scottish Church, the transfer of a minister from one parish to another.
"The translation of the Archbishop of Toledo to the see of Seville was announced."—Daily Telegraph, Jan. 16, 1886.
* 4. The removal of a person to heaven without being subjected to death.
"Before his translation he had this testimony, that he pleased God."—Hebrews XI. 5.
* 5. Used especially of Enoch (Gen. v. 24) and Elijah (2 Kings II. 1-11).

5. The act of turning into another language; a rendering of words in another language.

"It had been in some of the former sessions determined that there should be chosen six divines for the translation of the Bible, three for the Old Testament, and three for the New with the Apocrypha."—Edin: Letter from the Synod of Dort, Nov., 1618.

6. That which is produced by rendering in another language; a translated version. [VERSION.]

"It is by means of French translations and extracts that they are generally known in Europe."—Goldsmith: Follies Learning, ch. VIII.

7. (See extract.) (Slang.)

"Translation, as I understand it (said my informant), is this—to take a worn, old pair of shoes or boots, and by repairing them make them appear as if left off with hardly any wear—as if they were only soled."—Mayhew: London Labour & London Poor, II. 40.

* II. Rhet.: Transference of the meaning of a word or phrase; metaphor; translation.

¶ Motion of translation: Motion of a body from one place to another in such a way that all its points move in parallel straight lines. It is opposed to a motion of rotation and to a motion partly of translation and partly of rotation.

* tráns-la-tý-tious, a. [Lat. translaticius, translaticius, from translatus, pa. par. of transfero = to transfer, to translate (q.v.).]

- 1. Metaphorical; not literal; translation.
"We allow him the use of these words in a translation, abusive sense."—Translation of Pustrovsk's Morals.
2. Brought from another place; not native.
"I have frequently doubted whether it be a pure indigene, or translaticious."—Evelyn: Sylva, bk. I, ch. IV. § 5.

* tráns-lát-ýve, a. [Lat. translaticivus.] [TRANSLATE.] Pertaining or relating to transference of meaning.

"If our feet poetical want those qualities it cannot be sayde a foote in sense translaticus as here."—Puttenham: English Poetrie, bk. II, ch. III.

tráns-lát-ör, * trans-lat-our, s. [Eng. translát(e); -or.]

I. Ordinary Language:

- * 1. One who translates; one who removes, transfers, or changes.
"The changer and translator of kyngdoms and tymes."—Joyce: Expos. of Daniel, ch. v.
2. One who translates or renders into another language; one who expresses the sense of words in one language by equivalent words in another.
"To the great task each bold translator came."—Pitt: To Mr. Pope.
3. A collier of a low class who manufactures boots and shoes from the material of old ones, selling them at a low price to second-hand dealers. (Slang.)
"The collier is affronted if you don't call him Mr. Translator."—T. Brown: Works, III. 73.
4. (PL.): Second-hand boots mended and sold at a low price.
"To wear a pair of second-hand [boots] or translators . . . is felt as a bitter degradation."—Mayhew: London Labour & London Poor.

II. Teleg.: An instrument, such as a relay, for repeating a message upon a second circuit when the line-circuit of the former circuit is too feeble to carry the signal to the ultimate station.

* tráns-lá-tör-ý, a. [Eng. translát(e); -ory.] Transferring; serving to translate.

"The translatatory is a lie that transfers the merit of a man's good action to another more deserving."—Archbuthol.

* tráns-lá-tröss, s. [Eng. translát(e); -ress.] A female translator.

"The compliment to the translator is delightfully conceived."—C. Lamb: Letter to Southey.

* tráns-la-vá-tion, s. [Lat. trans = across, over, and lavatio = a waathing.] [LAVE.] A laving or lading from one vessel to another.

"This translation ought so long to be continued out of one vessel into another, until such time as it have done casting any residue downward; for the sediment that resteth in the bottom is the best."—P. Holland: Plinie, bk. xxxiv., ch. xviii.

tráns-lít-ör-áte, v. t. [Lat. trans = across, over, and litera = a letter.] To express or write, as words of a language having peculiar alphabetic characters, in the alphabetic characters of another language; to spell in different characters expressing the same sound: as, To transliterate Greek into English characters.

tráns-lít-ör-á-tion, s. [TRANSLITERATE.] The act of transliterating; the rendering of

бѣл, бѣы; пѣлѣ, пѣлѣ; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. cian, -tian = shan. -tion, -sion = shün; -tion, -gion = zhün. -cious, -tious, -sious = shüsh. -ble, -dle, &c. = bel, del.

the characters of one language by equivalent ones in another.

"The translocation often fails to convey a true idea of the pronunciation."—Atkinson, Oct. 14, 1882.

• **trāns-lō-cā-tion**, s. [Pref. *trans-*, and Eng. *location* (q.v.).] The removal of things reciprocally to each other's places; interchange of place; substitution of things for each other.

"The most notable of these offices that can be assigned to the spirit of nature, and that suitably to his name, is the *translocation* of the souls of beasts into such matter as is most fitting for them."—More: *Immort. of the Soul*, bk. III, ch. xiii.

• **trāns-lūcē**, v.t. [Lat. *translucere*, from *trans* = through, across, and *lūceo* = to shine.] To shine through.

"Let Joy transduce thy Beauty's blandishment."—Dennis: *Holy Rood*, p. 26.

• **trāns-lū-cēnce**, **trāns-lū-cēn-cy**, s. [Eng. *translucent* (f); *-ce*, *-cy*.]

1. The quality or state of being translucent; the property, as of a mineral, ground glass, or oiled paper, of allowing rays of light to pass through, but not so as to render the form or colour of objects on the other side distinguishable through it.

"I have for trial's sake taken lumps of rock crystal, and heating them red-hot in a crucible, I found, according to my expectation, that being quenched in fair water, even those, that remained in seemingly entire lumps, exchanged their transparency for whiteness."—Boyle: *Works*, l. 708.

* 2. Transparency.

• **trāns-lū-cēt**, a. [Lat. *translucens*, pr. par. of *translucere* = to shine through.] [TRANSLUCENT.]

I. Ordinary Language: 1. Allowing rays of light to pass through, but not so as to render the form or colour of objects on the other side distinguishable. 2. Transparent, clear.

"The aperted frame, compact at every joint, And overlaid with clear translucent glass."—Cooper: *Task*, iii. 488.

II. Min.: So nearly opaque that objects are scarcely if at all visible through it.

• **trāns-lū-cēt-lī**, adv. [Eng. *translucently*; *-ly*.] In a translucent manner; so as to be partially visible through.

"Amber, where the slightest are often times transparently unperceived."—Dryden: *Edward IV*, to Mistress Shore.

• **trāns-lū-cid**, a. [Lat. *translucidus*, from *trans* = across, through, and *lucidus* = clear, lucid (q.v.).] Transparent, clear.

"In anger the spirits ascend and wax eager; which is seen in the eyes, because they are *translucid*."—Bacon: *Nat. Hist.*, § 872.

• **trāns-lū-nar**, * **trāns-lū-nar-ŷ**, a. [Pref. *trans-*, and Eng. *lunar*, *lunary*.] Being or situated beyond the moon. (Of posed to subsidiary.)

"Next Marlow, bathed in the Thespian springs, Had in him those brave *translunary* things That the first poets had: his raptures were All air and fire."—Dryden: *Of Poets & Poetry*.

• **trāns-mā-rine**, a. [Lat. *transmarinus*, from *trans* = beyond, across, and *marinus* = marine (q.v.).] Lying or being beyond or on the other side of the sea; found beyond the sea.

"Indeed if the case were just that it was very hard with good people of the *transmarine* churches; but I have here two things to consider."—Bp. Taylor: *Epic*. Ascerted, § 92.

• **trāns-mē-a-ble**, * **trans-me-at-a-ble**, a. [TRANSMEATE.] Capable of being transmuted or traversed. (Ash.)

• **trāns-mē-āte**, v.t. [Lat. *transmeatus*, pr. par. of *transmeo* = to go through or across: *trans* = across, through, and *meo* = to go, to pass.] To pass over or beyond. (Coles.)

• **trāns-mē-ā-tion**, s. [TRANSMEATE.] The act of transmeating or passing over or through. (Bailey.)

• **trāns-mew** (ew as ñ), * **trans-mewc**, * **trans-mewc**, v.t. & i. [Fr. *transmuer*, from Lat. *transmuto* = to transmute (q.v.).]

A. *Trans.*: To change, to transform, to transmute.

"They instead, as if *transmew'd* to stone, Marvel'd he could with such sweet art unite The lights and shades of manners."—Thomson: *Castle of Indolence*, II. 42.

B. *Intrans.*: To change.

"Therewith thy colour will *transmew*."—Romans of the Rose.

• **trāns-mī-grant**, * **trāns-mī-grant**, a. & s. [Lat. *transmigrans*, pr. par. of *transmigro* = to transmigrate (q.v.).]

A. *As adj.*: Passing into another state or country for residence, or into another form or body; migrating.

B. *As substantive*:

1. One who migrates or passes into another country for residence; an emigrant.

"Besides an unloin in sovereignty, or a conjunction in parts, there are other implicit considerations, that of solitudes or *transmigrations* towards their mother nation."—Bacon: *Holy War*.

2. One who passes into another state or body.

• **trāns-mī-grāte**, v.t. [Lat. *transmigratus*, pr. par. of *transmigro* = to migrate across or from one place to another: *trans* = across, and *migro* = to migrate (q.v.).]

1. To pass from one place, country, or jurisdiction to another for the purpose of residence; to emigrate.

"This complexion is maintained by generation; so that strangers contract it not, and the natives which *transmigro* omit it, not without commixture."—Browne: *Vulgar Errors*.

2. To pass from one body into another.

"Plutarch himself thus defends the mortality of demons, but this only as to their corporeal part, that they die to their present bodies, and *transmigro* into others, their souls in the mean time remaining immortal and incorruptible."—Cudworth: *Intell. System*, p. 424.

• **trāns-mī-grā-tion**, * **trans-mī-grā-ti-ōn**, * **trans-mī-grā-ci-ōn**, * **trans-my-grā-ci-ōn**, s. I. *Ord. Lang.*: The act of transmigrating; passing from one place or country to another for purposes of residence; emigration.

"From David to the *transmigraçion* of Babiloyne ben fourteen generacions, and from the *transmigraçion* of Babiloyne to Crist ben fourteen generacions."—Wycliffe: *Matthew*, i. 17.

II. *Compar. Relig.*: Metempsychosis; the doctrine of the passage of the soul from one body into another. It appears among many savage races in the form of the belief that ancestral souls return, imparting their own likeness to their descendants and kindred.

and Tylor (*Prim. Cult.*, ii. 17) thinks that this notion may have been extended so as to take in the idea of rebirth in bodies of animals. In this form the belief has no ethical value. Transmigration first appears as a factor in the gradual purification of the spiritual part of man, and its return to God, the source and origin of all things, in the religion of the ancient people of India, whence it passed to the Egyptians, and, according to Herodotus (ii. 123), from them to the Greeks. It was one of the characteristic doctrines of Pythagoras, and Pindar the Pythagorean (*Olymp. ii.*, ant. 4) lets the soul return to bliss after passing three unblemished lives on earth. Plato in the dream of Er (*Rep.* x) deals with the condition and treatment of departed souls; and (*Phædo*, vi. 14) extends the period of the return of souls to God to ten thousand years, during which time they inhabit the bodies of men and animals. Ennius seems to have introduced the doctrine among the Romans (*Lucretius: de Ber. Nat.*, i. 120-4). Virgil (*Æn.*, vi. 713-15), Persius (vi. 9), and Horace (*Ep.*, II. i. 52), allude to it, and Ovid (*Metam.*, xv. 153, sqq.) sets forth the philosophy and preexistences of Pythagoras. Traces of it appear in the Apocrypha (e.g. *Wisd.* viii, 20), and that at least some Jews held it in the time of Jesus seems indicated in the disciples' question (John ix. 2). St. Jerome (*Ep. ad Demetr.*) alludes to the existence of a belief in transmigration among the Gnostics, and Origen adopted this belief as the only means of explaining some Scriptural difficulties, such as the struggle of Jacob and Esau before birth (*Gen.* xv. 22) and the selection of Jeremiah (*Jer.* i. 5). In modern times Lessing held it and taught it in his essay (*Dass mehr als fünf Sinne für den Menschen sein können*); it formed part of the system of Swedenborg (*True Christian Religion*, 13) and Charles Kingsley seems to have written his *Water Babies* to put on record his belief in Transmigration. Figuer deals with the subject in his book, *Le Lendemain de la Mort*, of which there is an English edition, *The Day after Death: Our Future Life, according to Science*. (See extract.)

"One of the most notable points about the theory of *transmigration* is its close bearing upon a thought

which lies very deep in the history of philosophy, the development-theory of organic life in successive stages. An elevation from the vegetable to the lower animal life, and thence onward through the higher animals to man, to every unfolding of superfluous beings, does not here require even a succession of distinct individuals, but is brought by the theory of metempsychosis within the compass of the successive vegetable and animal lives of a single being."—Tylor: *Prim. Cult.* (ed. 1878), II. 18.

• **trāns-mī-grā-tōr**, s. [Eng. *transmigrator* (e); *-or*.] One who transmigrates.

"Whenever we find a people begin to revive in literature, it was owing to one of these causes; either to some *transmigrators* from those parts ceasing and settling among them, or else to their going thither for instruction."—Bills: *Knowledge of Divine Things*, p. 126.

• **trāns-mī-grā-tōr-ŷ**, a. [Eng. *transmigrator* (e); *-ory*.] Passing from one place, state, or body to another.

"There is a delightful *transmissibility* of blood in all his heroes."—*Century Magazine*, June, 1888, p. 290.

• **trāns-mis-si-ble**, a. [Fr.]

1. Capable of being transmitted or passed from one to another.

2. Capable of being transmitted through a body or substance.

• **trāns-mis-si-ōn** (as as sh), s. [Lat. *transmissio*, from *transmissus*, pr. par. of *transmitto* = to transmit (q.v.); Fr. *transmission*; Sp. *transmission*, *transmisión*; Ital. *transmissione*.]

1. The act of transmitting or of sending from one person or place to another; transmittal, transference; a passing on or over.

"In the experiment of *transmission* of the sea-water into the pits, the water rises; but in the experiment of *transmission* of the water through the vessels, it falleth."—Bacon: *Nat. Hist.*, § 2.

2. A passing through, as of light through glass or other transparent body.

"Their reflexion or *transmission* depends on the constitution of the air and water behind the glass, and not the striking of the rays upon the parts of the glass."—Newton: *Opticks*.

3. The act of passing down (physical characteristics or peculiarities) from a parent or parents to offspring.

"Equal *transmissions* of ornamental characters to both sexes."—Darwin: *Descent of Man* (ed. 2nd), p. 612.

• **trāns-mis-sive**, a. [Lat. *transmissus*, pr. par. of *transmitto* = to transmit (q.v.).] Transmitted; derived from one to another; sent or passed on.

"To the great house thy favour shall be shown, The father's star *transmissive* to the son."—Prior: *Carmen Seculare*.

• **trāns-mit**, v.t. [Lat. *transmitto* = to send over or across, to despatch, to transmit; *trans* = across, over, and *mitto* = to send; Fr. *transmettre*; Sp. *transmittir*, *transmitir*; Ital. *transmettere*.]

1. To cause to pass over or through; to send or despatch from one person or place to another; to hand on; to pass on; to hand or pass down: as, To *transmit* a letter through the post. Light is *transmitted* from the sun to the earth; civil and religious liberties have been *transmitted* to us by our ancestors, and we ought to *transmit* them to our children.

2. To suffer to pass through: as, Glass *transmits* light.

• **trāns-mit-tal**, s. [Eng. *transmit*; *-al*.] The act of transmitting; transmission, transfer.

"Besides the *transmitted* to England of two-thirds of the revenues of Ireland, they make our country acceptable for their superannuated pretenders to offices."—Swift.

• **trāns-mit-tance**, s. [Eng. *transmit*; *-ance*.] The act of transmitting; the state of being transmitted; transmittal.

• **trāns-mit-tēr**, s. [Eng. *transmit*; *-er*.] I. *Ord. Lang.*: One who or that which transmits.

"He lives to build, not boast, a generous race: No tooth transmittor of a foolish face."—Savage: *The Bastard*.

II. *Technically*:

1. *Teleg.*: The sending or despatching instrument, especially that, under the automatic system, in which a paper strip with perforations representing the Morse or similar alphabet is passed rapidly through, the contacts being made by metallic points wherever a perforation occurs, and prevented where the paper is unperforated.

voice and conveying the waves of sound upon the thin iron diaphragm. [TELEPHONE.]

trans-mit-ti-ble, *trans-mit-ta-ble, a. [Eng. transmit; -able.]

1. Capable of being transmitted; transmissible.

* 2. Capable of being put, thrown, or projected across.

"A transmittible gallery over any ditch or breach in a wall, with a blind and parapet, cannon-proof."—Worcester: Century of Inventions, § 73.

trans-mög-ri-fi-cä-tion, s. [Eng. transmogrify; -ation.] The act of transmogrifying; the state of being transmogrified.

"It has undergone a great transmogrification."—Gail.

trans-mög-ri-fy, *trans-mög-ra-phy, v.t. [First element trans; etymology of second element doubtful.] To transform into some other person or thing; to change; to metamorphose.

"Angustine seems to have had a small doubt whether Apuleius was really transmogrified into an ass."—Jortin: Eccles. Hist., l. 254.

*trans-möve', v.t. [Pref. trans, and move.] To transform, to change.

"Yet love is sulleto, and Saturnlike seems, As he did for Ergone it prove, That to a centaur did himself transmove."—Spenser: F. Q., III. xl. 42.

trans-mü-ta-bil-i-ty, s. [Eng. transmutable; -ity.] The quality or state of being transmutable; susceptibility of change into another nature or substance.

trans-mü-ta-ble, a. [Fr.] Capable of being transmuted or changed into another nature or substance; susceptible of change into a different nature or form.

"The Aristotelians, who believe water and air to be reciprocally transmutable, do therefore fancy an affinity between them, that I am not yet convinced of."—Boyle: Works, III. 342.

trans-mü-ta-ble-nöss, s. [Eng. transmutable; -ness.] The quality or state of being transmutable; transmutability.

"Some learned modern naturalists have conjectured at the easy transmutability of water by what happens in gardens and orchards, where the same showers or rains, after a long drought, makes a great number of differing plants to flourish."—Boyle: Works, III. 63.

*trans-mü-ta-bly, adv. [Eng. transmutable(-ly).] In a transmutable manner; with capacity of being changed into another nature or substance.

*trans-mü-tate, v.t. [Lat. transmutatus, pa. par. of transmuto = to transmute (q.v.).] To transmute, to transform.

"Her fortune her fair face first transmuted."—Mearns.

trans-mü-tä-tion, *trans-mü-ta-ci-on, s. [Fr. transmutation, from Lat. transmutatio, accns. of transmutatio, from transmutatus, pa. par. of transmuto = to transmute (q.v.).]

I. Ordinary Language:

1. The act of transmuting or changing into a different form, nature, or substance.

"The principal operations of nature are, not the absolute annihilation and new creation of what we call material substances, but the temporary extinction and reproduction of forms."—Jones: Hymn to Durga. (Arg.)

2. The state of being transmuted or changed into a different form, nature, or substance.

"Am I not old Sid's son, by birth a pedlar, by education a cardmaker, by transmutation a bear-herd?"—Shakep.: Taming of the Shrew. (Induct. 2.)

* 3. Successive change; change of one thing for another.

"The same land suffereth sundry transmutations of owners within one term."—Bacon: Office of Attention.

II. Technically:

1. Alchemy: The changing of base metals into gold or silver.

"The ether is, when the conversion is into a body newly new, and which was not before; as if silver should be turned to gold; or iron to copper; and this conversion is better called for distinction sake transmutation."—Bacon: Nat. Hist., § 836.

2. Biol.: The change of one species into another.

"The transmutation of species is, in the vulgar philosophy, impossible: and certainly it is a thing of difficulty, and requireth deep search into nature."—Bacon: Nat. Hist., § 525.

3. Geom.: The change or reduction of one figure or body into another of the same area or solidity, but of a different form, as of a triangle into a square; transformation.

transmutation-hypothesis, s.

Biol.: The most generally received form of the doctrine of Evolution; transformism (q.v.).

"The transmutation hypothesis considers that all existing species are the result of the modification of pre-existing species, and those of their predecessors, by species similar to those which at the present day produce varieties and races, and therefore in an altogether natural way; and it is a probable, though not a necessary consequence of this hypothesis, that all living beings have arisen from a single stock. The transmutation hypothesis . . . is perfectly consistent either with the conception of a special creation of the primitive germ, or with the supposition of its having arisen, as a modification of inorganic matter, by natural causes."—Huxley: Lay Sermons, pp. 273-280.

transmutation of energy, s. [TRANSFORMATION OF ENERGY.]

trans-mü-tä-tion-ist, s. [Eng. transmutation; -ist.] One who believes in the transmutation of metals or species.

trans-müte', v.t. [Lat. transmuta, from trans = across, over, and muta = to change; Sp. transmutar, transmutar, tramudar; Ital. transmutare, tramutare.]

1. To change from one form, nature, or substance into another; to transform.

"Which is our human nature's highest dower, Controls them and subdues, transmutes, bestraves Of their bad influence, and their good reserves."—Wordsworth: Character of the Happy Warrior.

* 2. To alter, to commute.

"Thee the emperor having compassed of the forenamed Barnardo, for no moole as he was the sone of Payno, last kyng of Italy, & his sere kynnesman, transmuted the sentence of death unto perpetuetye of prison, & leveage of his syght."—Polyan: Chronycle, ch. clix.

trans-müt-éd, pa. par. & a. [TRANSMUTE.]

A. As pa. par.: (See the verb).

B. As adjective:

1. Ord. Lang.: Transformed or changed into another form, nature, or substance.

2. Her.: The same as COUNTERCHANGED (q.v.).

trans-müt-ér, s. [Ebg. transmut(e); -er.] One who or that which transmutes or transforms.

*trans-mü-tü-al, a. [Pref. trans, and Eng. mütuäl (q.v.).] Reciprocal, commutual.

trans-na-tä-tion, s. [Lat. transnatio, from transnatus, pa. par. of transnato = to swim across; trans = across, and nato = to swim.] The act of swimming across.

*trans-nä-ture, v.t. [Pref. trans, and Eng. nature (q.v.).] To transfer or transform the nature of.

"For, as he sayth, we are transmeleated, or trans-natured, and changed into Christe, even so, and none otherwise, we see, The bread is transmeleated, or changed into Christes body."—Jewel: Reple to M. Har-dinge, p. 255.

*trans-nor-mal, a. [Pref. trans, and Eng. normal (q.v.).] Not normal in character. (Applied to something in excess of or beyond the normal or usual state.)

trans-ö-çë-än-ic (q.v. sh), a. [Pref. trans, and Eng. oceanic (q.v.).]

1. Being or lying beyond the ocean; being on the other side of the ocean.

"The administration of the transoceanic possessions of France."—Observer, Jan. 10, 1878.

2. Crossing or passing over the ocean.

"The final statements of the cable companies upon the reduction of the tariff for transoceanic messages."—Daily Telegraph, Sept. 11, 1885.

trän-sóm, *trän-some, *trän-somer, *trän-summer, *trän-son, s. [Prob. a corrupt. of Lat. transtrum = a transom (Skeat), from trans = across, from the form transomer is due to Fr. sommier = a piece of timber called a summer (q.v.).] [BEST-SUMMER.]

1. Arch.: A term applied to horizontal stone bars or divisions of windows. They seldom occur previous to the fifteenth century, and were sometimes embellished, as at Brasenose College, Oxford.

At Bloxham Church, Oxfordshire, the transoms of a large Perpendicular window are decorated with a row of the Tudor flower (q.v.). (Blount.)

PERPENDICULAR WINDOW WITH TRANSON.

2. Build: A horizontal piece framed across a doorway or a double-light window. The cross-bar separating a door from the fanlight above it.

"But onlie crooke posts, raisins, beames, prickeposts, groundels, sumner for dormants transoms, and such principalls."—Holinshead: Descrip. Eng., bk. II., ch. XII.

3. Ordn.: A horizontal piece connecting the cheeks of a gun-carriage.

4. Shipbuild.: A beam bolted across the sternpost, supporting the afterend of a deck and giving shape to the stern. The third, second, and first transoms are, referring to them in the rising order, below the deck transom.

STERN OF SHIP, SHOWING TRANSON. 1. Upper deck transom; 2. Helm port transom; 3. Wing port transom; 4. Transoms; 5. Rudder; 6. Stern post; 7. Side Counter timber; 8. Quarter deck; 9. Berthing; 10. Taffrail.

The wing transom is the sill of the gun-room ports; the helm transom is at the head of the stern-post, and forms the head of the ports.

"The long-boat at this time moored astern, was on a sudden canted so high, that it broke the transom of the commodore's gallery, whose cabin was on the quarter-deck."—Anon: Voyages, bk. III., ch. II.

5. Surr.: The vane of a cross-staff.

transom-knee, s. Shipbuild.: A knee bolted to a transom and after-timber.

transom-stern, s. Shipbuild.: A square stern. [TRANSOM, 3.]

transom-window, s. Building:

1. A window divided by a transom.

2. A window over the transom of a door.

*trän-s-pä-dä-ne, a. [Lat. transpadanus, from trans = across, beyond, and Padus = the Po.] Beyond or lying beyond, or on the side of the river Po. [CISPADANE.]

"The transpadane republics."—Burke.

*trän-s-pä-re, v.i. [Lat. trans = through, and pareo = to appear.]

1. To appear through.

"But through the eye of that violet diademe Yet still transparent her picture and my paine."—Stirling: Aurora, xcix.

2. To become transparent.

"Oft have I wish'd, whilst in this state I was, That the alabaster briarlike might transpire."—Stirling: Aurora, lxxiii.

*trän-s-pär-ence, s. [Eng. transparent(-); -ce.] The quality or state of being transparent; transparency.

"Amongst which clear amber jellied seemed to be, Through whose transparence you might easily see The beds of pearl whereon the gins did sleep."—Drayton: Man in the Moon.

trän-s-pär-ën-cy, s. [Eng. transparent(-); -cy.]

1. The quality or state of being transparent; that state or quality of bodies by which they allow rays of light to pass through them, so that the forms, lines, and distances of objects can be distinguished through them; diaphaneity.

"The man should hold forth a pure taper, that his wife may, by seeing the beauties and transparency of that crystal, dress her mind and her body by the light of so pure reflexions."—Bp. Taylor: Sermons, vol. I., ser. 18.

2. Anything that is transparent; specif., a picture painted on transparent or semi-transparent materials, such as glass or thin canvas, to be viewed by the natural or artificial light shining through it.

"Father Ferry and I took transparencies of the little photos he took of my station."—Corbet: Venus at the Isle of Desolation (1874), p. 104.

trän-s-pär-ent, a. [Fr., from Lat. trans = through, and parens, pr. par. of pareo = to

bell, böy; pöüt, jöw; cat, cëll, chorus, çhîn, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing. -cian, -tiau = shan. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tious, -sious = shün. -ble, -dle, &c. = bël, dël.

appear; Sp. *transparente, trasparente*; Its. *trasparente*.]

I. Literally:

1. Having the property or quality of transmitting rays of light, so that the forms, colours, and distances of objects can be distinguished through; pervious to light; diaphanous, pellucid.

¶ The power possessed by certain solids of transmitting light is a remarkable one, of which no adequate explanation has yet been given. It is an interesting fact that this property seems in a measure opposed to that of the transmission of electricity, no transparent substance being an electric conductor, while the best conductors seem to be the most opaque substances. If light is transmitted by ether only, then it would appear as if in transparent substances the vibrations of ether are not disturbed, while in opaque substances they are absorbed and destroyed.

2. Admitting the passage of light; having interstices so that things are visible through.

"And heaven did this transparent veil provide, Because the sun had no gruffly thought to hide." Dryden: *On the Monuments of a Fair Maiden*, l. 45.

* 3. Bright, shining, clear.

"The glorious sun's transparent beams." Shakespeare: *2 Henry VI.*, III. 1.

II. Fig.: Easily seen through; not sufficient to hide what underlies; evident, plain; as, a transparent motive, a transparent excuse.

transparent-colors, *s. pl.* Colors that transmit light readily. Such only are used for painting on glass, and most water-colors are more or less transparent. It is sometimes necessary to make such colors more or less opaque by the admixture of body colors. (Opposed to *opaque colors*, which only reflect light.)

trāns-pār-ent-ly, *adv.* [Eng. *transparently*.] In a transparent manner; so as to be seen through.

trāns-pār-ent-ness, *s.* [Eng. *transparentness*.] The quality or state of being transparent; transparency.

* **trāns-pass**, *v.t. & i.* [Pref. *trans-*, and Eng. *pass* (q.v.).] A. *Trans.*: To pass over.

"The river Hephysus, or, as Ptolemy calleth it, Bispas, was Alexander's non ultra; which yet he transpasseth, and set up altars on the other side." Gregory: *Notes on Scripture*, p. 75. (1684.)

B. *Intrans.*: To pass by or away.

"They form and flattered him, Which shall so soon transpass, Is far more fair than is thy looking-glass." Daniel: *A Description of Beauty*.

* **trāns-pass-a-ble**, *a.* [Eng. *transpassable*.] Capable of being transpassed or passed over.

* **trāns-pāt-ron-ize**, *v.t.* [Pref. *trans-*, and Eng. *patronize* (q.v.).] To transfer the patronage of.

"To transpatronize from him To you mine orphan muse." Warner: *Albion England*, ix. 43.

* **trān-spē-ci-āte** (*ci* as *shi*), *v.t.* [Pref. *trans-*, and Lat. *speciatus* = shaped, formed from *species* (q.v.).] To transform.

"I do not credit those transformations of reasonable creatures into beasts, or that the devil hath power to transspeciate a man into a horse." Brocme: *Religio Medici*, pt. 1, § 50.

* **trān-spīc-ō-ūs**, *a.* [Lat. *transpicio* = to see through; *trans* = through, and *specio* = to look, to see.] Transparent; pervious to the sight. (Milton: *P. L.*, viii. 140.)

* **trāns-pīerce**, *v.t.* [Pref. *trans-*, and Eng. *pierce* (q.v.).] To pierce through, to penetrate; to pass through.

"Antiochos, as Thoon turned him round, Transpierced his back with a dishonest wound." Pope: *Homere; Iliad* xiii. 691.

trāns-pīr-a-ble, *a.* [Eng. *transpire*(s); *able*.] Capable of transpiring; capable of being transpired.

trāns-pīr-ā-tion, *s.* [Fr.] [TRANSPIRE.]

1. *Ord. Lang.*: The act or process of transpiring; exhalation through the skin; evaporation.

"They conceive also, that the Individuation and sameness of men's persons, does not necessarily depend upon the numerical identity of all the parts of matter, because we never continue thus the same, our bodies always flowing like a river, and passing away by insensible transpiration." Cadworth: *Intell. System*, p. 760.

2. *Bot.*: The emission of watery fluid from the leaves of plants, a process continually going on. The vapour from the watery contents of the cells passes from them into the intercellular adjacent spaces and canals, thence into the chambers beneath the stomata, finally reaching the external atmosphere either by them or by the invisible pores of the epidermis. The vapour is in most cases invisible, but sometimes the water distils in drops large enough to be easily seen. The amount of moisture thus given off depends on the amount of moisture in the atmosphere, the temperature, any concussions to which the plant may be subjected, and the age and size of the leaves. Transpiration in plants is analogous to perspiration in animals.

"If transpiration is suddenly stopped in branches which ordinarily transpire strongly, the leaves fall, while plants which thrive in a moist atmosphere often preserve their leaves for a long time in saturated air." Field, Jan. 1, 1867.

¶ I. Pulmonary transpiration:

Physiol.: The exhalation of watery vapour from the lungs. It becomes visible in frosty weather, and condenses on the beard and mustache. It varies in amount according to the proportion of water in the blood and of aqueous vapour in the atmosphere.

2. *Transpiration of gases*: The motion of gases through a capillary tube. The velocity of transpiration is independent of the rate of diffusion. *Canoz; Physics* (ed. Atkinson), § 143, gives the following laws on the subject:

(1) For the same gas the rate of transpiration increases, other things being equal, directly as the pressure; that is, equal volumes of air of different densities require times inversely proportional to their densities.

(2) With tubes of equal diameters, the volume transpired in equal times is inversely as the length of the tube.

(3) As the temperature rises the transpiration becomes slower.

(4) The rate of transpiration is independent of the material of the tube.

3. *Transpiration of liquids*: The passage of liquids through small pores or capillary tubes.

* **trāns-pīr-a-tōr-ŷ**, *a.* [Eng. *transpiration*(ion); *-ory*.] Of or pertaining to transpiration; transpiring, exhaling.

trāns-pīr-e, *v.t.* [Fr. *transpirer*, from Lat. *transpiro* = to breathe through; *trans* = through, and *spiro* = to breathe; Sp. *transpirar*, *transpirar*; Ital. *transpirare*.] I. Literally:

1. To be emitted through the excretories of the skin; to be exhaled; to pass off in insensible perspiration.

"Blood and fleshy substance . . . useth to transpire, breathe out, and waste away thro' invisible pores." Wood's: *Letters*, bk. 1, let. 31.

2. To exhale or emit watery vapour from the surface.

"Cut branches which transpire slowly shed their leaves even when lying on the ground." Field, Jan. 1, 1867.

II. Figuratively:

1. To escape from secrecy; to become public gradually; to ooze out; to come to light; to become known.

"This letter goes to you, in that confidence, which I always shall, and know that I safely may place in you;—and you will not therefore let one word of it transpire." Lord Chesterfield: *To S. Dayrolles*, Jan. 1748.

* 2. To be emitted; to have vent; to escape.

"Pierced with a thousand wounds, I yet survive; My pangs are keen, but no complaint transpires." Cooper: *Vicissitudes in Christian Life*.

3. To occur, to take place, to happen, to come to pass.

"What had transpired during his absence he did not know." Mrs. Beecher Stowe: *Ired*, ch. xii.

* **trāns-plāce**, *v.t.* [Pref. *trans-*, and Eng. *place*, v. (q.v.).] To put or remove into a new place.

"It was transplac'd from the left side of the Vatican unto a more eminent place." Wilkins: *Math. Magick*, ch. 2.

trāns-plānt, *v.t.* [Fr. *transplanter*, from Lat. *transplanto*, from *trans* = across (hence, implying change), and *planto* = to plant; Sp. *transplantar*; Port. *transplantar*; Ital. *transplantare*.] I. *Ordinary Language*:

1. To remove and plant in another place.

"Lines thirty years old were transplanted from neighbouring woods to shade the alleys." Macaulay: *Hist. Eng.*, ch. xl.

2. To remove from one place to another.

"Of light the greater part he took Transplanted from her cloudy shrub, and plac'd In the sun's orb." Milton: *P. L.*, vi. 360.

3. To remove and settle or establish for residence in another place.

"If any transplants themselves into plantations abroad, who are schismatics or outlaws, such are not fit to lay the foundation of a new colony." Bacon: *Advice to Villagers*.

II. *Med.*: To transfer from one part or person to another. [TRANSPANTATION, II. 2.]

"The doc continued [licking] so long till he . . . perfectly cured the sore, but had the swelling transplanted to himself." Boyle: *Works*, II. 167.

trāns-plān-tā-tion, *s.* [Fr.] [TRANSPANTANT.]

I. *Ordinary Language*:

1. The act of transplanting or of removing and planting in another place.

¶ The time to transplant shrubs, trees, &c., is when their energies are in abeyance at the fall of the year. November is a good month for the transplantation of seedling stocks and suckers taken from the roots of the pear, plum, quince, &c., to prepare them for receiving grafts, and stocks of briars to be budded with garden species and varieties. To render the removal of a tree or bush successful, care must be taken not to destroy or injure the spongioles, these tender portions of the root being the channels through which nutriment is taken from the ground. In placing the root in the ground, the trench or pit intended to receive it must be of sufficient breadth at the bottom to allow it and the branching rootlets to occupy their natural position. Water should be freely supplied, but not to such an extent as to saturate the soil.

* 2. A removal or transfer from one place to another.

"His transplantation into the Greek tongue." More: *Philos. Cabbala*: *Ap.*

3. The removal or transfer of persons from one place to another for purposes of residence, settlement, or the like.

 1. The act of transporting, conveying, or carrying from one place to another; transport; carriage; conveyance.
 "If the countries are near, the difference will be smaller, and may sometimes be scarce perceptible; because in this case the transportation will be easy."—*Smith; Wealth of Nations*, bk. I., ch. XI.

2. Transmission; and transference from one to another.
 "Some were not so solicitous to provide against the plague, as to know whether we had it from the malignity of our own air, or by transportation."—*Dryden. (Toda).*

3. The banishing or sending away of a person convicted of crime out of the country to a penal settlement, there to remain for life or for the term to which he has been sentenced. Transportation grew out of banishment. During mediæval times a person who had committed an offence was in certain circumstances permitted to "abjure the realm" (ASSURATION, I. 1.), the country to which he was to go not being indicated. The first statute which established transportation to English colonies was apparently the Act 39 Eliz., cap. 4. By 18 Chas. II., cap. 3, passed in 1666, the king obtained permission to sentence criminals to be "transported to any of His Majesty's dominions in North America," where they were given over to the settlers as virtual slaves. When negro slavery was introduced, white criminals became much less welcome, and complaints against their being sent arose; but the practice continued till the commencement of the War of Independence in 1775. Then Australia was utilised, and by two Orders of Council, dated December 6, 1786, Botany Bay, on its eastern shores, and the adjacent islands, was selected, to which the first batch of convicts, 800 in number, was sent out in May, 1786. Next year the penal settlement was established, and became the nucleus of the town of Sydney and the colony of New South Wales. Afterwards Van Diemen's Land, Norfolk Island, the Cape of Good Hope, Bermuda, &c., became receptacles for convicts. No such system has ever been adopted in the United States, and transportation no longer exists in England, it having been given up as a result of the protests of the inhabitants of the colonies. It still exists in some European countries, as France and Russia, in the latter to a large extent, Siberia being the penal territory.

4. The state of being transported, carried, or conveyed from one place to another.

5. The state of being transported or sent into exile, under a sentence of transportation.

6. Transport; ecstasy.
 "All pleasures that affect the body must needs weary, because they transport, and all transportation is a violence."—*South; Sermons.*

trans-pōs'-ér, s. [Eng. *transpose*(e); -*er*.] One who transposes; specif., one who transposes music from one key to another.

trans-pōs'-ing, pr. par. & a. [TRANPOSE, v.]
 A. *As pr. par.*: (See the verb).
 B. *As adj.*: Having the quality of changing or transposing; specif. applied to musical instruments which do not play the actual notes written down, but others, according to the modifications in the instrument itself.

trans-pō-si'-tion, s. [Fr., from Lat. *transpositionem*, accus. of *transpositio*, from *transpositus*, pa. par. of *transpono* = to change in place, to transpose, to transfer; *trans* = across (hence, implying change), and *pono* = to place; Sp. *transposicion*, *trasposicion*; Ital. *trasposizione*.]
 I. *Ordinary Language*:
 1. The act of transposing; the act of changing the places of things, putting each in the place previously occupied by the other.
 "At last, they formed a double circle, as at the beginning, danced, and repeated very quickly, and finally closed with several very dexterous transpositions of the two circles."—*Cook; Third Voyage*, bk. II., ch. v.
 2. The state of being transposed or reciprocally changed in place.
 II. *Technically*:
 1. *Alg.*: The act or operation of bringing over any term of an equation from the one side to the other. This is done by changing the sign of the term so transposed. The object of transposition is to bring all the known terms of an equation to one side, and all the unknown to the other, in order to determine the value of the unknown terms with respect to those that are known. Thus if $2x + 4 = x + 7$ = by transposition of x , $2x - x + 4 = 7$, whence $x + 4 = 7$; by transposition of 4, $x = 7 - 4$, whence $x = 3$. The transposition of terms is the first operation to be performed in the solution of a simple equation.

[Low Lat. *transubstantiatus*, pa. par. of *transubstantio* = to change the substance of: *trans* = across (hence, implying change), and *stantia* = substance (q.v.); Fr. *transubstantier*; Sp. *transubstanciar*, *transubstanciar*; Ital. *transustanziare*, *transustanziare*.] To change into another substance. [TRANSUBSTANTIATION.]

trān-sūb-stān-ti-ā-tion (tī as shī), s. [Fr., from Low Lat. *transubstantiatio*, accus. of *transubstantiatio*, from *transubstantiatus*, pa. par. of *transubstantio* = to transubstantiate (q.v.); Sp. *transustanciacion*, *transustanciacion*; Ital. *transustanziazione*.]

* *1. Ord. Lang.*: Change.

"The smell of autumn woods, the colour of dying fern, may turn by a subtle *transubstantiation* into pleasure and faces that will never come again."—*Milford: New Republic*, bk. III, ch. II.

2. *Church Hist.*: The Roman doctrine of the Eucharist. The Council of Trent (sess. xiii., c. iv.) declares "that by the consecration of the bread and wine the whole substance of the bread is changed into the substance of the body of Christ and the whole substance of

the wine into the substance of his blood, which change is properly and fitly called Transubstantiation by the Holy Catholic Church." That is to say, the accidents of the bread and wine which are perceived by the senses conceal the body and blood of Christ, and not the substances of bread and wine. In canon 4 (*de sac. Euchar. Sacram.*) the Council defines "that under each species" (i.e., of bread and wine), "and under each particle of each species, Christ is contained whole and entire." Roman theologians found their proof of this doctrine on the discourse of Jesus after the miracle of the loaves and fishes (John vi. 32-71), on the words of institution (Matt. xxvi. 26-29, Mark xiv. 22-25, Luke xxii. 19, 20), and on the words of St. Paul (1 Cor. x. 16-21), and on patristic testimony, claiming that the doctrine is apostolic, though the word itself only came into use in the eleventh century, in the controversy between Berengarius and Lanfranc, in which the former denied and the latter asserted a change of substance in the Eucharistic elements. Transubstantiation implies a Real Presence, though belief in the Real Presence (of Christ in the Eucharist) does not necessarily involve a belief in Transubstantiation. The Lutheran view of the Eucharist is called Companation, or Consubstantiation, and admits a Real Presence without a change of substance. The Calvinistic view is that the presence of Christ depends on the faith of the recipient. Article xxviii. of the Anglican Church is apparently Calvinistic, and condemns Transubstantiation as "repugnant to the plain words of Scripture;" but the belief and practice of a large number of her clergy and laity is, to say the least, much the same as the Lutheran. [TRACTARIANISM.] Dr. Pusey (*Eirenicon*, p. 229) goes so far as to say that the dispute between Anglicans and Romanists in this matter is "probably a dispute about words."

* **trān-sūb-stān-ti-ā-tōr** (tī as shī), s. [Eng. *transubstantiate*; -or.] One who believes in or maintains the doctrine of transubstantiation (q.v.).

"The Roman *transubstantiators* affirm that the body of our Lord is here upon earth at once present in many places (namely, in every place, where the Host is kept, or the Eucharist is celebrated)."—*Barrow: Sermons*, vol. II, sec. 31.

trān-su-dā-tion, s. [Fr., from Lat. *transudatus*, pa. par. of *transudo*, from *trans* = across, through, and *sudo* = to sweat.] The act or process of transuding; the process of oozing through membranes, or of passing off through the pores of a substance, as water or other fluid.

"The drops proceeded not from the *transudation* of the humors within the glass."—*Boyle*.

* **trān-sū-dā-tōr-y**, a. [Eng. *transud(e)*; -atory.] Passing by transudation.

trān-sūde, v.i. [Fr. *transuder*, from Lat. *transudo*; Ital. *transudare*.] [TRANSUDATION.] To pass or ooze through the pores or interstices of a membrane or other porous substance, as water or other fluid.

"The water which has *transuded* from the *lenses*."—*Sheldon: Datory Farming*, p. vii.

* **trān-sūme**, v.t. [Lat. *transumo*, from *trans* = across, and *sumo* = to take.] To take from one to the other; to convert.

"With a well-blessed bread and wine *Transum'd*, and taught to turn divine."—*Crashaw: Hymn for the Sacrament*.

trān-sūmpt (p silent), s. [O. Fr., from Low Lat. *transumptum* = a copy, a transcript, from Lat. *transumptus*, pa. par. of *transumo* = to take from one to another, in Low Lat. to transcribe.] [TRANSMUME.] A copy of a writing; an exemplification of a record.

"Wherewith, the pretended original breve was produced, and a *transumpt* or copy thereof (signed by three bishops) offered them, to send to England."—*State Trials: Henry VIII.* (an. 1528); *Dis. of Q. Catherine*.

¶ *Action of transumpt*: *Scots Law*: An action competent to anyone having a partial interest in a writing, or immediate use for it, directed against the custodian of the writing, calling upon him to exhibit it, that a copy or *transumpt* of it may be made and delivered to the pursuer.

transverse-tension, s.

Bot.: Tension exerted by the bark on the wood, and *vice versa*, in the stem of a tree, when, after its growth in length has ceased, a permanent increase takes place in its thickness.

trans-verse' (1), v.t. & t. [TRANSVERSE, 6.]

A. Trans.: To overturn, to change, to thwart.

"Nothing can be believed to be religion by any people but what they think to be divine; that is, sent immediately from God: and they can think nothing to be so, that is in the power of man to alter or transverse."—*Locke*.

B. Intrans.: To transgress.

"Ac treuhte that transposede never, as transversed agens the lawe."—*Piers Plowman*, p. 241.

trans-verse' (2), v.t. [Pref. trans., and Eng. verse (q.v.)] To turn from prose into verse.

"I take a book in my hand, either at home or elsewhere, for that's all one; if they be any wit in't, as there is no book but has some, I transverse it; that is, if it be prose put it into verse but that takes up some time, and if it be verse put it into prose.—*Metaphors*, Mr. Bayes, that putting verse into prose should be called transposing.—By my troth, sir, tis a very good notion, and hereafter it shall be so."—*Duke of Buckingham: The Rehearsal*, l. 1.

trans-verse'-ly, adv. [Eng. transverse, a.; -ly.] In a transverse or cross direction; across.

"Transversely fixing one end to the first thread that was spun."—*Goldsmith: The Bee*, No. 17.

trans-view' (lew as ū), v.t. [Pref. trans., and Eng. view, v. (q.v.)] To see or look through.

"Transview the obscure things that do remain."—*Davies: Mirum in Modum*, p. 9.

trans-vō-lā'-tion, s. [Lat. trans = across, beyond, and volatim, super. of volo = to fly.] The act of flying over or beyond.

"Such things as these which are extraordinary agressions and transvolations beyond the ordinary course of an even pley, God loves to reward with an extraordinary favor; and gives them testimony by an extraordinary blessing."—*Bp. Taylor: Sermons*, vol. II, ser. 4.

trans-voive' v.t. [Lat. trans = across, over, and volvo = to roll.] To overturn, to break up.

"He who transvolves empires."—*Hosell: Parly of Beasts*, p. 110.

tránt, v.t. [Dut. tranden = to walk slowly.] To carry about with wares for sale; to hawk.

tránt-ër, s. [Eng. trant; -er.] One who carries about wares for sale; a hawker, a pedlar.

tráp (1), s. *trappe, s. [A.S. treppe = a trap; cogn. with O. Dut. trappe; O. H. Ger. trapo = a snare, a trap; Low Lat. trappa; Fr. trappe; Sp. trampa. From the same root as tramp (q.v.); cf. Dut. trappen = to tread; trap = a stall, step; Ger. trappe = a flight of stairs; Sw. trappa = a stair.]

1. An instrument or device for ensnaring game or other animals; a snare; a contrivance that shuts suddenly, and often with a spring, for taking game and other animals.

"She wolde wepe if that she saw a mous Caughte in a trappes, if it were dead or blidde."—*Chaucer: C. T., ProL* 142.

2. Any contrivance for catching wild animals. "Thes spake agayne with fell and spitefull heart, [So lions roar] outdoode to trauise or trap!"—*Petrarch: Godfrey of Boulogne*, II. 29.

¶ Darwin (*Descent of Man*, pt. I., ch. III.) remarks that animals "learn caution by seeing their brethren caught or poisoned."

3. An ambush, a stratagem; a device or contrivance to catch one unawares.

"God and your majesty Protect mine innocencie, or I fall into The trap is laid for me."—*Shakesp.: Henry VIII.*, v. 1.

4. A contrivance applied to drains and soil-pipes to prevent the escape of effluvia; a drain-trap.

5. A sheriff's officer; a police-constable. (*Slang*.)

"Mentime the Kellys had got to hear that the trap was in search of them."—*Lecture Hour*, March, 1884, p. 162.

¶ 6. Sagacity, acuteness, cunning, sharpness, penetration.

"Some cunning person that had found out his foible and ignorance of trap, first put him in great fright."—*North: Kæmnen*, p. 549.

7. A familiar name for a carriage on springs, of any kind. (See extract.)

"The old-fashioned gig had, under the seat, a sort of boot extending a few inches beyond the back of the seat. At the beginning of the century gigs were raised upon higher wheels than at present. On this raised vehicle the boot was lengthened behind, holding a brace of dogs for sporting purposes. In these 'dog-carts' (thus named afterwards the dogs were at first placed in the boot at the front, and I dare say that the 'noble sportsman' may occasionally have had their heels or their calves bitten by dogs with short teeth and with scant liking for the confinement of the boot. This led to a great improvement, in the shape of an open latticed box, which was attached to the back of the body of the carriage, and provided with a trap-door behind for the admission of the dogs. In process of time the latticed box was found very convenient for the carriage of other things besides dogs, and as everything conveyed to the cart (chattels, not people) had to be put in through the trap-door (soon curtailed into trap: compare 'bus' for omnibus, 'cab' for cabriolet) the conveyance itself was eventually termed 'trap.'—*Illustrated London News*, Oct. 11, 1884, p. 339.

8. A game, and also one of the instruments used in playing the game, the others being a small bat and a ball. The trap is of wood, made like a slipper, with a hollow at the heel end, and a kind of wooden spoon working on a pivot, in which the ball is placed. By striking the handle or end of the spoon the ball is projected up into the air, and the striker endeavours to hit it as far as possible with the bat before it falls to the ground. The opponents endeavour to catch the ball, or to bowl it so as to hit the trap. Also called Trap-bat and Trap-bat and ball.

9. A device worked by trigger end spring for throwing pigeons, glass-balls, &c., into the air at shooting matches.

¶ Up to trap, To understand trap: To be very knowing or wide-awake. (*Slang*.)

trap-ball, s. The same as TRAP (1), s. 8.

trap-bat, s. A bat used in the game of trap (q.v.).

trap-cut, s. A mode of cutting gems, in which the facets consist of parallel planes, nearly rectangular, arranged round the centre of the stone.

trap-door, s. A door in a floor or roof, which when shut is flush or nearly so.

"In some houses there were trap-doors through which, in case of danger, he might descend."—*Maccaldy: Hist. Eng.*, ch. v.

Trap-door spider:
Zool.: A popular name for any species of Mygalidæ (= Ferritellariæ, Latr.) which constructs a tubular nest in the earth, closed by a more or less perfect door or doors. Mogridge (*Harvesting Ants & Trap-door Spiders*, p. 143) enumerates nearly forty species from Europe and the borders of the Mediterranean. The United States possesses numerous species. He divides the nests into six separate types, according to the kind of door present, the straightness or divarication of the tube, and the presence or absence of a second door in the tube below the surface of the earth. *Atypus subseris*, nearly half an inch long, is found in the south of England, and excavates a more or less cylindrical gallery, about half an inch wide, in moist ground, at first in a

horizontal and then in a vertical direction. This gallery is lined with a tube of silk, but, instead of closing the aperture with a trap-door, the spider continues the lining tube beyond the mouth of the gallery for some distance on the surface of the ground. *Cteniza fodiens*, common in the south of Europe, closes the entrance to its nest (see illustration) with a trap-door composed of earthy particles firmly held together by layers of silk. Other

TRAP-DOOR SPIDER.

species make more elaborate dwellings, either by constructing a second door in the vertical tube, or a second tube branching off from the first and shutting off communication by a second trap-door. When inside their dwelling, these spiders resist the opening of the trap-door by clinging to the lining of the tube and to the inner coat of silk composing the trap-door.

trap-hole, s. [TROUS-DE-LOUP.]

trap-net, s. A fishing-net in which a funnel-shaped piece leads the fish into a pound from which it is difficult to return.

trap-shooting, s. The sport of shooting at pigeons, balls, &c., projected from a trap. [*TRAP, s.*, 9.]

trap-stairs, s. Stairs with trap-door at top.

trap-stick, s. A stick used in the game of trap; something resembling such a stick; something long and slender.

trap-treo, s. An unidentified species of *Artocarpus*, which furnishes a glutinous gum used as birdlime at Singapore. (*Treas. of Bot.*) The species of this genus known to furnish a kind of birdlime are *A. integrifolia* [JACK (9)], and *A. hirsuta*.

trap-valve, s. A check-valve (q.v.).

tráp (2), s. [Sw. trappa = a stair; trapp = trap-rook; Dan. trappe = a stair; trapp = trap; Dut. trap = a stair, a step; Ger. trappe = a flight of stairs.]

1. *Ord. Lang.:* A kind of movable ladder or steps; a kind of ladder leading up to a loft.

2. *Petrol.:* A name originally given to certain igneous rocks, of great geological age, occurring in Sweden, which, partly from weathering and partly as the result of successive extrusions, presented a stair-like aspect. Subsequently this name was loosely applied to any ancient, fine-grained, igneous rock which had undergone a certain amount of alteration. Most of the so-called "traps" have since been identified as varieties of dolerite or basalt.

¶ Trap, in this general sense, is widely diffused, and, where it occurs, it exerts much influence in determining the surface configuration of the region. When it decays it produces rich agricultural soil, so that a trap district is generally remarkable for its fertility.

***trap-conglomerate, s. [TUFACEOUS CONGLOMERATE.]**

trap-granulite, s.

Petrol.: A dark variety of granulite (q.v.), occurring interlamined with the normal granulites. It sometimes contains augite and hornblende.

trap-tuff, trap-tufa, s.

Geol.: Volcanic-ash, volcanic-tuff (q.v.).

***tráp (3), s. [TRAPS.]**

*tráp (4), s. [O. Fr. trap (Fr. drap) = cloth; Sp. & Port. trapo = a cloth, clout, rag; Low Lat. trapus = a cloth.] Trappings; ornaments of a horse.

tráp (1), *trappe (1), v.t. & i. [TRAP (1), a.]

A. Transitive:

1. Lit.: To catch in or with a trap; to snare.

"The beaver was trapped for its fur in the twelfth century in the river Tevri."—Dawkins: Early Man in Britain, ch. xiv.

2. Fig.: To take or catch by stratagem; to insnare.

3. Baseball: To secure a fly ball at the moment it touches the ground; an unlawful stratagem to effect a double play.

B. Intrans:

To take game or other animals in traps.

"Trapping has been there so long carried on, that inheritance may possibly have come into play."—Darwin: Descent of Man, pt. 1, ch. lii.

tráp (2), *trappe (2), v.t. & i. [TRAP (4), s.]

To adorn; to dress or deck out with ornaments. (Generally in the pa. par.)

"Four great horses fully trapped and covered doe lead the way."—Buckinge: Voyages, II, 62.

tráp-a, s. [An abbreviation of Low Lat. calceitrapa = a caltrap (q.v.). Named from the apines on the fruit.]

Bot.: Water Caltraps, the sole genus of Trapeza (q.v.). Floating plants, with the petioles tumid in the middle, and clustered leaves, those under water cut into capillary segments. Calyx superior, four-parted; petals four; stamens four; ovary two-celled, each cell with one pendulous ovule. Fruit hard, indelhiscent, one-celled, one-seeded; aced large, without albumen; the cotyledons very unequal; the kernel of the fruit largely consists of pure starch. Known species, four. They are found in temperate Europe, Siberia, India, Cochín China, &c. Trapa natans has four spines on its fruit, and is large and black. It is the Tribulus of the Romans, and the nuts are sold in the markets of Venice (where they are known as Jesuit's nuts) and other parts of Italy and in France. They are made into bread. T. bispinosa has only two spines or horns on its fruit. It is found in tanks and pools throughout India. Its nuts are dark-brown and triangular. Their kernel is white and sweetish, and is eaten, both raw and cooked, and made into cakes, by the Hindoos. Many of these plants grow on the Wular Lake, a large sheet of water, about forty miles in circumference, on the Upper Jhelum, in Cashmere, the old traveller, Moorcroft, declaring that the nuts from the lake furnish almost the sole support of 30,000 people for five months of the year. Moorcroft and Dr. Royle say that, under the government of Rungeet Singh, £12,000 of revenue was raised from the traps, amounting to from 96,000 to 128,000 ass-loads, taken from the lake. The natives consider the nuts as useful in bilious affections and diarrhoea, besides applying them externally as poultices. The plant is called by the natives Singhara = horned, referring to the fruit. Another less-known East-Indian species is T. quadrispinosa, introduced into Britain as a stove-plant in 1823. T. bicornis, called by the Chinese Ling, or Linko, has the two horns recurved and very obtuse. It is cultivated by them in lakes, ponds, &c.

tráp-á, s. [TRAPEZIUM]

tráp-pé-zí-í-form, a. [Lat. trapezi(um) = a trapezium, and forma = form.]

Having the form of a trapezium. (Applied in Botany to the leaves of Populus nigra, &c.)

tráp-pé-zí-hé-drón, s. [TRAPEZOHEDRON.]

Crystallog.: Having the lateral planes composed of trapeziums situated in two ranges between two bases.

tráp-pé-zí-ím, s. [Lat., from Gr. τραπέζιον (trapezion) = a small table or counter; a trapezium, because four-sided, like such a table; dimin. of τραπεζός (trapezós) = a table; Sp. trapezio; Ital. trapezio; Fr. trapèze.]

TRAPEZIUMS.

a. Two sides equal, but none parallel; b. Four sides neither equal nor parallel; c. Two short sides equal in length, and two long sides equal, but none parallel; d. Two sides equal, but none parallel.

1. Geom.: A quadrilateral figure, no two of whose sides are parallel to each other.

2. Anatomy:

(1) The outermost bone of the second row in the carpus. In its inferior or palmar aspect it presents a rhombic form, with its most prominent angle directed downwards. It articulates with four other bones, the scaphoid, the trapezoid, and the first and second metacarpals.

(2) A set of transverse fibres opposite the lower portion of the pons varolii. The name trapezium is given because, in most of the lower vertebrates, they appear on the surface in a four-sided form.

3. Zool.: A synonym of Cypricardia (q.v.).

tráp-pé-zí-ús, s. [TRAPEZIUM.]

Anat.: A trapeziform muscle reaching from the base of the skull to the middle of the back, and connected with the clavicle and scapula on each side. It is by means of this muscle that the scapula is moved.

tráp-pé-zó-hé-dral, a. [TRAPEZOHEDRON.]

Crystallog.: Pertaining to or having the form of a trapezohedron.

tráp-pé-zó-hé-drón, s. [Gr. τραπέζιον (trapezion) = a little table, a trapezium, and drón (hedra) = a base.]

Crystallog.: A solid bounded by twenty-four equal and similar trapezoidal planes.

tráp-é-zóid, a. & s. [Gr. τραπέζιον (trapezion) = a little table, a trapezium, and eidos (eidos) = form, appearance.]

A. As adj.: Trapeziform (q.v.).

B. As subst.: A quadrilateral, two of whose sides only are parallel to each other.

trapezoid-bone, s.

Anat.: A bone of the wrist, of which the

superior surface articulates with the scaphoid bone, the external with the trapezium, the internal with the os magnum, and the inferior, with the second metacarpal bone. It is smaller than the trapezium, has its largest diameter from before backwards, and its posterior surface, which is much larger than the anterior one, pentagonal. (Quain.)

tráp-é-zóid-al, a. [Eng. trapezoid; -al.]

1. Ord. Lang.: Having the form of a trapezoid.

2. Min.: Having the surface composed of twenty-four trapeziums, all equal and similar.

trapezoidal-wall, s. A retaining wall, vertical against the bank, and with a sloping face.

tráp-pé-an, a. [Eng. trap (2), e.; -an.]

Pertaining to or of the nature of trap or rock.

Tráp-píst, s. & a. [Fr. Trappiste (see def. A.).]

A. As substantive:

Church Hist. (PL.): A branch of the Cistercian order, following the reformed rule of La Trappe, an ancient monastery in the heart of La Perche, not far from Sées, in France, founded as a Cistercian house in 1140 by Rotron, Count of Perche. The reform was due to Arnaud Jean le Bouthillier de Ranocé (1626-1700), who had held the abbey, with other preferments, in commendam for many years before his ordination (A.D. 1651), by his uncle, the Archbishop of Tours, whose coadjutor he hoped one day to become. For some years after he became a priest, de Ranocé led a worldly life in Paris; but his heart being touched by a series of disappointments, he sold his patrimony, distributed the money to the poor, and, giving up all other business, retired to La Trappe. Here he found the discipline greatly relaxed, but by bringing some monks from a neighbouring monastery he reestablished the rule and restored regularity. Still his ideal was not attained; he sought to add to the purely contemplative life bodily mortification and separation from canons of sickness, was forbidden, and manual labour was strictly enjoined. The monks rose at two o'clock, and went to rest at seven in winter

and eight in summer. From two till half-past four they spent in prayer and meditation, and then retired to their cells till half-past five, when they said Prime. At seven they went to labour, either out or indoors; at half-past nine Tierce was said, followed by the Mass, Sext, and None; then they dined on vegetables; at one o'clock returned to work for another two hours, and then retired to their cells till Vespers at four o'clock; this was followed by a collation of bread and fruit, and spiritual reading till six o'clock, when Compline was said; at seven they went to rest and slept on pallets of atraw. Absolute silence was enjoined at all times, and they had to make their wants known by signs. In 1790, when other monasteries were suppressed in France, the Trappists took refuge in the monastery of Val Sainte, in Freiburg, under Dom Augustin (de Lestrangé); but this was destroyed by the French in 1798, and the monks wandered about till the Bourbon restoration, when they recovered La Trappe. (See extract under B.)

B. Of or belonging to the Trappists [A.]; following the reform of La Trappe.

"From this centre Trappist filiations spread the austere rule of the order into Spain, Belgium, Piedmont, England, and Ireland. Mount St. Bernard, in Leicestershire, and the Trappistine convent of Stepehill, in Dorset, are their houses in this country; in Ireland they have flourishing monasteries at Mount Mellary and Roscrea."—Addis & Arnold: Cath. Dict., p. 804.

trāv-ēs-tý, pr. of s. travestír = to disguise one's self; *tr-* (Lat. *trans*) = across (hence

implying change), and *vestír* (Lat. *vestis*) = to clothe.]

* **A. As adj.**: Having an unusual dress; disguised in dress, so as to be ridiculous; travestied.

B. As substantive:

1. A literary term used to denote a burlesque treatment of a subject which has been originally handled in a lofty or serious style. It differs from a parody in that in travesty the characters and the subject-matter remain substantially the same, while the language becomes grotesque, frivolous, and absurd, whereas in a parody the subject-matter and characters are changed, and the language and style of the original humorously imitated.

"Accusing him in very high and solemn terms of profaneness and immorality on a mere report from Edm. Curll, that he was author of a travesty on the Great psalm."—*Foxe*: *Duneland*, bk. II., Rem. on v. 28.

2. An unintentional burlesque; a misrepresentation so gross as to be ridiculous.

trāv-ēs-tý, v.t. [TRAVESTY, a.] To make a travesty on; to treat so as to render ridiculous, as something that has originally been handled in a lofty and serious style; to burlesque; to parody.

"It need not be said that it went immeasurably beyond the facts, which it absolutely distorted and travestied."—*Daily Telegraph*, Nov. 9, 1885.

trāv-ís, *trav-éis, s. [TRAVE.]

1. The same as TRAVE (1).

2. The same as TRAVE (2).

trawl-roller, s. A roller having a number of grooves cut in its periphery, and attached to the side of the wherry or dory, and over which the trawls are drawn into the boat.

trawl-warp, s. A rope passing through a block and used in dragging a trawl-net.

trāwl-ēr, s. [Eng. *trawler*, v.; -er.]

1. One who trawls; one who fishes with a trawl-net.

2. A fishing vessel which uses a trawl-net.

"The trawlers on a few occasions have delivered from sixty to a hundred dozen hake."—*Field*, April 4, 1885.

* **trawler-man, s.** A fisherman who used unlawful arts or engines to catch fish. (*Cowell.*)

trāwl-ing, s. [TRAWL, v.] The act or process of fishing with a trawl-net. It is the mode usually adopted for deep-sea fishing, the fish generally caught being cod, hake, whiting, and soles. Trawling is only adapted for a smooth bottom, as a rough bottom would destroy the net. The term is also applied in Scotland, to a mode of catching herrings with a seine-net.

¶ In the bank-fisheries off the coast of New England the French trawl system is usually employed, viz.: by the use of a long line extended along the bottom of the ocean, secured at each end by small anchors, which are buoyed by means of buoy lines leading to floating kegs, each with a short staff and flag. Hooks are attached to the trawl line five feet apart. These trawls are from 500 to 1500 feet long, and are left set from 12 to 24 hours.

bēil, bōy; pōut, jōwī; cat, cēll, chorus, çhin, bench; go, gem; thin, ðis; sin, aš; expect, Xenophon, exist. -ing. -cian, -tian = shān. -tion, -sion = shūn; -ñion, -ñion = zhūn. -cious, -tious, -sious = shūs. -ble, -die, &c. = bēl, dēl.

Trawling with gill nets is also practiced to some extent, the location of the nets being similarly indicated by floats bearing flags. In Britain there is strong objection made to trawling inshore, or in estuaries or land-locked bays, as destroying the spawn of food-fishes.

trāy (1), *trēy, *treie, *treye, s. [A.S. *træg* = a tray; cogn. with *trōh* = a trough.]

1. A small shallow trough or wooden vessel, sometimes scooped out of a piece of timber and made hollow; used for various domestic purposes, as kneading, mincing, &c.; a trough generally.

"A gardener, of peculiar taste, On a young hog his favour plac'd, Who led not with the common herd; His tray was to the hall preferred."

Gay: *Fable 3.*

2. A flat receptacle for handing glasses, dishes, and what not. Known by names indicating material or purposes, as papier-maché, tin, silver, tea, bread. Also known as a waiter, or salver.

raising water a rope is wound directly around the axle, and has a bucket at each end; these

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, eūre, unīte, cūr, rāle, fūll; trý, Sýrian. s, o = ē; ey = ā; qu = kw.

are alternately raised and lowered by reversing the movement of the wheel. A form of tread-wheel in which a donkey walks inside of a large wheel is used in pumping from the deep well of Carishrook Castle; turn-spit dogs were formerly used in turning the spit upon which meat was roasted; and dogs are employed in some dairies to turn the barrel-churns or agitate the vertical dashers of plunger-churns. Like the modern treadmill, the tread-wheel was formerly used as a means of punishment and prison discipline.

"At one of the provincial prisons, at which a similar use of the tread-wheel was made, the authorities recently declared that they could buy four cheaper than they could grind it."—Daily News, Feb. 2, 1887.

tread-er, s. [Eng. tread, v.; -er.] One who treads.

"The treading shall tread out no wine in their presses."—Isaiah xvi. 10.

tread-le (le as el), *tréd-dle, *tred-y, s. [A.S. tredel.] [TREAD.]

1. A foot-lever connected by a rod to a crank to give motion to a lathe, sewing-machine, circular saw, or other small mechanism. A treadle is distinct from a pedal, whose use is in musical instruments to raise a damper, open a valve, work a bellows, or what not, and is not designed to produce a rotary motion.

"While with her foot on the treadle she guided the wheel."—Longfellow: Miles Stanish, iii.

2. The albumina cords which unite the yolk of the egg to the white; so called, because formerly believed to be the sperm of the cock.

tread-mill, s. [Eng. tread, and mill.] A wheel driven by the weight of persons treading upon the steps of the periphery. It is usually employed in prisons, where it forms part of the "hard labour" of persons convicted. The usual form is a wheel sixteen feet long and five in diameter, several such wheels being coupled together when necessary for the accommodation of the prisoners. The circumference of each has twenty-four equidistant steps. Each prisoner works in a

TREADMILL.

separate compartment, and has the benefit of a hand-rail. The wheel makes two revolutions per minute, which is equivalent to a vertical ascent of thirty-two feet. The power may be utilized in grinding grain or turning machinery. The treadmill is a feature of English prison discipline, and sometimes is not revolved to any useful effect, a brake being simply attached to the axle, forming a seat for the warder, who regulates the work or speed by moving toward or from the outer end of the lever. Its use, as part of the machinery of "hard labour" in prisons, is now greatly restricted, as the weak and the strong are by it compelled to equal exertion.

tréague, s. [Sp., Port., & Ital. tregua; Low Lat. tregua, from O. H. Ger. triuwa; Goth. trigga.] [TRUCE, TRUCE.] A truce.

"She them besought, during their quiet tregua, Into her lodgings to repair a while."—Spenser: F. Q., II. ii. 23.

tréas-ón, *trais-on, *trays-on, *treis-on, *treis-un, *tres-on, *tres-oun, s. [O. Fr. traison (Fr. trahison), from Lat. traditio = a handing over, surrender, from trado = to hand over; O. Fr. trair (Fr. trahir) = to betray.] [TRADITION, TRAITOR.] A betraying, treachery, or breach of faith, especially by a subject against his sovereign, liege lord, or chief authority of a state. There were a number of different species of treason against the sovereign, according to English Statute law dating from the time of Edward III.

1. Compassing or imagining the death of the king, of his queen, or of the eldest son and heir.

2. The second species of treason is, "if a man do violate the king's companion, or the king's eldest daughter unmarried, or the wife of the king's eldest son and heir." By the king's companion is meant his wife; and by violation is understood carnal knowledge, as well without force as with it; and this is high treason in both parties, if both be consenting. The plain intention of this law is to guard the blood royal from any suspicion of bastardy, whereby the succession to the crown might be rendered dubious.

3. The third species of treason is, "if a man do levy war against our lord the king in his realm." And this may be done by taking arms, not only to dethrone the king, but under pretence to reform religion, or the laws, or to remove evil counsellors, or other grievances whether real or pretended.

4. "If a man be adherent to the king's enemies in his realm, giving to them aid and comfort in the realm, or elsewhere, he is guilty of high treason." This must likewise be proved by some overt act, as by giving them intelligence, by sending them provisions, by selling them arms, or treacherously surrendering a fortress or the like.

5. "If a man counterfeit the king's great or privy seal," this is also high treason.

6. The next species of treason mentioned in the statute is, "if a man counterfeit the king's money; and if a man bring false money into the realm counterfeit to the money of England, knowing the money to be false, to merchandise and make payment withal."

7. The last species of treason ascertained by this statute is, "if a man slay the chancellor, treasurer, or the king's justices of the one bench or the other, justices in eyre, or justices of assize, and all other justices assigned to hear and determine, being in their places doing their offices."

Of these forms of treason the three numbered 5, 6, and 7 are not now regarded as such. In the United States treason against the ruler cannot exist, the people in their collective capacity being sovereign, and the President the chosen servant of their will. Treason here, therefore, is limited to levying war against the country or in giving aid and comfort to the enemies of the state. It implies the assembling of a body of men for the purpose of overturning or resisting the government by force. Treason was formerly punished by the condemned person being drawn on a hurdle to the place of execution, there hanged and quartered, and afterwards beheaded and quartered, a conviction being followed by attainer and forfeiture of lands and goods. The punishment for treason in England is now hanging only. In the United States it is death, or, at the discretion of the court, imprisonment with hard labor for not less than five years and a fine of not less than \$10,000.

"On this occasion the Parliament supposed him to have been guilty only of a single treason, and sent him to the Castle of Edinburgh."—Macaulay: Hist. Eng., ch. xxi.

treason-felony, s.

English Law: The offence of compassing or devising, or intending to depose or deprive the present queen from her throne, or to levy war within the realm, in order to forcibly compel her to change her measures, or to intimidate either House of Parliament, or to excite an invasion in any of her Majesty's dominions. Treason-felony was defined by the Crown and Government Security Act, 11 Vict., c. 12 (1848), by which certain treasons, till then capital offences, were mitigated to felonies, punishable with penal servitude for life, or for any term not less than five years. The Fenians in Ireland were tried under this act in 1865 and 1866.

tréas-ón-a-ble, a. [Eng. treason; -able.] Pertaining to or involving the crime of treason; consisting of or partaking of the nature of treason.

"In these dens were manufactured treasonable works of all classes and sizes."—Macaulay: Hist. Eng., ch. xvi.

tréas-ón-a-ble-néss, s. [Eng. treasonable; -ness.] The quality or state of being treasonable.

tréas-ón-a-blý, adv. [Eng. treasonable; -ly.] In a treasonable manner; by treason.

*tréas-ón-óus, a. [Eng. treason; -ous.] Treasonable.

"Were it a draught for Juno when she banqueted, I would not taste thy treasonous offer."—Milton: Comus, 702.

tréas-úre (s as zh), *tres-or, *tré-our, s. [Fr. trésor, from Lat. thesaurum, accus. of thesaurus = a treasure, from Gr. θησαυρός (thésaurós) = a treasure, a store, a hoard, from the same root as τήθημι (tithēmi) = to place, to lay up; Ital. & Sp. tesoro; Port. thesouro.]

1. Wealth accumulated or hoarded; particularly, a stock or store of money in reserve

"An inventory, importing The several parcels of his plate, his treasure, Rich stuff."—Shakspeare: Henry VIII., iii. 2.

2. A great quantity of anything collected for future use.

"We have treasures in the field, of wheat, and of barley, and of oil, and of honey."—Jeremiah xli. 3.

3. Something very much valued or prized.

"Ye shall be a peculiar treasure to me."—Exodus xix. 5.

*treasure-city, s. A city for stores and magazines.

treasure-flower, s.

Bot.: Gazania, a genus of Gorterieæ.

treasure-house, s. A store or building in which treasures are stored or kept; a place where treasured or highly valued things are kept.

"Inomparably effaced by debts Which her poor treasure-house is content to owe."—Wordsworth: Excursion, bk. vii.

treasure-trove, s. [Eng. treasure, and O. Fr. trové (Fr. trouvé) = found.]

Law: Any money or coin, gold, silver, plate, or bullion, found hidden in the earth or other private place, the owner thereof being unknown. In the United States treasure trove usually belongs to the individual who finds it, although in Louisiana it is dealt with under the French civil code, derived from the rule of old Roman law. In England the treasure belongs to the Crown. If the owner is known, or is ascertained after the treasure is found, he is entitled to it. Concealing or appropriating treasure-trove is an indictable offence, punishable by fine and imprisonment. If it be found in the sea, or upon the earth, it does not belong to the Crown, but to the finder, if no owner appears.

treasure-vault, s. A vault, cellar, or similar place, where treasure, stores, &c., are kept.

"To Rokeby treasure-vaults!"—Scott: Rokeby, vi. 4.

tréas-úre (s as zh), v.t. [TREASURE, s.]

1. To hoard up; to lay up in store; to collect and hoard, as money or other precious things or valuables, either for future use or for the sake of preserving them from harm or damage; to accumulate. (Generally followed by up.)

"Yet, faith if I must needs offend To spectre watching treasure hoard."—Scott: Rokeby, iii. 19.

2. To retain carefully in the mind or heart.

"That not a dram, nor a dose, nor a scruple of this precious love of yours is lost, but is safely treasur'd in my breast."—Howell: Letters, bk. 1, let. 17.

3. To regard as very precious; to prize.

*4. To enrich; to make precious.

"Treasure thou some place with beauty's treasure."—Shakspeare: Sonnet 6.

tréas-úr-ér (s as zh), *tres-er-er,

*tres-or-er, *threas-ur-er, *threas-or-or, *treas-ur-or, s. [Fr. trésorier; Sp. tesorero; Port. thesourreiro; Ital. tesoriere.] One who has charge of a treasury or treasury; an officer who receives the public money arising from taxes, duties, and other sources of revenue, takes charge of the same, and disburses it upon orders drawn by the proper authority; one who has the charge of collected funds, such as those belonging to incorporated companies or private societies.

"And had vnto his tresourers, That thal his tresour all about, Departe anon the poore route."—Gower: C. A., ii.

*1. Lord High Treasurer: Formerly the third great officer of the Crown, having under his charge and government all the king's revenue, which was kept in the exchequer; the office is now abolished, its duties being performed by commissioners entitled Lords of the Treasury. (English.)

*2. Lord High Treasurer of Scotland: An

officer whose duty it was to examine and pass the accounts of the sheriffs and others concerned in levying the revenues of the kingdom, to receive resignations of lands, and other subjects, and to revise, compound, and pass signitures, gifts of livery, &c. In 1663 the Lord High Treasurer was declared president of the Court of Exchequer.

3. **County and State Treasurers:** In the United States each county and state has its treasurer—officers elected by the people, and whose duty it is to receive, care for, and disburse the receipts from taxes, &c. Each state has its own laws concerning these, and safeguards around the control of the public money. The city treasurer has the same duties to perform with municipal funds, and the United States Treasurer with national funds. In England the county treasurer takes charge of county funds, which are raised by rates through the overseers of every parish, and applied for the maintenance of the police, county roads, bridges, &c. The office is generally filled by a leading county banker.

trēas-ūr-ēr-ship (s as zh), * **treas-ur-or-ship**, s. [Eng. *treasurer*; -ship.] The office or dignity of a treasurer.

"Thomas Brandingham bishop of Exeter and lord treasurer, was discharged of his office of *treasurer-ship*."—*Holinshed: Chronicle; Rich. II. (an. 1381).*

* **trēas-ūr-ēs** (s as zh), * **treas-our-esse**, s. [Eng. *treasurer*; -ess.] A female who has charge of a treasure.

"Yea, Lady Muse, whom Jove the counsellor Begot of Memory, widow'd *treasurers*."—*Daniel: Immort. of the Soul.*

* **trēas-ūr-ōūs**, a. [Eng. *treasur(e)*; -ous.] Worthy to be cherished and prized; of great value.

"Goddess full of grace,
And *treasurous* angel to all the human race."
Chapman: Homer; Hymn to Earth.

trēas-ūr-ŷ (s as zh), * **treas-ur-ic**, * **trēs-er-ye**, * **trēs-or-ic**, * **trēs-or-ye**, s. [Fr. *trésorerie*; Sp. & Ital. *tesoreria*.]

1. A place or building in which treasure is deposited; a store-place for wealth; particularly, a place where the public revenues are deposited and kept, and where money is disbursed to defray the expenses of government; also, a place where the funds of an incorporated company or private society are deposited and disbursed.

2. A department of government, having control over the management, collection, and expenditure of the public revenue.

¶ **United States Treasury:** The duties of this department are performed by the Secretary of the Treasury, the second in rank among the members of the President's Cabinet, and in some respects the first in importance. The collection of the revenue, customs and internal, and the financial business of the government generally, fall under his control, and all payment of moneys from the Treasury are made under his warrant. His other duties include the superintendence of the coinage, the national banks, the custom houses, the marine hospitals, and life-saving service, and the coast survey and lighthouse system. One of his most important duties is the management of the public debt, left as a burden upon the country by the Civil War. The business of the department is an enormous one, the disbursements of the Treasury in the ten years from 1880 to 1890 having been more than seven billions of dollars.

English Treasury: The duties of this department were formerly performed by the Lord High Treasurer (q.v.), but are now entrusted to a board of commissioners entitled Lords of the Treasury. The commissioners are five in number. The first Lord of the Treasury is, as a rule, the Prime Minister, or head of the government. He must be a member of one of the Houses of Parliament. The office is frequently combined with another in the ministry; thus, the first Lord at times holds the office of Secretary of State for Foreign Affairs. The virtual head of the Treasury is the Chancellor of the Exchequer, with which office that of first Lord is sometimes united. He must be a member of the House of Commons, and exercises complete control over the expenditure of the different branches of the service. He prepares the annual estimate of the state expenses, and of the ways and means by which it is proposed to meet them, and lays this statement, commonly called the Budget, before

the House of Commons. The three remaining Lords of the Treasury, called the Junior Lords, have little beyond formal duties to perform. Several important government departments, as the Board of Inland Revenue, the Post-office, Woods and Forests, &c., are under the general authority or regulation of the Treasury.

3. The officers of the Treasury department. [2.]

4. A repository, storehouse, or other place for the reception of valuable objects.

5. A collection of, or a book containing (generally in a small compass), valuable information or facts on any subject; anything from which wisdom, wit, or knowledges may be abundantly derived: as, a *treasury* of botany, a *treasury* of wit.

* 6. A treasure.

treasury-bench, s. The front bench or row of seats in the House of Commons, on the right hand of the Speaker, which is appropriated to the chief members of the British ministry.

treasury-board, s. The five Lords Commissioners of the Treasury. (*English*.)

treasury-note, s. A demand note issued by the Treasury and payable in coin; a legal tender for all debts and dues, unless otherwise stipulated by contract.

treasury-warrant, s. A duly signed and countersigned order on the Treasury for a specified sum of money.

trēat, * **traye**, * **trate**, * **treat-en**, * **trēte**, * **tret-en**, * **tret-y**, v.t. & i. [Fr. *traiter* = to treat, from Lat. *tracto* = to handle, frequent. from *traho* (p. par. *tractus*) = to draw.]

A. Transitive:

1. To behave to or towards; to conduct one's self to or towards in a particular manner; to act well or ill towards; to use in any way.

"At present they have but little idea of *treating* others as themselves would wish to be *treated*, but *treat* them as they expect to be *treated*."—*Cook: Second Voyage, bk. II, ch. v.*

2. To handle or develop in a particular manner, in writing or speaking, or by the process of art.

"Zeuxis and Polygnotus *treated* their subjects to their pictures, as Homer did in his poetry."—*Dryden: Daphnocy.*

3. To manage in the application of remedies: as, To *treat* a disease or a patient.

4. To subject to the action of: as, To *treat* a substance with sulphuric acid.

* 5. To discourse of; to speak of or on; to discuss.

"And thei camen to Cafarnaum and whosce thei weren in the hous he axide hem what *trateden* ye in the waye?"—*Wycliffe: Mark. I.*

* 6. To negotiate, to settle.

"To *treat* a peace at wene both princes."—*Fabian: Chronicle, ch. cxi.*

7. To entertain, without expense to the guest; to pay the expense of an entertainment, food, or drink (especially the last) for, as a compliment, or as a sign of goodwill or friendliness.

"Our generous scenes are for pure love repeated,
And if you are not pleased at least you're *treated*."
Prior: Prolog. spoken in Westminster School (1695).

8. To look upon or consider.

"The Court of Rome *treats* it as the immediate suggestion of Hell—open to no forgiveness."—*Je Quincey: Military Kun, sec. v, p. 11.*

* 9. To entreat, to beseech, to solicit.

B. Intransitive:

1. To discuss, to discourse; to make discussion or discourse of. (Generally followed by of.)

"Now wol I speke of others false and grete
A word or two, as olde bookes *trate*."

Chaucer: C. T., 12, 498.

2. To discuss terms of accommodation or agreement; to negotiate.

"He was now not only willing, but impatient to *treat*."—*Maccarty: Sic. Eng., ch. xvii.*

3. To come to terms of accommodation; to agree.

"He sende, and so betwene hem twayns
They *treaten* that the clee all
Was christened."

Gower: C. A., II.

4. To make gratuitous entertainment; to pay for food, drink, or entertainments for another or others. [*TREATING*, C. 2.]

2. Specifically, the act of bribing in parliamentary or other elections with meat or drink. Every candidate who corruptly gives, causes to be given, or is necessary to giving, or pays, wholly or in part, expense for meat, drink, entertainment, or provision for any person, before, during, or after an election, in order to be elected, or for being elected, or for corruptly influencing any person to give or refrain from giving his vote, is guilty of *treating*, and forfeits £50 to any informer, with costs. Every voter who corruptly accepts meat, drink, or entertainment, shall be incapable of voting at such election, and his vote shall be void. (*English*.)

* **treating-house**, s. A restaurant.

"His first jaunt is to a *treating-house*."—*Gentleman Instructed, p. 478.*

* **trēat-isc**, * **treat-ysc**, * **tret-yse**, * **trēt-is**, s. [O. Fr. *traiticis*, *treitis*, *treitis* = well handled or nicely made.]

1. A written composition on some particular subject, in which its principles are discussed or explained. It may denote a composition of any length, but it implies more form, method, and fulness than an essay.

"When we write a *tractate*, we consider the subject throughout. We strengthen it with arguments—we clear it of objections—we enter into details—and in short, we leave nothing unsaid that properly appertains to the subject."—*Ogilby: Preface to sermons, I.*

* 2. Discourse, talk, tale.

"Your *tractate* makes me like you worse and worse."
Shakespeare: Venus & Adonis, 774.

* **trēat-is-ēr**, * **treat-is-or**, s. [Eng. *traitis(e)*; -er.] One who writes a treatise.

"I tremble to speak it in the language of this black-mouthed *traiter*."—*Featley: Dippers Dipt., p. 82 (1645).*

trēat-mēt, s. [Fr. *traitement*.] [*TREAT*, v.]

1. The act or manner of treating or handling a subject.

"Scarce an honour or character which they have not used: all comms wasted to us, and were they to entertain this act, they could not now make such piteous *tratement*."—*Dryden.*

3. An agreement upon terms between two or more persons.

"Then she began a treaty to procure, And establish terms betwixt both their requests." - Spenser: F. Q., II. 11. 32.

4. Specifically, an agreement, contract, or league between two or more nations or sovereigns, formally signed by commissioners, duly accredited, and solemnly ratified by the several sovereigns or supreme authorities of each state. Treaties include all the various transactions into which states enter between themselves, such as treaties of peace, or of alliance, offensive or defensive, truces, conventions, &c. Treaties may be entered into for political or commercial purposes, in which latter form they are usually temporary. The power of entering into and ratifying treaties is vested in monarchies in the sovereign; in republics it is vested in the chief magistrate, senate, or executive council; in the United States it is vested in the President, by and with the consent of the Senate. Treaties may be entered into and signed by the duly authorized diplomatic agents of different states, but such treaties are subject to the approval and ratification of the supreme authorities.

¶ The most important European treaties of the century have been: the Treaty of Amiens, between Great Britain on the one part and France, Spain, and Holland on the other, signed March 25-7, 1802; the Treaty of Paris, between France on the one part and Austria, Russia, Great Britain, and Prussia on the other, signed May 30, 1814; the Treaty of Vienna (which long constituted the basis of the public law of Europe), between Austria, Spain, France, Great Britain, Portugal, Prussia, Russia, and Sweden, signed June 9, 1815; the Treaty of Paris, between Russia on the one and France, Great Britain, Sardinia, and Turkey on the other, March 30, 1856; the Treaty of Villafranca, of which the preliminaries were signed between France and Austria on July 12, 1859; the Treaty of Frankfurt, between Germany and France, signed May 10, 1871; the Treaty of San Stefano, between Russia and Turkey, March 3, 1878; the Treaty of Berlin, again between Russia and Turkey, with the assent of the other European Powers, Aug. 3, 1878.

¶ The United States has concluded numerous treaties with European and other powers, several of them of high importance. Among these may be named the treaty of alliance, amity, &c., with France, in 1778; the treaty of peace with Great Britain, in 1783; the treaty of financial adjustment with Great Britain in 1794, known as Jay's Treaty; the Washington reciprocity treaty with Great Britain in 1854, respecting the Newfoundland fisheries, commerce, &c.; the treaty with the same country of 1871 in settlement of the Alabama claims, the payment of which were in part offset by the fishery award of \$5,500,000 made to Great Britain in 1877; and treaties with the same country in respect to the relations of the two nations in Central America, &c. Other

important treaties were those made with the Barbary States with the purpose of putting an end to piratical attacks upon and capture of American merchant vessels; the treaty of commercial alliance with Japan in 1854, in which that country gave up its old policy of seclusion, and various others made with the nations of Europe and America.

třeb'-y-š, s. [The fictitious name of a dependent and parasite to whom Juvenal (v. 19) offered advice.]

Entom.: A genus of Caligida. Head buckler-shaped, with no sucking diaks on the large frontal plates; thorax three-jointed, four pairs of legs with long plumose hairs, the fourth pair slender, two-branched; second pair of foot-jaws two-jointed, not framed into a sucking disk. *Trebis caudatus* is parasitic on the skate. The male is much larger than the female.

třeb'-le (le as el), *třeb'-ble, a, adv., & s. [O. Fr. *treble*, *treble* = triple, from Lat. *tripulum*, accus. of *tripulus* = triple, from *tres* = three. *Treble* and *treble* are doublets.]

A. As adjective: 1. Ord. Lang.: Triple, threefold.

"But to speak them were a deadly sin, And for having but thought them my heart within, A treble penance must be done." - Scott: Lay of the Last Minstrel, II. 13.

II. Music:

1. Of or pertaining to the highest vocal or instrumental part, sung by boys, or played by violins, oboes, clarinets, or other instruments of acute tone.

"It is evident, that the percussion of the greater quantity of air, causeth the baser sound; and the least quantity the more treble sound." - Bacon: Nat. Hist., § 178.

2. Playing or singing the highest part or most acute tone: as, a treble voice, a treble violin, &c.

"A volume re-written, *trebled* in size, and covering a much larger area than the original." - Field, July 14, 1887.

*2. To utter in a treble voice or key; to whine out.

"He outrageously (When I accused him) *trebled* his reply." - Chapman.

B. Intrans.: To become threefold or thrice as much.

"Whoever annually runs out, as the debt doublets and *trebles* upon him, so doth his inability to pay it." - Swift.

*třeb'-le-něss (le as el), *třeb'-ble-ness, s. [Eng. *treble*, a.; -ness.]

1. The quality or state of being treble or threefold.

2. The quality or state of being treble in sound or note.

"The just and measured proportion of the air percussed, towards the baseness or *trebleness* of tones, is one of the greatest secrets in the contemplation of sounds; for it discovereth the true coincidence of tones into diapasons; which is the return of the same sound." - Bacon: Nat. Hist., § 183.

třeb'-lět, s. [TRIBLET.]

třeb'-ly, adv. [Eng. *treble*, a.; -ly.] In a treble manner; in a threefold manner, degree, or quantity; triply.

třeb'-ň-čět, třeb'-ne-čet, s. [Fr. *trébuchet* (O. Fr. *trebuchet*, *trabuchet*), from *trébucher* = to stumble, to tumble; O. Fr. *trébuchier* = to overbalance, to bear down by weight, from Lat. *trans* = across, and, O. Fr. *buc* = the trunk of the body; O. H. Ger. *buk* = the belly.]

*1. *Archæol.*: A warlike engine formerly used for hurling stones. A heavy weight on the short end of a lever was suddenly released,

TREBUCHET.

raising the light end of the longer arm containing the missile, and discharging it with great rapidity. It was used by besiegers for making a breach, or for casting stones and other missiles into the besieged town or castle.

"[A] *trebuchet* [is] a warlike engine of the Middle Ages, used to throw stones, fiery material, and other projectiles employed in the attack and defence of fortified places by means of counterpoise. At the long end of a lever was fixed a sling to hold the projectile; at the short end a heavy weight, which furnished the necessary moving force." - *Brande & Cox*.

2. A kind of balance or scale used in weighing.

3. A tumbrel or ducking-stool.

4. A kind of trap.

třeb'-čent-ist, s. [TRECENTO.]

Art: (See extract.)

"Antonio Cesar (died in 1828) was the chief of the *Trecentists*, a school which carried its love of the Italian authors of the fourteenth century to affectation." - *Ripley & Dana: Amer. Cyclop.*, ix. 464.

třeb'-cën-tō (c as ph), s. [Ital. = three hundred, but used for thirteen hundred.]

Art: A term applied to the style of art which prevailed in Italy in the fourteenth century. Also called sometimes the Early Style of Italian art.

třeb'-chóm'-ě-těr, s. [Gr. *τρεῖς* (*treis*) = to run, and *μέτρον* (*metron*) = a measure.] A kind of odometer or contrivance for ascertaining the distance run by vehicles.

*třech-our, s. [TRACHER.]

třeck'-schuyt (uy as oi), s. [Dut., from *trecken*, *trekken* = to draw, and *schuit* = a boat.] A covered boat, drawn by horses or cattle,

"I was playing at eighteen-peece *trèdrille* with the Doctors of Newcastle and Lady Brown."—*Walpole's Letters*, iii. 164.

trèd, * **trè** (pl. * *trèen*, * *trèen*, *trèes*), s. [A.S. *trèd*, *trèow* = a tree, dead wood, or timber; cogn. with Icel. *tré*; Dan. *trèz*; Sw. *trå* = timber; *tråd* = a tree; Goth. *triu*, genit. *triuvis* = a tree, a piece of wood; Russ. *drèvo* = a tree; Wel. *derw* = an oak; Ir. *darag*, *darog* = an oak; Gr. *δρῦς* (*drus*) = an oak, *δρῦν* (*doru*) = a spear-shaft; Sansc. *dru* = wood.]

1. Ordinary Language:

L. Literally:

(1) In the same sense as II. 1.

* (2) Wood, timber.

"Not onell vessels of gold and of silver, but also of trèe and ertne."—*Wycliffe*: I *Timothy* ii. 20.

2. Figuratively:

(1) Something more or less resembling a tree, consisting of a stem and stalk or branches.

"Vain are their hopes who fancy to inherit, By trees of pedigores, or fame or merit."—*Stepney: Juvenal*, viii. 10.

* (2) A CROSS.

"Whom also they slew, hanging him on a tree."—*Acts* x. 39. (R. V.)

(3) The gallows. In this sense usually in composition, or with an adjective as, the fatal tree, the triple tree. [GALLOW-TREE, TYBORN-TREE.]

II. Technically:

1. **Bot.**: Any woody plant rising from the ground, with a trunk, and perennial in duration; an arborescent plant as distinguished from a shrub, an undershrub, and an herb. The classification of plants which at first suggests itself as the most natural one is into trees, shrubs, and herbs. This is still the popular classification as it was that of the oldest observers (cf. I Kings iv. 33); but it violates all natural affinities, and has long since been abandoned by botanists. Trees occur in many orders, their stems varying in structure according to the sub-kingdoms to which they belong. They may be exogenous, or of that modification of the exogenous stem which exists in gymnosperms, or may be endogenous or acrogenous. [ACROGEN, EXOGEN, ENDOGEN, GYMNOGEN.] The age of certain trees, especially of Exogens, is often great, and, when cut down, the number of years they have existed can be ascertained by counting the annual zones. Von Martius describes the trunks of certain locust-trees in Brazil as being eighty-four feet in circumference and sixty feet where the bole becomes cylindrical. From counting the annual rings of one, he formed the opinion that it was of about the age of Homer; another estimate increased the age to 4,104 years, but a third one made the tree first grow up 2,052 years from the publication of Martius's book (1820). A baobab-tree (*Adansonia digitata*) in Senegal was computed by Adanson, A. N. 1794, to be 5,150 years old; but he made his calculations from the measurement of one fragment of the cross section, and, as zones differ much in breadth, this method of computation involves considerable risk of error. Sir Joseph Hooker rejects the conclusion. Most trees are deciduous, i. e., have deciduous leaves, a few are evergreen. To the latter kind belong those coniferous trees which form so conspicuous a feature in the higher temperate latitudes, while deciduous trees prevail in lower latitudes. Many of the wild trees of our forests have inconspicuous flowers, which appear so early that the unobservant fail to take note of them at all;

the fruit-trees generally have conspicuous flowers. The planting of trees designed for timber is now more attended to than formerly, and their cultivation in the squares of cities and along the sides of wide streets has been recently recommended, and to a certain extent commenced.

2. **Mech.**: A generic name for many wooden pieces in machines or structures, as

(1) **Vehicles**:

(a) The bar on which the horse or horse pail, as single, double, treble, whiffle, swingle trees.

(b) The axle. Also known as axletree.

(2) **Harness**: The frame for a saddle; a saddle-tree, harness-tree, gig-tree.

(3) **Shipbuild.**: A bar or beam in a ship, as chest-tree, cross-tree, rough-tree, treatie-tree, waste-tree (q.v.).

(4) **Mill.**: The bar supporting a mill-apindle.

(5) A vertical pipe in some pumps and air-engines.

3. **Palæobot.**: Parts of trunks of trees are often found almost as they grew in certain strata. [DIAT-BED, FOREST, 8.]

¶ I. At the top of the tree: Preeminent; having attained the highest position.

2. **Boot-tree**: [BOOT-TREE.]

3. **Genealogical-tree**: [GENEALOGICAL-TREE.]

4. **Tree of Chastity**:

Bot.: *Vitex Agnus-castus*. [AGNUS-CASTUS.]

5. **Tree of Heaven**:

Bot.: The genus *Ailanthus* (q.v.), and spec. *Ailanthus glandulosa*.

6. **Tree of Knowledge**:

Script.: A tree in the Garden of Eden, chosen as the test of obedience to our first parents in their state of innocence. Had they abstained from eating it, they would have known only good; eating it, they for the first time knew evil, and, by contrast, knew good more perfectly the moment that they lost it for ever (Gen. ii. 9-17, iii. 1-24). Tradition makes the Scripture Tree of Knowledge a species of *Tabernaemontana*, but there is not the smallest atom of evidence on the subject.

7. **Tree of Liberty**: A tree planted by the people of a country to commemorate the achievement of their liberty, or the obtaining of some great accession to their liberties. Thus the Americans planted a tree of liberty to commemorate the establishment of their independence in 1789, and several were planted in Paris after the Revolution in 1848.

8. **Tree of Life**:

(1) **Script.**: (a) A tree in the garden of Eden, eating of which man would have lived for ever (Gen. ii. 9, iii. 22); (b) a tree in the heavenly Jerusalem (Rev. xxii. 2).

(2) **Bot.**: The genus *Tuija* (q.v.).

9. **Tree of Long Life**:

Bot.: *Glaphyria nitida*. [GLAPHYRIA.]

10. **Tree of Sadness**:

Bot.: *Nyctanthes arbor-tristis*. [NYCTANTHES.]

11. **Tree of the Gods**:

Bot.: The genus *Ailanthus* (q.v.).

12. **Tree of the Magicians**:

Bot.: A Chilean name for *Lycoplestium pubiflorum*, a shrub of the order Solanaceæ, with red flowers.

13. **Tree of the Sun**:

Bot.: A rendering of Hinoki, a Japanese name for *Retinospora obtusa*. So called because dedicated by them to the god of the Sun. It is a tree belonging to the Cupressaceæ. It rises to the height of eighty or ninety feet, with a straight trunk, having a diameter at the base of five feet, and yields a fine-grained timber. Called also the Japanese Cypress.

tree-beard, s.

Botany:

(1) *Usnea* (q.v.), a genus of Lichens. So named from growing on trunks of trees, and for the same reason sometimes called Tree-hair and Tree-moss.

(2) A South American name for *Tillandsia usneoides*. [TILLANDSIA.]

tree-boa, s.

Zool.: *Epicrates angulifer*, from Cuba and Hayti. The muzzle is covered with scales,

those of the lips pitted, the forehead with symmetric shields, the crown scaly. Called more fully the Pale-headed Tree Boa.

tree-calf, s.

Bookb.: A brown calf binding with markings resembling the limbs and foliage of a tree.

tree-celandine, s.

Bot.: *Bocconia frutescens*. [BOCCONIA.]

tree-climber, s.

Ichthy.: *Anabas scandens*, the Climbing Perch. Lieut. Dindorf, of the Danish East India Company's Service, told Sir Joseph Banks that he had taken this fish from a moist cavity in the stem of a Palmyra palm growing near a lake. He saw it when already four feet above the ground struggling to ascend still higher—suspending itself by its gill-covers, and bending its tail to the left, it fixed its anal fin in the cavity of the bark, and sought, by extending its body, to urge it way upwards, and its march was only arrested

TREE-CLIMBER.

a. Head of Tree Climber, with the armed gill-cover removed to show the suprabranchial organ, which, by retaining moisture, enables this fish to live for some time out of water.

when seized. Tennent (*Ceylon*, i. 217) says: "The motive for climbing is not apparent, since water being close at hand it could not have gone for the sake of the moisture contained in the fissures of the palm, nor could it be in search of food, as it lives not on fruit but on aquatic insects. The descent, too, is a question of difficulty. The position of its fins and the apices on the gill-covers might assist its journey upwards, but the same apparatus would prove anything but a facility in steadying its journey downwards. The probability is that the ascent which was witnessed by Dindorf was merely accidental, and ought not to be regarded as the habit of the animal.

"In the Tamool language it is called *Pandiri*, or *Tree-climber*."—*Wood: Illus. Nat. Hist.* iii. 255.

tree-coffin, s.

Anthrop.: A kind of box hollowed out of the trunk of a tree, and used as a coffin.

tree-coupling, s. A piece uniting a single to a double tree.

tree-crab, s.

Zool.: The genus *Birgus* (q.v.).

tree-creeper, s.

Ornith.: *Certhia familiaris*, a slender bird, scarcely so large as a sparrow, with a long, curved, sharp-pointed bill, and stiff tail-feathers; plumage on upper surface shades of brown, wings barred with pale brown and black, and nearly all wing-feathers tipped with white; under-surface silvery white, flanks and vent with a rufous tinge. Found generally in Britain, and in Ireland where old wood prevails. It is an excellent climber, running rapidly by jerks in a spiral direction over the bark of trees, searching for small insects which lurk in the crevices, picking them out with its slender bill, occasionally varying its diet on the seeds of the Scotch fir.

tree-crow, s.

Ornith.: Any individual of the Corvine sub-family, Dendroctittine.

tree-cultus, s.

Anthrop.: Tree-worship (q.v.).

"The whole tree-cultus of the world must by no means be thrown indiscriminately into the one category."—*Tylor: Prim. Cult.* (ed. 1875), ii. 21.

fāte, **fāt**, **fāre**, amidst, **whāt**, **fāl**, father; **wē**, **wēt**, here, camel, **hēr**, there; **pine**, **pīt**, **sīro**, **sir**, marine; **gō**, **pōt**, **or**, **wōre**, **wōlf**, **wōrk**, **wō**, **sōn**; **mūte**, **ōūb**, **cūre**, **qūite**, **cūr**, **rūle**, **fūll**; **trȳ**, **Sȳrian**. **æ**, **œ** = **ē**; **oy** = **ā**; **qu** = **kw**.

tree-deity, s.

Anthrop. : A tree considered either as a god or as the abode of some god or spirit.

"In actual fact a tree-deity is considered to be human enough to be pleased with dolls set up to swing in the branches."—*Tylor: Prim. Cult.* (ed. 1878), II. 217.

tree-digger, s.

Agric. : A kind of double plough employed in nurseries for cutting off the roots of trees which have been planted in rows. It divides the earth at a certain depth below the surface, and at a determinate distance on each side of the rows, to permit the tree to be readily removed from the soil.

tree-duck, s.

Ornith. : Swainson's name for the genus *Dendrocygna* (q.v.).

tree-dwelling, s.

Anthrop. : A rude kind of hut built among the branches of trees by some races of low culture as a protection against wild beasts.

"He found their tree-dwellings deserted for some years past, but the people feared they might have to resort to them again, from the increase of tigers and elephants near their settlements."—*Journ. Anthrop.* Int., x. 448.

tree-fern, s.

1. **Bot.** : A fern rising to the elevation, and to a certain extent, having the structure of a tree. The trunk is really a rhizome, consisting of a woody cylinder, of equal diameter at each end, growing only at the top, and composed internally of loose cellular substance, which often disappears. When actual wood is present, it consists almost wholly of large scalariform or dotted ducts imbedded in hard plates of thick-sided, elongated tissue, usually of an interrupted sinuous aspect, though sometimes constituting a complete tube. Externally, the stem has a hard, cellular, fibrous rind, consisting of the united bases of leaves, and is thicker below than above. Many Tree-ferns belong to the genus *Cyathea* (q.v.). Tree-ferns flourish further from the equator in the southern than in the northern hemisphere. They do so in New Zealand, 46 S. Lat.

2. Palaeobot. : [FERN, 2.]**tree-frog, s.**

Zool. : There are in all 95 species in the typical genus *Hyla*, of which much the greater number belong to America, the United States possessing a number of species. There are about 20 species in Australia and two in Asia, while Europe has but one, *Hyla arborea*, which is common in the central and southern districts and ranges into Asia and northern Africa. The Common Tree-frog of the United States (*H. versicolor*) displays in a remarkable degree the power of color change possessed by the genus, its color varying from a dark brown to a lichen-like gray or a brilliant green. This species is replaced in the Southern States by *H. viridis*, the Green Tree-frog. In the male of the common tree-frog the skin of the throat is distensible, and may be swollen into a resonant bladder, to whose aid are due the somewhat annoying vocal powers of the animal. Tree-frogs are of small size, and of brighter colors and more active habits than the true frogs. They feed on insects of the trees.

tree-germander, s.

Bot. : *Teucrium Scorodonta*. It is a labiate plant, one or two feet high, with downy and much wrinkled leaves, crenate on the margin, and yellowish-white flowers. It is frequent in woods and dry, stony places, flowering in August and September. It is very bitter, and has sometimes been substituted for hops.

tree-goose, s.

Ornith. : The *Bernicla goose* (q.v.).

"It has also been called tree-goose, from the belief that it originated from old and decayed trees."—*Ripley & Dana: Amer. Cyclop.*, VIII. 187.

tree-grasshopper, s.

Entom. : *Meconema varia*.

tree-hair, s.

Botany :
(1) *Cornicularia jubata*, a lichen hanging in dark, wiry masses from trees in subalpine woods.
(2) [TREE-BEARD, L.]

tree-hopper, s.

Entom. : A popular name for any individual of the genus *Membracis* (q.v.).

"Other harvest-flies of the same family . . . are not

surpassed with a musical apparatus, but have the faculty of leaving a distance of five or six feet; they are more properly called tree-hoppers."—*Ripley & Dana: Amer. Cyclop.*, VIII. 502.

tree-irons, s. pl.

Vehicles : The irons connecting single to double trees, or the latter to the tongue of the vehicle. Also the hooks or clips by which the traces are attached.

tree-jobber, s. A woodpecker. (*Prov.*)

tree-kangaroo, s.

Zool. : Any individual of the genus *Dendrolagus* (q.v.).

tree-like, a.

Bot. : Dendroid; divided at the tip into a number of fine ramifications, so as to resemble the head of a tree, as *Lycopodium dendroideum*. Generally used of small plants.

*** tree-lizards, s. pl.**

Zool. : The *Dendrosauria* (q.v.).

tree-louse, s.

Entom. : A plant-louse. [APHIS.]

tree-mallow, s.

Bot. : The genus *Lavatera* (q.v.), and spec. *L. arborea*.

tree-molasses, s. Molasses made from the Sugar-maple-tree.

tree-moss, s.

Botany :

(1) *Umea plicata*. So named from its growing on trees.

(2) The genus *Umea*. [TREE-BEARD.]

tree-mouse, s.

Zool. : A popular name for any of the *Dendronyinae*, an African sub-family of *Murida*. The ears are clothed with hairs; and the feet, which are five-toed, are fitted for climbing.

tree-nymph, s.

Anthrop. : A dryad. (See extract.)

"The Homeric Hymn to Aphrodite tells of the tree-nymph, long-lived, yet not immortal—they grow with high-topped leafy pines and oaks upon the mountains, but when the lot of death draws nigh, and the lovely trees are sapless, and the bark rolls away, and the branches fall, then their spirits depart from the light of the sun."—*Tylor: Prim. Cult.* (ed. 1878), II. 219.

tree-onion, s.

Bot. : *Allium proliferum*, a hardy perennial, three feet high, the native country of which is unknown.

tree-pic, s.

Ornith. : A popular name for any individual of the genus *Dendrocytta*.

tree-pigeon, s.

Ornith. : A popular name for any pigeon of the genus *Treron* (q.v.). The species are shy and timid, and inhabit the woods of inter-tropical Asia and Africa. The prevailing colours of the plumage are green and yellow of different shades, more or less contrasted with rich purple and reddish brown. Their note is very different from the mere cooing of the ringdove.

tree-porcupine, s.

Zool. : A popular name for any species of *Syntherisma* (q.v.). They are of considerable size, measuring from sixteen to twenty inches without the tail, which is about a third the length of the head and body. They are of lighter build than the Ground-porcupines, are covered with short, close, many-coloured spines, often mixed with hairs, and their tail is always prehensile. They are nocturnal in their habits, and live on fruit and roots.

tree-primrose, s.

Bot. : *Oenothera biennis*. [EVENING-PRIMROSE.]

tree-purslane, s.

Bot. : *Portulacaria afra*, an evergreen African shrub, about three feet high; with purple flowers in its native country, but which has not flowered in British greenhouses since A.D. 1732.

tree-rat, s.

Zool. : *Mus arboreus*, about seven or eight inches long, from Bengal. It builds a nest in cocoa-nut trees and bamboos, and lives partly on grain and partly on young cocoa-nuts.

tree-runner, s.

Ornith. (Pl.) : Swainson's name for *Anabatinae*, which he makes a sub-family of *Cer-*

thiade. Its type-genus is *Anabates*, founded on *Anabates subcristata*, a Brazilian bird.

tree-scraper, s. A tool, usually a triangular blade, to remove old bark and moss from trees. Also used in gathering turpentine.

tree-serpent, s. [TREE-SNAKE.]

tree-snake, tree-serpent, s.
Zool. : Any individual of the family *Dendrophidae* (q.v.).

"Some nocturnal tree-snakes have a prolonged snout."—*Owen: Anat. Vert.*

tree-sorrel, s.

Bot. : *Rumex Lunaria*, an evergreen plant, about two feet high, with greenish flowers, introduced from the Caucasus into British greenhouses in A.D. 1690.

tree-soul, s.

Anthrop. : An animating and individualizing principle supposed by races practising tree-worship to reside in every tree.

"Orthodox Buddhism declared against the tree-soul, and consequently against the scruple to harm them, declaring trees to have no mind nor sentient principle."—*Tylor: Prim. Cult.* (ed. 1878), I. 475.

tree-sowthistle, s.

Bot. : *Sonchus arvensis*, (*Britten & Holland*.) Root with creeping scions, stem simple, leaves denticulate, clasping the stem, with short, obtuse auricles; involucre glandulose, hispid; flowers very large, yellow. Frequent in cornfields in Britain. Called also Corn Sowthistle.

tree-squirrel, s.

Zool. : Any individual of the genus *Sciurus* (q.v.), as distinguished from the Flying Squirrels (*Pteromys*) and the Ground Squirrels (*Tamias*).

tree-sugar, s. Sugar made from the Maple-tree.

tree-swift, s.

Ornith. : Any individual of the genus *Dendrochelidon*.

tree-toad, s.

Zool. : A popular name for several of the *Hylidae*. Used without a qualifying epithet, it is equivalent to tree-frog (q.v.). With a qualifying epithet it is limited to particular species. *Hyla versicolor* is the Changeable Tree-toad, *Trachycephalus lichenatus* is the Lichened, and *T. marmoratus*, the Marbled Tree-toad.

tree-top, s. The top or highest part of a tree.

"Reflected in the water,
Every tree-top had its shadow."

Longfellow: Hiawatha, xxii.

tree-wasp, s.

Entom. : Any wasp that makes its nest in trees, as do two British species, *Vespa holzschuhi* and *V. britannica*. [VESPA.]

tree-wool, s. The same as PINE-NEEDLE WOOL (q.v.).

tree-worship, s.

Compar. Relig. : A "form of religion . . . general to most of the great races of mankind at a certain stage of mental development." (*Lubbock: Orig. Civil.*, ed. 1852, p. 294.) It may have been a particular kind of nature-worship, or have arisen from the animistic conception prevailing among the races of low culture at the present day, that trees were the residences or embodiments of spirits or deities. Tree-worship was a peculiarly Canaanitic cult, as is proved by the frequent mention of it in the Old Testament, and the stern denunciations of it show that the Jews, from time to time, lapsed into the nature-worship of their neighbours (*Deut.* xii. 3, xvi. 21; *Judges* vi. 25; *1 Kings* xv. 23, xv. 13, xviii. 19; *2 Kings* xvii. 10, xviii; *Isa.* lvii. 5; *Jer.* xvii. 2; *Ezek.* vi. 13, xx. 28; *Hos.* iv. 13.) It formed an essential part of the classic mythologies, in which are found superhuman beings attached to individual trees, and *evyaa* deities—dryads, fauns, and satyrs—roaming in the forest, the analogues of which still live in folk-tales as elves and fairies. [*Grove*, II.] Tree-worship, in Southern Asia, still forms an important part of Buddhist practice, though it is not recognized by Buddhist sacred literature. The famous Bo tree, grown from a branch of the tree sent by *Asoka* to Ceylon in the third century B.C., till its destruction in October, 1857, received the worship of pilgrims, who came in thousands to do it

reverence and offer prayer before it. (Cf. *Athenæum*, Nov. 12, 1887, pp. 639, 640.) Ferguson (*Tree & Serpent Worship*, *passim*) also shows that a large place tree-worship held in early Buddhism, and that it was then closely connected with serpent-worship. On this subject Tyler (*Prim. Cult.*, ed. 1873, ii. 218) remarks: "The new philosophic religion seems to have amalgamated, as new religions ever do, with older native thoughts and rites. Down to the later middle ages tree-worship lingered in Central Europe; while names like 'Huljoaks' and 'Holywood' record the fact that at no very remote period holy trees and groves existed in Britain; and it is a remarkable fact that a sacred linden-tree in the parish of Hviyard, in South Sweden, gave a name to the family of Linnæus. At the present day tree-worship is prevalent among native races in America, Africa, Asia, and Australia. In Europe, though traces of it still linger in folk-tales and popular customs, it no longer exists as a cult, except among the people of the Chersonese, who, though nominally Greek Christians, "still adhere to their beliefs in good and evil spirits, and worship them—the good apirits in forests and groves where coniferous are mixed with foliaceous trees, and the evil apirits in purely coniferous forests. Every god is represented by a special tree, the worship of which is provided for by a separate priest chosen by lot" (*Nature*, March 25, 1886, p. 496).

tree-worshipper, s.

Anthrop.: One who practises any form of tree-worship (q.v.).

"The transformed teacher reproved the tree-worshipper for thus addressing himself to a senseless thing."—Tyler: *Prim. Cult.* (ed. 1873), ii. 218.

trēē, v.t. & i. [TREE, s.]

A. Transitive:

I. Literally:

1. To drive to a tree; to cause to ascend a tree or trees.

"One day my dog *treed* a red squirrel, in a tall hickory."—*Burroughs: Peppercorn*, p. 212.

2. To place upon a tree; to stretch on a tree: as, *To tree* boots.

II. *Fig.*: To put in a fix; to drive to the end of one's resources.

"You are *treed*, and you can't help yourself."—*H. Kingsley: Geoffrey Hamlyn*, ch. v.

B. Intransitive:

1. To take refuge in a tree, as a wild animal. (*Amer.*)

"Besides *treeing*, the wild cat will take advantage of some hole in the ground."—*Thorp: Backwoods*, 180.

2. To grow to the size of a tree.

† *To tree one's self*: To conceal one's self behind a tree, as in hunting or fighting. (*Amer.*)

* *tree'-hood*, s. [Eng. *tree*, s.; *hood*.] The quality, state, or condition of a tree.

tree'-less, a. [Eng. *tree*, s.; *-less*.] Destitute of trees.

"A quiet *treeless* nook, with two green *beds*."—*Wordsworth: Excursion*, bk. II.

* *treēn*, a. [A.S. *treowen*, from *treow* = a tree.]

1. Made of wood or tree; wooden.

"Which done, or in doing, they praised and worshipped their own golden, silver, copper, yerny, frenn and stony goddis."—*Joye: Exposition of Danie*, ch. 1.

2. Pertaining, derived from, or drawn from trees.

"*Treen* liquora, especially that of the date."—*Esculap: Sylla*.

* *treēn*, s. pl. [TREE, s.]

tree'-nail, *tree'-nail*, *tree'-nel*, *tree'-nel*, s. [Mid. Eng. *treen* = wooden, and Eng. *nail*.]

Shipbuild.: A cylindrical pin of hard wood, from an inch to an inch and three-quarters in diameter, used for securing planking to the frames, or parts to each other.

tree'-ship, s. [Eng. *tree*, s.; *-ship*.] The state or condition of being a tree; treehood.

"While thus through all the stages thou hast pushed *Of tree-ship*—first a seedling bud in grass; Then twig, then sapling."—*Couper: Tardley Oak*.

tree'-fal-lōw, v.t. [THRIFALLOW.]

tree'-fle, s. [TREFOLI.]
Fort.: A mine with three chambers like a trefoil.

trēf'-leē, a. [Fr. *trèfle* = trefoil (q.v.).]

Her.: An epithet applied to a cross, the arms of which end in triple leaves, representing treflois. Bends an sometimes borne treflee, that is with treflois issuing from the side.

CROSS TREFLEE.

trēf'-ōil, *trē'-fōil*, *trēy'-fōil*, s. [O. Fr. *trifolium*, from Lat. *trifolium* = a three-leaved plant, as the clover, from pref. *tri-* = three (allied to *tree* = three), and *fōilium* = a leaf; Fr. *trèfle*; Sp. *trifolito*; Ital. *trifoglio*.]

I. Botany:

(1) The genus *Trifolium*, spec. *Trifolium minus*. [CLOVER.]

(2) *Medicago lupulina*.

(3) *Stylosanthes procumbens*, a West Indian species of *Hedysaraceæ*, with yellow dimorphic flowers.

† *Great Trefoil*

is *Medicago sativa*. [BIRD'S-FOOT-TREFOIL, WATER-TREFOIL.]

2. *Arch.*: An ornament used in Gothic architecture, formed by mouldings in the heads of window-lights, tracery, panellings, &c., so arranged as to resemble the trefoil or three-leaved clover.

TREFOIL.

3. *Her.*: A charge representing the clover-leaf, and always depicted as alipped, that is, furnished with a stalk.

* *trēō'-lēt*, s. [Eng. *tree*, s.; dimin. suff. *-let*.] A little or young tree.

"Kurz says that in Burma it is sometimes a *treetlet* fifteen to twenty feet high."—*Journal of Botany*, vol. 2, No. 221, p. 144, (1881.)

* *treget*, s. [TRAJET.]

* *tregetour*, s. [TRAGETOUR.]

* *tregetry*, * *tregettrie*, s. [TRAGETRY.]

trē-ha'-la, s. [Corrupted from *tigala*, the native name.]

Chem.: The substance from which a peculiar sugar [TREHALOSE] has been obtained. It is the cocoon of a beetle from Persia, and not properly a saccharine exudation. (*Flückiger & Hanbury: Pharmacographia*.)

trē'-ha-lōse, s. [Eng. *trehal*(a), and (*gluc*)ose.]

Chem.: $C_{12}H_{22}O_{11} \cdot 2H_2O$. A saccharine substance extracted from trehala mauna by boiling alcohol. It forms shining rhombic crystals, soluble in water and in boiling alcohol, insoluble in ether, and melts at 100°. Boiled with dilute sulphuric acid, it is converted into dextro-glucose; with dilute nitric acid, it yields oxalic acid; in contact with yeast it passes slowly into the alcoholic fermentation. An aqueous solution of trehalose has a retro-rotatory power [α] = + 190°.

* *trēll'-lage* (age as *ig*), s. [Fr., from *treille* = an arbour.]

Horl.: A light frame of posts and rails to support espaliers; a trellis.

"Contrivers of bowers, grots, *trellages*, and cascades."—*Spectator*.

trēllie, s. [Fr.]

Her.: A lattice; it differs from *fretty* in that the pieces do not interlace under and over, but cross athwart each other, and are nailed at the joint. Called also *trellis*.

TRELLIE.

trēk, v.t. [Dut. *trekken* = to draw, to draw a waggon; to journey.] To travel by waggon; to journey as in search of a new settlement. (*South Africa*.)

"It is quite possible that they might, like the Boers, *trek* once more beyond the reach of American laws."—*Daily Telegraph*, Oct. 18, 1883.

trēk, s. [TRAK, v.] A journey with a waggon; a march. (*South Africa*.)

trēk-oxen, s. pl. Oxen used for drawing waggons. (*P. Gillmore: Great Thirst Land*.)

trēk-rope, s. A *trek-tow* (q.v.).

"The oxen loosened from the *trek-rope*."—*Cornhill Magazine*, March, 1884, p. 293.

trēk-tow, s. A Dutch name, in Southern Africa, for strips of hide twisted into rope-traces, for oxen to draw waggons by.

trēll'-lis, * *trēll'-lice*, * *trēll'-lize*, * *trēll'-lys*, s.

[Fr. *treillis* = a trellis; *treiller* = to grate or lattice, to furnish or support with crossed bars or latticed frames, from *treille* = an arbour or walk set with vines, &c., twining about a latticed frame, from Lat. *trichilia*, *trictia*, *triclea*, *triclea* = a bower, arbour, or summer-house.]

I. Ordinary Language:

1. A gate or screen of open-work; lattice-work either of metal or wood.

2. A support for vines, creepers, or espaliers. Used especially for grapes, hops, and ornamental climbing-plants.

II. *Her.*: The same as *TRILLE* (q.v.).

trēllis-work, s. Lattice-work.

"With lawns, and beds of flowers, and shades of *trellis-work* in long avenues."—*Wordsworth: White Doe of Rylstone*, iv.

trēll'-lis, * *trēll'-lize*, v.t. [TRILLIS, s.] To furnish with, or as with trellis or lattice-work.

"The windows are large, *trellised*, and neatly carved."—*Herbert: Tristram*, p. 211.

trē-mā-bō'-lī-tēs, s. [Gr. *τρίμα* (*trima*) = a hole; *βολή* (*bole*) = a thunder-bolt, a wound, and suff. *-ites*.]

Palæont.: A genus of Manderopongidae, with one species from the Upper Cretaceous rock.

trē-mā-dīc'-tī-ōn, s. [Gr. *τρίμα* (*trima*) = a hole, and *δίκτυον* (*diktunon*) = a net.]

Palæont.: A genus of Hexactinellid Sponges, from the Upper Jurassic.

Trē-mād'-ōc, s. [Wel. See def.]

Geog.: A small town situated on the north side of Cardigan Bay, in Carnarvonshire.

Tremadoc-slates, s.

Geol.: Sedgwick's name for the upper beds of the Cambrian formation, corresponding to part of Barrande's Primordial zone. They were first met with at Tremadoc, and next traced to Dolgelly. Dr. Hicks found and carefully examined them at St. David's promontory and Ramsey Island, in South Wales; and finally Mr. Callaway showed that the Shibeton shale of Shropshire was of the same age. They are dark earthy flags and sandstones, with at least eighty-four fossil species, those of North somewhat differing from those of South Wales. Many new genera of Trilobites appear; Crinoidæ, Asteroidæ, Lamellibranchiata, and Cephalopoda are met with for the first time. In North Wales there are nine Tremadoc, mostly of the genus *Theca*, and Phyllopod Crustacea have been found.

trē-man'-dō, s. [Ital. = trembling.]

Music: One of the harmonic graces, which consists in a general shake of the whole chord, and is thus distinguished from *tremolo*, which consists in a reiteration of a single note of the chord.

trē-mān'-drā, s. [Gr. *τρίμα* (*trima*) = a hole, a pore, and *ἀνθρ* (*anthr*), genit. *ἀνθρῶς* (*anthrōs*) = a man; here used for a stamen.]

Bot.: The typical genus of Tremadraceæ (q.v.). Shrubs, with stellate downy, purple flowers with a five-cleft calyx, five petals, ten stamens, and two-celled anthers. Known species two, from Western Australia.

trē-mān'-drā'-cē-æ, s. pl. [Mod. Lat. *tremandra*(a); Lat. fem. pl. adj. suff. *-acæ*.]

Bot.: Poreworts; a order of Hypogynous Exogens, alliance Sapindales. Slender health-like plants, generally with glandular hairs. Leaves alternate, or whorled, exstipulate, with axillary one-flowered pedicels; flowers in most species large, showy; sepals deciduous, four or five, slightly adhering at the base, equal, valvate in aestivation; petals the same number, large, deciduous, involute in aestivation; stamens eight or ten; anthers two or four-celled, opening by a pore at the apex; styles one or two; ovary two-celled, each cell with one to three pendulous ovules. Fruit capsular, two-valved, two-celled; seeds

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, campl, hēr, thēre; pine, pīt, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, oūb, cūre, quite, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā: qn = kw.

with a hooked appendage at the apex. Natives of Australia. Genera three, species sixteen. (Lindley.)

trem-arc-tis, s. [Gr. τρέμα (trēma) = a hole, and ἄρκος (arkos) = the back.]

Palaeont.: A genus of Heliotidae, with two species, from the Upper Silurian of North America.

trem-arc-tos, s. [First element doubtful; second, Gr. ἄρκος (arkos) = a bear.]

Zool.: A genus of Ursidae, with one species, commonly known as Ursus ornatus, the Spectacled Bear (q.v.).

trem-arc-tis, s. [TREMATA.]

Palaeont.: A sub-genus of Discina, with fourteen species, from the Silurian rocks of North America and Europe.

trem-arc-tis, pref. [TREMATA.] Hollow; having a hollow process or processa.

trem-arc-tis, s. pl. [Gr. τρέμα (trēma), genit. τρέματος (trēmatis) = a hole, a pore.]

Zool.: Flukes, Suctorial Worms; an order of the class Annelida, with two groups, Distoma and Polystoma. Leaf-like parasites, for the most part internal, but some external, provided with one or more ventral suckers, a mouth and alimentary canal, but no anus or body-cavity; integument of the adult not ciliated; sexes generally united in one individual. They are the Stermathina of Owen, and were included by Cuvier in his Parenchymatous Intestinal Worms. The intestinal canal is often much branched, and possesses but one external opening, usually at the bottom of the anterior suctorial disc, and serving both as an oral and anal aperture. A water-vascular system is present, consisting of two lateral vessels, generally opening on the surface by a common excretory pore. The nervous system consists of two pharyngeal ganglia. The young may be developed directly into the adult, or may pass through a complicated metamorphosis, varying in different cases [REOIA]; and one of the early stages of their existence is often passed in the interior of freshwater molluscs, whence they are transferred to a vertebrate host. In their adult state they occupy the most varied situations. The majority lives in the intestines or hepatic ducts, the eyes, or bloodvessels of vertebrates; a few are ectoparasitic, and live on the skin and gills of fishes, crustaceans, molluscs, &c. The genus Distoma (q.v.) may be taken as the type of the order. The genus Gynæcophorus, in which the sexes are distinct, occurs abundantly in the bloodvessels of man in Egypt, South Africa, and the Mauritius, and its presence has also been detected in monkeys.

trem-arc-tis, a. & s. [TREMATA.]

A. As adj.: Of or pertaining to the Trematoda (q.v.).

B. As subst.: Any individual member of the order Trematoda.

trem-arc-tis, a. [TREMATA.] The same as TREMATODE (q.v.).

trem-arc-tis-rūs, s. [Pref. tremato-, and Gr. σαύρος (sauros) = a lizard.]

Palaeont.: A serpentine genus of Labyrinthodontia, of which little definite is known. Two species are generally recorded by taxonomists: Trematosaurus braunii, and T. ocella, both from the Bunter Sandstone of Bernburg.

trem-arc-tis-spir-ēs, s. [Pref. tremato-, and Gr. σπείρα (speira) = a coil.]

Palaeont.: A genus of Spiriferidae, with seven species, ranging from the Upper Silurian to the Middle Devonian of the United States. It appears to be closely related to Retzia. [RETZIA, 2.]

trem-bé-lór-ēs, trēm-blór-ēs, s. pl. [Sp.]

Phys. Science: The name given in South America to small earthquakes, consisting of a series of rapidly recurring vibratory movements, not sufficiently powerful to create damage. (Milne: Earthquakes, p. 10.)

* trem-bla-ble, a. [Eng. trembl(e); -able.] Calculated to cause fear or trembling; fearful.

"But what is tremblable and monstrous, there be some who, when God smites them, fly unto a witch." -G. Benson. (Annandale.)

trem-ble, v. t. [Fr. trembler, from Low Lat. tremulo = to tremble, from Lat. tremulus = trembling, from tremo = to tremble; Gr. τρέμα (trēmō) = to tremble. The ð is exorcistic, as in number.]

1. To shake involuntarily, as with fear, cold, weakness, or the effect of different emotions, as passion, rage, grief, &c.; to shake, to quiver, to shudder. (Said of persons.)

"But his knees beneath him trembled."

Longfellow: Hiawatha, II.

2. To be moved or shaken with a quivering motion; to quiver, to shake.

"Airs, vernal airs ... atone
The trembling leaves." Milton: P. L., IV, 268.

3. To quaver, to shake, as sound: as, His voice trembled.

trem-ble, s. [TREMBLE, v.]

1. The act or state of trembling; an involuntary shaking through cold, &c.

* 2. Fear.

"The housekeeper ... to set a good example, ordered back her trembles and came out." -Blackmore: Christowell, ch. XII.

¶ All of a tremble: In a state of shaking involuntarily, as from fear, cold, &c.

trem-ble-mēt, s. [Fr., from trembler = to tremble.]

* 1. Ord. Lang.: A tremor, a quivering, a tremble.

"Thrills in leafy trembling."

K. B. Browning: Lost Boomer.

2. Music: A trill or shake.

trem-ble, s. [Eng. trembl(e), v.; -er.]

1. Ord. Lang.: One who trembles.

"Not one poor trembler only fear betrays."

Byron: An Occasional Prologue.

2. Church Hist. (Pl.): The name given to an extreme Protestant sect in the early days of the Reformation in England.

"As thus I stroll'd along the street,
Such gangs and parcels did I meet
Of these quaint primitive dissemblers
In old Queen Bess's days call'd Tremblers,
For their sham shaking and their shivering."

Ward: Hudibras Redivivus.

trem-bling, pr. par., a., & s. [TREMBLE, v.]

A. As pr. par.: (See the verb).

B. As adj.: Shaking, as with fear, cold, or the like.

"The anxious crowd, with horror pale,
All trembling, heard the wondrous tale."

Scott: Lay of the Last Minstrel, VI, 28.

C. As substantive:

1. The act or state of shaking involuntarily, as from fear, cold, &c.

"Ah! then and there was hurrying to and fro,
And gathering tears, and tremblings of distress."

Byron: Childe Harold, III, 24.

2. (Pl.): An inflammatory affection in sheep, caused by eating noxious food.

trembling-poplar, s.

Bot.: Populus tremula, the Aspen (q.v.).

trembling-tree, s.

Bot.: Populus tremula; an American tree, about forty feet high, akin to the Aspen, of which some botanists consider it to be only a variety. It has a sub-orbiculate leaf, with an abruptly acuminate point, and two glands at its base; young leaves silky on the upper surface, old ones glabrous.

trem-bling-ly, adv. [Eng. trembling; -ly.]

In a trembling manner; so as to shake; tremulously.

"We must come tremblingly before him." -Ep. Matt. Denovio soul, § 22.

trem-blór-ēs, s. pl. [TREMPELORES.]

* trem-ō-fác-tion, s. [Lat. tremefactio, pr. par. of tremefacio = to cause to shake or tremble: tremo = to tremble, and factio = to make.] The act or state of trembling; agitation, tremor.

trem-ō-lō, s. [Mod. Lat., dimin. from Lat. tremo = to tremble, to shake, to quiver; from the quivering of the gelatinous mass of the plant.]

Bot.: The typical genus of Tremellini (q.v.). It consists of a tremulous gelatinous mass, generally more or less wavel and sinuated, free from papille and tubercles. They vary greatly in form, being brain-like, club-shaped, orbicular, &c., and in colour, being white, yellow, orange, rose-coloured, purple, &c. A common species, Tremella mesenterica, is conspicuous in winter in hedges from its orange tint.

trem-ō-lō-ni, s. pl. [Mod. Lat. tremell(a); Lat. masc. pl. adj. suff. -ini.]

Bot.: An order or sub-order of Hymenocetous Fungals, the species of which are a gelatinous texture, sometimes, though rarely, with a cretaceous nucleus, their hymenium in the more typical genera covering the whole surface without any definite upper or under side; sporophores scattered, often lobed or quadripartite; spores often producing secondary spores or spermatia. They grow upon branches or stumps of trees, in crevices of the bark, or on the dead wood, rarely on the ground. Found chiefly in temperate climates, though some are tropical. A widely distributed representative is the Jew's-ear (q.v.).

trem-ō-lōid, a. [Mod. Lat. tremell(a); suff. -oid.]

Bot., &c.: Resembling the genus Tremella; gelatinous.

trem-ō-lōus, a. [Lat. tremendus = that ought to be feared, fut. pass. par. of tremo = to tremble.]

1. Sufficient or calculated to excite fear or terror; terrible, dreadful, awful.

"Fleitions in form, but in their substance truths - Tremendous truths!"

Wordsworth: Excursion, bk. VI.

2. Such as may astonish by magnitude, size, force, violence, or degree; wonderful. (Colloq.)

"But they are numerous now as are the waves
And the tremendous rain."

Byron: Beaten & Earth, I, 15.

trem-ō-lōus-ly, adv. [Eng. tremendous; -ly.] In a tremendous manner or degree; so as to terrify or astonish; wonderfully.

"A tremendously strong indictment can be preferred by civilised society against the rat." -Daily Telegraph, March 5, 1887.

trem-ō-lōus-ite, s. [After Mr. Trembeere; suff. -ite (Min.).]

Min.: An impure variety of graphite (q.v.).

trem-ō-lōus-pūs, s. [Gr. τρέμα (trēma) = a hole, and Mod. Lat. octopus (q.v.).]

Zool.: A sub-genus of Octopus (q.v.), with three species, from the Atlantic and Mediterranean. Some or all of the arms are webbed half-way up, and there are two large aquiferous pores on the back of the head.

trem-ō-lōus-tō, s. [Ital.]

Music: The same as TREMOLO (q.v.).

trem-ō-lōus-ly, s. [TREMULO.]

Music: An organ and harmonium stop which causes the air as it proceeds to the pipes or reeds to pass through a valve having a movable top, to which a spring and weight are attached. The up-and-down movement of the top of the valve gives a vibratory movement to the air, which similarly affects the sound produced. On American organs, a fa-wheel by rotating in front of the wind-chest causes a tremolo. [TREMULO, 3.]

trem-ō-lōus-ly, s. [After Val Tremola, Italy, where it was erroneously stated to have been found; suff. -ite (Min.).]

Min.: A magnesia-line of amphibole (q.v.), containing little or no alumina, and occurring in bled crystals in the granular dolomite of Campo-longo, St. Gotthard, Switzerland, and numerous other localities. Colour, white, gray, greenish.

trem-ō-lōus-ly, s. [Ital., from Lat. tremulus = trembling.]

Music: 1. A chord or note played or bowed with great rapidity, so as to produce a quivering effect.

2. Vibration of the voice in singing, arising from nervousness or a bad production, or used for the purpose of producing a special effect. [SHAKE, s. II, 2.]

3. A pulsative tone in an organ or harmonium, produced by a fluttering valve which commands the air-dust, and causes a variation in the volume of air admitted from the bellows. Also applied to the contrivance itself.

trem-ō-lōus-ly, s. [Lat., from tremo = to tremble; Sp. & Port. tremor; Ital tremore.]

bōil, bōy; pōut, jōw1; cat, cēil, choros, chin, bench; go, gēm; thin, this; sin, as; expect, Xenophon, exist. -īng. -cian, -tian = shān. -tion, -sion = shūn; -tion, -sion = zhūn. -cious, -tious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

tré-páng (1), *s.* [Fr.] The same as TREPAN (1), *s.*, 3.

tré-páng (2), *s.* [Native name.]

Zool. & Comm.: A popular name for several edible tropical species of the Holothuroidea, especially applied to *Holothuria edulis*, and to its dried flesh. It is a slug-like animal, from the eastern seas, from six inches to two feet in length, living among seaweed or in sand on mud, and moving by the alternate extension and contraction of the body. The trepang forms an important article of food in China. About thirty-five varieties are enumerated by traders, but only five or six have any real commercial value. To prepare them for the market the viscera are removed, and the animals boiled for about twenty minutes, then soaked in fresh water, and afterwards smoked and dried. The curing process occupies about four days, during which the trepang must be kept very dry, for it readily absorbs moisture from the atmosphere. The final product is an unwhiting, dirty-looking substance, which is used to prepare a sort of thick soup, a favourite dish in China and the Philippine Islands. Trepang is worth from eight to thirteen shillings a bushel, according to the variety and the perfection with which it is cured.
"In the meantime, unless both the *trepang* and the pearl trades are not to be overdone, it behoves the Government concerned to put them under some wholesome regulations."—*Standard*, Nov. 23, 1885.

TREPANG.

tré-pán-ize, *v.* [Eng. *trepan* (1); -ize.] To trepan.

"Not long after by the insinuations of that old pander and *trepanner* of souls."—*South: Sermons*, vol. vi., ser. 10.

tré-pán-níng, *s.* [Eng. *trepan* (1), *v.*; -ing.]

1. Surg.: The operation of making an opening in the skull for relieving the brain from compression or irritation.

2. Brush-making: The operation or process of drawing the tufts or bristles into the holes in the stock by means of wire inserted through holes in the edge, which are then plugged, concealing the mode of operation.

trepanning-elevator, *s.*

Surg.: A lever for raising the portion of bone detached by the trephine.

* **trepeget**, *s.* [TREBUCRET.]

tré-phine, *s.* [Fr.]

Surg.: An improved form of the trepan (q.v.). An instrument for taking a circular piece out of the cranium. It is a cylindrical saw, with a cross-handle like a gimlet and a centre-pin (called the perforator), around which it revolves until the saw has cut a kerf sufficient to hold it. The centre-pin may then be withdrawn. The saw is made to cut through the bone, not by a series of complete rotations, such as are made by the trepan, but by rapid half rotations alternately to the right and left, as in boring with an awl. The trephine is sometimes worked by a revolving brace like that of the carpenter, and has been socketed upon a stem with three legs, and turned by one hand while the socket is held by the other. The trephine for the antrum is a small crown-saw set in the end of a handle. It is used for entering the antrum through a tooth-socket. The trephine differs

from the trepan in having its crown fixed upon and worked by a common transverse handle, instead of being turned by a handle, like a wimble or centre-bit, as is the case with the trepan. The operation of trepanning is resorted to for the purpose of relieving the brain from pressure; such pressure may be caused by the depression of a portion of the cranium, or it may be produced by an extravasation of blood, or by the lodgment of matter betwixt the skull and the dura mater, occasioned by a blow upon the head, or the inflammation of the membranes of the brain.

trephine-saw, *s.* A crown-saw; a cylindrical saw with a serrated end, to make a circular kerf by the rotation of the saw on its longitudinal axis.

tré-phine, *v.* [TREPHINE, *s.*] To perforate with a trephine; to operate on with a trephine; to trepan.

* **trép'-id**, *a.* [Lat. *trepidus*, from an old verb *trepo* = to turn round; cogn. with Gr. *τρέπω* (*trēpō*) = to turn.] Trembling, quaking.
"Look at the poor little *trepid* creature, panting and helpless under the great eyes."—*Thackeray: Virginias*, ch. 12x.

¶ Now surviving in its opposite, *intrepid* (q.v.).

* **trép'-i-dáte**, *v.* [Lat. *trepidatus*, pa. par. of *trepido*.] [TREPIDATION.] To tremble. (*De Quincy*.)

trép'-i-dá-tion, *s.* [Fr., from Lat. *trepidationem*, accus. of *trepidatio* = alarm, a trembling, from *trepidatus*, pa. par. of *trepido* = to tremble, from *trepidus* = trembling, *trepid* (q.v.); sp. *trepidacion*; Ital. *trepidazione*.]

trés'-pass, *tres-pas, s. [TRESPASS, v.]

I. Ordinary Language: 1. The set of one who trespasses or offends; an injury or wrong done to another; an offence against or violation of some law or rule laid down.

"Once did I lay in an ambash for your life. A trespass that doth vex my grieved soule."—*Shakespeare: Richard III.*

2. Any voluntary transgression of the moral law; a violation of a known rule of duty; sin.

"The scape-got on his head. The people's trespass bore."—*Compter: Olney Hymns*, xix.

3. Unlawful entry on the land or property of another.

II. Law: (See extract).

"Trespass, in its largest and most extensive sense, signifies any transgression or offence against the law of nature, of society, or of the country in which we live; whether it relates to a man's person, or his property. Therefore beating another is a trespass; for which an action of assault and battery will lie: taking or detaining a man's goods are respectively trespasses; for which the action of trover and detinue are given by the law; so also non-performance of promises or undertakings is technically a trespass, upon which the action of assumpsit is grounded; and, in general, any misfeasance or act of one man whereby another is injuriously treated and damaged, is a transgression or trespass in its largest sense. But in the limited and confined sense it signifies no more than entry on another man's ground without a lawful authority, and doing some damage, however inconsiderable, to his real property, which the law entitles a trespass by breaking his close. And a man is answerable for not only his own trespass, but that of his cattle also; for, if by his negligent keeping they stray upon the land of another, and much more if he permits, or drives them on, and they there tread down his neighbour's herbage, and spoil his corn or his trees, this is a trespass, for which the owner must answer in damages."—*Blackstone: Comment.*, bk. iii, ch. 8.

trespass - offering, s. An offering amongst the Jews, in expiation of a trespass. Heb. *אֲשָׁמָה* (*asham*), from *אָשָׁם* (*asham*) = to commit a fault. It was closely akin to the sin-offering, and consisted of a ewe lamb or kid, or a ram without blemish. After being killed its blood was to be sprinkled, the fat burned on the altar, and the flesh eaten by the priests in the holy place. The trespasses for which it made atonement were sins of dishonesty, falsehood carrying hurtful consequences to others, and, combined with the trespass-offering, compensation was to be made for the wrong inflicted (Lev. v. 14-19; vi. 1-8; vii. 1-7, &c.)

*trés'-pass-ant, a. [O. Fr., pr. par. of *trespasser* = to trespass (q.v.).] Trespassing.

II. *Technically*:

1. *Coursing*: A single course between two greyhounds.

"Paradise and Persephone had a terrific *trial*." *Field, Jan. 28, 1884.*

2. *Law*: The examination of a cause in controversy between parties before a proper tribunal. Trials are either criminal or civil. In criminal informations and indictments, wherever preferred, trial must take place before a judge or judges (or other presiding magistrate) and a jury. Minor offences may be tried and disposed of summarily by magistrates without a jury. The species of trials in civil cases are six in number: by record, by inspection or examination, by certificate, by witnesses, by jury, and by the court. Trials by inspection, by certificate, and by witnesses are very unusual, but they are still recognised modes of trial in certain cases. Civil actions are now tried (1) before a judge or judges; (2) before a judge, sitting with assessors; (3) before a judge and jury; (4) before an official or special referee, with or without assessors. The first of these is now much more common than formerly. In ancient times there were also trials by combat and by ordeal.

¶ (1) *New trial*: A rehearing of a cause before another jury, granted in cases where the court, of which the record is, sees reason to be dissatisfied with a verdict on the ground of misdirection by the judge to the jury, a verdict against the weight of evidence, excessive damages, the admission of improper evidence, the discovery of fresh evidence after the verdict was given, &c.

(2) *Trial and error*:

Math.: A method of mathematical calculation for attaining to results not possible by a more direct process. An experiment is made on the assumption that a certain number is the correct one. Then it is seen how much obscure inaccuracy this hypothesis introduces into the result, and thus materials are obtained for a new calculation, which directly leads to the truth.

"Here we can only go on a method of *trial and error*." *Airy: Pop. Astron., p. 239.*

(3) *Trial at bar*: [BAR, s., ¶ 3 b].

ból, bóy; pól, jól; oat, çell, chorus, çhin, bench; go, çom; thin, çhis; sin, aç; expect, çenophon, exist. -íng, -clan, -tian = shan. -tion, -sion = shün; -çion, -çion = zhün. -clous, -çious, -çious = shüs. -ble, -dle, &c. = bçl, dçl

- (4) *Trial by battle*: [BATTLE, B. 1.]

Saddlery: A skeleton-bit used to determine the exact width of the horse's mouth, also the breadth as well as the height of the port.

* **trial-day, s.** The day of trial.

* **trial-fire, s.** A fire for trying or proving; an ordeal-fire.

"With *trial-fire* touch me his finger-end."
Shaksp.: Merry Wives, v. 5.

trial-jar, s. A tall glass vessel for containing liquids to be tested by the hydrometer. The mouth is preferably enlarged, to prevent capillary adhesion.

trial-list, s.

Law: A list or catalogue of causes for trial.

trial-square, s. A try-square (q.v.).

trial-trip, s. An experimental trip; specif. a trip made by a new vessel to test her sailing qualities, rate of speed, working of machinery, &c.

* **tri-ál-i-tý, s.** [Lat. *tria*, nent. of *tres* = three.] The quality or state of being three; three united.

tri-ál-lýl, s. [Pref. *tri-*, and Eng. *allyl*.] A compound containing three atoms of allyl.

Triallyl-sulphidide, s.

Chem.: (C₃H₅)₃SI. Obtained by heating allylic sulphide with methylic iodide. It crystallizes in prismatic crystals, is soluble in water, and forms an alkaline liquid with silver oxide.

* **tri-a-lógue, s.** [Gr. *τρεις* (*treis*), *τρία* (*tria*) = three, and *λόγος* (*logos*) = a word, a discourse.] A discourse by three speakers; a colloquy of three persons.

"*Trialogue* between T. Blinney, Hugh Latimer, and W. Reppé."—*Wood: Athena Oxon., l. 21.*

tri-ám-ýl, s. [Pref. *tri-*, and Eng. *amyl*.] A compound containing three atoms of amyl.

Triamyl-glycerin, s.

Chem.: C₁₈H₃₈O₃ = (C₃H₇)₃O₃. Obtained by heating a mixture of arsolein, amylie alcohol, and acetic acid to 110° for twelve hours. It is decomposed by distillation.

tri-an, a. [Lat. *tria*, nent. of *tres* = three.]

Her.: Said of an aspect neither passant nor affronté, but midway between those positions.

TRIAN.

† **tri-án-dér, s.** [TRIAN-DRIA.]

Bot.: Any individual of the Linnaean class Triandria (q.v.).

tri-án-dri-a, s. pl. [Pref. *tri-*, and Gr. *άνδρ* (*anêr*), *άνδρως* (*andros*) = a male.]

Bot.: The third class of Linnaeus's Artificial System, consisting of plants with three stamens. Orders: Monogynia, Digynia, and Trigynia.

tri-án-dri-an, tri-án-drouís, a. [TRIAN-DRIA.]

Bot.: Pertaining or belonging to the Linnaean class Triandria; having three distinct and equal stamens in the same flower with a pistil or pistils.

tri-án-gle, tri-án-gle, * try-angle, s. [Fr. *triangle*, from Lat. *triangulum*, nent. of *triangulus* = having three angles: *tria* = three, and *angulus* = an angle; Sp. & Port. *triángulo*; Ital. *triangolo*.]

1. *Ord. Lang.*: A three-cornered figure, plot of ground, or the like. [Il. 5.]

II. Technically:

1. *Astron.*: [TRIANGULUM.]

2. *Build.*: A gin formed by three spars; a staging of three spars.

3. *Draughtsmanship*: A three-cornered straight-edge, used in conjunction with the

T-square for drawing parallel, perpendicular, or diagonal lines. It has one right angle, the two others being each of 45°, or one of 30° and the other of 60°.

4. *Eccles. Art.*: A symbol of the Holy Trinity represented by an equilateral triangle. [TRINITY.]

5. *Geom.*: A portion of a surface bounded by three lines, and consequently having three angles. Triangles are either plane, spherical, or curvilinear. A plane triangle is a portion of a plane bounded by three straight lines called sides, and their points of intersection are the vertices of the triangle. Plane triangles may be classified either with reference to their sides or their angles. When classified with reference to their sides, there are two classes: (1) Scalene triangles, which have no two sides equal; (2) Isosceles triangles, which have two sides equal. The isosceles triangle has a particular case, called the equilateral triangle, all of whose sides are equal. When classified with reference to their angles, there are two classes: (1) Right-angled triangles, which have one right angle, and (2) oblique-angled triangles, all of whose angles are oblique; subdivided into (a) acute-angled triangles, which have all their angles acute; and (b) obtuse-angled triangles, which have one obtuse angle. The sides and angles of a triangle are called its elements; the side on which it is supposed to stand is called the base, and the vertex of the opposite angle is called the vertex of the triangle; the distance from the vertex to the base is the altitude. Any side of a triangle may be regarded as a base, though in the right-angled triangle one of the sides about the right angle is usually taken. The three angles of a plane triangle are together equal to two right angles, or 180°; its area is equal to half that of a rectangle or parallelogram having the same base and altitude; in a right-angled plane triangle the square of the side opposite the right angle is equal to the sum of the squares of the other two sides. The triangle being the fundamental figure of plane geometry, the investigation of its properties is held to be of primary importance, and the geometry of the triangle has become a system of its own. In the discussion of its properties the geometer considers alike the area bounded by the sides of the triangle, and the outside regions of space marked off by those sides produced to infinity.

6. *Mil.*: A sort of frame formed of three halberds to which a person was lashed to undergo military punishment. [HALBERD, ¶.]

7. *Music*: A bar of steel bent into the form of a triangle, having an opening at one of the lower angles, so that the sides are of unequal length. It is suspended by one angle and struck with a small rod, and is sometimes introduced in brilliant musical passages.

8. *Pottery*: A small piece of pottery, placed between pieces of biscuit ware in the seggar, to prevent the adherence of the pieces when fired.

9. *Surveying*: Since every plane figure may be regarded as composed of a certain number of triangles, and as the area of a triangle is easily computed, the whole practice of land-surveying is nothing more than the measurement of a series of plane triangles.

¶ (1) *Arithmetical triangle*: A name given to a table of numbers arranged in a triangular manner, and formerly employed in arithmetical computation. It is equivalent to a multiplication table. The first vertical column consisted of units; the second of a series of natural numbers; the third of triangular numbers; the fourth of pyramidal numbers, and so on. [FIGURATE-NUMBERS.]

(2) *Curvilinear triangle*: A triangle whose sides are curved lines of any kind whatever: as, a spheroidal triangle, lying on the surface of an ellipsoid, &c.

(3) *Mixtilinear triangle*: A triangle in which some of the lines are straight and others curved.

(4) *Spherical triangle*: Spherical triangles take the names, right-angled, obtuse-angled, acute-angled, scalene, isosceles, and equilateral, in the same cases as plane triangles. A spherical triangle is birectangular, when it has two right angles, and trirectangular, when it has three right angles. A trirectangular

triangle is one-eighth of the surface of the sphere, and is taken as the unit of measure for polyhedral angles. Two spherical triangles are polar, when the angles of the one are supplements of the sides of the other, taken in the same order. A spherical triangle is quadrantal, when one of its sides is equal to 90°. [SPHERICAL.]

- (5) *Supplemental triangle*: [SUPPLEMENTAL.]
- (6) *Triangle of forces*:

Mech.: A term applied to that proposition which asserts that if three forces, represented in magnitude and direction by the sides of a triangle taken in order, act upon a point, they will be in equilibrium; and, conversely, if three forces acting upon a point, and in equilibrium, be represented in direction by the sides of a triangle taken in order, they will also be represented in magnitude by the sides of that triangle.

- (7) *Triangle of Hesselbach*:

Anat.: A triangular interval at the part of the abdominal wall through which the direct inguinal hernia passes.

- (8) *Triangle of Scarpa*:

Anat.: A triangular depression between the muscles covering the outer side of the femur and the adductor muscles on the inner side. It affords a passage for the femoral artery.

tri-án-gled (le as el), a. [Eng. *triangl(e)*, -ed.]

- 1. Having three angles; triangular.
- 2. Formed into triangles.

tri-án-gu-lar, a. [Fr. *triangulaire*, from Lat. *triangularis*, from *triangulus* = having three angles.] [TRIANGLE.]

1. *Ord. Lang.*: Having three angles; having the form of a triangle; pertaining to a triangle.

"The city itself in forme representeth a *triangular* figure."—*Hackluyt: Voyages, lib. 116.*

2. *Botany*:

- (1) (*Of a leaf*): Having the figure of a triangle of any kind: as the leaf of *Betula alba*.
- (2) (*Of a stem, &c.*): Three-edged, having three acute angles with concave faces, trigonal.

triangular-compasses, s. Compasses having three legs, two opening in the usual manner, and the third turning round an extension of the central pin of the other two, besides having a motion on its own central joint. By this instrument three points may be taken off at once, and it is very useful in constructing maps and charts.

triangular-crabs, s. pl.

Zool.: A popular name for the family Maidee (q.v.), from the shape of the carapace.

triangular file, s. The ordinary, tapering hand-saw file of triangular cross section. Also known as a three-square file.

triangular-level, s. A light frame in the shape of the letter A, and having a plumb line which determines vertically. It is used in levelling for drains.

triangular-numbers, s. pl. [FIGURATE-NUMBERS.]

triangular-prism, s. A prism having a triangular base.

triangular-pyramid, s. A pyramid whose base is a triangle, its sides consisting of three triangles, which meet in a point at the vertex.

triangular-scale, s. A scale used by draughtsmen and engineers for laying down measurements on paper. Each edge is differently divided, giving a variety of scales to select from. The rule being laid flat on the paper, the distances required to be laid down can at once be pricked off, dispensing with the use of dividers. They are commonly made of boxwood, but sometimes of metal—silver, or nickel plated, or of steel.

* **tri-án-gu-lár-i-tý, s.** [Eng. *triangular*; -ity.] The quality or state of being triangular.

"We say, for instance, not only that certain figures are triangular, but we discourse of *triangularity*."—*Bolingbroke: Essay 1; On Human Knowledge.*

* **tri-án-gu-lár-lý, adv.** [Eng. *triangular*; -ly.] In a triangular manner; after the form or shape of a triangle.

"Their further ends . . . stood *triangularly*."—*Dampier: Voyages* (an. 1687).

fâte, fát, fáre, amidst, whát, fáll, father; wê, wét, hère, camél, hêr, thère; pine, píť, síre, sír, marine; gô, pôť, er, wôre, wôłf, wôrk, whô, sôn; müte, cúb, cüre, únite, cür, rüle, füll; try, Sýrian. æ, œ = ê; ey = ä; qu = kw.

tri-án-gu-lar-ý, *tri-an-gu-lar-íe, a. [Eng. *triangular*; -y.] Triangular.

"The two *triangularis* bones called *sinapital*."—*Orvikars: Rabalata*, bk. 1, ch. xlv.

tri-án-gu-lá-te, v.t. & t. [Lat. *triangulus*] = three-angled; Eng. suff. -ate.]

A. Transitive:

1. *Ord. Lang.*: To make triangular or three-cornered.

2. *Surr.*: To divide into triangles; to survey by dividing into triangles.

B. Intrans.: To survey by the method of triangulation.

"Engineers were often compelled to triangulate from the opposite side to mark out the course of the road."—*Scribner's Magazine*, Aug., 1877, p. 465.

tri-án-gu-lá-tion, s. [TRIANGULATE.]

*1. *Ord. Lang.*: The act of triangulating; the reduction of an area to triangles.

2. *Surr.*: The operation of measuring the elements necessary to determine the triangles into which the country to be surveyed is supposed to be divided. The term is principally used in geodesic surveying. [TRIANGLE, 9.]

tri-án-gu-lóid, a. [Lat. *triangulus*] = three-cornered, and Gr. *éidos* (*eidos*) = form, appearance.] Somewhat resembling a triangle in shape.

Tri-án-gu-lúm, s. [Mod. Lat., from Lat. *triangulus* = a triangle.]

Astron.: The Triangle; one of the forty-eight ancient constellations. It is of small size, and is situated south-east of Andromeda, north of Arica, and west of Perseus. The largest star, a Trianguli, is only of the third magnitude.

Triangulum-australe, s.

Astron.: The Southern Triangle; a southern constellation of small size, but having the three stars which define it so prominent that they are sometimes called the Triangle stars. The constellation is between Pavo and Centaurus.

• Triangulum-minus, s.

Astron.: The Lesser Triangle; an obsolete constellation of small size between Triangulum (q.v.) and Arica. It was established by Hevelius.

tri-a-nó-spér-má, s. [Gr. *τρίασπέρ* (*trianōs*) = she that has three husbands, and *σπέρμα* (*sperma*) = seed.]

Bot.: A genus of Cucurbitaceae, akin to Bryonia, but having only three seeds. They are climbing plants, with tendrils and monoecious flowers. Stamens three, ovary three-celled. Fruit globular, fleshy. Natives of the West Indies and Brazil. *Trianosperma ficifolia*, called also *Bryonia ficifolia*, is an active purgative, and said to be a purifier of the blood. *T. Tayuya* is given in Brazil in small doses as an emetic, and in large ones as a purgative.

tri-án-thé-má, s. [Pref. *tri-*, and Gr. *άνθος* (*anthos*) = a flower. So named because the flowers are generally disposed in threes.]

Bot.: A genus of Sesuviae. Sepals oblong, colored on the inside; stamens five to twelve; styles one or two, filiform; capsule oblong, truncate, circumscissile. Weeds from the tropical parts of both hemispheres and the sub-tropics of Africa. *Trianthena crystallina*, *T. monogyna* (*T. obcordata* of Roxburgh), *T. pentandra*, and *T. decandria*, are natives of India. The tender leaves and the tops of the second and third species are eaten by the natives; the seeds of the first also serve as food during famine. *T. pentandra* is used as an astringent in abdominal diseases, and is said to produce abortio. The roots of *T. decandria* and *T. monogyna*, the latter combined with ginger, are given as cathartics.

tri-ar-ché, a. [Pref. *tri-*, and Eng. *arch* (q.v.).]

Her.: Formed of three arches; having three arches.

tri-ar-chý, s. [Gr. *τρεῖς* (*treis*) = three, and *ἀρχή* (*arché*) = rule, government.] Government by three persons.

"There lies between and about these cities, certain *triarches*, containing every one of them, as much as an whole country."—*P. Holland: Plinie*, bk. v., ch. xviii.

tri-ar-i-an, a. [Lat. *triarit*] = the veteran Roman soldiers, who were stationed in the

third rank from the front, when the troops were drawn up in order of battle, from *tres* = three; the other two were known as *hastati* and *principes*.] Occupying the third rank or place.

"Let the brave second and *Triarian* band Firm against all impression stand."—*Conley: Restoration of Charles II.*

tri-ar-thra, s. [Pref. *tri-*, and Gr. *άρθρον* (*arthron*) = a joint.]

1. *Zool.*: A genus of Rotatoria, family Hydatinae, with three or more species. Eyes two; frontal jaws two, each bidentate; foot simply styliform; body with lateral appendages; movement jerking.

2. *Palæont.*: A genus of Conocephalidae, from the Upper Cambrian and Lower Silurian.

tri-ás, s. [Gr. = the number three.]

Geol.: The Triassic System (q.v.).

tri-ás-ic, a. [Eng. *trias*; -ic.] Pertaining to, found in, or characteristic of the Trias. [TRIASSIC-SYSTEM.]

Triassic-period, s.

Geol.: The period during which the rocks of the Triassic system were being deposited.

Triassic-system, s.

Geol.: The lowest great division of the Mesozoic rocks. The name Trias came from Germany, and was designed to imply that in that country, where these rocks are more fully developed than they are in England or France, they are naturally divided into three series of beds: the Keuper sandstone above, the Muschelkalk (a marine limestone) in the middle, and the Bunter sandstone below. The Keuper and Bunter are represented in England, the intermediate Muschelkalk is wholly wanting. The Triassic-system is well developed in the United States and part of Canada, as in Nova Scotia, Prince Edward Island, and British Columbia. In the Eastern States it extends from the Connecticut Valley and the west side of the Hudson River to Virginia and North Carolina. Strata believed to be of the same age extend from the eastern borders of the Rocky Mountains into California, and similar strata exist in Alaska. A prominent lithological feature of these beds is the abundant presence of brick-red sandstone and marls, while, like the similar rocks of Europe, they contain few fossils. Animal tracks and footprints, however, are of frequent occurrence, especially in the Connecticut Valley. This absence of fossils is not the case in the Trias of California, which yields a plentiful marine fauna. Rocks of Triassic age occur also in South Africa, in Australia and India, &c. The Triassic period was one of abundant life, and many traces of its life history have been recovered. The predominant plants were cycads, horse-tails, ferns, and conifers. The animal forms included many striking reptiles and amphibians. The foot-prints of Labyrinthodonts are abundant, and lizard-like reptiles were numerous, while crocodiles first appeared during this period. The extinct group of Dinosaurs also now first appeared—terrestrial reptiles which walked on their hind feet. These being three-toed, their impressions in the sandstones were long taken to be those of gigantic birds. There were other remarkable reptiles, and the Trias is of great interest as having yielded the earliest remains of mammals, small marsupial creatures, with some affinity to the Banded Ant-eater of Australia. In Great Britain the Triassic fossils are few: nine genera and twelve species of plants are known, including Ferns, some of them arborescent, Equisetaceae, Coniferae, and Cycadaceae; of animals there are, according to Etheridge, thirty-five foraminifera, eight actinozoans, one echinoderm, five crustaceans, of which the most abundant is *Esteria minuta*, one brachiopod, sixty-seven other mollusca, thirty-five fishes, thirty-one amphibians and reptiles, and four mammals. In the Alpine regions of Europe the Trias is largely developed, the beds attaining a thickness of many thousand feet, and forming ranges of mountains, consisting of limestones overlaid with shales, marls, dolomites, &c. The character of the rocks here indicates deposition in open ocean waters, while those of Northern Europe seem to have accumulated in inland seas. In England there are many outcrops of Triassic rocks.

tri-át-ic, a. [Etym. doubtful.] (See compound.)

triatic-stay, s.

Naut.: A rope connected at its ends to the heads of the fore and main mast, and having a thimble applied to its bight for the attachment of the stay-tackle, by which boats, heavy freight, and speck are hoisted aboard.

tri-a-tóm-ic, a. [Pref. *tri-*, and Eng. *atomic*.] Containing three atoms in the molecule. [OZONE.]

triatomic-alcohol, s.

Chem.: An alcohol containing three atoms of replaceable hydrogen in the oxytalia portion of the radical.

tri-bal, a. [Eng. *trib(e)*; -al.] Belonging or pertaining to a tribe; characteristic of a tribe.

"A system of tribal food-prohibitions."—*Taylor: Prim. Cult.* (ed. 1873), II. 235.

tri-bal-ism, s. [Eng. *tribal*; -ism.] The condition or state of existing or living in separate tribes; tribal feeling.

† **tri-bal-ist,** s. [Eng. *tribal*; -ist.] One of a tribe.

tri-bás-ic, a. [Pref. *tri-*, and Eng. *basic*.]

Chem.: A term applied to an acid in which three atoms of hydrogen have been replaced by a metal or organic radical.

trib-ble, s. [Etym. doubtful.]

Paper-making: A large horizontal frame in the loft or drying-room of a paper-mill, having wires stretched across it for the suspension of sheets of paper while drying.

tribe, s. [Fr. *tribu*, from Lat. *tribus* = one of the three bodies into which the Romans were originally divided, from *tri-*, stem of *tres* = three; Sp. *tribu*; Ital. *tribù*.]

I. Ordinary Language:

1. One of the three bodies into which the Romans were divided. Originally the united people was divided into three tribes, which bore respectively the names: (1) Ramnes or Ramenses, (2) Tities, Titienses, or Tatienses, (3) Luceres or Lucreenses. The name of the first, according to the belief of the later Romans, was taken from Romulus, that of the second from Tatius, and that of the third was connected with the Etruscan word *Lucumo* (q.v.). At the head of each tribe was a captain, called *Tribunus*, and the members of the same tribe were termed, in reference to each other, *Tribules*. By the reorganization effected by Servius Tullius, the whole Roman people were divided into thirty tribes, twenty-six of these being *Tribus Rustice*, and four *Tribus Urbane*. This arrangement was strictly local; each individual possessed of landed property being enrolled in the Rustic Tribe corresponding to the region in which his property lay, and those who were not landowners being included in one or other of the City Tribes.

"Have you collected them by tribes?"—*Shakesp.: Coriolanus*, III. 5.

2. A division, class, or distinct portion of a people or nation, from whatever cause the division or distinction may have arisen.

"In tribes and nations to divide thy train."—*Pope: Homer: Iliad* II. 431.

3. A family, race, or body of people having a particular descent; a family or series of generations descending from the same progenitor and kept distinct.

"Cursed be my tribe, If I forgive him."—*Shakesp.: Merchant of Venice*, I. 5.

4. A separate body; a number considered collectively.

5. A nation of savages, forming a subdivision of a race; a body of uncivilized people united under one leader or government.

"The aboriginal tribes were friendly."—*Macaulay: Hist. Eng.*, ch. xxiv.

6. A number of persons of any character or profession; a term used in contempt.

"Folly and vice are easy to describe, The common subjects of our scribbling tribe."—*Roscommon*.

II. Nat. Science: A division of a natural order or grade in the classification of animals and plants immediately below an order, and in most cases immediately above a family, unless the grade of sub-tribe require to be intercalated. In Zoology it has various terminations: as *Dentirostres*, *Tetramera*, &c. In Botany it often ends in -*ce*: as, *Loteæ*. The word has not always been used in the same

sense as now. Linnaeus (*System Naturae*, ii. 3) employed it for what would now be called a sub-kingdom, enumerating three tribes of vegetables, Monocotyledones, Dicotyledones, and Acotyledones. Some other naturalists have made a tribe a division of a family.

* **tribe, v.t.** [TRIBE, s.] To divide or distribute into tribes; to classify by tribes.

"Our fowl, fish, and quadrupeds are well *tribed* by Mr. Willoughby and Mr. Ray."—*Nicolson: Eng. Hist.* Lib., p. 19.

tribes'-man, s. [Eng. *tribe*, and *man*.] A member of a tribe or clan; a clansman.

"The coris and the ealdormen could not lead, they could not constrain the will of their fellow tribesmen."—*Gardiner & Mullinger: Introduct. to Eng. Hist.* ch. ii.

trib'-lét, trib'-ò-lét, trib'-òu-lét, s. [Fr. *tribolet*.]

1. Forging: A mandrel used in forging tubes, nuts, and rings, and for other purposes. The nut having been cut from the bar, the hole is punched and enlarged by the triblet, which also serves as a handle while the nut is being finished on the anvil. In the case of a ring, the parts having been joined, the ring is fashioned and shaped on the triblet.

2. The mandrel in a machine for making lead-pipe.

tri-bòm-è-tër, s. [Gr. *τριβω* (*tribè*) = to rub, and *μετρον* (*metron*) = a measure.] An apparatus resembling a sled, used in estimating the friction of rubbing surfaces.

tri-bò-ni-òph'-òr-ús, s. [Gr. *τριβων* (*tribwón*) = a cloak, and *φορος* (*phoros*) = bearing.]

Zool.: A genus of Limacidae, with three species, from Australia. Mantle small, triangular; back with an almost imperceptible furrow; teeth with wavy edges.

trib'-òu-lét, s. [TABLET.]

trib'-ràch, s. [Lat. *tribrachus*, from Gr. *τριβραχης* (*tribrachus*), from *τρι-* (*tri-*) = three, and *βραχίς* (*brachis*) = short; Fr. *tribraque*.]

Pros.: A poetic foot of three short syllables, as *mē | ĩ | ũ*.

tri-bràc'-tè-ate, a. [Pref. *tri*, and Eng. *bractate* (q.v.).]

Bot.: Having three bracts.

trib'-u-al, a. [Lat. *tribus* = a tribe, and Eng. suff. *-al*.] Of or pertaining to a tribe; tribal.

"For which he proposes and defines a *tribal* character."—*Gardener's Chronicle*, No. 563, p. 374. (1861.)

* **trib'-u-lar, a.** [TRIBE.] Of or pertaining to a tribe; tribal.

trib-u-là-tion, * trib-u-la-ci-oun, s. [Fr. *tribulation*, from Lat. *tribulationem*, accus. of *tribulatio* = distress, affliction, from *tribulatus*, pa. par. of *tribulo* = to press, to oppress, from *tribulum* = a thrashing-sledge for separating grain from its husk. It was in the form of a wooden platform, studded beneath with sharp bits of flint or with iron teeth.]

1. That which causes affliction or distress; a severe affliction, trouble, or trial.

"When *tribulation* or persecution ariseth because of the word, by and by he is offended."—*Matt.* xiii. 21.

2. A state of severe affliction or distress.

tri-bù-lè-æ, s. pl. [Lat. *tribulus*]; Lat. fem. pl. a.ij. suff. *-æ*.]

Bot.: A section of Zygophyllaceæ, having the seeds without albumen.

trib'-u-lús, s. [Lat., from Gr. *τριβωλος* (*tribolos*) = a caltrap (q.v.), various plants with fruit like caltraps; spec. (1) *Tribulus terrestris*, (2) *Fagonia cretica*, (3) *Trapa natans* (q.v.).]

Bot.: The typical genus of Tribulææ (q.v.). Calyx five-parted; petals five, spreading; stamens ten; style short or absent; stigma five-lobed. Fruit of five capsular, pentagonal capsules, spinous or tubercular on the back; cells five, indehiscent; seeds many. Tropical and sub-tropical regions. *Tribulus terrestris* (Linn.), from which *T. lanuginosus* (Linn.) is not distinct, is a trailing annual, about nine inches long, with yellow flowers, found in many of the warm countries, including India, the south of Europe, and the West Indies. In the last-named locality, where it is called Turkey Blossom, it is sometimes cultivated in gardens for its fragrant flowers. In pastures the prickly fruits wound the feet of cattle.

Fowls feed and become fat upon the plant, of which they are very fond. In India its fruits are regarded as cooling, diuretic, astringent, and tonic; they are given in painful micturition, calculus, urinary affections, and gonorrhœa. Sometimes the fruit and root are boiled to form a medicated liquid. Another Indian species, *T. alatus*, has similar qualities. The South American *T. cistoides* is an aperient. *T. terrestris* may very possibly be the "thistle" of Matt. vii. 16, and the "brier" of Heb. vi. 8.

tri-bù-nal, * tri-bu-nal, s. [Lat.] [TRIBUNE.]

1. The seat of a judge; the bench on which a judge and his associates sit for administering justice.

"This goddess, this to his remembrance call. Embrace his knees, at his tribunal fall."—*Pope: Homer: Iliad* l. 681.

2. Hence, a court of justice.

"The ordinary tribunals were about to resume their functions."—*Macaulay: Hist. Eng.* ch. xi.

3. In France, a gallery or eminence in a church or other places in which the musical performers are placed.

¶ **Tribunal of Penance, Tribunal of Confession:**

Roman Church: The internal court (*forum internum*), in which the Church, through her priests acting judicially, remits or retains sins; and the sacrament of penance.

"Censures can be imposed, according to the ordinary law, by ecclesiastics possessing jurisdiction in the external courts (*forum externum*, as distinct from the internal court, or *tribunal of confession*)."—*Addis & Arnold: Cath. Dict.* p. 138.

* **trib'-u-nar-ý, a.** [Eng. *tribune*(s); -ary.] Of or pertaining to a tribune or tribunes; tribunitian.

* **trib'-u-nate, s.** [Lat. *tribunatus*, from *tribunus* = a tribune (q.v.).] Tribuneship.

"Before the succession of the tribunate and manifestly in the decemvirate."—*Smith: Commonwealth*, ch. iv.

trib'-une, tri'-bune, * tri-bun, s. [Lat. *tribunus* = a tribune, prop. = the chief, or elected by, a tribe, from *tribus* = a tribe (q.v.); Fr. *tribun*; Sp., Port., & Ital. *tribuno*.]

1. Roman Antiq.: Properly, the chief magistrate of a tribe. There were several kinds of officers in the Roman state that bore the title.

(1) The plebeian tribunes, who were first created after the secession of the commons to the Mons Sacer (A. C. C. 260), as one of the conditions of its return to the city. They were especially the magistrates and protectors of the commons, and no patrician could be elected to the office. At their first appointment the power of the tribunes was very small, being confined to the assembling of the plebeians and the protection of any individual from patrician aggression; but their persons were sacred and inviolable, and this privilege consolidated their other powers, which, in the later ages of the republic, grew to an enormous height, and were finally incorporated with the functions of the other chief magistracies in the person of the emperor. The number of the tribunes varied from two to ten, and each of these might annul the proceedings of the rest by putting in his veto.

(2) Military tribunes were first elected in the year A. C. C. 310, in the place of the consuls, in consequence of the demands of the commons to be admitted to a share of the supreme power. This measure was not, however, a complete concession of their demands, but, in fact, evaded them in a great degree; for the tribunate was not invested with the full powers or honours of the consulate, not being a curule magistracy, and, though it was open to all the people, patricians were almost invariably chosen. The number of the military tribunes was sometimes six and sometimes three. For above seventy years sometimes consuls were elected and sometimes military tribunes; at last the old order was permanently restored, but the plebeians were admitted to a share of it. (3) Legionary tribunes, or tribunes of the soldiers, were the chief officers of a legion, six in number, who commanded under the consul, each in his turn, usually about a month; in battle each led a cohort.

"These are the *tribunes* of the people, The tongues of the common mouth: I do despise them."—*Shaksp. Coriolanus*, ii. 2.

2. A bench or elevated place; a raised seat or stand. Specif.:

* (1) The throne of a bishop.

(2) A sort of pulpit or rostrum where a speaker stands to address an audience.

"She had scarcely stepped off the tribune when Mr. Delany entered, and there was a commotion which made her wait."—*George Elliot: Felix Holt*.

trib'-une-ship, tri'-bune-ship, s. [Eng. *tribune*; -ship.] The office or post of a tribune; the period during which one holds the office of tribune.

"But to say a truth, this *tribuneship* having taken originally the first beginning from the common people is great and mighty in regard that it is popular."—*P. Holland: Plutarch*, p. 718.

* **trib'-u-ni'-cian, * trib'-u-ni'-tial (ti as sh), * trib'-u-ni'-tious, a.** [Lat. *tribunicus*, *tribunitius*, from *tribunus* = a tribune (q.v.).] Pertaining to, befitting, or characteristic of a tribune or tribunes.

"O happy ages of our ancestors! Beneath the kings and tribunitian powers, One jail did all their criminals restrain."—*Dryden: Juvenal*, iii. 490.

* **trib'-u-tar-i-ly, adv.** [Eng. *tributary*; -ly.] In a tributary manner.

* **trib'-u-tar-i-nèss, a.** [Eng. *tributary*; -ness.] The quality or state of being tributary.

trib'-u-tar-ý, * trib-u-tar-ia, a. & s. [Fr. *tributaire*, from Lat. *tributarius* = paying tribute, from *tributum* = tribute (q.v.); Sp., Port., & Ital. *tributario*.]

A. As adjective:

1. Paying tribute to another, whether under compulsion, as an acknowledgment of submission or dependence, or voluntarily, to secure protection or for the purpose of purchasing peace.

"Viewed a Deliverer with disdain and hate, Who left them still a tributary state."—*Cowper: Expedition*, 218.

2. Subject, subordinate.

"These he, to trace his tributary gods, By course commits to several governments."—*Milton: Comus*, 94.

3. Paid in or as tribute.

"At this tomb my tributary tears I render."—*Shaksp.: Titus Andronicus*, i.

4. Yielding supplies of anything; serving to form or make up a greater object of the same kind.

"Poor tributary rivers."—*Shaksp.: Cymbeline*, iv. 2.

B. As substantive:

1. Ord. Lang.: An individual government or state which pays tribute or a stated sum to another, whether as an acknowledgment of submission or dependence, or to secure protection, or for the purpose of purchasing peace.

"But whether or on they are tributaries to the Russians, we could never find out."—*Cook: Third Voyage*, bk. vi. ch. xi.

2. Geog.: A stream which directly or indirectly contributes water to another; an affluent.

trib'-ute, * trib-ut, a. [Fr. *tribut*, from Lat. *tributum* = tribute, prop. neut. sing. of *tributus*, pa. par. of *tribuo* = to assign, to allot, to pay, from *tribus* = a tribe (q.v.); Sp., Port., & Ital. *tributo*.]

I. Ordinary Language:

1. An annual or stated sum of money or other valuable thing paid by one prince or nation to another, either as an acknowledgment of submission and dependence, or to secure protection, or to purchase peace, or by virtue of some treaty.

"Forbidden ye *tributa* to be gown to the emperor and saying that himself is Cret a kyug."—*Wyclif: Luke* xxiii.

2. The state of being under the obligation to pay such sum; the obligation of contributing; as, To lay a country under tribute.

* **3.** That which was paid by a subject to the sovereign of a country; a tax.

4. A personal contribution; something given or contributed; anything done or given out of devotion or as due or deserved; as, a *tribute* of affection or of respect.

II. Mining:

1. Work performed in the excavation of ore in a mine, as distinguished from *tut-work*, which is upon the non-metalliferous rock, as in sinking shafts and the driving of adits and drifts.

"Some twelve men are now working old dump, concentrating on tribute."—*Money Market Review*, Aug. 29, 1885.

2. The proportion of ore which the tributer or workman receives for his labour.

fàto, fát, fàf, amidst, what, fáll, father; wè, wét, hère, camèl, hër, thère; pine, pit, sire, sir, marine; gò, pòt, or, wòre, wòlf, wòrk, wòb, sòn; mûte, oûb, oûre, ûnite, cûr, rûle, fûll; trý, Sýrian. æ, œ = ò; ey = à; qu = kw.

tribute-money, s. Money paid as tribute.

"They that received *tribute-money*."—*Mat. xvii. 2.*

tribute-pitoh, s.

Mining: The limited portion of a lode which is set to a company of tributers, beyond which they are not for the time being permitted to work.

trib-ute, v. t. [TRIBUTE, s.] To pay as tribute.

"*Tributing* most precious moments to the sceptre of a son."—*Whitlock: Manners of the English.*

trib-ut-er, s. [Eng. *tribut(e)*; -er.]

Mining: One who excavates ore from a mine; one who works on tribute.

"The *tributers* work only at the extraction of ore. They form themselves into parties who agree to work a portion of a lode for a given time in the best manner they can, receiving as their remuneration a certain portion of the value of the ores raised, as may be agreed upon."—*Cassell's Technical Educator*, iii. 64.

tri-ca, s. [Probably from Lat. *tricus* (pl.) = (1) trifles, toys; (2) vexations, perplexities, from *Trica*, an unimportant town in Apulia.]

Bot.: A button-like shield, the surface of which is covered with sinuous concentric furrows. It occurs in Gyrophora, a genus of Lichens. Called also Gyroma.

tri-cáp-su-lar, a. [Pref. *tri-*, and Eng. *capsular* (q. v.).]

Bot.: Three-capsuled; having three capsules to each flower.

tri-car-bal-yl-ló, a. [Pref. *tri-*, and Eng. *carballylic*.] [CARBALLYLIC-ACID.]

tri-car-pól-lar-ý, a. [Pref. *tri-*, and Eng. *carpellary* (q. v.).]

Bot. (Of a pistil): Consisting of three carpels.

tri-car-pél-lite, s. [TRICARPELLITES.]

Palaeobot.: Any individual of the genus *Tricarpellites*.

tri-car-pél-lí-tēs, s. [Pref. *tri-*; Mod. Lat. *carpellus* = a carpel, and suff. -*ites*.]

Palaeobot.: A genus of fossil fruits. Capsule three-celled, three-valved, three-seeded, dehiscence septical. Seeds erect, compressed from back to face; liliun a little above the base of the seed. Placenta central, triangular, angula tumid near the base. Seven species have been described from the London Clay of Sheppey. (*Bowerbank: Fossils of the London Clay*, pp. 76-84.)

tri-ce, trise, v. t. [Sw. *trissa* = a sheave, a pulley, a truckle; *triss* = a spritail-brace; Dan. *trids* = a pulley; *trids* = to haul by means of a pulley, to trice; Norweg. *triss*, *trisset* = a pulley, or sheave in a block.]

1. *Ord. Lang.*: To pull, to haul, to drag, to tug. (*Chaucer: C. T.*, 14,443.)

2. *Naut.*: To haul or tie up by means of a small rope; to hoist.

"They *tricen* uppe thaire saillez."—*Morte Arthure*, 832.

tri-ce, s. [Sp. *tris* = noise made by the breaking of glass, a tripe, an instant; *venir en un tri* = to come in an instant; so also Port. *tris* = the sound of breaking glass; *en han tri* = in a tripe; cf. Scotch in a crack.] A very short time, a moment, an instant. Now used only in the phrase, in a tripe; formerly, on a tripe, with a tripe.

"In a tripe the turnpike men
Their gates wide open threw."
—*Cowper: John Bull*.

tri-cén-nár-í-óus, a. [Lat. *tricennium* = a period of thirty years; *tricens* = thirty, and *annus* = a year.] Pertaining or belonging to the period of thirty years; tricennial.

tri-cén-ní-al, a. [Lat. *tricennalis*, from *tricennium* = a period of thirty years.] Denoting thirty, or what pertains to that number; pertaining or belonging to the term of thirty years; occurring once in every thirty years.

tri-cén-tén-ar-ý, tri-cén-tén-ar-ý, s. & a. [Lat. *tricentus* = three hundred.]

A. As substantive:

1. That which consists of or comprehends three hundred; the space or period of three hundred years. [See extract under *TERCENTARY*.]

2. The commemoration of any event which

occurred three hundred years before; a tercentenary: as, the *tricentenary* of Shakespeare's birth.

B. As adj.: Relating to or consisting of three hundred; relating to three hundred years: as, a *tricentenary* celebration.

tri-géps, a. & s. [Lat. = three-headed: *tri* = three, and *caput* = a head.]

A. As adj.: Three-headed.

B. As substantive:

Anat.: A muscle, one extremity of which is composed of three distinct fascie. The *triceps extensor cubiti* occupies the whole brachial region; the fascie unite into a common mass, the tendon of which is inserted into the posterior and upper part of the olecranon, a bursa, however, intervening. Applied also to the *triceps cruris extensor*.

tri-gér-á-ti-úm (or tí as shí), s. [Mod. Lat., from Gr. *τρικέρας* (*trikeratos*) = three-horned: pref. *tri-*, and Gr. *κέρας* (*keras*), genit. *κέρατος* (*keratos*) = a horn.]

Bot.: A genus of Diatomaceae. Frustules free, valves triangular, areolar, each angle generally with a minute tooth or short horn. Kützinger describes fourteen species, of which Mr. Smith, author of the *British Diatomaceae*, regards three as British, *Triceratium fuvus*, *T. alternans*, marine, and *T. striolatum* (?), from Ulsterish water.

trich-, pref. [TRICHO-]

trich-a-dé-ní-a, s. [Pref. *trich-*, and Gr. *ἀδήν* (*adēn*) = a gland.]

Bot.: A genus of Pangiacae, with a single species, *Trichadenia zeylanica*, the *Tettigaha* or *Tettigasa* of Ceylon. It is dioecious, with alternate oblong leaves, and panicles of pale green flowers. The fruits are about an inch in diameter, and contain one to three seeds, from which an oil is obtained useful for burning, and applied externally in the skin diseases of children. (*Treas. of Bot.*)

tri-chál-çite, s. [Pref. *tri-*; Gr. *χαλκός* (*chalkos*) = brass, copper, and suff. -*ite* (Min.).]

Min.: A hydrated arsenate of copper, occurring in radiated groups on tetrahedrite at the Turjinsk mine, Beresovsk, Urala. Hardness, 2½; lustre, silky; colour, verdigris-green. Compos.: arsenic acid, 88.73; phosphoric acid, 0.67; protoxide of copper, 44.19; water, 16.41 = 100, yielding the formula $3CuO \cdot 4AsO_5 + 5H_2O$.

tri-chú-ás, s. [Gr. *τρίχας* (*trichas*) = a kind of thrush or fieldfare.]

Ornith.: Yellow-throat; a genus of Paridae, with two species. Bill somewhat conic, compressed, the base a little widened, both mandibles equally thick; wings short, the first and second quills slightly graduated, tail rounded; feet large, slender; tarsus long, middle toe shorter than the tarsus, lateral toes equal. *Trichas personatus* is the Maryland Yellow-throat.

tri-chéçh-í-dæ, s. pl. [Mod. Lat. *trichechus*]; Lat. fem. pl. adj. *-idæ*.]

Zool.: A family of Pinnipedia, with a single genus, *Trichechus* (q. v.). In many respects this family is intermediate between the Otariidae and the Phocidae, but the dentition is abnormal. The upper canines are developed into immense tusks, which descend a long distance below the under jaw; the other teeth, including the lower canines, are much alike, small, single, and with one root; the molars with flat crowns. [TRICHECHODON.]

trich-é-chino, a. [Mod. Lat. *trichechus*]; Eng. suff. -*ine*.] Resembling a walrus; of or belonging to the family Trichechidae. (See extract under *OTARINE*.)

tri-chéçh-ó-dón, s. [Mod. Lat. *trichechus*]; suff. -*odon*.]

Palaeont.: A genus of Pinnipedia, from the Pliocene of Europe, apparently nearly allied to *Trichechus* (q. v.).

trich-é-chús, s. [Gr. *τρίχης* (*trichēs*), pl. of *θρίξ* (*thrix*) = hair, and *ἐχῶ* (*echō*) = to have.]

1. *Zool.*: Walrus (q. v.); the sole genus of the family Trichechidae (q. v.), with one species, *Trichechus rosmarus*, from the northern circumpolar regions. Some zoologists consider the Walrus of the North Atlantic to be distinct species from that found in the North Pacific, but they are more usually classed as

varieties. Head round, eyes rather small, muzzle short and broad, with very long, stiff, bristly whiskers on each side; fur very short and adpressed; external ears absent; tail very rudimentary; toes sub-equal. On land the hind feet are turned forward and used in progression, though less completely than in the Otariidae.

2. *Palaeont.*: From the Cromer Forest-bed, and the post-Pliocene of North America.

trich-í, pref. [TRICHO-]

trich-í-a, s. [Mod. Lat., from *θρίξ* (*thrix*), genit. *τρίχός* (*trichos*) = hair.]

Bot.: A genus of Myxogastrea or Gasteromycetous Fungi, having a stalked or sessile, simple, membranous peridium bursting at the summit; spiral threads, which carry with them the spores. The threads and spores are often bright coloured. Species numerous, occurring on rotten wood, &c. They are well represented in Europe.

tri-chí-a-sis, a. [Gr. *τρίχισος* (*trichisōs*).] (See def.)

Surg. & Pathol.: The growth of one or more of the eyelashes in a wrong direction, ultimately bringing it in contact with the anterior portion of the eyeball. Sometimes this is the natural mode of growth, but more frequently it is produced by a disease of the eyelid, or its inversion. The cure is slowly and steadily to remove each eyelash with a broad-pointed and well-grooved forceps, and then repeatedly apply spirits of wine to the place to destroy the follicles.

tri-chíd-í-úm, s. [Latinised dimin. from Gr. *θρίξ* (*thrix*), genit. *τρίχός* (*trichos*) = a hair.]

Bot.: A tender, simple, or sometimes branched hair, which bears the spores of certain fungals, as in the genus *Gaeumtrum*.

tri-chil-í-a, s. [Gr. *τρίχια* (*trichia*) = in three parts, referring to the ternary division of the stigma and the fruit.]

Bot.: The typical genus of Trichilaeae (q. v.). Trees or shrubs with unequally plumate, rarely trifoliate leaves; flowers in axillary panicles; calyx four or five cleft; petals four or five overlapping; stamens eight or ten, united into a tube; fruit capsular, three-celled; seeds, two in each cell. Known species about twenty, the majority from America, the remainder from Africa. The bark of *Trichilia emetica*, called by the Arabs *Roka* and *Elicajia*, is a violent purgative and emetic. The Arab women mix the fruits with the perfumes used for washing their hair; the seeds are made into an ointment with sesame oil, and used as a remedy for the itch. *T. cathartica* is also a purgative. *T. moschata*, a Jamaica plant, has an odour of musk wood. *T. Catigua*, now *Moschoxylon Catigua*, the *Catigua* of Brazil, stains leather a bright yellow.

tri-chil-í-ē-æ, s. pl. [Mod. Lat. *trichili(a)*]; Lat. fem. pl. adj. suff. -*ææ*.]

Bot.: A tribe of Meliaceae, having the embryo without albumen.

tri-chí-na, s. [Mod. Lat., from Gr. *θρίξ* (*thrix*), genit. *τρίχός* (*trichos*) = a hair.]

Zoology:

1. A genus of Nematodea, established by Owen for the reception of the minute spiral flesh-worm, *Trichina spiralis*, discovered in human muscle by Sir James Paget, in 1835, when a student at St. Bartholomew's Hospital, London.

Mr. Hilton, of Guy's, had previously noticed gritty particles in human muscle, and recognized them as the results of parasites, afterwards shown (by Owen) to be young trichinae. The trichinae met with in human muscle are minute immature worms, spirally coiled in small oval cysts, scarcely visible to the naked eye, measuring $\frac{1}{16}$ inch in length and $\frac{1}{32}$ inch in breadth. Sometimes the worms are not

TRICHINA.
m, n. Bands of muscle; t. Worm coiled up in capsule or cyst.

bél, bóy; pént, jówl; cat, çell, chorus, çhin, bench; go, gem; thin, þis; sín, aç; expect, Xenophon, exist. -íng. -cian, -tian = shan. -tion, -sion = shün; -çion, -çion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c = bël, dël.

encysted, and measure $\frac{1}{16}$ inch in length and $\frac{1}{32}$ inch in breadth. The mature and reproductive trichinae inhabit the intestinal canal of mammals, including man, and live for four or five weeks, attaining ability to reproduce on the second day of their introduction. The male is about $\frac{1}{16}$ and the female $\frac{1}{8}$ inch long. The eggs are hatched within the female, and as soon as the embryos are expelled they bore their way into the muscles, and there in about fourteen days assume the form known as *Trichina spiralis*, often setting up trichiniasis (q.v.). Thus the only way in which trichinae can get into the human system is by being swallowed alive with pieces of imperfectly-cooked muscle in which they are encysted. The pig is the great source of infection to man, as it is peculiarly liable to the presence of encysted trichinae. Adult trichinae do, or may, infest the intestinal canal of all animals in the muscles of which the larval forms have been found. These are, besides man, the pig, dog, cat, rabbit, rat, mouse, hedgehog, mole, and badger.

2. Any individual of the genus *Trichina* [I]; a fleshworm. (In this sense there is a plural form, *tri-chi-næ*.)

tri-chi-nal, a. [Mod. Lat. *trichin(a)*; Eng. suff. -*nal*.] Of or belonging to the trichina or to trichinosis.

"Whist Trichow was the first to rear and recognize sexually mature intestinal trichinae in a dog. It yet remained for Zenker to open up a new epoch in the records of trichinal discovery, by a complete diagnosis of the terrible disease which these parasites are capable of producing in the human frame."—*Quain's Dict. Med.* (ed. 1888), p. 1386.

tri-chi-ni-a-sis, tri-chi-nô-sis, s. [Mod. Lat., from *trichina* (q.v.).]

Path.: Fleshworm disease; a morbid condition produced by the ingestion of food containing *Trichina spiralis* in large quantity. The first recorded case occurred in the Dresden Hospital in 1860, but the disease must have existed long before, though its cause and nature were unknown. The first symptoms are prostration and general indispotion; pain and stiffness of the limbs follow, commonly with constipation, but in some cases with severe diarrhoea; then in favourable cases the gastric symptoms abate and the muscular pains diminish. In unfavourable cases the diarrhoea becomes very severe, and pneumonia often supervenes. Death may occur as early as the fifth and as late as the forty-second day of the disease. Epidemics have occurred in Germany; one at Hettstadt in 1863 affected 158 persons, of whom twenty-eight died. A slight outbreak of trichiniasis occurred at New York in 1864.

tri-chi-nised, a. [Mod. Lat. *trichin(a)*; Eng. suff. -*ised*.] Infested with trichinae.

"The ingestion of badly trichinised meat."—*Quain's Dict. Med.* (ed. 1888), p. 1387.

tri-chi-nous, a. [Mod. Lat. *trichin(a)*; Eng. adj. suff. -*ous*.] Pertaining to or connected with trichinae.

tri-chi-ite, s. [Gr. *θριξ* (*thrix*), genit. *τριχός* (*trichos*) = a hair; suff. -*ite* (*Petrol.*)]

Petrol.: A name applied to certain microscopic capillary forms of uncertain nature, frequently met with in vitreous or semi-vitreous rocks. They occur curved or bent, and in aggregated groups.

tri-chi-tēs, s. [Gr. *θριξ* (*thrix*), genit. *τριχός* (*trichos*) = hair; suff. -*ites*.]

Palæont.: A sub-genus of *Pinna*, with five species, from the Oolite of England and France. Shell thick, inequivalve, somewhat irregular, marginia wavy. Full-grown individuals are supposed to have measured a yard across; fragments an inch or more in thickness are common in the Cotteswold Hills.

tri-chi-ūr-a, s. [TRICHIURUS.]

Entom.: A genus of Bombycidae, the male with pectinated, the female with ciliated antennae. The abdomen slightly tufted, that of the male bifid; the wings in both sexes densely clothed with scales. *Trichiura crateri* is the Pale oak-eggar. It is gray with a black band; is about an inch and a quarter across the expanded wings. The larva feeds on hawthorn, alce, and sallow. Not common in Britain.

tri-chi-ūr-ich-thys, s. [Mod. Lat. *trichiu(rus)*, and Gr. *ἰχθύς* (*ichthys*) = a fish.] [TRICHIURUS, 2.]

tri-chi-ūr-i-dæ, s. pl. [Mod. Lat. *trichiu(rus)*; Lat. fem. pl. adj. suff. -*idæ*.]

1. **Ichthy.**: The single recent family of Trichuriformes (q.v.), with nine genera, from tropical and sub-tropical seas. Some of them are surface-fishes, living in the vicinity of the coast, whilst others descend to moderate depths, but all are powerful and rapacious.

2. **Palæont.**: The family is first represented in the Chalk of Lewes and Maestricht. Hemithyrsites and Trichiurichthya, allied to Thyrsites and Trichiu(rus), but covered with scales, are from the Miocene of Licata, where a species of *Lepidopus* also occurs.

tri-chi-ūr-i-for-mēs, s. pl. [Mod. Lat. *trichiu(rus)* (q.v.), and Lat. *forma* = form, appearance.]

Ichthy.: A division of Acanthopterygian Fishes, with two families, Trichuriidae and Palæorhynchidae. Body elongate, compressed, or band-like; mouth-cleft wide, with strong teeth; spinous and soft portions of dorsal and anal of nearly equal extent, long, many-rayed, sometimes terminating in finlets; caudal forked, if present.

tri-chi-ūr-ūs, s. [Pref. *trichi-*, and Gr. *οὐρά* (*oura*) = a tail.]

Ichthy.: Hair-tails; the type-genus of Trichuriidae, with six species, belonging to the tropical marine fauna, but occasionally carried by currents to the northern temperate zone. Body band-like, tapering to a fine point; dorsal extending whole length of the body, ventrals reduced to a pair of scales or entirely absent, anal rudimentary; long fangs in jaws, teeth on palatine bones.

tri-chi-ō, tri-chi-ī, tri-chi-, pref. [Gr. *θριξ* (*thrix*), genit. *τριχός* (*trichos*) = hair.] Pertaining to or resembling hair; having processes more or less resembling hair.

tri-chi-ō-cēph-ā-lūs, s. [Pref. *tricho-*, and Gr. *κεφαλή* (*kephalē*) = the head.]

Zool.: A genus of Nematodea, comprising forms in which two-thirds of the body is filiform, terminating in a point. *Trichocephalus dispar* affects man, and resides chiefly in the cæcum, but rarely causes serious mischief. It varies from an inch and a half to two inches in length; the male is smaller than the female, and has the tail spirally contorted. *T. affinis*, a closely allied species, infesting some of the lower animals, has been known to produce serious irritation of the intestines.

tri-chi-ō-cy-clūs, s. [Pref. *tricho-*, and Gr. *κύκλος* (*kuklos*) = a circle.]

Ichthy.: A genus of Tetrodontina, having the spines elongated like bristles.

tri-chi-ō-cyst, s. [Pref. *tricho-*, and Eng. *cyst* (q.v.).]

Biol. (Pl.): The name given to microscopic vesicular bodies in the internal lamina of the cortical layer in certain of the Infusoria. They are capable of emitting thread-like filaments, probably for offensive and defensive purposes, and in many respects they closely resemble the thread-cells of the Coelenterata.

tri-chō-da, s. [Gr. *τριχόδης* (*trichōdēs*) = like hair, hairy, fine as a hair.]

Zool.: A genus of Ophryogleniidae. An ovate furrow leading to the mouth, with a vibratile flap on its inner wall. Common in putrid infusoria.

tri-chi-ō-dēc-tēs, s. [Pref. *tricho-*, and Gr. *δεκτις* (*dēktēs*) = a biter; *δάκνω* (*daknō*) = to bite.]

Entom.: A genus of Mallophaga, family Phleboteridae. Known species ten, parasitic upon the dog, the fox, the cat, the weasel, the ox, the sheep, deer, and the horse. *Trichodectes latus* is common on puppies.

tri-chi-ō-dēr-ma, s. [Pref. *tricho-*, and Gr. *δέρμα* (*derma*) = skin.]

Bot.: The typical genus of Trichodermaceae (q.v.). Peridium roundish, composed of interwoven, ramified, septate filaments; spores minute, cingobated, then heaped together. *T. viride* grows on fallen trees.

* **tri-chi-ō-dēr-mā-cē-æ, s. pl.** [Mod. Lat. *trichoderm(a)*; Lat. fem. pl. adj. suff. -*æcæ*.]

Bot.: A tribe formerly placed in Gastro-mycetæ, now merged in Mucorini (q.v.).

tri-chō-dēs, s. [TRICHODA.]

Entom.: A genus of Tiliidae. *Trichodes apterius* (= *Clerus apterius*) is a great foe of hive bees. It occurs in Britain.

tri-chi-ō-dēs-ma, s. [Pref. *tricho-*, and Gr. *δέσμος* (*desmos*) = a bond.]

Bot.: A genus of Cynoglossaceæ. Corolla sub-rotate, with the throat naked; anthers exerted, with pointed awns made to adhere together by means of hairs. Plants from India, Egypt, and South Africa. An infusion of the leaves of *Trichodesma indicum* is given in snake-bites, and is considered a diuretic, a blood purifier, and a cooling medicine. This and *T. zeylanicum* are used externally as emollient poultices. The leaves of *T. africanum*, which grows in the Punjab and Scinde, as well as in Africa, are diuretic.

tri-chi-ō-dēs-mi-ūm, s. [Pref. *tricho-*, and Gr. *δέσμιον* (*desmion*) = a bond.]

Bot.: Sea-dust, a genus of Oscillatoridæ. Microscopic algae, the short threads of which are collected in little fascicles which float and form an acun upon the surface of thesea. Ehrenberg and Dupont found that they produced the red colour over large tracts in the Red Sea. Darwin and Hinds found them in the Atlantic and Pacific Oceans, and they have also been observed in the Chinese Sea. Ehrenberg recognizes two species, *Trichodesmium ehrenbergii* and *T. hindii*. Both, when young, are blood-red, though the first becomes green when old. Notwithstanding this, they may not be specifically distinct.

tri-chi-ō-dī-na, s. [Mod. Lat., dimin. from Gr. *θριξ* (*thrix*), genit. *τριχός* (*trichos*) = a hair.]

Zool.: A genus of Urceolariidæ, with five species from salt and fresh water; all parasitic. Animalcules free-swimming, elastic, changeable in shape; oral aperture terminal, posterior extremity discoidal, flat ciliated; contractile vesicle spherical, near termination of pharynx.

tri-chi-ō-dī-ō-dōn, s. [Pref. *tricho-*, and Mod. Lat. *diodon* (q.v.).]

Ichthy.: A genus of Tetrodontina, having the erectile apices on the body reduced to delicate hairs.

tri-chō-di-ūm, s. [TRICHODA.]

Bot.: A sub-genus of *Agrostis*, having the upper empty glume smaller than the lower one, and the palea minute or wanting. There are two British species, *Agrostis canina* and *A. setacea*.

tri-chi-ō-dōn, s. [Pref. *tricho-*, and Gr. *δούς* (*doūs*), genit. *δόντος* (*odontos*) = a tooth.]

Ichthy.: A genus of Trachinina, with one species from Kamchatka.

tri-chi-ō-gās-tēr, s. [Pref. *tricho-*, and Gr. *γαστήρ* (*gastēr*) = the belly.]

Ichthy.: A genus of Labryrinthici, from the rivers of Bengal. It differs from *Ospiro-menus* (q.v.) in having the ventral fins reduced to a single filament.

tri-chi-ō-gās-trēs, s. pl. [Pref. *tricho-*, and Gr. *γαστήρ* (*gastēr*), genit. *γαστρός* (*gastros*) = the belly.]

Bot.: A sub-order of Gasteromycetæ. The leathery peridium breaks when mature, emitting a pulverulent masa of spores and filaments, without a central column. It contains the Puff-balls and one or two species of escent fungus.

tri-chi-ō-g-ēn-ōūs, a. [Pref. *tricho-*, and Gr. *γεννάω* (*gennāō*) = to produce.] Promoting the growth of hair.

tri-chi-ō-glōs-sī-dæ, s. pl. [Mod. Lat. *trichogloss(us)*; Lat. fem. pl. adj. suff. -*idæ*.]

Ornith.: In Reichenow's classification, a family of Psittaci (q.v.). Wallace also considers the group to form a family, and makes it consist of six genera, with fifty species. These birds are exclusively confined to the Australian region.

tri-chi-ō-glōs-sī-næ, s. pl. [Mod. Lat. *trichogloss(us)*; Lat. fem. pl. adj. suff. -*inæ*.]

Ornith.: Brush-tongued Parrots; a sub-family of Psittaciidæ (q.v.). This group differs greatly in its extent in various classifications. [NESTORIDÆ.]

fāt, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēr; pine, pīt, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā; qu = kw.

Their plumage is very beautifully coloured, and they are mostly found in Australia and the Moluccas, some few species extending through the islands of the Pacific.

trich-ô-glôs-sûs, s. [Pref. tricho-, and Gr. γλῶσσα (glôssa) = the tongue.]

Ornith.: The type-genus of Trichoglossidae or Trichoglossina; with twenty-nine species, ranging over the whole of the Austro-Malay and Australian sub-regions, and to the Society Islands. They have an extensile brush-tipped tongue, adapted to extract the nectar and pollen from flowers.

trich-ô-gÿne, s. [Pref. tricho-, and Gr. γυνή (gynê) = a woman.]

Bot.: A hair-like cell, to which the antherozoids in the Roae-spored Algae attach themselves and transfer their contents.

trich-ô-lôg-îo-al, a. [Eng. trichology; -ical.] Of or pertaining to trichology (q.v.).

"There is, it appears, a British Trichological Association, whose president delivered the address; and there is going to be, if it can be got up, a hospital for the treatment of hair diseases." — *Daily News*, Oct. 28, 1887.

tri-chôl-ô-gÿst, s. [Eng. trichology; -ist.] One who makes a scientific study of hair.

"Yesterday evening, at the St. James's Restaurant, the Trichologists met for the second time in Council. It is necessary to explain that these gentlemen are not interested in discovering a remedy for trichinosis in pigs, but for baldness in human kind." — *Echo*, Oct. 28, 1887.

tri-chôl-ô-gÿ, s. [Pref. tricho-, and Gr. λόγος (logos) = a discourse.] The study of human hair, with a view to the prevention of baldness.

"A lecture was delivered last night in St. James's Hall on the striking subject of Trichology and Baldness." — *Daily News*, Oct. 28, 1887.

trich-ô-lô-ma, s. [Pref. tricho-, and Gr. λῶμα (lôma) = the hem, fringe, or border of a robe.]

Bot.: A sub-genus of Agaricus. Spores white; the point of attachment of the gills to the stem annulated. *Tricholoma gambosus* (= *Agaricus gambosus*) is the St. George's Agaric, and one of the best among the edible species.

tri-chô-ma, s. [Τριχόμεα.]

tri-chôm-a-nêç, s. [Pref. tricho-, and Gr. μανός = few, scanty.]

Botany:

1. Bristle-fern; a genus of Hymenophylaceæ. Sori marginal, axile, or terminal; capsules upon an elongated receptacle within a cylindrical or sub-orbulate one-leaved involucre of the same texture as the frond, and opening above; veins forked. Known species, seventy-eight, chiefly from warm countries. One, *Trichomanes radicans*, the Rooting Bristle-fern, is British. The rootstock is creeping; the frond, which is from five to twelve inches long, is twice or thrice pinnatifid. Found in Wales and in Ireland, near Killarney and Wicklow, but is rare.

2. A common name for *Asplenium trichomanes*.

trich-ô-mân-i-dæ, s. pl. [Mod. Lat. trichomanes;] Lat. fem. pl. adj. suff. -idæ.]

Bot.: A family of Jungermanniaceæ.

trich-ô-ma-ni-tês, s. [Mod. Lat. trichomanes;] suff. -ites.]

Palæobot.: A genus of Ferns, apparently akin to Trichomanes. From the Devonian of Britain and North America.

tri-chôm-a-tôse, a. [TRICHOMA.] Matted or agglutinated together; affected with trichoma. (Said of hair.)

trich-ôme, **tri-chô-ma**, s. [Gr. τριχώμα (trichôma) = a growth of hair.]

1. **Botany**: (1) The filamentous thallus of Algae like Conferva.

(2) (Pl.): Hairs on roots, underground stems, the bases of leaf-stalks, &c.

2. **Pathol.**: Plica Polonica (q.v.).

trich-ô-môn-âs, a. [Pref. tricho-, and Mod. Lat. monas (q.v.).]

Zool.: A genus of Trimastigidae (q.v.). Endoparasitic animalcules, free-swimming, soft and plastic, ovate or subfusiform, bearing at the anterior extremity two long sub-equal flagella, a supplementary flagellum depending from the posterior extremity. There are

three species: *Trichomonas batrachorum*, from the intestinal canal of the common frog and toad; *T. limacis*, from the intestinal canal of *Limax agrestis*, the Gray Slug; and *T. vaginalis*, discovered by Dujardin in human vaginal mucus.

trich-ô-mÿc-tër-ûs, s. [Pref. tricho-, and Gr. μυκτήρ (muktîr) = the nose.]

Ichthy.: A genus of Siluridae, sub-family Opisthoptereæ. They are small South American fishes, and many of the species are found at altitudes up to 14,000 feet above the sea-level.

trich-ô-nê-ma, s. [Pref. tricho-, and Gr. νῆμα (nêma) = thread, yarn.]

1. **Bot.**: A genus of Iridaceæ. Leaves radical, slender; perianth, single, petaloid, deeply cleft into six segments, the tube shorter than the limb. Stamens three, filaments hairy; stigmas three, slender, bipartite; capsule ovoid, three-lobed; seeds globose. Known species, twenty-one, chiefly from Southern Europe. One, *Trichonema Columne*, a small bulbous plant, with a single-flowered scape of pale bluish-purple and yellow flowers, is a native of Dawlish, Guernsey, and Jersey. *Trichonema edule* is eaten by the natives of Socotra.

2. **Zool.**: The type-genus of Trichonemidae (q.v.). Animalcules more or less ovate, elastic, and changeable in form; oral aperture distinct, at the base of the flagellum. There is one species, *Trichonema hirsuta*, from fresh water.

trich-ô-nê-mi-dæ, s. pl. [Mod. Lat. trichonema(a);] Lat. fem. pl. adj. suff. -idæ.]

Zool.: A family of Cilio-Flagellate Infusoria. Animalcules free-swimming, with a single terminal flagellum, the remainder of the cuticular surface more or less completely clothed with cilia. There are two genera, *Trichonema* and *Mitophora*.

trich-ô-nô-ti-dæ, s. pl. [Mod. Lat. trichonotus;] Lat. fem. pl. adj. suff. -idæ.]

Ichthy.: A family of Acanthopterygian Fishes, division Blennioformes. They are small carnivorous fishes, of which only two species are known, each constituting a genus; *Trichonotus setigerus*, from the Indian Ocean, having some of the anterior dorsal rays prolonged into filaments, and *Hemerocoetes acanthorhynchus*, from New Zealand, sometimes found far out at sea on the surface.

trich-ô-nô-tûs, s. [Pref. tricho-, and Gr. νῶτος (nôtos) = the back.] [TRICHONOTIDÆ.]

trich-ô-nÿm-pha, s. [Pref. tricho-, and Lat. nympha = a pupa, a chrysalis.]

Zool.: The type-genus of Trichonymphidae (q.v.). Animalcules exceedingly flexible and elastic, often convolute, mostly separable into two distinct regions, consisting of a smaller ovate head-like portion and a larger more or less inflated body. There is one species, *Trichonympha agilis*, endoparasitic within the intestines of white ants.

trich-ô-nÿm-phi-dæ, s. pl. [Mod. Lat. trichonympha(a);] Lat. fem. pl. adj. suff. -idæ.]

Zool.: A family of Holotrichous Infusoria, with three genera: Trichonympha, Pyrsomonas, and Bineynympha. Animalcules freely motile, but rarely swimming, their movements being confined to twisting and writhing motions; cuticular surface ciliate, accompanied, apparently, in some instances, by a nodulating membrane. Occurring as endoparasites in certain neuropterous insects.

tri-chôph-ôr-ûm, s. [Pref. tricho-, and Gr. φῶρός (phorôs) = bearing.]

Bot.: The stipe of certain fungals.

trich-ô-ph-rÿ-a, s. [Pref. trich-, and Gr. ὄφρῦς (ophrys) = the eyebrow.]

Zool.: A genus of Suctorial Tentaculifera. Animalcules without a lorica, ovate or elongate, temporarily affixed in a sessile manner to various objects without the medium of a pedicle; tentacles suctorial, variously distributed. There are two species: *Trichophrya epistylidis*, living on freshwater plants, and *T. digitata*, parasitic on freshwater Entomostraca.

tri-chôp-tër-a, s. pl. [Pref. tricho-, and Gr. πτερόν (pteron) = a wing.]

Entom.: Caddis-flies; a group or sub-order of Neuroptera, with close affinity to the Lepidoptera, through some of the lower forms of

that order. They are grouped in two divisions: (1) Inæquipalpia, with three families, Phryganeidae, Limnophilidae, and Sericostrimidae; (2) Equipalpia, with four families, Leptoceridae, Hydropterygidae, Rhyacophilidae, and Hydrophilidae. They are for the most part moth-like insects, having a smallish head, with the mouth downwards, and usually three ocelli at the vertex; antennæ bristle-shaped, generally long, the first joint thicker than the rest, and more or less hemispherical; hind wings wider, shorter, and more rounded than the anterior, venation comparatively simple, surface of wings generally clothed with hairs, which sometimes simulate scales. In the males a few species the hinder wings are rudimentary, and in one genus, Eubolya, the females are almost destitute of wings. Coxæ large and conical, meeting in the middle line of the body; tibiae spurred at the apex, and generally also in the middle. The larvæ have well-developed thoracic legs and anal hooks, but no pro-legs; they live in tubes composed of various materials by different species; the pupa lies free in the case, or sometimes in a special cocoon, and is only active just before its metamorphosis.

tri-chôp-tër-an, s. [TRICHOPTERA.] One of the Trichoptera; a caddis-fly.

tri-chôp-tër-ous, a. [TRICHOPTERA.] Of or pertaining to the Trichoptera (q.v.).

tri-chôp-tër-ÿg-ÿ-dæ, s. pl. [Mod. Lat. trichopterygæ, genit. trichopterygia;] Lat. fem. pl. adj. suff. -idæ.]

Entom.: A family of Necrophaga, with ten genera. Oblong or oval beetles, pubescent or polished; antennæ with eleven joints, the last three constituting a club; tarsi three-jointed; elytra sometimes short; wings feather-shaped, sometimes rudimentary or absent.

tri-chôp-tër-ÿx, s. [Pref. tricho-, and Gr. πτερόν (pteron) = a wing.]

Entom.: The typical family of Trichopterygide, with twenty-seven or more British species. The minutest of all known beetles, some of them only a fifteenth of an inch in length. They are found in decaying vegetable matter, the litter of old haystacks, under manure heaps, &c.

trich-ô-pÿr-ÿte (yr sa ir), s. [Pref. tricho-, and Eng. pyrite.]

Min.: The same as MILLERITE (q.v.).

tri-chord, s. & a. [Pref. tri-, and Eng. chord (q.v.).]

A. As substantive:

Musie: An instrument with three strings or chords.

B. As adj.: Having or characterized by three strings or chords.

trich-ô-sân-thês, s. [Pref. tricho-, and Gr. ἀνθος (anthos) = a blossom, a flower. Named from the beautifully-fringed flowers.]

Bot.: A genus of Cucurbitaceæ. Trailing or climbing plants, with twice- or thrice-cleft tendrils; cordate, entire, or three to five-lobed leaves, and monoecious flowers, the males in racemes, the females generally solitary. The fruit is either very long or roundish. *Trichosanthes colubrina*, the Serpent Cucumber, or the Viper Gourd, from Central America, has fruit six or more feet long, when half ripe streaked with green, when fully ripe orange yellow. *T. anguina*, a native of India or the Indian Archipelago, resembles it, but the fruits are only about three feet long. It is cultivated in the East for the fruit, which is cooked and eaten in curry; its seeds are considered a cooling medicine. Most of the other species have short fruits. Those of *T. cucumerina*, wild in India, are oblong and only two or three inches long by one to one and a half in diameter. The unripe fruit is very bitter, but is eaten by the Hindoos in their curries. It is used medicinally as a laxative, its seeds as antifebrile and anthelmintic, and the expressed juice of the leaves as an emetic. The fruit of *T. dioica* is eaten in India. It is also used medicinally. The large tubers of *T. cordata* are considered in India tonic, and the root and stem of *T. palmata* are used in diseases of cattle, as inflammation of the lungs, &c.

Rom. Antiq.: In early times, the whole family sat together in the Atrium, or public room; but when mansions were built upon a large scale, one or more spacious banqueting halls commonly formed part of the plan, such apartments being classed under the general title of Triclinia. The word Triclinium, however, in its strict signification, denotes not the apartment, but a set of low divans or couches grouped round a table; these couches, according to the usual arrangement, being three in number, and arranged round three sides of the table, the fourth side being left open for the ingress and egress of the attendants, to set down and re-

tri-cūs'-pī-date, a. [TRICUSPID.]

Bot.: Having three points.

tri-gy'-cle, s. [Gr. *τρι-* (*tri-*) = three, and *κύκλος* (*kuklos*) = a circle, a wheel.] A three-

wheeled machine for travelling on the road. It is an improvement on the old velocipede, and was introduced in its present form about 1878. The earliest patterns were rear-steering (STEERING, 2), but were soon superseded by front-steering machines, the latter being steadier, and having better hill-climbing qualities. Tricycles were first worked by levers carrying pedals, which were connected by chains to a cranked axle. This form of machine was very powerful, but tiring to the knees, and speedily gave way to the rotary action, which consists of a cranked axle, the pedals being fastened on it. This axle has also a toothed wheel, sometimes placed in the centre and then called central-gear, sometimes at the end, this wheel in most machines catches in each link of a chain, and the chain runs over a corresponding toothed wheel fixed on the axle of the driving wheel. The various types are now merged chiefly into one with the steering-wheel in front, steered direct by its fork; but some are made with two steering-wheels abreast in front, driven by a single wheel behind.

tri-gy'-cle, v. f. [TRICYCLE, s.] To ride or travel on a tricycle.

tri-gy'-clist, s. [Eng. *tricycl(e)*; *-ist*.] One who rides on a tricycle.

"The last protégé of the British Crown—the Khedive Tewfik—is, we may add, a tricyclist also."—*Pall Mall Gazette*.

tri-dac'-na, s. [Lat., from Gr. *τρίδακνα* (*tridákna*), from *τρίδακνος* (*tridáknos*) = eaten at three bites, used of large oysters; pref. *tri-*, and Gr. *δάκνω* (*dákno*) = to bite.]

1. **Zool.**: Giant-clam; the sole-genus of the family Tridacnide (q.v.), with seven species, from the Indian Ocean, China Seas, and the Pacific. Shell massive, extremely hard, calcified until almost every trace of organic structure is obliterated; trigonal, ornamented with radiating ribs and imbricating foliations, margins deeply indented; byssal sinus in each valve, large, close to theumbo in front; hinge teeth 1-1. This genus attains a greater size than any other bivalve. *Tridacna gigas*, from the Indian Ocean, the shell of which often weighs 500 lbs., contains an animal weighing about twenty pounds, which, according to Captain Cook, is very good eating. Darwin (*Journal*, p. 466) says of this species: "We stayed a long time in the lagoon, examining . . . the gigantic clam-shells, into which if a man were to put his hand, he would not as long as the animal lived be able to withdraw it." The Paphian Venus, springing from the sea, is usually represented as issuing from the opening valves of a Tridacna. The natives of the Eastern Archipelago often use the valves as bathing-tubs; in London they may occasionally be seen in fishmongers' windows, and two, measuring about two feet across, are used as holy-water stoups in the Church of St. Sulpice in Paris.

2. **Palæont.**: A few species from the later Tertiary of Poland.

tri-dac'-ni-dæ, s. pl. [Mod. Lat. *tridacna*]; Lat. fem. pl. adj. suff. *-idæ*.]

Zool.: A family of Conchiferous Molluscs, group Integro-pallialia (q.v.). Shell regular, equivalve, truncated in front; ligament external; sometimes the animal is attached by a byssus, at others it is free. One genus Tridacna (q.v.) with a sub-genus Hippopus (q.v.).

tri-dac'-tyl, tri-dac'-tyle, tri-dac'-tyl-ous, a. [Gr. *τρι-* (*tri-*) = three, and *δάκτυλος* (*dáktylos*) = a finger, a toe.] Having three toes or fingers; three-fingered, or composed of three movable parts attached to a common base.

tri-dac'-tyl-ūs, s. [TRIDACTYL.]

Entom.: A genus of Gryllide, with no tarsal on the hind legs, but in place of them two more pointed movable appendages.

B. Transitive: * 1. To befool; to play or trifle with. * How doth our byshop trifle and mocke us. -Barners: Proverbs; Crayle, i. 20. * 2. To make a trifle of; to make trivial or of no importance. (Shakesp.: Macbeth, ii. 4.) * 3. To waste in trifling; to waste to no purpose; to spend in trifles; to fritter. (Followed by away.) * Such men . . . having trifled away youth, are reduced to the necessity of trifling away age. -Bolingbroke: Retirement & Study. ¶ To trifle with: To treat as a trifle, or as of no importance, consideration, or moment; to treat without respect or consideration; to play the fool with; to mock.

tri-fie (2), v.t. [A.S. trifelian, from Lat. tribulo.] To pound, to bruise. (Prov.)

tri-fier, s. [Eng. trifler; -er.] One who trifles; one who acts with levity. * Improve the remnant of his wasted span, And, having lived a trifler, die a man. -Cooper: Retirement, 14.

tri-fling, * try-fling, pr. par., a., & s. [TRIFLE, v.] A. As pr. par.: (See the verb.) B. As adjective:

1. Acting or talking with levity or without seriousness; frivolous. * And still thy trifling heart is glad To join the vain, and court the proud. -Byron: To a Youthful Friend. 2. Being of little or no value, importance, or moment; trivial, insignificant, petty, unimportant, worthless, frivolous. * Blind was he born, and his misguided eyes Grown dim in trifling study, blind he dies. -Cooper: Charity, 358.

C. As subst.: The act of one who trifles; an acting or talking without seriousness. * Using therein nothing but triflings and delates. -Holinshead: Chron. Ireland (ca. 1579). ¶ Trifling and trivial differ only in degree, the latter denoting a still lower degree of value than the former. What is trifling or trivial does not require any consideration, and may be easily passed over as forgotten. Trifling objections can never weigh against solid reason; trivial remarks only expose the shallowness of the remarker. What is frivolous is disgraceful for any one to consider. Dress is a frivolous occupation when it forms the chief business of a rational being. A frivolous objection has no grounds whatever.

tri-fling-ly, adv. [Eng. trifling; -ly.] In a trifling manner; with levity; without seriousness; with regard to trifles. * By the labours of commentators, when philosophy became abstract, or triflingly minute. -Goldsmith: Polite Learning, ch. li.

tri-fio-li-ūm, s. [Lat. = trefoil; pref. tri-, and folium = a leaf, from its three leaflets.]

1. Bot. : Trefoil, Clover; the typical genus of Trifolieae (q.v.). Low herbs, with the leaves, as a rule, digitately trifoliate; flowers capitate, spiked, rarely solitary, with red, purple, white, or yellow flowers; calyx five-toothed, the teeth unequal; wings united by their claws to the obtuse keel, persistent; legume about as long as the calyx, one to four-seeded, indehiscent. Species about 150, chiefly from the northern hemisphere. The clovers particularly abound in Europe, but many species are natives of the United States. The true clovers have herbaceous, not twining stems, roundish heads or oblong spikes of small flowers, the corolla remaining in a withered state till the ripening of the seed. Of all the species the most important to the farmer is the Common Red Clover (T. pratense). This is a native of Europe, but is everywhere naturalized in the United States, growing freely in meadows and pastures, and widely cultivated. The White or Dutch Clover (T. repens) is found in all parts of North America, and is a common native of most parts of Europe, nearly always springing up when a barren heath is turned up with the spade or plough. The flowers of this species are the particular delight of bees, though all the clover flowers are favored by them. The Crimson or Italian Clover (T. incarnatum) bears spikes of rich crimson flowers, and is much cultivated in France and Italy as a forage plant, being also grown as a decorative garden annual. Yellow Clover, or Hop Trefoil (T. agrarium), is very common in parts of the United States and Europe.

2. Agric. : A local agricultural name for Trifolium incarnatum. (Britain & Holland.) T. pratense is largely sown for fodder crops; the cultivated is larger than the wild plant, and succeeds better on heavy than on light soil. T. medium, called the Zigzag Clover, from the bends at each joint of its stalk, has also red flowers, but has generally more pointed leaves, while the white spot seen on T. pratense is, as a rule, absent; its seeds are not always obtainable. T. incarnatum, also wild, was cultivated on the continent before it was sown in Britain. The tubes of T. pratense and T. incarnatum do not differ very perceptibly in length; but Darwin (Orig. of Species, ch. liii, iv.) shows that the proboscis of the humble-bee is too short to sip the honey of the former, while it can obtain that of the latter species, and the Common Red Clover is therefore fertilized by humble-bees alone. Humble-bees in quest of honey are also the great agents in fertilizing other species of clover. The White Clover (T. repens) and the Alsike Clover (T. hybridum) the latter introduced from the continent, are excellent for pasture; both have white or pinkish flowers. Two Yellow Clovers, T. procumbens and T. filiforme, are also cultivated on pasture grounds. The growth of clover is greatly promoted by a sprinkling of lime. The seeds of the plants may be sown broadcast from February to May and from August to October. Some are used for their ornamental character as border-plants.

* trif-ō-ly, * trif-fō-ly, s. [Lat. trifolium = trifolium.] Trefoil. * She was crowned with a chaplet of trifoly. -Ben Jonson: Coronation Entertainment.

tri-fōr-is, s. [TRIFORIUM.] Zool. & Paleont. : A sub-genus of Cerithium, with thirty recent species, ranging from Nor-

way to Australia. Shell sinistral; anterior and posterior canals tubular; the third canal accidentally present, forming part of a varix. Fossil in the Eocene of Britain and Frauce.

tri-fōr-i-ūm, s. [Lat. tri = three, and fores = doors.]

Arch. : A gallery or arcade in the wall over the pier arches which separate the body from the aisles of a church. The arcade is not in general carried entirely through the wall, but there is commonly a passage-way behind it which is often continued in the thickness of the wall round the entire building; in some cases, however, the arcade is entirely open, as at Lincoln Cathedral. Sometimes the triforium is a complete upper story over the side aisle, having a range of windows in the side wall, as at Ely, Norwich, Gloucester choir, Peterborough, Lincoln choir, Westminster Abbey, &c. In some continental churches of Decorated and later work, the aisle roofs are kept entirely below the level of the triforium, and the back of it is pierced with a series of small windows, corresponding with the ornamental work in the front, thus forming what is sometimes called a transparent triforium. (Parker.) The cut shows the triforium in the Priory Church of St. Bartholomew the Great, London.

TRIFORIUM.

* tri-form', a. [Lat. triformis, from tri = three, and forma = form.] Having a triple shape or form. (Milton: P. L., iii. 730.)

* tri-form'-i-ty, s. [Eng. triform; -ity.] The quality or state of being triform.

† tri-form'-ous, a. [Eng. triform; -ous.] Triform (q.v.).

* The inscription served . . . to show the idea entertained by the pagan Egyptians of a triformous deity, 'the father of the world,' who assumed different names according to the triad under which he was represented. -Wilkinson: Manners of the Egyptians (ed. Birch), ii. 514.

tri-fūr-cate, tri-fūr-cāt-ēd, a. [Pref. tri-, and Eng. furcate, furcat (q.v.).] Having three branches or forks; trichotomous.

trifurcated-hake, s. [TADPOLE-HAKE.]

trif (1), v.t. [Cf. Dan. trykke; Ger. drücken = to press.] To fill, to stuff. * By how much the more a man's skile is full trif'd with flesh, blood, and natural spirits. -More: Mystery of Godliness, p. 105.

trig (2), v.t. [TRIGON.] To stop, as the wheel of a vehicle, by putting something down to check it; to skid, as a wheel.

trig, s. [TRIO (2), v.] A stone, wedge of wood, or the like, placed under a wheel, barrel, &c., to check its rolling; a skid.

trig, a. & s. [Sw. trygg; Dan. trygg = safe, secure.]

A. As adjective: * 1. Safe, secure. 2. Neat, spruce, tidy. (Prov. & Scotch.) * Fling the earth into the hole, and mask a things trig again. -Scott: Antiquary, ch. xxiv. 3. Well; in good health; sound. (Prov.) * B. As subst. : A coxcomb.

* trig'-a-mist, s. [Eng. trigam(y); -ist.] 1. One who has been married three times. 2. One who has three wives or three husbands at the same time.

trig'-a-mous, a. [TRIGAMY.] * 1. Ord. Lang. : Of, pertaining to, or of the nature of trigamy. 2. Bot. : Having three sorts of flowers (male, female, and hermaphrodite) on the same head.

* trig'-a-my, s. [Gr. τρι- (tri-) = three, and γάμος (gamos) = a marriage.] 1. The act of marrying or the state of being married three times. 2. The act or state of having three wives or three husbands at the same time. [BIOGAM, 11.]

tri-gās-tric, a. [Pref. tri-, and Eng. gastric (q.v.).] Anat. (Of certain muscles): Having three bellies or protuberant portions.

tri-gem'-in-al, a. [Mod. Lat. *trigeminus*, from Lat. *trigeminus* (q.v.).] (See etym. & compound.)

trigeminal-nerve, s. pl.

Anat.: The trifacial nerves (q.v.)

* **tri-gem'-in-ous, a.** [TRIGEMINL]

1. Being one of three born together; born three at a time.
2. Threefold.

tri-gem'-in-ūs (pl. tri-gem'-in-i), s. [Lat. = three at a birth; pref. *tri-*, and *geminus* = a twin.]

Anat. (PL): The trigeminal nerves (q.v.).

tri-gem'-ic, a. [Pref. *tri-*; Gr. *γεννάω* (*gennao*) = to produce, and Eng. suff. *-ic*.] Containing organic anhydride, aldehyde, and ammonia.

trigeneic acid, s.

Chem.: $C_4H_7N_3O_2 = (CN)_2O \cdot C_2H_5(NH_2)O$. An acid containing the elements of cyanic anhydride and aldehyde ammonia, obtained by passing the vapour of cyanic acid over aldehyde. It crystallizes in small prisms, slightly soluble in water, insoluble in alcohol. When slightly heated it melts and carbonizes, giving off alkaline vapours having the odour of chinoline.

trig-ger, *trick-ër, s. [Dut. *trekker* = a triger; *trecker* = one who draws or pulls, from *trekken* = to pull, to draw.]

1. **Firearms**: A catch which, being retracted, liberates the hammer of a gun-lock; hence, a lever or catch performing a similar service in a trap or other like mechanism. [HAIK-TAIGER.]

2. **Shipbuild.**: A piece of wood placed under a dog shore to hold it up until the time for launching. The dog-shore butts against cleats on the bulwarks, and is knocked away when the signal is given for launching.

3. **Vehicles**: A catch to hold the wheel of a carriage in descending a hill.

trigger-fish, s.

Ichthy.: A popular name for the genus *Balistes*, from the fact that when the dorsal fin is erected, the first ray, which is very

A. TRIGGER-FISH (*Balistes aculeatus*). B. DETAILS OF DORSAL FIN.

thick and strong, holds its elevated position so firmly that it cannot be pressed down by any degree of force; but if the second ray be depressed, the first immediately falls down like the hammer of a gun when the trigger is pulled.

* **trigger-line, s.** The line by which the gun-lock of ordnance was operated.

* **tri-gin'-tals, s. pl.** [Lat. *triginta* = thirty.] Trentals; the number of thirty masses to be said for the dead.

* Trentals or trigintals were a number of masses to the tale of thirty, instituted by Saint Gregory. — *Aylife*.

trig'-la, s. [Mod. Lat., from Or. *τριγλή* (*trigle*) = a mullet.]

1. **Ichthy.**: A genus of Cottidae, with about forty species, from tropical and temperate zones. Head paralleloiped, with the upper surface and sides entirely bony, the enlarged infraorbital covering the cheek; two dorsal fins; three free pectoral rays, serving as organs of locomotion as well as of touch; teeth villiform. Dr. Günther refers the species to three groups: (1) *Trigla*, no palatal teeth, scales of moderate size; (2) *Lepidotrigla*, no palatal teeth, scales of moderate size; (3) *Prionotus*, with palatal teeth. They are generally used as food, being caught by the trawling net, or by hook and line. Most of the Gurnards, as the

species are generally called, live near the bottom, feeding on molluscs, crustaceans, and small fishes. The Gray Gurnard (*T. gurnardus*) is a common European species, as also *T. pini*, the Red Gurnard, which is much used as food. The Sapphirine Gurnard (*T. hirundo*) is a rare species, its pectoral fins of a beautiful blue color.

2. **Palæont.**: Two or three species are known, from the Tertiary.

tri-glāns, s. [Pref. *tri-*, and *glans* = the nut-like fruit of forest trees, an acorn.]

Bot.: A fruit having three nuts within an involucre, as the Spanish Chestnut.

tri-glō'-chin, s. [Gr. *τριγλόχης* (*triglochis*), genit. *τριγλόχινος* (*triglochinos*) = three-barbed; pref. *tri-*, and Gr. *γλοχίς* (*glochis*), genit. *γλοχίνος* (*glochinos*) = a projecting point. Named from the three projecting carpels.]

Bot.: Arrow-grass; a genus formerly called *Juncago*, typical of the order Juncaginaceae. Saline plants; root fibrous, leaves very narrow; flowers in a naked, straight spike or a raceme; perianth of six erect, concave, deciduous leaves; atamens six, anthers nearly sessile, stigmas three to six, sessile, plumose; capsules three to six, one-seeded, united by a longitudinal receptacle; albumen none. Known species about ten, from the temperate regions, Australia being a favorite habitat. Two species are European, *Triglochin palustre*, the Marsh, and *T. maritimum*, the Sea-side Arrow-grass. The first has a three-celled, nearly linear, the latter a five-celled, ovate fruit. The first occurs in marshy meadows, by riversides, and in ditches; the latter in salt marshes.

trig-ly, adv. [Eng. *trig*, a.; *-ly*.] Neatly, sprucely.

tri-glyph, *trý-glyph, s. [Lat. *triglyphus*, from Gr. *τριγλύφος* (*triglyphos*) = thrice-cloven

... a triglyph, from *τρι-* (*tri-*) = three, and *γλύφος* (*glyphō*) = to carve.]

FRIEZE, SHOWING TRIGLYPHS.

Arch. (PL): Ornaments repeated at equal intervals in the Doric frieze. Each triglyph consists of two entire gutters or channels cut to a right angle, called glyphs, and separated by their interstices, called femora, from each other, as well as from two other half-channels that are formed at the sides.

* The triglyph, which I affirm'd to be charged on the Doric frieze, is a most inseparable ornament of it. ... By their triangular furrows, or gutters rather, they seem to me as if they were meant to convey the guttae or drops which hang a little under them. — *Evelyn: On Architecture*.

tri-glyph'-ic, tri-glyph'-ic-al, a. [Eng. *triglyph*; *-ic, -ical*.]

1. Consisting of, or pertaining to, a triglyph or triglyphs.

2. Containing three sets of characters or sculptures.

trig'-ness, s. [Eng. *trig*, a.; *-ness*.] Neatness, spruceness.

tri-gōn, s. [Fr. *trigone*; Lat. *trigonum*, from Gr. *τριγωνος* (*trigōnos*) = a triangle, from *τρι-* (*tri-*) = three, and *γωνία* (*gōnia*) = an angle.]

* **I. Ord.**
Lang.: A triangle.

* To cut their way, they in a trigon file. *Beaumont: Bosworth Field*.

II. Technically:

* **1. Antiquities**:
(1) A kind of triangular harp or lyre.

(2) A game at ball, played by three persons atanding so as to be at the angles of a triangle.

LOVE, WITH TRIGON.

2. Astrology:

(1) The junction of three signs, the zodiac being divided into four trigons, named respectively after the four elements—the watery trigon, including Cancer, Scorpio, and Pisces; the earthy trigon, including Taurus, Virgo, and Capricornus; the airy trigon, Gemini, Libra, and Aquarius; and the fiery trigon, Aries, Leo, and Sagittarius.

* The warring planet was expected in person, and the fiery trigon seemed to give the alarm. — *O. Harvey: Pierce's Supererogation*.

(2) Trine; an aspect of two planets distant 120° from each other.

tri-gō'-na, s. [TRIGON.]

1. **Entom.**: A genus of Social Bees. Small Apidae forming their nests within hollow trees or the cavities of rocks in America, Sumatra, Java, &c.

2. **Zool. & Palæont.**: A genus of Veneridae (q.v.), with twenty-eight recent species, from the West Indies, Mediterranean, Senegal, Cape, India, and the west coast of America. Shell trigonal, wedge-shaped, sub-equilateral; ligament short, prominent; hinge-teeth 3-4; pallial sinus rounded, horizontal. Found fossil in the Miocene of Bordeaux.

tri-gōn'-al, a. [Eng. *trigon*; *-al*.]

* **I. Ord. Lang.**: Triangular; having three angles or corners.

* A spar of a yellow hue shot into numerous trigonal pointed shoots of various size, found growing to one side of a perpendicular fissure of a stratum of freestone. — *Woodward*.

II. Technically:

1. **Anat.**: A term applied to a triangular space on the fundus of the bladder.

2. **Bot.**: Three-cornered.

tri-gō-nē, s. [TRIGON.]

Anat.: A smooth, triangular surface in the bladder, immediately behind the urethral opening, at the anterior part of the fundus.

tri-gō-nē-la, s. [Mod. Lat., dimin. from Gr. *τριγωνος* (*trigōnos*) = triangular. So named because the standard is flat and the spreading also give the flowers a triangular appearance.]

Bot.: Fenugreek, a genus of Trifoliceae. Leaves trifoliate; calyx five-toothed, the teeth nearly equal; petals distinct, keel obtuse; flowers in few or many-flowered heads, or in short racemes. Legume straight or slightly curved, two-valved, much longer than the calyx. Known species fifty, all from the eastern hemisphere. One, *Trigonella orthopodioides*, the Bird's-foot Fenugreek, is British. It has decumbent stems, two to five inches long, orbiculate leaflets, toothed at the end, the peduncles bearing about three flowers; the legumes nearly twice the length of the calyx, and containing about eight seeds. Found in dry, sandy pastures, generally near the sea. It flowers in July and August. A decoction of it is used as an emollient, and its flowers are made into poultices for veterinary use. *T. Fenum græcum*, the Fenugreek, or Fenugree, is an erect annual, one or two feet high, a native of the Mediterranean region and of the Punjab. It is cultivated in India and other warm countries, and occasionally in England, where, however, the climate is too variable to render it a profitable crop. In India the seeds are largely used as a condiment and as a substitute for coffee; they also yield a yellow dye. Containing the principle coumarin, which imparts the pleasant sweet smell to hay, they are used to render damaged hay palatable to horses, and are an ingredient in concentrated cattle food.

* **tri-gō-nē-li-tēs, s.** [Mod. Lat., dimin. from *trigona*; suff. *-ites*.]

Palæont.: The name given by Parkinson in 1811 to the opercula of certain species of ammonites. These opercula are divided into two symmetrical pieces by a straight median suture, and were mistaken for bivalve shells.

tri-gō-ni-a, s. [Mod. Lat.] [TRIGON.]

1. **Bot.**: The single genus of the order Trigoniaceae. Tropical American trees with opposite, stipulate leaves, their inflorescence in panicles, irregular flowers, and long, hairy seeds.

2. **Zool. & Palæont.**: The sole recent genus of Trigoniadae (q.v.), with three species (or varieties) from Australia. Shell almost entirely nacreous, thick, tuberculated, or ornamented with radiating or concentric ribs;

posterior side angular; ligament small and prominent; hinge-teeth 2-3, diverging. Animal with a long, pointed foot, bent sharply, heel prominent; gills ample, the outer smaller than the inner, united behind the body to each other and to the mantle. The species are very active; one taken alive from the dredge by Mr. Stutchbury, and placed on the gunwale of his boat, leapt overboard, clearing a ledge of four inches. They are probably migratory, as in dredging for them it is very uncertain where they may be obtained, though they abound in some parts of Sydney Harbour. A hundred fossil species are known, widely distributed in space, and ranging in time from the Lias to the Chalk, but almost, if not entirely absent from the Tertiary. The shell is wanting or metamorphic in Limestone strata.

trigonia-grits, s. pl.

Geol.: Two grits, an upper and a lower, characterized by the presence of species of Trigonia. They constitute part of the Upper Ragstone of the Inferior Oolite at Leckhampton Hill and Cleeve Hill, near Cheltenham.

* tri-gō-ni-ā-p'ē-sā, s. pl. [Mod. Lat. trigonia(a); Lat. fem. pl. adj. snff. -accē.]

Bot.: Von Martine's name for an order which he separates from Polygalaceae (q. v.), on account of its opposite leaves, the possession of stipules, &c.

trig-ō-ni-ā-dæ, i tri-gōn-i-dæ, s. pl. [Mod. Lat. trigonia; Lat. fem. pl. adj. snff. -i-dæ.]

1. Zool.: A family of Conchiferous Molluscs, group Integro-pallialia. Shell equivalve, close, trigonal, umbones directed posteriorly; ligament external, interior nacreous; hinge-teeth few, diverging; pallial line simple. Animal with the mantle open; foot long and bent; gills two on each side, recumbent; palpi simple. [TRIGONIA.]

2. Palæont.: Five fossil genera, ranging from the Lower Silurian to the Trias.

† tri-gōn-i-dæ, s. pl. [TRIGONIDÆ.]

trig-ōn-ō, pref. [TRIGON.] Triangular; having a triangular process or processes.

trig-ōn-ō-car-pōn, s. [Pref. trigono-, and Gr. καρπός (karpós) = fruit.]

Palæobot.: A genus of fossil plants founded on three- or six-angled nut-like fruits, commencing in the Devonian and abundant in the Carboniferous Rocks. The exterior of the fruit was probably fleshy. It was once believed to be a palm fruit; then Sir Joseph Hooker considered it the solitary fruit of the recent Salisburia, a taxod, though Principal Dawson believes it to have been Sigillarioid. Known British Carboniferous species six, from Lancashire, Salop, Somerset, &c. Two species occur in the Permian.

trig-ōn-ō-ceph-ā-lūs, s. [Pref. trigono-, and Gr. κεφαλή (kephalē) = the head.]

Zool.: A genus of Crotalidae, with three species, ranging from Mexico to Patagonia. Body elongate, fusiform, back slightly compressed; head large and distinct from neck, depressed, triangular; muzzle prominent, angular; tail short, tapering to a point; crown-plates small, scale-like; eye moderate, pupils vertical; scales keeled.

trig-ō-nōc'-ēr-ōūs, a. [Pref. trigono-, and Gr. κίρας (keras) = a horn.] An epithet applied to an animal having horns with three angles, as some goats and sheep.

trig-ōn-ō-grāp'-tūs, s. [Pref. trigono-, and Gr. γραπτός (grapτός) = painted.]

Palæont.: A genus of Graptolites, with three British species from the Lower Silurian.

trig-ō-nōm-ē-tōr, s. [TRIGONOMETRY.] An instrument for plotting angles and laying down distances upon paper, and for solving problems in plane trigonometry by inspection. It consists of a semicircular protractor, with a long arm carrying a T-square and graduated sliding-scale.

trig-ō-nō-mēt-ric, a. [Eng. trigonometr(y); -ic.] Pertaining or relating to trigonometry; trigonometrical.

trig-ō-nō-mēt-ric-al, a. [Eng. trigonometr(y); -ical.] Pertaining to trigonometry;

performed by or according to the rules of trigonometry; ascertained by or deduced from trigonometry.

trigonometrical-coordinates, s. pl. Elements of reference, by means of which the position of a point on the surface of a sphere may be determined with respect to two great circles of the sphere. Called also Spherical-coordinates.

trigonometrical-curves, s. pl. Curves whose equations are respectively y = sin x, y = cos x, y = ver-sin x, y = tan x, y = cot x, y = sec x, and y = cosec x. If a circle be conceived to roll upon a straight line, containing in the same plane, and at the point of contact perpendiculars to be erected equal to the sine, cosine, versed sine, &c., of the arc from the origin of the arcs to the point of contact, the loci of the extremities of these ordinates will be the curves whose equations are given.

trigonometrical-lines, s. pl. Lines which are employed in solving the different cases of plane and spherical trigonometry, as radius, sines, cosines, tangents, cotangents, secants, cosecants, &c. These lines, or the lengths of them, are called the trigonometrical functions of the arcs to which they belong. When an arc increases through all its values from 0° to 360°, the sines and cosecants are positive in the first and second quadrants, and negative in the third and fourth; the tangents and cotangents are positive in the first and third quadrants, and negative in the second and fourth; the cosines and secants are positive in the first and fourth quadrants, and negative in the second and third, and the versed sines and covered sines are positive throughout.

trigonometric-series, s. pl. Infinite series which are of the form a sin x + b sin 2x + c sin 3x + &c., and a cos x + b cos 2x + c cos 3x + &c.

trigonometrical-survey, s. A survey of a country carried out from a single base by the computation of observed angular distances; but the term is usually confined to measurements on a large scale embracing a considerable extent of country and requiring a combination of astronomical and geodetical operations. A trigonometrical survey may be undertaken either to ascertain the exact situation of the different points of a country relatively to each other and to the equator and meridians of the terrestrial globe, for the purpose of constructing an accurate map, or to determine the dimensions and form of the earth by ascertaining the curvature of a given portion of its surface, or by measuring an arc of the meridian. The most minute accuracy and the most perfect instruments are required in all the practical parts of such operations, and regard must be had to the curvature of the earth's surface, the effects of temperature, refraction, altitude above the level of the sea, and a multitude of other circumstances which are not taken into account in ordinary surveying. In a trigonometrical survey the whole area to be surveyed is divided into a system of triangles, commencing from a carefully measured base, which forms the side of the first triangle. These are further intersected by a network of smaller triangulations, which will fix all the secondary points on the surface, and finally the details of the ground are completed by measurement and the theodolite. The value of this work of triangulation lies in the exactitude of the base-line and the determination of the true position of the starting-point at one of its extremities. Extreme care in measurement and a most painstaking repetition of observations are essential; for errors committed at this period of a survey are not merely continued, but increased, as the work proceeds. Having completed the determination of the base-line, the more prominent or most central and convenient points are fixed for the greater triangulation. Powerful theodolites are used for this purpose, and care is taken that the triangles are as nearly equilateral as possible, so as to avoid the inaccuracy which taking very acute angles would induce. The triangulation proceeds from the base-line in a series of gradually increasing triangles, and these are repeatedly taken, their means carefully calculated, and their reduction to the true surface completed by mathematical calculation. When the greater triangulation is completed, the minor points, those of less importance, are united by a series of smaller triangles, until the relative

positions of all the prominent natural and artificial features of the area (the whole of which, with the exception of the base-line, have been fixed by mathematically corrected trigonometrical calculation), can be finally marked down on the map. The remainder of the work is done by absolute measurement with a chain, a small theodolite being still used for correction and to determine the bearings of the points with regard to those of the greater triangles. [ORDNANCE-SURVEY.]

trig-ō-nō-mēt-ric-al-ly, adv. [Eng. trigonometrical; -ly.] In a trigonometrical manner; by means of or according to the rules of trigonometry.

trig-ō-nōm-ē-tr'y, s. [Pref. trigono-, and Gr. μέτρον (metron) = a measure.] In its primitive and narrower sense the measuring of triangles, or the science of determining the sides and angles of triangles by means of certain parts which are given; but in the modern acceptation of the term it includes all theorems and formulae relative to angles and circular arcs, and the lines connected with them, these lines being expressed by numbers or ratios. Trigonometry is divided into three branches, Plane, Spherical, and Analytical. Plane trigonometry treats of the relations existing between the sides and angles of plane triangles. The principal object of plane trigonometry is to show the methods of solving plane triangles; that is, the method of finding the remaining parts of a plane triangle, when three are given, one of the three being a side. Spherical trigonometry treats of the relations existing between the sides and angles of spherical triangles. The principal object of this branch is to show the method of solving spherical triangles; that is, the method of finding the remaining parts of a spherical triangle, when any three are given. Analytical trigonometry treats of the general relations and properties of angles, and trigonometrical functions of angles. In every plane triangle there are six parts or elements—three angles and three sides. When any three parts of a plane triangle are given, one of which is a side, the remaining parts may be found, and the operation of finding them is called Solving the triangle, the operation being facilitated by tables of sines, tangents, secants, &c. (See these words.) Thus, any triangle ABC may be solved by the aid of the following formulae, where a denotes the sum of the three sides, or s = a + b + c. The capitals denote angles, and the small letters the sides opposite to the respective angles.

sin A/a = sin B/b = sin C/c (1);

a + b/a - b = tan 1/2(A + B) / tan 1/2(A - B) (2);

sin 1/2 A = sqrt((s-b)(s-c)/bc);

cos 1/2 A = sqrt(A s(s-a)/bc) (3).

If the triangle is right angled at A, the formulae used in the solution are the following:

sin B = b/a; cos B = c/a; tan B = b/c (4);

b = a sin B = c tan B = sqrt(a^2 - c^2) = sqrt((a-c)(a+c)) (5).

In spherical, as in plane trigonometry, there are six parts in every triangle—three sides and three angles. When any three are given, the other three may be found, except in the particular case of a triangle having two right angles. In that case, if two right angles and a side opposite one be given, each given part will be 90°, and the solution is indeterminate.

tri-gō-nōn, s. [Gr. = a triangle.]

Musical: A small harp or triangular lyre used by the ancients. [TRIGON.]

* trig-ōn-ōūs, a. [TRIGON.] Triangular; trigonal.

* trig-ōn-ō-y, s. [Pref. tri-, and Gr. γόνυ (gonē) = a birth.] Threefold birth or product. "Man . . . in whom be three distinct souls by way of trigony."—Hoswell.

trig-ō-rhī-na, s. [Pref. trigono-, and Gr. ρίς (rhís), genit. ρίνος (rhínos) = the snout.]

Palæont.: A genus of Rajidae, from the Tertiary strata of Monte Postale.

bōil, bōy; pōut, jōwī; cat, çell, chorus, çhin, bench; go, çem; thin, çhis; sin, aç; expect, Xenophon, exist, -ing. -cian, -lian = çhan. -tion, -sion = çhün; -tion, -çion = çhün. -ctious, -tious, -sious = çhūs. -ble, -dle, &c. = beç, deç.

Bot.: Having three pistils or styles; having three carpels.

tri-hō-dra, a. [TRIHEDRON.] Having three equal sides.

trihedral arseniate of copper, s.
Min.: The same as **CLINOCLASE** (q.v.).

tri-hō-drōn, s. [Pref. *tri-*, and Gr. *δῶρα* (*hedra*) = a seat, a base.] A figure having three equal sides.

tri-hēp-tīl-a-mine, s. [Pref. *tri-*; Eng. *heptyl*, and *amine*.]

Chem.: $C_7H_{15}N = (C_7H_{15})_3N$. Tricentanthylamine. A liquid obtained by heating sulphite of centanthyl-ammonium with a mixture of quicklime and slaked lime. It is pale yellow by transmitted, greenish yellow by reflected light, strongly efflorescent, and turns brown on exposure to the air; insoluble in water, but soluble in alcohol and ether. Its salts are all deliquescent and form oily drops or syrupy masses.

tri-hī-lā-tae, s. pl. [Pref. *tri-*, and Lat. *hilum* = a little thing, a trifle.]

Bot.: The fifthieth order in Linnæus's Natural System. Genera: Sapindus, Malpighia, Begonia, Berberis, &c.

tri-hī-late, a. [TRIHILATE.]
Bot.: Having three apertures. Used of some pollen grains, &c.

* **tri-hōr-al**, a. [Pref. *tri-*, and Eng. *horal* (q.v.).] Occurring once in every three hours.

tri-ju-gate, **tri-ju-goūs**, a. [Gr. *τρίζυγος* (*trizygos*) = three-yoked; pref. *tri-*, and *ζυγον* (*zygon*) = a yoke.]

Bot.: A term used when the petiole of a pinnate leaf bears three pairs of leaflets.

† **tri-jūnc-tion**, s. [Pref. *tri-*, and Eng. *junction*.] The junction of three things at one point.

"To have the *trijunction* of Tibet, India, and Burma focussed within the four corners of a map."—*Atenaeum*, Jan. 29, 1887, p. 164.

tri-lābe, s. [Etym. doubtful.]

Surg.: An instrument used in extracting foreign substances from the bladder. It has three fingers, which are expanded and contracted after the instrument is *in situ*.

tri-lām-in-ar, a. [Pref. *tri-*, and Eng. *lamina* (q.v.).]

Physiol.: Consisting or composed of three-fold laminae or layers of cells; as, the *trilaminar* structure of the blastoderm. [TRIFLORBLASTIC.]

† **tri-lāt-ēr-al**, a. [Lat. *trilateralis*, from *tri-* = three, and *latus*, genit. *lateralis* = a side.] Having three sides; three-sided, as a triangle.

† **tri-lāt-ēr-al-lŷ**, adv. [Eng. *trilateral*; *-ly*.] With three sides.

* **tri-lāt-ēr-al-nēss**, s. [Eng. *trilateral*; *-ness*.] The quality or state of being trilateral.

tri-lēm-ma, s. [Pref. *tri-*, and Gr. *λήμμα* (*lēmma*) = something received, an assumption, from *λαμβάνω* (*lambanō*) = to take.]

1. *Logic*: A syllogism with three conditional propositions, the major premises of which are disjunctively affirmed in the minor.
2. Hence, generally, any choice between three alternatives.

tri-lēt-tō, s. [Ital.]
Music: A short trill.

tri-lin-ē-ar, a. [Pref. *tri-*, and Eng. *linea* (q.v.).] Composed or consisting of three lines.

tri-liū-gual, **tri-liū-guar** (u as w), a. [Lat. *tri-* = three, and *lingua* = a tongue, a language.] Consisting of or written in three languages.
"The much-noted Rosetta stone . . . bears upon its surface a *trilingual* inscription."—*Taylor*.

tri-lit-ēr-al, a. & s. [Pref. *tri-*, and Eng. *litteral* (q.v.).]

A. As adj.: Consisting of three letters.
"The Arabic roots are universally *triliteral*."—*Sir W. Jones: Fourth Anniversary Discourse*.

B. As subst.: A word consisting of three letters.

triliteral-languages, s. pl. A term applied to the Semitic languages, because every word in them consists, in the first instance, of three consonants, which represent the essential idea expressed by the word, while special modifications are produced by certain vowels or additional letters.

tri-lit-ēr-al-ism, **tri-lit-ēr-al-ī-tŷ**, **tri-lit-ēr-al-nēss**, s. [Eng. *triliteral*; *-ism*, *-ity*, *-ness*.] The quality or state of being triliteral; the condition or character of consisting of three letters.

"But no such thing is at present practicable for the Semitic; this contains two characteristics—the *triliterality* of the roots and their inflection by internal change, by variation of vowel—which belong to it alone."—*Whitney: Life & Growth of Languages*, ch. xii.

tri-lith, s. [Fr. *trilith*.]

Archæol.: A trilithon (q.v.).

"Much greater mechanical skill, moreover, was required to raise the superincumbent masses and fit them into their exact position, than to rear the rude standing-stone, or upheave the capstone of the cromlech on to the upright *trilith*."—*Wilson: Prehistoric Annals of Scotland*, li. 2.

tri-lith-īc, a. [Eng. *trilith*; *-ic*.] Of, belonging, or relating to a trilith; consisting of three stones.

tri-lith-ōn, s. [Gr. *τρίλιθος* (*trilithos*) = of or with three stones; *τρίλιθον* (*trilithon*) = a temple at Baalbec, with huge columns consisting of three stones each.]

Archæol.: A monument, probably sepulchral, either standing alone or forming part of a larger work, and consisting of three stones: two uprights, connected by a continuous impost or architrave. The best-known examples of trilithons in the United Kingdom are at

TRILITHONS.
1. Stonehenge. a. Outer circle; b. Trilithons; c. Part of inner oval of upright posts. 2. Tomb of Isidorus (A. E. 222) at Khatouna, near Aleppo. 3. Trilithon at Eikeb (late Roman?), about forty-five miles S. E. from Tripoli.

Stonehenge, or Salisbury Plain. In the trilithons still standing, each of the uprights has a tenon on its surface, and the under sides of the architrave or horizontal piece have each two mortices into which the tenons fit. According to Olaus Magnus (*de Gent. Sept.*, p. 49) similar monuments were formerly erected in Sweden over the graves of nobles and other eminent persons; and Fergsson (*Rude Stone Monuments*, p. 101), considers that the trilithon "is only an improved dolmen, standing on two legs instead of three or four." (See extract.)

"We must not, however, attribute too much importance to the similarity existing between the megalithic erections in various parts of the world. Give any child a box of bricks, and it will immediately build dolmens, cromlechs, and *trilithons*, like those of Stonehenge, so that the construction of these remarkable monuments may be regarded as another illustration of the curious similarity existing between the child and the savage."—*Lubbock: Prehistoric Times* (ed. 1878), p. 133.

trill, s. [Ital. *trillo* = a trill, a shake.]
I. *Ordinary Language*:

1. A warbling, quavering sound; a rapid, trembling aerie or succession of sounds.
"The blackbird pipes in artless trill."
Warton: *Inscription in a Hermitage*.

2. A consonant pronounced with a trilling sound, as *l* or *r*.

II. *Music*:

1. The same as **SHAKE** (q.v.).
"I have often . . . attributed many of his *trills* and quavers to the coquetry of the weather."—*Taylor*, No. 222.

2. The rapid repetition of a note in singing [VIBRATO.]

trill (1), v. t. & i. [Ital. *trillare* = to trill, to shake, to quaver; Dut. *trillen*; Ger. *trillern*.]

A. Trans.: To utter or sing with a quavering or tremulousness of voice. (*Thomson: Summer*, 706.)

B. Intransitive:
1. To shake, to quaver; to sound with tremulous vibrations.
"To judge of *trilling* notes and tripping feet."—*Dryden*. (*Todd*.)

2. To sing with quavers; to pipe.

trill (2), * **tril**, * **tryll**, v. t. & i. [Sw. *trilla* = to roll; *trilla* = a roller; Dan. *trille* = to roll, to trundle. The same word as Icel. *thyria* to whirl; Eng. *thrill*, *thirl*, or *drill*.]

A. Trans.: To turn round; to twirl
"By thundering on the sordid sodas smarters
Which daily chance as fortune *trilles* the ball."
Gascoigne: Fruits of Warra.

B. Intransitive:
* 1. To turn, to twirl.
2. To flow in a small stream or in rapid drops; to trickle.
"But through his fingers, long and slight
Fast *trilled* the drops of crystal bright."
Scott: Lord of the Isles, iv. 14.

tri-lī-ā-qē-ē, s. pl. [Mod. Lat. *trilium*];
Lat. fem. pl. adj. suff. *-aceæ*.]

Bot.: Paris; an order of Dicotyledons. Herbs, with tubers or rhizomes, simple stems, and verticillate, membranous, simple leaves; flowers large, solitary, hermaphrodite; sepals three, herbaceous; petals three, much larger than the sepals, coloured or herbaceous; stamens six to ten; styles three to five, free, or vary three to five-celled, ovules in two rows, indefinite; fruit succulent. From the north temperate zone. Known genera four, species thirty. (*Lindley*). [PARIS.]

* **tri-lī-būb**, s. [Etym. doubtful.] A cant name for anything trifling or worthless.

tri-lī-ŷng, s. [THREΞ.]
* 1. One of three children born at the same birth.
2. A composite crystal composed of three individuals.

tri-lī-ōn (1 as y), s. [Pref. *tri-*, and Eng. (*million*).]

Arith.: The product of a thousand raised to the fourth power; a number denoted by a unit followed by twelve ciphers. In English notation a number expressed by a unit followed by eighteen ciphers; or a million raised to the third power.

tri-lī-um, s. [Lat. *trilix* = woven with three sets of fleashes, triple; pref. *tri-*, and *licum* = the ends of a weaver's thread. So called because of the ternary arrangement running through the calyx, corolla, styles, and leaves.]

Bot.: The typical genus of Triliceæ. Sepals three, herbaceous; petals three, coloured; stigmas three, sessile; berry superior, three-celled, many-seeded. Known species seventeen, all from North America. The fleshy roots of *Trilium erectum* (= *T. pentatum*), the Beth-root, Indian Balm, or Lamb's Quarters, is used as a tonic, antiseptic, &c., by the Shakers. It is about a foot high, with rhomboid leaves, and drooping, fetid, purple flowers.

tri-lō, s. [Ital.]
Music: A trill, a shake.

tri-lō-bate, **tri-lō-bate**, **tri-lōbed**, a. [Pref. *tri-*, and Eng. *lobate*, *lobed*.] Having three lobes.

tri-lō-bā-tion, s. [Eng. *trilobate*; *-ion*.] The state or condition of being trilobed.
"In some cases . . . this *trilobation* is only obscurely marked."—*Nicholson: Palæont.*, II. 351.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pit, sīre, salr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, oūb, oūre, unite, oūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā; qu = kw.

tri-lô-bi-ta, s. pl. [Mod. Lat., from Gr. τρεῖς (treis) = three, and λοβός (lobos) = a lobe.]

Palæont.: An order of Crustacea, to which different positions in the class have been assigned, but which are now regarded as an early and more generalized type from which the living and more specialized Isopoda have arisen. Body usually more or less distinctly trilobate in a longitudinal direction; there is a cephalic shield, generally bearing a pair of sessile, compound eyes; the thoracic somites are movable upon one another, and vary greatly in number; the abdominal segments coalesce to form a caudal shield (the pygidium); and there is a well-developed upper lip (the hypostome), formed by a doubling of the head-shield. The Trilobita are exclusively Palæozoic, and range from the Upper Cambrian (in which the Primordial Trilobites of Barrande are found) to the Lower Carboniferous of Europe and America, attaining their maximum in the Silurian. More than 500 species are known, distributed in many genera, which are arranged in about twenty families.

tri-lô-bi-te, s. [TRILOBITE.]

Palæont.: Any individual of the order Trilobita (q.v.). The body was protected by a well-developed chitinous shell, divided laterally into three regions: (1) a cephalic shield; (2) a variable number of body-rings; and (3) a caudal shield, tail, or pygidium—commonly found detached from each other. The cephalic shield (A) is usually more or less semicircular, with an elevated portion, the glabella (a), usually grooved, and bounded by the fixed cheeks (b), to which the free cheeks (c) which bear the eye are attached by what is known as the facial suture (f), indications of which are present in Limulus.

TRILOBITE.

covered by a thin cornea. The number varies greatly, Barrande having found as few as fourteen and as many as fifteen thousand facets in each eye in different types. Behind the cephalic shield comes the thorax (B), composed of a number of segments (from two to twenty-six), capable of more or less movement on each other; in several genera this freedom of movement was so great that species could roll themselves up into a ball, like a hedgehog. The thorax is usually trilobed, each body-ring exhibiting the same trilobation, being composed of a central, more or less convex portion, the axis, with two accessory portions, the pleurae (p). The tail is also composed of a number of segments (from two

plate, situated in front of the mouth in many species, and closely resembling the lip-plate of Apus, a recent Phyllopod. Next, Woodward found the remains of a maxillary palp in Asaphus platycephalus; and in another individual of the same species Billings found what he considered to be the remains of eight pairs of legs, but Dana and Verrill believed them to be the arches to which the legs were attached. From Walcott's examinations of sections of rolled-up specimens, it appears that the thoracic appendages were slender, five-jointed legs, in which the terminal segment formed a pointed claw, and the basal segment carried a jointed appendage, homologous with the epipodite of many recent Crustacea. On each side of the thoracic cavity was attached a row of bifid, spiral brachial appendages, and appendages serving also as gills were probably attached to the bases of the thoracic limbs. The mouth was situated behind the hypostome, and bounded by four pairs of jointed manducatory appendages, the basal joints of which were partly or entirely modified to act as jaws. Trilobites vary greatly in size, some being scarcely larger than a pin's head, while species of Asaphus have been met with two feet in length. They appear to have lived on muddy bottoms in shallow water, feeding on small marine animals, and probably swam on their backs, as do the recent Apus and the larval forms of Limulus.

trilobite-schists, s. pl.

Geol.: A name originally applied by Murchison to the Llandoilo Flags, from the fact that trilobites were recorded from Llandoilo by Lhwyd as early as 1698. (H. B. Woodward: Geol. England & Wales, p. 70.)

trilobite-slates, s. pl.

Geol.: A name given by the Rev. D. Williams to the Pilton beds, from the fact that Phacops latifrons has been found in them. (H. B. Woodward: Geol. England & Wales, p. 129.)

tri-lô-bit-ic, a. [Eng. trilobite(-ic); -ic.] Of, pertaining to, or resembling a trilobite.

tri-lôc-y-lar, a. [TRILOCULINA.]

Bot.: Having three cells. (Used of fruits.)

tri-lôc-y-li-na, s. [Pref. tri-; Lat. locus = a little place, dimin. of locus = a place, and fem. sing. adj. suff. -ina. (See def.)]

1. Zool.: A genus of Foraminifera, having the test partly divided into three chambers. 2. Palæont.: One British species from the Middle Eocene, and three from the Pliocene.

tri-lô-gy, s. [Gr. τριλογία (trilogia), from τρι = three, and λόγος (logos) = a word, a speech.]

1. Lit. & Drama: A series of three dramas, which, though complete each in itself, bear a certain relation to each other, and form one historical and poetical picture. The term belongs more particularly to the Greek drama. In Athens it was customary to exhibit on the same occasion three serious dramas, or a trilogy, at first connected by a sequence of subject, but afterwards unconnected, and on distinct subjects, a fourth or satyric drama being also added, the characters of which were satyrs. Shakespeare's Henry VI. may be called a trilogy. [TRITROLOGY.] 2. Fig.: Any literary production consisting of three parts forming a connected whole.

"His delectful trilogy of Nottingham speeches."—St. James's Gazette, Oct. 25, 1887.

tri-lô-ph'-ô-dôn, s. [Pref. tri-; Gr. λóφος (lophos) = a crest, and suff. -odon.]

Palæont.: A sub-genus or section of Mastodon (q.v.), in which the molars have three ridges.

tri-lô-ph'-ô-dônt, a. [TRILOPHODON.] Of or belonging to the sub-genus Trilophodon; having molars with three ridges.

* tri-lû'-mîn-ar, * tri-lû'-mîn-ôis, a. [Lat. tri = three, and lumen, genit. luminis = light.] Having three lights.

trim, * trym, * trymme, a., adv., & s. [TRIM, s.]

A. As adjective:

1. Neat and in good order; having everything appropriate and in its right place; properly adjusted, snug, neat, tidy, smart.

"Where lies the land to which yoe ship must go? Festively she puts forth in trim array."—Wordsworth: Sonnets.

* 2. In good or proper order for any purpose; properly equipped.

"Thirteen trim barks thronghlike furnished and appointed with good mariners and men of warre."—Doctonabed: Chronicle: Edw. III. (an. 1374).

* 3. Nice, fine. (Used ironically.)

"There's a trim rascal let in."—Shakespeare: Henry VIII, v. 4.

* B. As adv.: Neatly, finely, well.

"Young Adam Cupid, he that shot so trim, When King Cophetua loved the beggar-maid."—Shakespeare: Romeo & Juliet, II. 1.

C. As substantive:

1. Dress, garb, ornament.

"The eslander aimed to see His neighbour in such trim."—Cooper: John Gilpin.

2. State of preparation; order, condition, disposition.

"He was out of trim altogether, owing to his having to read so hard for the examination."—Field, July 16, 1867.

3. The state of a ship or her cargo, ballast, masts, &c., by which she is well prepared for sailing.

"That done, bears up to th' prize, and views each limb, To know her by her rigging from th' new abode."—Dryden: Prætor's Conquest of Granada.

¶ Trim of the masts:

Naut.: Their position in regard to the ship and to each other, as near or distant, far forward or much aft, erect or raking.

trim, trymme, v. t. & i. [A.S. trymian, tryman = to make firm, strengthen, to set in order, to array, to prepare, from trym = firm, strong; cogn. with Low Ger. trim.]

A. Transitive:

I. Ordinary Language:

1. In the same sense as II. 2. (1).

2. To make trim; to put or set in due order for any purpose; to adjust; to make neat and pleasing to the eye.

"Some bound in order, others loosely etrow'd, To dress thy bowyer, and trim thy new abode."—Dryden: Virgils; Eccl. II. 70.

3. To invest or embellish with extra ornaments; to decorate or ornament, as with ribbons, lace, or the like.

"It is many seasons—I should say years—since jackets made of velvet, and handsomely trimmed, were worn."—Daily Telegraph, Sept. 29, 1887.

* 4. To provide or furnish with necessary equipment; to equip.

"[Sir Andrew Dudley] being but single manned, had a grate conficte with three Scottish shippes, being double manned and trimmed with ordnance."—Fabyan: Chronicle (an. 1566).

5. To dress up; to put in a proper state as regards clothes; to deck, to array.

"Our youth got me to play the woman's part, And I was trimmed to Julia a gown."—Shakespeare: Two Gentlemen, IV. 4.

* 6. To prepare, to dress, to treat.

"There hang down certaine square flappes compacted of a klad of strawe which is made rough and rugged with extreme heat, and is so trimmed, that it glittereth in the auncie beames, like unto a glasse, or an helmet well burnished."—Hackluyt: Voyages, I. 116.

7. To bring to a trim, compact, or neat condition by removing all superfluous, loose, or straggling appendages or matter; hence, to clip, pare, cut, prune, or the like.

"Had neither dressed his feet nor trimmed his beard."—2 Samuel xix. 24.

8. To adjust according to circumstances.

"Lord Harrington is not the sort of statesman to trim his opinions according to the expediency of conciliating or not conciliating."—Daily Telegraph, Nov. 6, 1885.

* 9. To rebuke, to reprove sharply, to beat, to chastise.

II. Technically:

1. Carp.: To dress, as timber; to make smooth; to fit to anything.

"When workmen fit a piece into other work, they say they trim it in a piece."—Mozon: Mechanical Exercises.

2. Nautical:

(1) To adjust, as a ship or boat, by arranging the cargo or disposing the weight of persons or goods so equally on each side of the centre and at each end, that she shall sit well in the water and sail well. A vessel is said to be trimmed by the head or by the stern respectively, when the weight is so disposed as to make her draw more water towards the head than towards the stern, or the reverse.

"In order to trim the vessel the carts were moved astern."—Daily Chronicle, Oct. 1, 1885.

(2) To arrange in due order for sailing.

"So they rose and trimmed their wherry."—Blackie: Lays of Highlands & Islands, p. 8.

B. Intrans.: To hold or adopt a middle

TRANSVERSE SECTION OF TRILOBITE.

a. Dorsal crust; b. Visceral cavity; c. c. Legs (enlarged); d. d. Epipodite; e. e. Spinal gills. (Enlarged.)

In *Sao hirsuta* to twenty-eight in the genus *Amphion*, anchylosed or amalgamated. The extremity is sometimes rounded, but may be prolonged into a spine, and the ends of the pleurae of the tail-segments may also be produced into spine-like processes. With regard to the under-surface and appendages of the Trilobites much remains to be discovered. The first structure met with on the lower surface was the hypostome, a broad, forked

course between parties, so as to appear to favour each.

"They wanted no such aristocrats or trimming Whigs for that constituency."—Daily Chronicle, Oct. 5, 1888.

* 1. To trim away: To lose or waste in fluctuating between parties.

* 2. To trim forth: To trick out, to dress out, to set off.

3. To trim up: To dress up; to make trim or neat.

"I found her trimming up the diadem On her dead mistress."

Shakspeare, Antony & Cleopatra, v. 2.

* tri-mac-u-lar, a. [Lat. tri = three, and macula = a spot.] Marked with three spots.

tri-mas-tig-i-dæ, s. pl. [Mod. Lat. trimastix, genit. trimastig(is); Lat. fem. pl. adject. suff. -idæ.]

Zool.: A family of Flagellata Pantostomata, with four genera. Animals naked, free-swimming or temporarily adherent; flagella three in number, equal or sub-equal, inserted close to each other; no distinct oral aperture.

tri-mas-tix, s. [Pref. tri-, and Gr. μάστιξ (mastix) = a whip.]

Zool.: A genus of Trimastigidae (q.v.), with one species, Trimastix marina, found in salt water, with decaying vegetation. Animals ovate or pyriform; endoplast with contractile vesicles conspicuous.

tri-mem-bral, a. [Pref. tri- = three, and Eng. member; -al.] Consisting of or having three members.

tri-mēr-a, s. pl. [Mod. Lat., from Gr. τριμερής (trimērēs) = tripartite.]

Entom.: One of the sections into which Latreille divided the Coleoptera. The tarsi have only three true joints, the joint which is apparently the analogue of the third joint in the Pentamera being rudimentary at the base of the claw-joint. The section comprises two families, Endomychidae and Coccinellidae, each with a single genus. The species of Coccinella are familiarly known as Lady-birds. They are found everywhere, sometimes in immense numbers.

tri-mēr-ī-la, s. [Mod. Lat., dimin. from Gr. τριμερής (trimērēs) = tripartite.]

Palæont.: The type-genus of Trimerellidae, (q.v.), with two species from the Lower and Upper Silurian of Canada.

tri-mēr-ī-lī-dæ, s. pl. [Mod. Lat. trimerell(a); Lat. fem. pl. adject. suff. -idæ.]

Palæont.: A family of Brachiopoda. Shell inequivalve, calcareous; beaks usually prominent, or sometimes obtusely rounded, and either massive or solid, or divided by a partition into two chambers. There is a well-developed hinge-area, and a wide deltidium, bounded by two ridges, the inner ends of which serve as teeth, though true teeth are not present. Each valve is furnished with muscular platforms. The genera are characteristic of the Upper Silurian, and especially of the Guelph Formation of North America.

tri-mēr-ēs-u-rīd, s. [TRIMERESURUS.]

Zool.: Any individual of the genus Trimeresurus (q.v.). They are venomous arboreal snakes, in colour resembling the foliage among which they live, naturally sluggish until disturbed, when they become fierce and aggressive, drawing back the head and anterior part of the body and then dashing forward with great rapidity. They are seldom more than two feet long, and their bite causes fever, nausea, and vomiting; but the bite of larger specimens causes much more serious, and sometimes fatal symptoms.

tri-mēr-ēs-ūr-ūs, s. [Gr. τριμερής (trimērēs) = tripartite, and οὐρά (oura) = the tail.]

Zool.: A genus of Crocodylia, with sixteen species ranging over India, Formosa, the Philippines, and Celebes. Head triangular, covered above with small scales, except the foremost part of the snout and above the eyebrows, body with more or less distinctly keeled scales; tail prehensile.

tri-mēr-ō-ōph-a-lūs, s. [Gr. τριμερής (trimērēs) = tripartite, and κεφαλή (kephalē) = the head.]

Palæont.: A sub-genus of Phacops. [PHACOPIDEÆ.]

tri-mēr-ōūs, a. [TRIMERA.]

1. Bot.: Having three parts; having the number three running through its several organs. Used when there are three divisions of the calyx or three sepals, three divisions of the corolla or three petals, and three stamens.

2. Entom.: Of or belonging to the Trimeres (q.v.).

* tri-mēs-tēr, s. [Fr. trimestre, from Lat. trimestris, from tri = three, and mensis = a month.] A term or period of three months.

* tri-mēs-tral, * tri-mēs-trī-al, a. [TRIMESTER.] Of or pertaining to a trimester; occurring every three months; quarterly.

tri-mēr-ō-tēr, s. & a. [Lat. trimetrus, from Gr. τριμετρος (trimetros) = consisting of three measures: τρι- (tri-) = three, and μέτρον (metron) = a measure.]

A. As subst.: A division of verse consisting of three measures of two feet each.

"This foot yet, in the famous trimeters Of Decius and Ennius, rare appears."

Ben Jonson: Horace; Art of Poetria.

B. As adj.: Consisting of three poetical measures, forming an iambic line of six feet.

tri-mēth-yl, s. [Pref. tri-, and Eng. methyl.] A compound containing three atoms of methyl.

trimethyl-glycerin, s.

Chem.: C₆H₁₄O₃ = (C₂H₅)₃O₃. Trimethylin.

A liquid formed by heating acrolein, methylic alcohol, and acetic acid for several hours to 100°. It has an agreeable odour, sp. gr. '9433 at 0°, is soluble in water, and boils at 148°.

tri-mēth-yl-īn, s. [Eng. trimethyl; -in.] [TRIMETHYL-GLYCERIN.]

tri-mēth-ric, a. [Pref. tri-, and Eng. metric (q.v.).] Crystall.: The same as ORTHORHOMBIC (q.v.).

tri-mēth-ric-al, a. [Pref. tri-, and Eng. metrical (q.v.).] The same as TRIMETER (q.v.).

tri-mē-ly, * trim-līe, adv. [Eng. trim, a.; -ly.] In a trim or neat manner; neatly, nicely; in good order.

"Came there a certain lord, neat, trimly dress'd, Fresh as a bridegroom." Shakspeare: Henry IV. i. 1.

tri-mēr, s. [Eng. trim, v.; -er.]

I. Ordinary Language:

1. One who trims, fits, arranges, ornaments, or sets in order: as, a coal-trimmer—that is, a labourer who arranges the cargo of coal in a ship.

2. One who chastises or reprimands; a sharp, shrewish person.

3. A person or thing of superior excellence; something specially good, great, or noteworthy.

"In the last round [he] met with a trimmer from No. 4 trap, which, fatally wounded, died over the fence."—Field, July 16, 1887.

4. A tool to pare or trim: as, a lamp-wick trimmer.

II. Technically:

1. Bricklay.: Brick-trimmer; a flat brick arch, turned from the face of the chimney to the timber-trimmer to support the slab.

2. Carp.: A joist into which others are framed or trimmed; as the hearth-trimmer of chimneys; stair-trimmers, into which the rough-strings of stairs are framed; the tail-trimmers, which receive the ends of floor-joists on the side of the chimney, when they cannot be inserted into the wall on account of flies.

3. Politics: One who fluctuates between parties, especially political parties.

* (1) One who refuses to identify himself with any party of extreme views.

"A trimmer cried (that heard me tell this story) 'Fie, Mistress Cooke! faith, you're too rank a Tory! Wish not Whigs beheaded, but pity their hard cases.'"

Dryden: Epilogue to Duke of Guise.

(2) A time-server or turncoat, who shifts his political allegiance to advance his interests.

"He was the chief of those politicians whom the two great parties contemptuously called Trimmers. Instead of quarrelling with this nickname, he [Halifax] assumed it as a title of honour, and vindicated, with great vivacity, the dignity of the appellation. Every thing good, he said, trims between extremes. The temperate zone trims between the climate in which men are reared and the climate in which they are frozen. The English Church trims between Anabaptist madness and the Papist lethargy. The English constitution trims between Turkish despotism

and Polish anarchy. Virtue is nothing but a just temper between opposites any one of which, if indulged in to excess, becomes vice. Nay, the perfection of the Supreme Being himself consists in the exact equilibrium of attributes, none of which could preponderate without disturbing the whole moral and physical order of the world. Thus Halifax was a Trimmer on principle."—Macaulay: Hist. Eng., ch. II.

4. Fishing: A dead line for pike.

* Espying a trimmer, I seized it to my mouth, and re-landed at a small natural pier, lo! a pike."—John Wilson: Notes Ambrosiana, i. 47.

tri-ming, pr. par. a., & s. [TRIM, v.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As substantive:

I. Ordinary Language:

1. The act of one who trims, arranges, or ornaments.

2. The act or practice of one who fluctuates between parties; inconstancy.

3. Ornamental appendages to a garment, as lace, ribbons, &c.

* "Narrow bands of fur are to be the favourite trimmings for early as well as deep winter."—Daily Telegraph, Sept. 29, 1887.

4. (Pl.): The accessories to any dish or article of food. (Colloq.)

"A select company of the Bath footmen presents their compliments to Mr. Weller, and requests the pleasure of his company this evening, to a friendly swarty, consisting of a boiled leg of mutton with the usual trimmings."—Dickens: Pickwick, ch. xxviii.

5. The act of reprimanding or chastising; a beating. (Colloq.)

II. Shipbuild.: The final shaping of ship-timbers, &c., after the conversion or rough shaping has been accomplished.

tri-ming-ly, adv. [Eng. trimming; -ly.] In a trimming manner; fluently, excellently.

tri-mness, s. [Eng. trim, a.; -ness.] The quality or state of being trim; neatness, fineness, good order.

tri-mor-phic, a. [Pref. tri-, and Gr. μορφή (morphē) = form.] Having three distinct forms; of, or pertaining to, or characterized by trimorphism (q.v.).

tri-morph-ism, a. [Pref. tri-; Gr. μορφή (morphē) = a form, and suff. -ism.]

1. Biol.: The existence in certain plants, and animals of three distinct forms, especially in connexion with the reproductive organs. In trimorphic plants there are three forms, differing in the lengths of their pistils and stamens, in the size and colour of their pollen grains, and in some other respects; and, as in each of the three forms there are two sets of stamens, the three forms possess altogether six sets of stamens and three kinds of pistils. These organs are so proportioned in length or each other that half the stamens in two of the forms stand on a level with the stigmas of the third form. To obtain full fertility with these plants, it is necessary that the stigma of the one should be fertilized by pollen taken from the stamens of corresponding height in another form. Hence, six unions are legitimate, i.e., fully fertile, and twelve are illegitimate, or more or less unfruitful. (Darwin: Orig. of Species, ch. ix.) Wallace has shown that the females of certain butterflies from the Malay Archipelago appear in three conspicuously distinct forms without intermediate links.

2. Crystallog.: The occurrence of certain forms in minerals which have the same chemical composition, but are referable to three systems of crystallization.

tri-mūr-tī, s. [Sansk. tri = three, and murti = form.]

Comparative Religion:

1. The later Hindoo triad—Brahma, Vishnu, and Siva—considered as an inseparable unity. The Padma Purana, which, as a Purana of the

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, campl, hēr, thēre; pine, pīt, sīre, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rāle, fūll; trȳ, Sȳrian. so, ce = ē; oy = ā; qu = kw.

Vaishnavas, assigns to Vishnu the highest rank, thus defines the Trimurti: "In the beginning of creation the great Vishnu, desirous of creating the world, produced from the right side of his body himself as Brahma; then, in order to preserve the world, he produced from the left side of his body Vishnu; and in order to destroy the world he produced from the middle of his body the eternal Siva. Some worship Brahma, others Vishnu, others Siva; but Vishnu, one, yet threefold, creates, preserves, and destroys; therefore let the pious make no difference between the three." Trimurti, therefore, implies the unity of the three principles of creation, preservation, and destruction, and is an expression of philosophical, rather than of popular belief. The symbol of the Trimurti is the mystical syllable $o (= a + u) m$; where a stands for Brahma, u for Vishnu, and m for Siva.

TRIMURTI.

2. A representation of the Hindoo triad. It consists of one human body with three heads: that of Brahma in the middle, that of Vishnu at the right, and that of Siva at the left.

Ornith.: A genus of Scolopacidae (or Totaninae), with six species, universally distributed. Bill rather straight above, curved at tip, groove extending nearly whole length of bill; tail rounded, broad.

tri-ni'a, s. [Named after Dr. C. B. Trinius, a Russian botanist, author of *Species Graminorum*.]

Bot.: Honewort; a genus of Ammineae or Amminidae. Dioecious; calyx teeth obsolete; petals of the barren flowers lanceolate, with a narrow, involute point, those of the fertile flowers ovate, with a short, inflexed point; fruit ovate, carpels with five prominent ribs and single vittæ beneath them. Known species eight, from Southern Europe and Temperate Asia. One of them, *Trinia vulgaris*, is the Common Honewort, a plant with a fusiform root, a deeply-grooved stem, three to six inches high, leaves tripartite, with linear, filiform leaflets, and minute flowers. South-western counties of England; rare.

trin'-y-tär'-y-an, a. & s. [Eng. *trinity* (*y*); *-arian*.]

A. As adjective:

1. *Ord. Lang.*: Of or pertaining to the Trinity or to the doctrine of the Trinity.

2. *Church Hist.*: Of or belonging to the order of Trinitarians.

"At the dissolution, there were eleven *Trinitarian* houses in England, five in Scotland, and one in Ireland." *Adair & Arnold: Cath. Dict.*, p. 310.

B. As substantive:

1. *Ord. Lang.*: One who believes the doctrine of the Trinity.

"If the *trinitarian* be still farther urged to shew in what way this divine equality exists—how far it is an equality—or, if not, what degree exist of superiority or inferiority, he answers with St. Paul, that God was manifest in the flesh; but that without controversy, great is the mystery of godliness." *Griffin: Sermons*, vol. iii., hint 30.

2. *Church Hist. (Pl.)*: An order of monks founded at Rome in 1198 by St. John of Matha, a native of Provence, and an old French hermit, Felix of Valois, to redeem Christian captives out of the hands of the infidels. The order was sanctioned by Innocent III.; the rule was that of St. Austin, with particular statutes; the diet was of great austerity; and the habit, at least in France, was a soutane and scapular of white serge, with a red and blue cross on the right breast. At one time the order possessed 250 houses, and it was estimated in the seventeenth century that, since its foundation, it had been instrumental in rescuing more than 30,000 Christian captives from what was practically slavery. A reform took place in 1599, and resulted in the erection of the congrega-

tion of Discaled Trinitarians in Spain, in which country the order (reformed and un-reformed) was suppressed in the reign of Isabella II.

trin'-y-tär'-y-an-ism, s. [Eng. *trinitarian*; *-ism*.] The doctrine of Trinitarians. [TRINITY, II. 1.]

tri-ni-trö-çöl'-ly-löse, s. [Pref. *tri-*; *nitro*, and Eng. *cellulose*.] [GUN-COTTON.]

trin'-y-tý, *trin'-i-tee, s. [Fr. *trinité*, from Lat. *trinitatem*, accna. of *trinitas* = a triad, from *trinus* = threefold; Sp. *trinidad*; Ital. *trinità*.]

I. Ordinary Language:

1. A triad; a number or set of three.

2. In the same sense as II. 1.

II. Technically:

1. *Script. & Church Hist.*: A term used to express the doctrine of Three Persons in one Godhead, which is held alike by the Roman, Greek, and Anglican Churches, and by the greater number of Nonconformist Communion. It is indicated in the Apostles' Creed, stated more explicitly in the Nicene Creed, and set out at length in the Athanasian Creed. The First Article of this Church of England states the doctrine in terms that would be accepted by sister churches, and by orthodox dissenters generally:—"there is one Living and True God. . . . And in Unity of this Godhead there be Three Persons, of one substance, power, and eternity; the Father, the Word, and the Holy Ghost." Protestant theologians deduce the doctrine of the Trinity from texts in which (a) the Unity of God is affirmed (Deut. vi. 4; Isa. xiv. 6; Mark xii. 29-32; Eph. iv. 6); (b) the Divinity of Christ is shown from the fulfillment of Messianic prophecies, or directly affirmed (1 Pet. ii. 7, 8, cf. Isa. viii. 19, 14; John xii. 41, cf. Isa. vi. 1, 2 Pet. iii. 18, cf. Isa. xliii. 11; Rev. xxii. 13, cf. Isa. xlv. 6; Matt. xi. 30, cf. Mal. iii. 1; 1 Cor. x. 9, cf. Pa. lxxviii. 18 and xcv. 9; John iii. 29, cf. Isa. liv. 5; John i. 1, xiv. 11, xv. 28; Rom. ix. 5, 2 Cor. v. 19, 20; Col. ii. 8, 9; 2 Pet. i. 2, 1 John v. 20); and (c) the Divinity of the Holy Ghost is affirmed (Matt. ix. 38, cf. Acts xiii. 4; John vi. 45, cf. 1 Cor. i. 13; John xv. 17, cf. 1 Cor. xiv. 25; Ezek. viii. 1-3, Matt. xii. 28, Acts v. 9, 1 Cor. ii. 11, 2 Cor. i. 3). The word "Trinity" is not found in the Scriptures, and is said to have been first used by Theophilus, Bishop of Antioch, in the second century; but from the texts quoted the early Church recognized that the Sacred writings taught (1) that there is one God; (2) that Christ was called God; and (3) that the Holy Ghost was also called God; and from the combination of these truths the doctrine of the Trinity was deduced. Moreover it was considered that the doctrine was clearly expressed in the words of Christ's commission to his disciples (Matt. xxviii. 19) and in the Apostolic benediction (2 Cor. xiii. 14). Early heresies with respect to the Trinity were Arianism, Trithicism, Sabellianism, and Patripassianism (see these words). The Council of Nice (A.D. 325) by affirming the divinity of Christ, and that of Constantinople (A.D. 381) by affirming the divinity of the Holy Ghost, while insisting on the Unity of God, declared the doctrine of the Trinity in Unity to be the doctrine of the Church. From that time it was never called in question except by a few obscure sects, until the Reformation, when Unitarianism (q.v.) became one phase of Protestantism. [ARIANISM, TRITHICISM.]

2. *Eccles. Art.*: A symbolical representation of the mystery of the Trinity frequent in the Christian art. The symbol which has endured the longest is the mystic triangle, which may be found on the tombs of the early Christians. The union of the three persons in one Godhead was also symbolized by a Latin inscription, disposed in geometric lines, containing at each angle the names of the Father, Son, and Holy Ghost, each connected by hand being inscribed with the words *non est*. In the midst of the triangle was the holy

höll, böy; pöut, löwi; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aş; expect, Xenophon, exist. -ing. -clan, -tian = shän. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bəl, dəl.

name of God, again connected by banda with those of the Trinity, each of which bore the one word est. At times an attempt was made to render the same mystery pictorially viable by three heads or three faces on one neck, the eyes becoming part of each individual face. [TRIMURTI.] An equilateral triangle, or a combination of the triangle, the circle, and sometimes the trefoil, was also used for the same purpose.

Trinity-house, s. An institution incorporated by Henry VIII., under the full title of the Corporation of the Elder Brethren of the Holy and Undivided Trinity, and intrusted with the regulation and management of the highhouses and buoys of the shores and rivers of England. The corporation is now empowered to appoint and license pilots for the English coast, and has a general superintendence over the corporations which have the charge of the lighthouses and buoys of Scotland and Ireland, subject to an appeal to the Board of Trade, to whose general superintendence the Trinity-houses is also subject in matters relating to England. The corporation consists of a master, deputy-master, a certain number of acting elder brethren, and of honorary elder brethren, with an unlimited number of younger brethren, the master and honorary elder brethren being chosen on account of eminent social position, and the other members from officers of the navy or the merchant-shipping service, who possess certain qualifications. [TRADE, s., ¶ 2.]

TRINITY HOUSE FLAG.

Trinity-Sunday, s. The Sunday next after Whit-Sunday, constituted a feast of the Trinity for the whole Church by Pope John XXII. in 1334.

Min.: An orthorhombic mineral, occurring only in imperfect crystals. Hardness, 4 to 5½; sp. gr. 3.44 to 3.8; lustre, resinous to adamantine; colour, shades of brown to black; streak, yellowish-gray to brown. Compos.: phosphoric acid, 32.7; protoxide of iron, 16.6; protoxide of manganese, 32.2; iron, 6.4; magnesia, 1.8; calcium, 1.5; fluorine, 8.8 = 100, which corresponds with the typical formula $3\text{ROPO}_2 + \text{Rf}$.

trip-lō-blas-tic, a. [Gr. *τριπλιος* (*triplios*) = threefold, triple, and *βλαστός* (*blastos*) = a sprout, shoot, or sucker.]

Embryol.: Of, belonging, or relating to the triple division in the blastoderm outside the yolk in the ovum of mammals, birds, &c. Previous to segmentation the blastoderm is single, then a bilaminar arrangement arises; finally it separates into outer, middle, and inner blastodermic membranes: the ectoderm, mesoderm, and endoderm; called by Foster and Balfour the epiblast, mesoblast, and hypoblast. (*Quain*.)

trip-lō-clāse, s. [Gr. *τριπλιος* (*triplios*) = triple, and *κλάσις* (*klasis*) = cleavage; Ger. *triploklas*.]

Min.: The same as **THOMSONITE** (q. v.).

trip-lō-ī-dite, s. [Eng. *tripelite*; Gr. *εἶδος* (*eidos*) = form, and suff. *-ite* (*Min.*)]

Min.: A monoclinic mineral, occurring in distinct crystals, also fibrous, divergent, massive; crystals with vertical striations. Hardness, 4.5 to 5; sp. gr. 3.697; lustre, vitreous to adamantine; colour, yellowish to reddish brown, wine-yellow, hyacinth-red; streak, grayish white; fracture, sub-conchoidal. Compos.: phosphoric acid, 31.91; protoxide of iron, 16.18; protoxide of manganese, 47.86; water, 4.05 = 100. Formula, $\text{R}_2\text{P}_2\text{O}_7 + \text{R}(\text{OH})_2$, where R = Fe, Mn. Found at Branchfield,

Fairfield County, Connecticut, associated with various other minerals new to science, in a vein of albite-granite.

trip-lō-py, s. [Gr. *τριπλιος* (*triplios*) = threefold, and *ὄψ* (*ops*) = the eye.]

Optics & Pathol.: An affection of the eye which causes objects to be seen triple. It is much rarer than diplopy (q. v.), and the third image is exceedingly faint. (*Ganot*.)

trip-ll-y, adv. [Eng. *tripled*, a.; *-ly*.] In a triply manner or degree; trebly.

triply-ribbed, a. [TRIPLE-RIBBED.]

tri-pōd, *tri-pode, s. & a. [Lat. *tripus*, genit. *tripodis*, from Gr. *τριπους* (*tripous*), genit. *τριποδος* (*tripodos*) = three-footed, a tripod, from *τρι-* (*tri-*) = three, and *πους* (*πους*), genit. *ποδος* (*podos*) = a foot; Sp. & Ital. *tripode*.]

A. As substantive:

I. Ordinary Language:

1. A three-legged seat or table.
2. A pot or caldron used for boiling meat, and either raised upon a three-legged frame or stand, or made with three feet in the same piece with itself.
3. A three-legged support for a table, chair, surveyor's compass, candelabrum, brazier, or other object.

II. Class. Antiq.:

A bronze altar, having three legs or feet, and frequently also three rings at the top to serve as handles. A tripod was one of the attributes of Apollo, and originated in the custom of seating the pythones, or prophesying priestesses, in a three-footed seat, over the vapour which ascended from a mystic cavern at Delphi, and which was believed to have the power of producing sacred inspiration, and the ability of foretelling future events. Highly ornamented tripods of similar form, made of precious metals, were given as prizes at the Pythian games and elsewhere, and were frequently placed as votive offerings in the temples.

"Within the circle arms and tripods lie."—*Dryden: Virgil: Æneid* III, 146.

B. As adjective:

1. Having three legs or supports.

"These tripod . . . dolmens . . . never had, or could have had, walls."—*Ferguson: Ruins Stone Monuments*, p. 45.

2. Three feet long.

"Its tripod sentences tired my ear."—*Mrs Edgeworth: Helen*, ch. VII.

3. Tripod of life:

Physiol.: The term used by Bichat for the brain, heart, and lungs.

* **tri-pō-dī-an, s.** [See def.]

Music: An ancient stringed instrument in form resembling the Delphic tripod, whence its name.

trip-ō-āy, s. [TAIPOP.]

Pros.: A series of three feet.

* **tri-pōint'-ēd, a.** [Pref. *tri-*, and Eng. *pointed*.] Having three points.

"The tripointed wrathful violence of the dead dart."—*Sylvestre: The Lovers*, 457.

trip-ō-ll, trip-ō-lite, s. [After Tripoli, in North Africa, where it occurs in considerable amount; Ger. *tripell*.]

1. **Min. & Petrol.**: A siliceous deposit, first shown by Ehrenberg to consist almost wholly of the cast-off shells of Diatoms. Sometimes found in deposits of considerable thickness, and extending over many miles of country; mostly earthy, but sometimes very hard and compact.

2. **Geol. & Palæont.**: The diatoms in a stratum of Tripoli at Bilin in Bohemia, where it is fourteen feet thick, are mainly of the genus *Gaillonella* (q. v.).

3. **Comm.**: Tripoli was first imported from Tripoli itself, but has since been found in

many other places. It is employed for polishing metals, marbles, glass, and other hard bodies. [TRIPOLI-POWDER.]

tripoli-powder, s. A pulverulent substance imported from Germany to be used as material for the polishing of steel. Like Tripoli, it is composed mainly of diatoms.

tripoli-slate, s.

Petrol.: A tripolite (q. v.) which, from varying causes, has assumed a laminated or slaty texture. Sometimes contains much clay, &c.

Trip-ō-line, a. [See def.]

1. Of or pertaining to Tripoli, a state and city in North Africa.
2. Pertaining to the mineral tripoli.

Tri-pōl-i-tan, a. & a. [See def.]

trip-ō-ly, s. [TRIPOLI.]

* **tri-pōs, s.** [TRIPOD.]

* 1. A tripod (q. v.).

"And from the tripods rushed a bellowing sound."—*Dryden: Virgil: Æneid* III, 124.

2. In Cambridge University, a word dating from the sixteenth century, and used successively in a number of different senses. At first it was applied to the stool on which the champion of the University sat at the disputations held at the admission of Bachelors of Arts to their degree; then it was transferred to the Bachelor himself; still later to the humorous, or, in some cases, scurrilous, speech with which "Mr. Tripods" opened the proceedings, and to the verses of the Bachelors at the Acts. The honours-lists were printed (about 1747-8) on the backs of these verses, and so tripods came to mean an honour-list, and, last of all, the examination itself. Until the year 1824 there was only one tripods, the Mathematical; and up to 1850 only those who had obtained honours in mathematics were admitted to the Classical examination. This degree was not given for that examination till a few years later.

"Such interest as is now attached to them belongs rather to the verses than to the list of the several tripods (for the name has now at last come to signify degree examinations) which have been circulated already severally."—*C. Wordsworth: Scholia Academicæ*, p. 20.

TAIPOP.

a. Caldron of thin bronze, supposed to increase the force of the prophetic sounds which came from the earth; **b.** Flat slab on which the priestess sat.

trip-pant, a. [TRIP, v.]

Her.: A term applied to beasts of chase, as passaut to beasts of prey, &c. The animal is represented with the right foot lifted up, and the other three, as it were, upon the ground, as if trotting. Counter trippant is when two animals are borne trippant contrary ways, as if passing each other out of the field.

TRIPPANT.

* **trippc, s.** [Etym. doubtful.] A small piece (of cheese).

"A goddess kichel, or a *trippc* of cheese."—*Cowser: C. T.*, 7, 822.

trip-pēr, s. [Eng. *trip*, v., *-er*.]

1. One who trips or walks nimbly; one who trips or trips up; a dancer.

"Begone, ye sylvan trippers of the green."—*Dryden: King Arthur*, IV, 1.

2. A street-railway employee who works, and is paid, by the trip. (*U. S. Local*.)

3. An excursionist.

4. Often in the compound *cheap-tripper*.

tripper-up, s. [See extract.]

"Mr. Wynne G. Baxter has probably, through his vocation, as large an acquaintance with the shady side of metropolitan life as most men, &c. yet even he was puzzled when a witness at the East End inquest answered: 'What is that?' Inspector Read answered: 'A man who trips you up and robs you.' If you make a noise they jump on you."—*Daily Chronicle*, Nov. 18, 1887.

trip-pōt, s. [TRIP.]

Mech.: A projection intended to strike some object at regularly recurrent intervals. A cam, lifter, toe, wiper, foot, &c.

trip-pīng, pr. par., a., & s. [TRIP, v.]

tripping-valve, s. A valve moved recurrently by the contact of some other part of the machinery.

trip-ping-ly, *trip-ping-lye, adv. [*Eng. tripping; -ly.*] In a tripping manner; with a light, nimble, and quick step; nimbly; with rapid but clear enunciation; fleetly.

"And this ditty, after me,
Sing, and dance it trippingly."

Shakspeare: *Midsummer Night's Dream*, v. 2.

† **trip-pist, s.** [*Eng. trip, v.; -ist.*] One who goes on a trip; an excursionist. (*Modern slang.*)

"With returning appetite came the desire to the convivial ocean trippists to set sail again for the Mediterranean."—*Modern Society*, Jan. 16, 1886, p. 117.

trip-p-ké-ite, s. [After Dr. Paul Trippke, the mineralogist; suff. -ite (*Min.*)]

Min.: A mineral of uncertain chemical composition, occurring in small, brilliant crystals with olivinite, in cavities in cuprite, at Copiapo, Chili. Crystallization, tetragonal; colour, bluish green. A qualitative examination showed that it was essentially an arsenite of copper, with the suggested formula (CuO, As₂O₃); but, in the opinion of E. S. Dana, it probably requires a further chemical investigation.

trip-sa-cūm, s. [*Gr. τριψύς (tripsis)* = rubbing, friction; *τριβω (tribō)* = to rub.]

Bot.: A genus of Rottboellæe, from the warmer parts of North America. Spikes solitary or three together, the upper male, the lower female; male glume two-flowered, female one-flowered. *Tripsacum dactyloides*, the Buffalo-grass of the United States and the Gama-grass of Mexico, is highly valued as fodder.

trip-sis, s. [*Gr.*, from *τριβω (tribō)* to rub.]
* 1. *Ord. Lang.*: The act of reducing a substance to powder; trituration.
2. *Med.*: The process of sham-pooing (q.v.)

trip-tēr-ōus, a. [*TRIPTERUS*.] Three-winged. (Said of a leaf.)

trip-tēr-ūs, s. [*Pref. tri-*, and *Gr. πτερόν (pteron)* = a feather, a wing, anything wing-like.]

Bot.: A genus of Nassaviee. Pretty annual Composites, sometimes cultivated in English gardens. They are used in South America, on account of their dryness, as everlasting flowers.

trip-tól-ē-mæ-a, s. [Named after *Τριπτόλεμος (Triptolemos)*, an Eleusinian, who spread the worship of Demeter, and was said to have invented the plough.]

Bot.: An old genus of Dalbergieæ, reduced by Benham to a sub-genus of Dalbergia. Known species three, all from Brazil. Trees or woody climbers, with unequally-pinnate leaves. The species were formerly believed to yield the rosewood of commerce. Now the greater part of it is known to come from *Dalbergia nigra*.

* **trip-tôte, s.** [*Lat. triptotum*, from *Gr. τριπτότωρ (triptōton)*, from *τρι-* (*tri-*) = three, and *πτόω (ptōō)* = falling; *πτόσις (ptōsis)* = a grammatical case of a word.]

Gram.: A noun having three cases only.

trip-tých, *trip-tých-ōn, s. [*Gr. τριπτύχον (triptuchon)*, from *τρι-* (*tri-*) = three, and *πτύξ (ptyx)*, genit. *πτύχος (ptychos)* = a fold, a folding.]

1. A writing tablet in three parts, two of which might be folded over the middle part; hence, sometimes, a book or treatise in three parts or sections.

2. A picture, carving, or other representation, generally on panel, with two hanging doors or leaves, by which it could be closed in front. Triptychs were constructed of various materials and dimensions; ivory and enameled triptycha were adorned with sacred subjects and emblems. They were frequently used for altar-pieces. The central figure is usually complete in itself. The subsidiary designs on either side of it are smaller, and frequently correspond in size and shape to one-half of the principal picture.

TRIPTYCH.

† **tri-pū-dī-a-rý, a.** [*Lat. tripudium* = measured stamping, a leaping, a solemn religious dance.] Pertaining to dancing; performed by dancing.

"And Claudius Pulcher underwent the like success, when he contemned the tripudary augurations."—*Brown's: Vulgar Errors*, bk. 1, ch. xi.

† **tri-pū-dī-āte, v. i.** [*Lat. tripudium*, sup. of *tripudio* = to leap, to dance.] To dance.

* **tri-pū-dī-ā-tion, s.** [*TRIPUDIATE*.] The act of dancing.

"The soul of man . . . dances to the muscull aires of the cogitations, which is that tripidation of the nymphs."—*Bacon: On Learning*, bk. 11, ch. xiii.

tri-pýr-a-mid, s. [*Pref. tri-*, and *Eng. pyramid* (q.v.).] A kind of spar composed of three-sided pyramids.

tri-quē-tra (pl. **tri-quē-træ**), *s.* [*Lat. triquetra* = a triangle.]

1. *Anat. (Pl.)*: Small, irregularly-shaped pieces of bone, principally in the occipitoparietal suture. First observed by Wormius, whence they are often called Wormian Bones.

2. *Arch.*: An interlaced ornament, of frequent occurrence on early northern monuments.

tri-quē-troués, *tri-quē-traj, a. [*Lat. triquetrus* = triangular.]

* 1. *Ord. Lang.*: Three-sided, triangular; having three plane or concave sides.

2. *Bot.*: Having three sides or angles. Three-edged (q.v.)

tri-rā-dī-ate, tri-rā-dī-ā-tēd, a. [*Pref. tri-*, and *Eng. radiate, radiated.*] Having thr. rays. (*Owen.*)

tri-rōme, s. [*Lat. triremis* = (a.) a trireme, (a.) having three banks of oars; *tri* = three, and *remus* = an oar; *Fr. trireme*; *Sp. & Ital. trireme.*]

Class. Antiq.: A galley or vessel having three ranks or benches of oars on each side, a common class of war-ship among the ancient Romans, Greeks, Carthaginians, &c. They were also provided with large square sails, which could be raised during a fair wind, to relieve the rowers. When two ships engaged, if tolerably well matched, the great object aimed at by each was, either by running up suddenly alongside of the enemy, to sweep away or disable a large number of his oars, or, by bearing down at speed, to drive the beak full into his side or quarter, in which case the planks were generally stove in, and the vessel went down. But if one of the parties was so decidedly inferior in seaman-

ship as to be unable to cope with his antagonist in such manoeuvres, he endeavoured, as he approached, to grapple with him, and

then the result was decided, as upon land, by the numbers and bravery of the combatants.

"Some indeed fancy a different original of these names, as that in the *trireme*, for example, either that there were three banks one after the other on a level, or three rowers sat upon one bank; or else three men lugged all together at one oar; but this is contrary, not only to the authority of the classicists, but to the figures of the *triremes* still appearing in ancient monuments."—*Kennet: Antiquities of Rome*, pt. II, bk. iv.

tri-rhōm-bōid-āl, a. [*Pref. tri-*, and *Eng. rhomboidal.*] Having the form of three rhombs.

* **tri-sāo-ra-mēn-tār-ī-an, s.** [*Pref. tri-*, and *Eng. sacramentarian.*]

Church Hist.: A controversial name given to those Reformers who maintained that the sacraments of Baptism, the Lord's Supper, and Penance were necessary to salvation. This opinion was held by some Lutherans at Leipzig, and was advocated in England in the *Institution of a Christian Man*, published in 1536.

tri-sāg-ī-ōn, s. [*Gr. neut. of τρισάγιος (trisagios)* = thrice holy; *τρίς (tris)* = three, and *άγιος (hagios)* = holy.] One of the doxologies of the Eastern Church, repeated in the form of versicle and response by the choir in certain parts of the liturgy, and so called from the triple recurrence in it of the word *hagios* = holy.

"Hereto agrees the seraphical hymn, called the *trise-gion*, holy, holy, holy, &c., that used to be sung in all churches throughout the Christian world."—*Bp. Bull: Works*, iii, 968.

Tri-scil-ī-ōn, s. pl. [*Eccles. Lat.*, from *Gr. τρίς (tris)*, and *σχίζω (schizō)* = to cut.]

Church Hist.: A sect of Sabellian heretics, mentioned by St. Augustine as maintaining the opinion that the Divine nature is composed of three parts, one of which is named the Father, the second the Son, and the third the Holy Ghost; and that the union of these parts constitutes the Trinity. (*Blunt.*)

trise, v. t. [*TRICE.*]

Naut.: To haul and tie up; to trice.
"Did softly trice them with long pulleys fastened to the beams."—*North: Plutarch; Eumenæ*

tri-sēct, v. t. [*Lat. tri* = three, and *sectus*, pa. par. of *seco* = to cut.] To cut or divide into three equal parts.

"Could I not . . . by adding water have bisected or trisected a drop."—*De Quincy: Opium-eater*, p. 122.

tri-sēct-ed, pa. par. or a. [*TRISECT.*]

1. *Ord. Lang.*: (See the verb).
2. *Bot.*: Trifid; triparted (q.v.)

tri-sēc-tion, s. [*Lat. tri* = three, and *sectio* = a cutting, a section.] The division or cutting of anything into three parts; specif., in geometry, the division of an angle into three equal parts. The trisection of an angle is a problem of great celebrity amongst the ancient mathematicians. It belongs to the same class of problems as the duplication of the cube, and the insertion of two geometrical means between two given lines. Like them, it has hitherto been found beyond the range of elementary geometry; but it may be effected by means of the conic sections, and some other curves, as the conchoid, quadrix, &c.

tri-sé-pal-ous, a. [Pref. tri-, and Eng. sepalous.]

Bot. (Of a calyx): Consisting of three sepals.

tri-sér'-y-ál, tri-sér'-i-ate, a. [Pref. tri-, and Eng. serial, serial (q.v.)]

Bot.: Arranged in three rows, which are not necessarily opposite to each other; trifarious.

tri-sé-túm, s. [Pref. tri-, and Lat. seta = a thick, stiff hair.]

Bot.: A sub-genus of Avena. Perennial grasses, with the spikelets compressed, the lowest flower bisexual; fruit glabrous, deeply furrowed, free. British species one, Avena (Trisetum) flavescens, the Golden Oat or Yellow Oat-grass. (Sir J. Hooker.) It is common in rich pastures, and is a favourite of sheep.

* tri-s'häg'-i-ön, s. [TRISAQION.]

tri-s'mis, s. [Gr. τριμός (trimos) = the making a shrill noise.]

Pathol.: Lockjaw, a variety of tetanus, marked by spastic rigidity of the muscles of the lower jaw. Two kinds are usually distinguished: Trismus nascentium, which often attacks infants soon after birth, and traumatic trismus, which may arise from a cold or a wound, and attacks persons of all ages.

tri-óc-ta-hé-drón, s. [Gr. τρίς (tris) = thrice, and Eng. octahedron (q.v.)]

Geom.: A solid bounded by twenty-four equal faces, three corresponding to each face of an octahedron.

tri-spást, tri-spás'-tón, s. [Gr. τρι- (tri-) = three, and σπᾶω (spáo) = to draw.]

Medic.: A tackle with three blocks.

tri-spér'-móus, a. [Pref. tri-; Gr. σπέρμα (sperma) = seed, and Eng. suff. -ous.]

Bot. (Of an ovary, a fruit, or a cell): Having three seeds.

tri-splánch'-níc, a. [Pref. tri-, and Eng. splanchnic (q.v.)]

Anat.: Of or belonging to the sympathetic nerve, which distributes its branches to the organs in the three great splanchnic cavities, the head, the chest, and the abdomen.

tri-spór'-íó, a. [Pref. tri-, and Gr. σπόρος (spóros), σπορά (spóra) = a seed.]

Bot.: Having three spores.

* trist, a. [Fr. triste, from Lat. tristis.] Sad, sorrowful, gloomy.

"Amazed, ashamed, disgraced, sad, silent, trist. Alone he would all day in darkness sit." Fairfax: Godfrey of Boulogne, xiii. 29.

tris-tár'-ní-a, s. [Named by Robert Brown after Mr. Tristram, a French botanist.]

Bot.: A genus of Leptospermæ. Leaves linear; flowers yellow; petals five; stamens in five parcels. Australian shrubs, sometimes cultivated in greenhouses.

* triste, s. [TRIST.]

* triste, v.t. & i. [TRUST.]

tri-stém'-ma, s. [Pref. tri-, and Gr. στέμμα (stemma) = a wreath, a garland.]

Bot.: A genus of Melastomæ. Tropical African shrubs, with quadrangular stems, involucre heads of flowers, and a four or five-celled, baccate fruit. The berries of Tristemma viridanum are given in the Mauritius as a remedy for syphilis.

* trist'-fúl, a. [Eng. trist; fúl(l).] Sad, sorrowful, gloomy, melancholy.

"His tristeful visage clearing up a little over his roast neck of veal." Lamb: South Sea House.

* trist'-fúl-lý, adv. [Eng. tristful; -ly.] Sadly, sorrowfully.

tri-stích'-i-ús, s. [Pref. tri-, and Gr. στίχος (stichos) = a row, order, or line.]

Palæont.: A genus of fossil fishes. Known species two, from the Coal Measures near Glasgow, in Scotland, and Fermanagh, in Ireland. (Agassiz.)

tri-tí-chóp'-tér-ús, s. [Gr. τριτίχος (tristichos) = in three rows, and πτερόν (pteron) = a flo.] [TRISTICHOUS.]

Palæont.: A genus of Holoptychiida (by some authorities placed with the Rhizodontida), from the Old Red Sandstone.

tri-tích-óus, a. [Pref. tri-, and Gr. στίχος (stichos) = a row, order, line.]

Bot.: Arranged on the stem in three vertical rows. Used of arrangement or phyllotaxis of leaves on the stems of grasses. If measurement be made from any leaf one-third round the stem; if a second leaf is just above the point reached; if another third be measured, there will be a third leaf above; and, if the remaining third be measured, there will be a fourth leaf just above the first. Thus, when there are a sufficient number of leaves to show the phyllotaxis, they will be found to be inserted, as defined, in three vertical rows.

* tri-tý'-tí-áte (ti as shí), v.t. [Lat. tristitia, from tristis = sad.] To make sad.

"Nor is there any whom calamity doth so much tristitate that he never sees the flashes of some warning joy." Feltham: Asolotes, pt. 1, res. 41.

tri-tó-má, s. [Gr. τριστόμος (tristomos) = three-mouthed: pref. tri-, and Gr. στόμα (stoma) = the mouth.]

Zool.: The typical genus of Tristomidae (q.v.). Body consisting of a broad and flat disk, having behind its inferior face a large cartilaginous sucker. Tristoma coccineum, a species of an inch or more in breadth, and of a lively red colour, is attached to the gills of many fishes in the Mediterranean.

tri-tóm'-i-dæ, s. pl. [Pref. tristom(a); Lat. fem. pl. adj. suff. -idæ.]

Zool.: A family of Trematoda, furnished with three suckers, two small ones at the anterior extremity, with the mouth between them, and a larger one at the posterior extremity. They are chiefly parasitic on the gills of fishes.

Tris-trám, s. [See def.]

Mythol.: A Cornish hero, one of the Knights of the Round Table.

Tristram's book, s. Any book on hunting or hawkng.

Tristram's knot, s.

Bot.: Cannabis sativa. (Britten & Holland.)

* trist'-ý, a. [Lat. tristis.] Sad, sorrowful, dejected.

"The king was tristy and heavy of cheer." Aschmole: Theatrum Chemicum, p. 264.

tri-súl, tri-sú-lá, s. [Sansc.]

Buddhism: An ornament very commonly occurring in old Buddhist sculpture, on old coins, &c. Its meaning is not ascertained. According to Rénusat, it represents the five elements of the material universe, and General Cunningham comes to the same conclusion, though by a different process. (See extract.)

TRISUL

"The Triad would be the emblem of himself. Just as the cross is placed on the altar of the Christian Churches, on the gables, and everywhere about the building, to signify Christ or Christianity, so this emblem may have been used to signify the founder of the religion at a time when personal representations of him were not known." Ferguson: Tree & Serpent Worship, p. 116.

* tri-súlc, * tri-súlk, s. & a. [Lat. trisulcus, from tri = three, and sulcus = a furrow.]

A. As subst.: Something having three furrows; a triident.

"Consider the threefold effect of Jupiter's triident, to burn, discuss, and terebrate." Browne: Vulgar Errors, bk. 11, ch. vi.

B. As adv.: Three-forked; having three tines or teeth.

"Jupiter confound me with his triident lightning." Uryshart: Rabelais, bk. 11, ch. xxxii.

* tri-súl-cato, a. [TRISULC.] Having three furrows; tridentate.

"That hurls the bolt trisulcate." Percy: Reliques; St. George for England.

tríte, a. [Lat. tritus, pa. par. of tero = to rub, to wear.] Used until it has become worn out, and so lost its novelty and freshness; hackneyed, commonplace, stale.

"To many perhaps it may seem vulgar and trite; so that discourse thereon, like a story often told, may be nauseous to their ears." Barrow: Sermons, vol. 111, ser. 98.

trit-é-lei'-a, trit-é-lé'-ja (j as y), s. [Pref. tri- = three, and τέλειος (teleios) = complete. Named from the completely ternary arrangement of the parts.]

Bot.: A genus of Scilleæ. Perianth salver-shaped, the limb six-parted; stamens six, in two rows; stigma three-lobed; seeds many. American liliaceous plants, with blue or white flowers.

trit-e-lý, adv. [Eng. trite; -ly.] In a trite or commonplace manner; staidly.

"I grant it to be a tritely vulgar saying, but it has everything to do with truth." Daily Telegraph, Oct. 14, 1888.

trit-e-nés-sa, s. [Eng. trite; -ness.] The quality or state of being trite, commonplace, or hackneyed; staleness.

"Sermons which, while they preach the gospel to the poor, disgust not the fastidious ear of modern elegance by triteness or vulgarity." Wingham: Sermons. [Pref.]

tri-tér'-nate, a. [Pref. tri-, and Eng. ternate (q.v.)]

Bot. (Of a leaf): Having the common petiole divided into three secondary petioles, each of which is again sub-divided into three ternary petioles, each bearing three leaflets, as the leaf of Epimedium alpinum.

tri-thé-ísm, s. [Eccles. Lat. tritheismus.]

Church Hist.: The doctrine which teaches that there are three Gods, instead of three Persons in the Godhead. According to Cyril of Jerusalem this teaching was introduced by the Gnostics in the second century. In the sixth century a philosophic doctrine of Tritheism was formulated by Aescunages of Constantinople, who was banished for his heresy by Justianus. The opinions of Aescunages were adopted by one of his pupils, Philoponus, who founded a sect called after him. With Philoponus was associated for many years a bishop of Tarsus, named Conon, who differed from his friend on the subject of the resurrection, and like him founded a sect, the Cononites. Tritheism was revived by Roscellinus, in the eleventh century, who taught that the name God was the abstract idea of a genus containing the three Persons, the Father, the Son, and the Holy Ghost. He was opposed by St. Anselm in his treatise de Fide Trinitatis, and condemned by the Council of Soissons (A.D. 1092), where he recanted. In 1691 the heresy was again revived. Dr. Sherlock, Dean of St. Paul's, published A Vindication of the Doctrine of the Holy and Ever-blessed Trinity, in which he maintained that "there are three infinite distinct minds and substances in the Trinity," and that "the three Persons in the Trinity are three distinct infinite minds or substances." Dr. South opposed the dean, and a long controversy ensued. In 1693, in a sermon before the University of Oxford, the preacher maintained the theory of Dr. Sherlock, which was condemned by the heads of houses as "false, impious, and heretical." A controversy followed of so serious a character that it was suppressed by an Order in Council, and measures were taken to stop the publication of Antitrinitarian books, which had been issued in great numbers during the controversy. [DUTCHINSONIANS.]

tri-thé-íst, s. [Pref. tri-, and Eng. theist.] One who believes in three distinct gods; an adherent of tritheism (q.v.).

tri-thé-íst'-íc, tri-thé-íst'-íc-al, a. [Eng. tritheist; -ic, -ical.] Pertaining or relating to tritheism.

"The tritheistical argument appears then to be as ancient as the theistical." Boltonbrooke: Essay 4.

* tri-thé-íte, s. [Gr. τρι- (tri-) = three, and θεός (theos) = god.] The same as TRITHEIST (q.v.).

* tri-tíng, s. [A.S.] One of three divisions into which a shire or county was divided; a riding, as in Yorkshire. [RIDING, s.]

"When a county is divided into three of these intermediate jurisdictions, they are called trithings; which were anciently governed by a trithing-reeve." Blackstone: Comment. [Intro.]

* **trithing-reeve, s.** A governor of a trithing.

tri-thi-ōn'-ic, a. [Pref. *tri-*; Gr. *θειον* (*theion*) = sulphur, and suff. *-ic*.] Containing three atoms of sulphur in the acid.

trithionic-acid, s.

Chem.: $H_2S_2O_6$. Sulphuretted hyposulphuric acid. A limpid, inodorously liquid, having a sour and somewhat bitter taste, obtained by gently heating an aqueous solution of acid potassic sulphite with sulphur. It is permanent in the dilute state, but on attempting to concentrate it, even in a vacuum, it decomposes, sulphurous oxide being evolved. The salts are but little known, and are very unstable.

* **trit'-ic-al, a.** [Eng. *trit(e)*; *-ic-al*.] Trité, commonplace, stale.

* He appears from a critical philosophy to have carried his opinion credulity into our British, Roman, and Saxon archæology. — *Warton: Hist. Kidlington. (Pref.)*

* **trit'-ic-al-ly, adv.** [Eng. *tritically*; *-ly*.] In a trite or commonplace manner; tritely.

* **trit'-ic-al-ness, s.** [Eng. *tritically*; *-ness*.] The quality or state of being tritical or trite; triteness.

* "Where there is not a triteness or mediocrity in the thought, it can never be snuck into the genuine and perfect lathos." — *Pope: Martinus Scribæna.*

† **trit'-i-cin, s.** [Mod. Lat. *triticeum*]; *-in*.] *Chem.*: The gluten of wheat.

trit'-i-cūm, s. [Lat. = wheat; according to Varro, from *tritrus*, pa. par. of *tero* = to bruise.]

Bot.: Wheat, wheat-grass; a genus of Hordeæ or Hordeaceæ. Spikelets solitary, sessile, distichous, compressed; the sides, not the backs, of the glumes and florets, directed to the rachis, many-flowered. Empty glumes, two, unequal, shorter than the flowering glumes. Flowering glumes herbaceous, rigid, many-nerved or without nerves. Palca with ciliate nerves. Scales ovate, entire, ciliate; at ligula subsessile; ovary hairy at the top; fruit grooved. Known species twenty, from temperate regions. Some species are annual, others perennial. Many botanists limit the genus Triticum to the first section, calling the second Agropyrum. Some of the species are widely distributed, that known as Couch Grass (*T. repens*) being among the most common, but the seeds of none of them except Wheat (*T. vulgare*) are of any value. The native country of wheat is not known. It has been generally supposed to be central Asia, and it has been reported as growing wild in Mesopotamia and elsewhere, but these reports lack proof. Of the other species *T. canicum*, the Fibrous-rooted Wheat-grass, is from one to three feet high, and is frequent in woods and on banks in Western Europe. *T. junceum*, the Rusky Sea Wheat-grass, is found on sandy sea shores, flowering in July and August. It bears large shining spikelets. Couch-grass (*T. repens*) is a troublesome weed, its creeping root stocks rendering it difficult to extirpate. In times of scarcity its roots have been employed as food, and also have been used as a source of beer, as a medicine, &c.

tri-tō-chōr'-ite, s. [Gr. *τριτος* (*tritōs*) = third; *χωρεῖν* (*chōreō*) = to follow, and suff. *-ite* (*Mīm.*).]

Min.: A fibro-columnar mineral, having its cleavage parallel to the direction of the fibres. Hardness, 3.5; sp. gr. 6.25; colour, blackish- to yellowish-brown. An analysis yielded: vanadic acid, 24.41; arsenic acid, 8.76; protoxide of lead, 53.90; protoxide of copper, 7.04; protoxide of zinc, 11.06 = 100.17, having the approximate formula $R_3V_2O_7$, where R = Pb, Cu, Zn. It is related to eusynchite and aræoxene (q.v.).

tri-tō-ma, s. [Pref. *tri-*, and Gr. *τομή* (*tomē*) = a cutting.]

Det.: A genus of Hemerocallæe. Fine aloëlike plants, but with grassy leaves; their inflorescence a spike of red or orange flowers, natives of the Cape of Good Hope. Three or four are cultivated in English gardens, where they continue in flower till late in autumn. In winter they need the protection of a frame.

tri-tō-mite, s. [Gr. *τριτομος* (*tritōmos*) = thrice-cut; suff. *-ite* (*Mīm.*).]

Min.: An isometric mineral of tetrahedral habit. Hardness, 5.5; sp. gr. 3.9 to 4.66;

lustre, vitreous; colour, brown; streak, dirty yellowish-gray. Compos. doubtful, analyses varying much, one of the most careful yielding, SiO_2 , 15.38; SnO_2 , 0.74; Ta_2O_5 , ZrO_2 (7), 9.03; Ca_2O_3 , 4.48; Al_2O_3 , 1.61; Fe_2O_3 , 2.27; Mn_2O_3 , 0.49; CeO , 10.06; La_2O_3 , DiO , 44.05; YO , 0.42; MgO , 0.16; CaO , 0.41; BaO , 0.19; SnO , 0.71; Na_2O , 0.56; K_2O , 2.10; H_2O , 5.63 = 99.49. Found in the island of Lembo, near Brevig, Norway, associated with leucophane and mosandrite in a syenite.

Tri-tōn, s. [Lat., from Gr. *Τριτων* (*Tritōn*) = a Triton.]

1. *Class. Mythol.*: A powerful sea-deity, son of Poseidon (Neptune) by Amphitrite, or, according to some, by Sileo or Salsacia. He dwelt with his father in a golden palace on the bottom of the sea. He could calm the ocean, and abate storms. He was generally represented as blowing a shell, and with a body above the waist like that of a man, and below like a dolphin. Many of the sea-deities were called Tritons by the poets.

"The hoarse alarm of Triton's sounding shell." *Cropper: Nature Unimpaired by Time.*

2. *Zoology*:

(1) A genus of Salamandrinæ, with sixteen species, widely distributed in temperate and sub-tropical regions. Body covered with warty tubercles, four toes on anterior, and five on posterior limbs, all without nails; no parotids; glandular pores above and behind the eyes, and a series of similar pores arranged longitudinally on each side of the body; male with well-marked discontinuous crest on back and tail; tongue globular, partially free at the sides, free behind, where it is pointed. Sixteen species are known, found in the eastern United States, California, and Oregon, also in Europe, north Africa, China, and Japan. They are known under the popular name of Newt, or Eft, the Great Water Newt, including the Smooth Newt or Eft, the Marbled Newt, &c.

(2) A genus of Muricidæ (Woodward), according to some other authorities, of Casadididæ, with 100 recent species, from the West Indies, Mediterranean, Africa, India, China, the Pacific, and Western Australia, ranging from low water to ten or twenty fathoms, and one minute species has been dredged at fifty fathoms. The Great Triton (*T. tritonis*) is the conch blown as a trumpet by the Australian and Polynesian natives. Fossil species forty-five, from the Eocene of Britain, France, and Chili.

(3) Any individual of either of the genera described above. [(1). (2).]

¶ *A triton among the minnows*: One greater than his fellows. (*Cf. Shakspeare: Coriolanus*, iii. 1.)

tri-tōne, s. [Gr. *τριτονος* (*tritōnos*) = of three tones.] [TONE, s.]

Music: An augmented fourth, containing three whole tones. The use of the tritone was anciently forbidden in harmony or counterpoint, as it was regarded in the light of what is called a false relation. It was not permitted to be employed in the upper note of one chord and the lower note of the following. In each case it was called *mi contra fa* (q.v.).

tri-tō-ni-a, s. [Mod. Lat., from *triton* (q.v.).]

1. *Bot.*: A genus of Iridacæe. About twenty-five species, all from Southern Africa, are cultivated in British green houses; they have yellow, orange, pink, red, blue, or greenish flowers, and are handsome when in bloom.

2. *Zool.*: The type-genus of Tritoniadæ (q.v.), with thirteen species, from Norway and Britain; found under stones at low water to twenty-five fathoms. Animal elongated; tentacles with branched filaments; veil tuberculated or digitated; gills in a single series; mouth with horny jaw, stomach simple.

tri-tō-ni-a-dæ, *tri-tōn'-i-dæ, s. pl. [Mod. Lat. *tritonía*; Lat. fem. pl. adj. suff. *-idæ*.]

Zool.: A genus of Tectibranchiata (q.v.), with nine genera (Woodward), to which Tate adds another, *Hero*. Animal with laminated, plumose, or papillose gills, arranged along the sides of the back; tentacles retractile into sheaths, lingual membrane with one central and numerous lateral teeth; orifices on the right side.

* **tri-tōn'-i-dæ, s. pl.** [TRITONIADÆ.]

tri-tōr'-i-ūm, s. [TRITURIUM.]

tri-tōx'-ide, s. [Pref. *tri-*; *t* connect, and Eng. *oxide*.]

Chem.: A term formerly used to denote the third in a series of oxides, the first and second terms of which were called protoxide and deutoxide. (*Watts*.)

tri-tō-zō-ō-īd, s. [Gr. *τριτος* (*tritōs*) = third, and Eng. *zoid*.]

Biol.: A zoid produced by fission from a deuteriozoid; a zoid of the third generation. [*Zooid*.]

* **trit'-u-ra-bie, a.** [Fr.] [TRITURATE.] Capable of being triturated or reduced to a fine powder by pounding, rubbing, or grinding.

* *Triturable* and red oxide into powder. — *Brown: Vulgar Errors*, bk. ii., ch. 1.

trit'-u-rāte, v. t. [Lat. *tritutus*, pa. par. of *trituro* = to thrash, to grind; *tritura* = a rubbing, chafing; orig. fem. sing. of fut. part. of *tero* = to rub.]

1. To rub, grind, bruise, or thrash.
2. To rub or grind down to a very fine powder, finer than that produced by pulverization.

* "Where the shore is low, the soil is commonly sandy, or rather composed of triturated coral." — *Cook: Third Voyage*, bk. ii., ch. viii.

trit'-u-rā-tion, s. [Fr., from Lat. *tritutus*, pa. par. of *trituro* = to triturate (q.v.).] The act of triturating or reducing to a very fine powder by grinding; the state of being triturated.

* "In poultry, the *trituration* of the gizzard, and the gastric juice, concurs in the work of digestion." — *Falcy: Natural Theology*, ch. x.

* **trit'-u-rā-ture, s.** [Eng. *trituration*]; *-ure*.] A wearing by rubbing or friction.

* **trit'-ure, s.** [Lat. *tritura*.] [TRITURATE.] A rubbing or grinding.

tri-tūr'-i-ūm, tri-tōr'-i-ūm, s. [TRITURATE.] A vessel for separating liquors of different densities.

trit'-yl, s. [Gr. *τριτος* (*tritōs*) = third; suff. *-yl*.] [PROPYLE.]

trit'-yl-ēne, s. [Eng. *trityl*; *-ene*.] [PROPYLENE.]

tri-tý-lō-dōn, s. [Prefs. *tri-*, *tylo-*, and Gr. *δωνος* (*donos*), genit. *δωντος* (*donotos*) = a tooth.]

Paleont.: A genus of Mammals, with one species, *Triylodon longevus*, founded on remains transmitted by Dr. Exton from beds of Triassic (q. v.) age in Thibet-chou, in Basuto-land, and described by Sir Richard Owen. Dentition: 1.2-2, m. 6-6. Its nearest allies are *Microlestes* (q.v.), and *Stereognathus*. (*Quar. Jour. Geol. Soc.*, xl, 140-151.)

tri-ūm-fēt'-ta, s. [Named after John Triumfetti, an Italian botanist and author.]

Bot.: A genus of Grewiæe. Annuals or perennials with stellate hairs. Leaves entire or palmately lobed; flowers solitary or in axillary clusters, yellow; stamens ten, rarely five; fruit prickly, two- to five-celled. The fruit of *Triumfetta annua* is called in Jamaica the Parakeet Bud, because parakeets feed on them. In India they eat this and *T. plicata*, while in times of scarcity *T. rhomboides*, a third Indian species, is eaten by men. *T. angulata* has a soft and glossy fibre.

tri-ūmph, *tri-ūmphe, s. [O. Fr. *triumphe*; Fr. *triomphe*, from Lat. *triumphum*, accens. of *triumphus* = a triumph; cogn. with Gr. *θριαμβος* (*thriambos*) = a hymn to Bacchus, sung in festal processions in his honour; Sp. & Port. *triufo*; Ital. *trionfo*. *Triumph* and *trump* are doublets.]

I. *Ordinary Language*:

1. Pomp of any kind.
"When thou didst ride in triumph through the streets." *Shakspeare: 2 Henry VI.*, ii. 4.

* 2. A public festivity or exhibition of any kind; as an exhibition of masks, a tournament, a pageant.
"Our daughter, in honour of whose birth these triumphs are." *Shakspeare: Pericles*, ii. 2.

3. In the same sense as II.
"Before his triumph he walked the streets with gilded chains on hire necks long." *Chaucer: C. T.*, 14, 366.

4. The state of being victorious.
"Hail to the chief, who in triumph advances." *Scott: Lady of the Lake*, li. 18.

fāte, fāt, fare, amidst, whāt, fāll, father; wē, wēt, here, camēl, hēr, thère; pine, pīt, sire, sir, marine; gō, pōt, or, wōre, wōlf, work, whō, sōn; mīte, cūb, cūre, unīte, cūr, rūle, fūll; trý, Sýrian. æ, œ = ē; ey = ā; qu = kw.

K. Victory, achievement, success, conquest.

"That mingled envy and content with which the ignorant naturally regard the triumph of knowledge."
—Macaulay: *Hist. Eng.*, ch. xli.

6. Joy or exultation for success; great gladness or rejoicing.

"Trion his trumpet shrill before them blew,
For goodly triumph and great iolliment."
Spenser: *F. Q.*, IV. xl. 12.

7. A trump-card. [TRUMP (1), L.]

"Let therefore euerie christian man end woman playe at these cards, that they may haue end otheine the triumph; you must marke also that the triumph must applye to felche loue vnto him all the other caries, whatsoeuer othe they be of."
—Latimer: *Sermons on the Card.*

*** 8. A game at cards; ruff.**

"The game that we will play at, shall be called the triumph, which if it be well played at, hee that dealeth shall winne; the players shall likewise winne, and the standers and lookers vpon, shall doe the same; in summe that there is no man, that is willing to playe at this triumphe with these cardes, but they shall be all winners, and to losers."
—Latimer: *Sermons on the Card.*

II. Roman Antiq.: A grand procession, in which a victorious general entered the city by the Porta Triumphalis, in a chariot drawn by four horses, wearing a dreas of extraordinary splendour, namely, an embroidered robe, an under garment flowered with palm leaves, and a wreath of laurel round his brow. He was preceded by the prisoners taken in the war, the spoils of the cities captured, and pictures of the regions subdued. He was followed by his troops; and after passing along the Via Sacra and through the Forum, ascended to the Capitol, where he offered a bull in sacrifice to Jove. A regular triumph could not be demanded unless the following conditions had been satisfied:—

1. The claimant must have held the office of dictator, censor, or praetor.
2. The success upon which the claim was founded must have been achieved by the claimant with command-in-chief of the victorious army; or, in other words, the operations must have been performed under his auspices.
3. The campaign must have been brought to a termination, and the country reduced to such a state of tranquillity as to admit of the withdrawal of the troops, whose presence at the ceremony was indispensable.
4. Not less than 5,000 of the enemy must have fallen in one engagement.
5. Some positive advantage and extension of dominion must have been gained, not merely a disaster retrieved, or an attack repulsed.
6. The contest must have been against a foreign foe.

Under the Empire, the prince being sole commander-in-chief of the armies of the state, all other military commanders were regarded merely as his legati, and it was held that all victories were gained under his auspices, however distant he might be from the scene of action; consequently he alone was entitled to a triumph.

A naval triumph differed from a military one only in being on a smaller scale, and in being characterized by the exhibition of nautical trophies, such as beaks of ships. An ovation was an honour inferior to a triumph, the chief difference being that in the former the victorious general entered the city on foot, and in later times on horseback. The senate claimed the exclusive prerogative of granting or refusing a triumph.

"To follow Caesar in his triumph."
Shakesp.: *Antony & Cleopatra*, III. 13.

*** ¶ To ride triumph:** To be in full career; to take the lead.

"So many jarring elements breaking loose, and riding triumph in every corner of a gentianian's house."
—Sterne: *Tristram Shandy*, III. 137.

tri-um-ph, v. t. & t. [Fr. *triumpher*, from Lat. *triumpho*; Sp. & Port. *triumfar*; Ital. *trionfare*.]

A. Intransitive:

1. To obtain victory; to be victorious; to prevail.

"He may triumph in love."
Shakesp.: *Sonnet* 151.

*** 2. To exult upon an advantage gained or supposed to be gained; to exult or boast inaudently.**

"He woe full blithe, as he had gone thereby,
And gan therat to triumph without victorie."
Spenser: *F. Q.*, IV. l. 50.

3. To enjoy a triumph, as a victorious general; to celebrate victory with pomp; hence, to rejoice for victory.

"Weep't to see me triumph"
Shakesp.: *Coriolanus*, II. 1.

*** 4. To play a trump or winning card on another; to trump.**

"Orace and mastery you might behold
Triumphing in their faces."
Shakesp.: *Rape of Lucrece*, 1, 888.

*** B. Transitive:**

1. To vanquish, to conquer, to prevail over, to subdue, to triumph over.

"Hee on Libyan coasts arride . . .
Triumphed Jougurs's mydd dominion."
—Mey: *Lucan*; *Pharsalia*, II.

2. To make victorious; to cause to triumph or prevail.

"He hath triumphed the name of Christ."
—Bp. Jewell: *Works*, II. 222.

tri-um-phal, a. & s. [Lat. *triumphalis*, from *triumphus* = a triumph; Fr. *trionphal*; Sp. *trionfal*; Ital. *trionfale, trionfale*.]

A. As adj.: Of or pertaining to a triumph; commemorating or used in celebrating a triumph or victory.

"They bore him aloft in triumphal procession."
Longfellow: *Evangeline*, II. 3.

*** B. As subst.:** A token of victory; insignia of a triumph. (*Milton*: *P. R.*, IV. 577.)

triumphal-arch, a.

Architecture:

1. An edifice erected by the Romans in various situations, but more especially at the entrance to a city, at first in honour of victorious generals, and, in later times, of the Emperors. These structures were originally of brick, but afterwards of stone or marble; their form was that of a parallelepipedon, having one central arch, often with a smaller one on each side. They were decorated with columns, sculptures, and other embellishments, the whole being surmounted with a

TRIUMPHAL ARCH.
(Arch. of Titus.)

heavy attic. Under the Emperors many triumphal arches of costly material were erected. The oldest in Rome is that of Titus, erected on the occasion of his triumph after the conquest of Jerusalem (A.D. 70). It is remarkable as containing a representation of the golden candlestick of the Herodian temple. [BAS-RELIEF.] Of modern triumphal arches the finest are the Arc de Triomphe or Arc de l'Étoile, at the western extremity of the Champs Elysées, Paris, commenced by Napoleon in 1806, and finished by Louis Philippe thirty years later; the Brandenburg Gate in Berlin (1789-93); and the Arco della Pace, in Milan.

2. A temporary arch set up in token of welcome to a royal personage or successful warrior, &c.

triumphal-column, s. An insulated column erected by the Romans in commemoration of a victorious general to whom triumph had been decreed.

triumphal-crown, s. A laurel crown awarded by the Romans to a victorious general.

tri-um'-phant, * tri-um-phaut, * try-um-phaut, a. [Lat. *triumphans*, pr. par. of *triumpho* = to triumph; Fr. *trionphant*; Sp. *trionfante*; Ital. *trionfante*.]

*** 1. Used in, pertaining to, or commemorating a triumph or victory; triumphal.**

"Make *Triumphant* fires
Shakesp.: *Coriolanus*, v. 5.

2. Victorious; graced or crowned with victory or success. (*Cooper*: *Hope*, 166.)

3. Rejoicing or exulting for victory, or as for victory; triumphing; exultant.

"Think you, but that I know our state secure,
I would be so triumphing as I am!"
Shakesp.: *Richard III.*, III. 2.

*** 4. Noble, notable.**

"Wherof King Edward . . . gave to the sayde Scottys battyll, & of them had *triumphante* victory."
—Fabyan: *Cronycle* (an. 1331.)

*** 5. Glorious; of supreme magnificence and beauty.** (*Shakesp.*: *Antony & Cleopatra*, II. 2.)

tri-um'-phant-ly, * tri-um-phaut-ly, adv. [Eng. *triumphant*; -ly.]

1. In a triumphant manner; in the manner of a victorious conqueror; like a victor; as becomes a victor or triumph.

"Christ ascended
Triumphantly, from star to star."
Longfellow: *Golden Legend*, II.

2. With insolent triumph or exultation.

"Or did I bragge and boast *triumphantly*,
As who should saye the field were mine the dayes?"
Gascoigne: *Lookes of a Lower forsaken*.

3. Festively; with rejoicing or exultation.

"Dance in Duke Theobald's hoose *triumphantly*."
Shakesp.: *Midsummer Night's Dream*, IV. 1.

tri-um-ph-er, s. [Eng. *triumph*; -er.]

1. One who triumphs or rejoices and exults in victory; a victor.

2. One who was honoured with a triumph; one who returned as a victorious general.

"And enters in our ears like great triumphers
In their applauding gates."
Shakesp.: *Timon of Athens*, v. 2.

tri-um-ph-ing, pr. par. or a. [TRIUMPH, v.]

*** tri-um'-phing-ly, adv.** [Eng. *triumphing*; -ly.] With triumph or exultation; triumphantly. (*Bp. Hall*: *Of Contention*, § 17.)

tri-um'-vir, s. [Lat. = one of three men associated in an office, from *trium* *virorum* = of three men; *tres* = three, and *vir* = a man.]

1. Rom. Antiq.: One of three men united in office. The triumvirs were either ordinary magistrates (as the *Triumviri Capitales*, who were police commissioners, having charge of the gaols, and acting as magistrates, the *Triumviri Monetale*, who were commissioners of the mint, and had the charge of coining money), or they were extraordinary commissioners appointed to jointly execute any office. Specifically applied to the members of the two triumvirates. [TRIUMVIRATE, I.]

2. Eng. Antiq.: A trithing man or constable of three hundred. (*Cowel*.)

tri-um'-vir-ate, s. [Lat. *triumviratus*, from *triumvir* = a triumvir (q.v.).]

1. A coalition of three men in office or authority. Specifically applied to two great coalitions of the three most powerful individuals in the Roman empire for the time being. The first of these was effected in the year B.C. 60, between Julius Caesar, Pompey, and Crassus, who pledged themselves to support each other with all their influence. This coalition was broken by the fall of Crassus at Carthæ in Mesopotamia; soon after which the civil war broke out, which ended in the death of Pompey, and establishment of Julius Caesar as perpetual dictator. After his murder, a.c. 44, the civil war again broke out, and after the battle of Mutina, a.c. 43, Antony, Octavius, and Lepidus coalesced, thus forming the second triumvirate. They divided the provinces of the empire; Octavius taking the west, Lepidus Italy, and Antony the east.

"And instituting a *triumvirate*,
Do part the land in triple government."
—Dunbar: *Civil Wars* IV.

*** 2. A party or act of three men; three men in company.**

"Someone requesting Mr. Pickwick in a surly manner, to be as alive as he could, for it was a busy time, drew up a chair by the door, and sat there till he had finished dressing. Sam was then despatched for a hackney coach, and in it the *triumvirate* proceeded to Coleman street."
—Dickens: *Pickwick*, ch. xli.

*** 3. A group of three things intimately connected.**

"Theology, philosophy, and science constitute a spiritual *triumvirate*."
—G. H. Lewis: *History of Philosophy*, I. xvii.

*** tri-um'-vir-y, s.** [TRIUMVIRATE.] The number of three men.

"Thou makest the *triumvirate* the corner-stone of society."
Shakesp.: *Love's Labour's Lost*, IV. 8.

*** tri-um'-one, a.** [Lat. *tri-* = three, and *unus* = one.] Three in one; an epithet applied to God, to express the trinity in unity.

"Power, wisdom and goodness combined in the *trium Deity*."
—Knox: *Christian Philosophy*. (Note.)

*** ¶ In the ninth century a controversy arose about the application of the word, or its Latin equivalent *trinus*, to the Deity. Hincmar objected to the words *Trinus Deitas* in a hymn, and forbade their use in his diocese. The Benedictine monks took the opposite view, and so did Godeschalca, who was in consequence accused by Hincmar of tritheism; but the words objected to retained their place in the hymn.—Mosheim: *Church Hist.* (ed. Reid), p. 316.**

"The trinity of the Godhead."—*Mors*.

tri-ūr-ē-æ, *s. pl.* [Mod. Lat. *triur(is)*; Lat. fem. pl. adj. suff. *-æ*.]

Bot.: The typical tribe of Triuridaceæ (q.v.).

tri-ūr-īd, *s.* [TRIURIDACEÆ.]

Bot. (Pl.): The Triuridaceæ (q.v.).

tri-ū-rī-dā-ō-æ, *s. pl.* [Mod. Lat. *trivialis*, genit. *trivialis*]; Lat. fem. pl. adj. suff. *-æ*.]

Bot.: Triurids; an order of Hydrales. Little perennial sub-hyaline plants, with a creeping rhizome. Stem simple, erect, cellular; leaflets minute, alternate, destitute of nervures; inflorescence in terminal racemes, flowers minute, generally unisexual; perianth hyaline, with a tube and limb, the latter divided into three, four, six, or eight segments; stamens few, anthers quadricellular; style sometimes lateral, smooth, or feathery; ovaries numerous, carpels many, drupaceous. From the hotter parts of South America, Java, Ceylon, and the Philippines islands. Known genera five, species eight. (*Lindley*.)

tri-ūr-is, *s.* [Pref. *tri-*, and Gr. *οὐρά* (*oura*) = a tail.]

Bot.: The typical genus of Trinidaceæ (q.v.), with only one known species, a small Brazilian herb.

triv-g-ent, *a.* [Pref. *tri-*, and Lat. *valens*, genit. *valentis* = powerful.]

Chem.: Equivalent to three units of any standard, especially to three atoms of hydrogen.

trivalent-element, *s.* [TRIAD.]

tri-valve, *s.* [Pref. *tri-*, and Eng. *valve*.] Anything having three valves, especially a shell with three valves.

tri-val-vu-lar, *a.* [Pref. *tri-*, and Eng. *valvular*.] Three valved; having three valves; opening by three valves, as the fruit of the tulip.

***triv-ant**, *s.* [TRUANT.] A truant.

"Thou art an idler, an ass, a trifter, a truant, thou art an idle fellow."—*Burton*: *Anat. Melan.*, p. 10. (To the Reader.)

***triv-ant-ly**, *adv.* [Eng. *triviant*; *-ly*.] Like a truant.

"Him that by reason of a voluble tongue, a strong voice, a pleasing tone, and some *triantly* Polyauthean helms, steers and gleases a few notes from other men's harvests."—*Burton*: *Anat. Melan.*, p. 188.

trive, *v.t.* [See *del*.] An abbreviation of Contrive (q.v.).

tri-vēr-bī-al, *a.* [Lat. *tri* = three, and *verbum* = a word.] Of or pertaining to certain days in the Roman calendar, which were juridical, or days allowed to the prætor for deciding causes: so named from the three characteristic words of his office, *do, dico, addico*. Also called *dies fasti*.

tri-vēr-tē-brāl, *a.* [Pref. *tri-*, and Eng. *vertebral*.]

Compar. Anat.: Consisting of three vertebrae. A term applied by Huxley (*Anat. Vert. Anim.*, p. 341) to a bone in *Glyptodon* (q.v.), formed by the ankylosis of the last cervical and first two dorsal vertebrae, and articulating by a movable hinge-joint with the remaining dorsal vertebrae, which are likewise ankylosed to form a kind of "arched bridge of bone."

triv-ēt, *triv-ette*, ***triv-ette**, *s.* [O. Fr. *trépiel*; Fr. *trépiel* = a trivet, from Lat. *tripedem*, accus. of *tripes* = having three feet, from *tri* = three, and *pes* = a foot. *Trivet* and *tripod* are doublets.]

1. A three-legged arrangement for supporting an object, as a pot or kettle; this may be effected by slinging it from a hook suspended from the point of junction of the three legs, or the legs may be set 120° apart, straddling outward from and supporting a ring sufficiently large to receive the bottom of the pot.

¶ *Trivet* is frequently used as a proverbial comparison indicating stability, inasmuch as having three legs to stand on it is never unstable: as, To suit one to a *trivet*, right as a *trivet*, &c.

2. The knife wherewith the loops of tery fabrics are cut.

***trivet-table**, *s.* A table supported by three feet.

"The *trivet-table* of a foot was lame."—*Dryden*: *Ovid*; *Metamorphoses* viii.

triv-ī-a, *s.* [Abbrev. from *trivialis* (*virgo*) = Diana, from often having her temples where three ways met.]

Zool.: A sub-genus of *Cypræa*, with about thirty species, from Greenland, Britain, the West Indies, the Cape, Australia, the Pacific, and the west coast of America. Small shells, with atria extending over the back. *Trivialis europæa* is common on the British coasts.

triv-ī-al, ***triv-ī-all**, *a. & s.* [Fr. *trivialis*, from Lat. *trivialis* = pertaining to cross-roads, common, trite, from *trivium* = a place where cross-roads intersect the public thoroughfare, from *tri* = three, and *via* = a road, a way.]

A. As adjective:

*1. Originally, trite, well worn, without its being implied that the saying so denominated was of trifling importance; everyday, commonplace.

"These branches [of the divine life] are three, whose names, though *trivial* and vulgar, yet, if rightly understood, they bear such a sense with them, that nothing more weighty can be pronounced by the tongue of men or seraphims, and, in brief, they are these: charity, humility, and purity."—*H. Mors*: *The Grand Mystery of Godines*, vol. ii, ch. 211.

2. Trifling, insignificant; of little value or importance; inconsiderable, slight.

"A while on *trivial* things we held discourse, To me soon tasteless."—*Wordsworth*: *Excursion*, bk. 1.

*3. Occupying one's self with trifles; trifling.

"As a scholar 'he was *trivial* and inespahle of labour."—*De Quincey*.

*4. Of or pertaining to the trivium; hence, initiatory, rudimentary, elementary. [TRIVIVM.]

**B. As subst.*: One of the three liberal arts which constitute the trivium (q.v.).

"Frothing in *trivials* to a miracle, especially in poetry."—*Wood*: *Athenæ Oxon.*, vol. ii.

¶ For the difference between *trivial* and *trifling*, see TRIFLING.

trivial-name, *s.*

Natural History:

1. The specific name (q.v.) of any animal or plant.

"The index to this volume (*Oldnaska och Gothländska Resa*, 1748) shows the first employment of *trivial names*."—*Encyc. Brit.* (ed. 9th), xiv, 673.

2. A popular name for any animal or plant.

"The *trivial name* Klog, as well as Tyrant, has been bestowed on this bird for its extraordinary behaviour and the authority it assumes over all others during the time of breeding."—*Wood*: *Illus. Nat. Hist.*, ii, 850.

***triv-ī-āl-ism**, *s.* [Eng. *trivial*; *-ism*.] A trivial matter or mode of acting.

triv-ī-āl-ī-tĭy, *s.* [Eng. *trivial*; *-ity*.]

1. The quality or state of being trivial; trivialness.

2. A trivial thing or matter; a trifle; a matter of little or no value.

"Dinner cards, and squares of silk for fancy articles, with other *trivialities*, being often in demand."—*Harper's Magazine*, June, 1882, p. 118.

triv-ī-āl-ly, *adv.* [Eng. *trivial*; *-ly*.]

*1. In a trivial manner; commonly, vulgarly, tritely.

"How *trivially* common it is, that Luther was the son of an incubus, the disciple of the devil."—*Hp. Hall*: *Christian Moderation*, bk. II, § 10.

2. Lightly, inconsiderably; in a trifling manner or degree.

"Art was not an amusement—it was a serious business of life, and those who treated it *trivially* deserved their pursuit and did injustice to themselves."—*Observer*, Sept. 27, 1885.

triv-ī-āl-ness, *s.* [Eng. *trivial*; *-ness*.] The quality or state of being trivial; triviality.

"The pretended *trivialness* of the fifth and sixth day's work."—*Mors*: *Defence of the Philon. Cabbata*. (A. P.)

triv-ī-ūm, *s.* [Lat. = a place where three roads met, or where they diverged; *tri* = three, and *via* = a road, a way.] The name given in the schools of the Middle Ages to the first three liberal arts, grammar, rhetoric, and logic. (See *extract*.)

"The *trivium* contained Grammar, Logic, and Rhetoric; the *Quadrivium*, Arithmetic, Geometry, Music, and Astronomy, as in these two lines, framed to assist the memory:—

GRAMM. Igitur; DIA. vera doct; RES. verba colorat; Mēs. cant; AR. numerat; GEO. ponderat; AER. colit astrum.

Hallam: *Intro. to Literature of Europe*, &c., pt. I, ch. i, § 3. (Note.)

tri-week-ly, *a. & s.* [Pref. *tri-*, and Eng. *weekly* (q.v.).]

A. As adjective:

1. Occurring, performed, or appearing once in every three weeks.

2. Occurring, performed, or appearing three times in each week; as, a *triweekly* newspaper.

B. As subst.: A newspaper which is published three times in each week.

trix-ā-gō, *s.* [Lat. *trixago*, *trissago* = a plant, *Teucrium Chamedrys* (Linn.).]

Bot.: A genus of Euphrasiceæ, akin to *Bartsia*, but with a fleshy, oval, globose capsule, and a thick trifid placenta. *Trizago viscosa* is the same as *Bartsia viscosa*.

trix-id-ē-æ, *s. pl.* [Mod. Lat. *trixis*, genit. *trixidis*]; Lat. fem. pl. adj. suff. *-æ*.]

Bot.: A tribe of Nassaviaceæ.

trix-is, *s.* [Lat. = the castor-oil plant.]

Bot.: The typical genus of Trixideæ. Two species are cultivated in Britain, one in gardens, the other as a stove plant. *Trixis brasiliensis* is given as a remedy of excessive menstruation.

trōad, *s.* [TRODE.]

trōat, *v.t.* [TROAT, *s.*] To cry, as a buck in rutting time.

trōat, *s.* [From the sound.] The cry of a buck in rutting time.

trō-car, **trō-char**, *s.* [Fr. *troiscarré* = three-faced, from *trois* = three, and *carre* = a square, a face.]

Surg.: An instrument consisting of a perforator or stylet and a cannula. After the puncture is made the stylet is withdrawn, and the cannula remains and affords a means of evacuating from the cavity. Used in case of dropsy, hydrocele, &c.

"The handle of the *trocar* is of wood, the cannula of silver, and the perforator of steel."—*Sharp*: *Surgery*.

trō-chā-īo, *a. & s.* [Lat. *trochæus*, from *trochæus* = a trochee (q.v.).]

A. As adjective:

Pros.: Pertaining to or consisting of trochees: as, *trochaic* verse. The trochaic verse used by the Greek and Latin poets most commonly consists of a perfect dimeter, followed by a dimeter wanting the last half foot.

B. As subst.: A trochee verse or measure. "One poem consisteth only of hexameters, and another was entirely of iambics, a third of *trochaic*."—*Dryden*: *Juvenal*. (Dedic.)

***trō-chā-īo-āl**, *a.* [Eng. *trochaic*; *-al*.] The same as TROCHAIC (q.v.).

trōch-āl, *o.* [Gr. τροχός (*trochos*) = a running, a wheel.] Wheel-shaped; specifically applied to the ciliated disc of the Rotifera.

trō-chām-mī-nā, *s.* [Pref. *troch(o)*; Gr. ἀμμινός (*ammīnos*) = sandy, from ἀμμος (*ammos*) = sand.]

1. *Zool.*: Wheel-sand; a genus of Foraminifera. Shell simple, flat, coiled, resembling smooth sandy plaster. Sometimes, however, it is twisted and constricted at intervals. One species is called *Trochammina gordialis*, the Gordian Knot, which it resembles; another imitates a Rotalia. [ROTALIA.]

2. *Palæont.*: From the Carboniferous onward.

trō-chān-tēr, *s.* [Gr. τροχάντηρ (*trochanter*) = a runner, a runner round; τροχάζω (*trochazō*) = to run along.]

Anatomy:

1. *Human*: One of two processes of the femur (q.v.). The *trochanter major* is a thick truncated process prolonged upwards in a line with the external surface of the shaft of the femur; the *trochanter minor*, a conical rounded eminence projecting from the posterior and inner aspect of the thigh, and giving attachment to the tendon of the psoas and iliacus muscles. The trochanters give insertion to the muscles which rotate the thigh.

2. *Compar.*: There is only one trochanter in the femur of the elephant, while there are three in that of the Perissodactyla. The term is also applied to the portion of the leg of an insect which unites the long thigh or femur to the coxa. The trochanter of insects varies greatly in form.

trō-chăn-tēr-ī-ăn, a. [Eng. trochanter; -ian.]

Anat.: Of or pertaining to the greater trochanter. (*Dunghison.*)

trō-chăn-tēr-īc, a. [Eng. trochanter; -ic.]

Anat., &c.: Of or belonging to a trochanter (q.v.).

trochanteric-fossa, s.

Anat.: A fossa at the base and rather behind the neck of the trochanter major. It gives attachment to the obturator and gemelli muscles.

trō-chăn-tîn-ī-ăn, a. [Eng. trochanter; -inian.]

Anat.: Of or pertaining to the lesser trochanter. (*Dunghison.*)

trō-char, s. [TROCAR.]

trōch-a-tēr-lā, s. [Mod. Lat., dimin. from Lat. trochus = a hoop.]

Zool.: A sub-genus of Helicina, with the peristome simple, expanded, and the shell not callous beneath. Known species, twenty from the West Indies and one from Venezuela.

trōche, troche, s. [Gr. τροχός (trochos) = a running, a wheel.] A form of medicine in a circular cake or tablet, or a stiff paste cut into proper portions and dried. It is made by mixing the medicine with sugar and mucilage, and is intended to be gradually dissolved in the mouth and slowly swallowed, as a demulcent.

trō-cheō, s. [Lat. trocheus, from Gr. τροχάιος (trochaios) = (a.) running, (s.) a trochee, from τροχός (trochos) = a running, from τρέχω (trēchō) = to run.]

Pros.: A foot of two syllables, of which the first is long and the second short: as *inter, nation, &c.* (— | ∪).

trōch-ē-ī-dō-scōpe, s. [Pref. troch(o); Gr. εἶδος (eidos) = appearance, and σκοπέω (skopēō) = to see.] A form of colour top. [Top.]

trō-chēt-ī-g, s. [Named after M. du Trochet, a French physiologist.]

Bot.: A genus of Dombeyae. Leaves entire; calyx five-lobed; petals five, deciduous; stamens many, combined below into a tube; capsule five-valved, five-celled. *Trochetia grandiflora*, a native of Mauritius, is a splendid stove plant with snow-white flowers.

***trōch-ī-dae, s. pl.** [Mod. Lat. trochus;] Lat. fem. pl. adj. suff. -idae.]

Zool.: A family of Gastropoda Helicostomata, now merged in Turbinidae.

trōch-ī-form, a. [Mod. Lat. trochus, and Lat. forma = form.] Resembling Trochus (q.v.) in shape. (*Woodward; Mollusca* (ed. Tate), p. 271.)

trōch-il, s. [TROCHILUS.] The same as TROCHILUS 2 (2) (q.v.).

"The crocodile . . . opens his chaps to let the trochil in to pick his teeth, which gives it the usual feeding."—*Sir T. Herbert: Relations*, &c., p. 364.

***trō-chil-lē, a.** [Gr. τροχίλος (trochilos), from τροχός (trochos) = a running; τρέχω (trēchō) = to run.] Pertaining to or characterized by rotary motion; having power to draw out or turn round.

"I am advertised that there is one, which, by art trochilick, will draw all English armines of the best families out of the pit of poetry; as Boucher from Busyrin, Percy from Perseus, &c."—*Camden: Remains*.

***trō-chil-ics, s.** [TROCHILIC.] The science of rotary motion.

"It is requisite that we rightly understand some principles in trochilicks, or the art of wheel instruments; as chiefly, the relation betwixt the parts of a wheel, and those of a balance."—*Wilkins: Delectata*, ch. xiv.

trō-chil-ī-dae, s. pl. [Mod. Lat. trochilus;] Lat. fem. pl. adj. suff. -idae.]

Ornith.: Humming-birds (q.v.), a family of Fissirostral Picarian Birds, closely allied in structure to the Swifts, but formerly classed with the Tenuirostres. The family contains 113 genera, confined to the New World. The bill, though always very slender, is very variable in shape and size; tongue long, composed of two cylindrical united tubes, and bifid at the tip; it is capable of being protruded for some distance, the tongue-bones with their muscles being prolonged backwards and upwards over the back of the skull; the wings with ten

primaries, usually narrow and pointed, and set in motion by enormously-developed muscles; sternum deeply keeled; tail of ten feathers, varied in shape, and in many instances highly ornamented; tarsal and feet particularly small and feeble, unfit for progression on the ground. The species consequently seldom or never alight on the earth, but prefer to settle on a bare dead limb of a tree or some other projection. The eggs are oval and white, and always two in number. According to Gould, restlessness, irritability, and pugnacity are among the principal characteristics of the Trochilidae; they not only fight persistently among themselves, but they will even venture to attack much larger birds. It is also stated that they have a great dislike to the large Hawkmoths, which they themselves somewhat resemble in their flight, the vibration of the wings producing in both a similar humming sound.

trō-chil-ī-ūm, s. [Mod. Lat., dimin. from Lat. trochilus = a small bird, the golden-crested wren.]

Entom.: Clear-wing; a genus of Egeriidae. Antennae simple, or in the males ciliated or pectinated, terminating in a slender tuft of hairs; fore wings generally with the basal half transparent; hind wings wholly transparent. Abdomen slender, with an anal tuft. The caterpillar feeds within the stems of currant bushes, the birch, the oak, the apple, various willows, &c.

trōch-il-ūs, s. [Lat. trochilus = a small bird, perhaps the golden-crested wren, from Gr. τροχίλος (trochilos).] [TROCHILIC.]

- 1. Arch.: The same as SCOTIA (q.v.).
- 2. Ornithology:

(1) The type-genus of Trochilidae (q.v.). Tail-feathers pointed, wings short. Two species are known—*Trochilus colubris*, inhabiting North America during the summer, and migrating in winter to Central America and the West India islands; and *T. alexandri*, from California and Mexico. *T. colubris*, otherwise known as the Ruby-throated Humming-bird, is the only species which visits the United States, and is remarkable for the boldness of its migratory flight and the wide extent of country covered. It is found in summer over all the United States, said as far north as the 57° of latitude. Its chin and throat are of a beautiful ruby-red color, its back a golden green, and the lower surface whitish; the wings and tail purplish brown.

(2) *Charadrius melanocephalus*, a native of Egypt. It is about ten inches long; general hue slate colour; abdomen and neck white, head black, with two white stripes running from the bill and meeting at the nape of the neck, black mantle extending over the shoulders to the tail, wings black, with a broad transverse black band.

"Herodotus [II. 68] enters into a detail of the habits of the crocodile, and relates the frequently-repeated story of the trochilus entering the animal's mouth during its sleep on the banks of the Nile, and relieving it of the leeches which adhere to its throat. The truth of this assertion is seriously impugned when we recollect that leeches do not abound in the Nile; and the polite understanding said to subsist between the crocodile and the hummer becomes more improbable when we examine the manner in which the throat of the animal is formed; for, having no tongue, nature has given it the means of closing it entirely, except when in the act of swallowing; and during sleep the throat is constantly shut, though the mouth is open."—*Wilkinson: Manners of the Egyptians* (ed. Birch), II. 133, 134.

(3) In older classifications, trochilus occurs as a trivial name; thus *Motacilla trochilus* (Linn.) = the willow-wren.

2. *Anat.*: Anything grooved like a pulley. Specifically:

(1) The trochlea of the humerus; the internal part of the inferior articular surface of the humerus. It articulates with the ulna, and is grooved down the middle.

(2) The trochlea of the orbit, a fibro-cartilaginous ring attached to the frontal bone.

trōch-lē-ār, a. [TROCHLEA.]

1. *Ord. Lang.*: Resembling a pulley; pulley-shaped. (Rare, except in botany.)

2. *Anat.*: Of or belonging to the trochlea.

trochlear-nerve, s.

Anat.: The Pathetic nerve (q.v.).

trōch-lē-ār-īs, s. [Mod. Lat.] [TROCHLEA.]

Anat.: The superior oblique muscle of the orbit.

trōch-lē-a-rŷ, a. [Eng. trochlear; -y.]

Anat.: Of or pertaining to the trochlea; as, the trochleary muscle, the trochleary nerve.

trōch-lē-ate, a. [Mod. Lat. trochleatus, from Lat. trochlea.]

Bot.: Twisted so as to resemble a pulley.

trōch-ō-, pref. [Gr. τροχός (trochos) = a wheel.]

Circular; having a circular, or nearly circular form.

trōch-ō-car-pē, s. [Pref. trocho-, and Gr. καρπός (karpos) = fruit. Named from the radiated arrangement of the cells in the fruit.]

Bot.: A genus of Stypheleae. Australian shrubs or small trees, with terminal or axillary spikes of white or yellow flowers. *Trochocarpa laurina* is a very handsome greenhouse shrub.

trō-chōç-ēr-ās, s. [Pref. trocho-, and Gr. κέρασ (keras) = a horn.]

Paleont.: A genus of Nautilidae, with forty-four species, from the Upper Silurian of Bohemia. Shell nautiloid, spiral, depressed; some of the species are nearly flat, and, having the last chamber produced, resemble *Lituites* (q.v.).

trōch-ō-çy-a-thā-çō-æ, s. pl. [Mod. Lat. trochocyathus;] Lat. fem. pl. adj. suff. -aceæ.]

Paleont.: A sub-family of Turbinolidae. Corals, with more than one row of pali, and with an abnormally large number of rows of tentacles. Largely represented in the Newer Secondary rocks and in the Tertiary, and at present in the deep sea.

trōch-ō-çy-a-thūs, s. [Pref. trocho-, and Lat. cyathus = a cup.]

Paleont.: The typical genus of Trochoeeyathaceæ (q.v.), from the Jurassic onward.

trōch-ō-çys-tī-tēs, s. [Pref. trocho-; Gr. κύστις (kustis) = a bladder, and suff. -ites.]

Paleont.: A genus of Cystoidea, from the Primordial Zone of North America.

trōch-ō-īd, a. & s. [Pref. trocho-, and Gr. εἶδος (eidos) = form, appearance.]

A. As adjective:

1. *Geom.*: The same as TROCHOIDAL (q.v.).

2. *Zool.*: Conical with a flat base, applied to shells of certain Foraminifera and Gastropoda.

B. As substantive:

1. *Geom.*: The same as CYCLOID (q.v.).

2. *Anat.*: A trochoidal articulation. [TROCHOIDAL, a.]

trō-chōid-āl, a. [Eng. trochoid; -al.]

1. *Ord. Lang. & Geom.*: Pertaining to a trochoid; pertaining of the nature of a trochoid; as the trochoidal curves, such as the cycloidal, the involute of the circle, the spiral of Archimedes, &c.

2. *Anat.*: Of or pertaining to a kind of articulation, in which one bone is inserted in another like an axle-tree, so that there can be a motion like that of a wheel. The first and second vertebrae of the neck are thus articulated.

†trōch-ō-lī-tēs, s. [Pref. trocho-, and Gr. λίθος (lithos) = a stone.]

Paleont.: A synonym of *Lituites* (q.v.).

trō-chōm-ç-ter, s. [Pref. trocho-, and Eng. meter (q.v.).] An instrument for computing the revolutions of a wheel; an odometer.

trōch-ō-smī-lī-a, s. [Pref. *trocho-*, and Gr. *σμίλη (smilē)* = a knife.]

Palæont.: The typical genus of Trochosmilieæ (q.v.). Species numerous, ranging from the Jurassic to the Tertiary.

trōch-ō-smī-lī-ā-gē-ō, s. pl. [Mod. Lat. *trochosmilī(a)*; Lat. fem. pl. adj. suff. *-acēe*.]

Palæont.: A sub-family of *Astræideæ*. Solitary corals, cup-shaped, and with the internal dissepiments well developed.

trō-chōt-ō-mā, s. [Mod. Lat. *trochus*, and Gr. *τροπή (trōpē)* = a notch.]

Palæont.: A genus of Hallotidæ, with ten species, from the Lias to the Coral Rag of Britain, France, &c. Shell trochiform, slightly concave beneath; whorls flat, spirally striated, rounded at the outer angles; lip with a single perforation near the margin.

trōch-ūs, s. [Lat.] [TROCHO.]

1. Zool.: A genus of Turbinidæ, with 200 species, universally distributed, from low water to fifteen fathoms, the smaller species range nearly to 100 fathoms. Shell pyramidal, with a nearly flat base; whorls numerous, flat, variously striated; aperture oblique, rhombic, pearly inside; columella twisted, slightly truncated; outer lip thin; operculum horny, multispiral. Woodward enumerates ten sub-genera, to which Tate adds some others.

2. Palæont.: Fossil species 361, from the Devonian onward. Found in Europe, North America, and Chili.

trōek, *troke, v.t. [TRUCK, v.] To truck, to barter; to do business on a small scale. (Scott.)

"Trucking and comming w' that Meg Merrilies."—Scott: *Guy Mannering*, ch. 11.

trō-co, s. [Sp. *trucks* = trucks, a game somewhat resembling billiards. (Newman & Barrett.)]

Games: An old English game revived, formerly known as "lawn billiards," from which billiards is said to have had its origin. Troco is played on a lawn with wooden balls and a cue ending in a spoon-shaped iron projection. In the centre of the green there is an iron ring moving on a pivot, and the object is to drive the ball through the ring. Points are also made by cannoning. [CANNON (2), a.]

trō-ēg-ēr-īte, s. [After Herr Troeger; suff. *-ite* (Min.).]

Min.: A mineral occurring in thin, tabular crystals, with walgurite and other minerals, at the Weisser Hirsch mine, Schneeberg, Saxony. Crystallization, monoclinic; colour, lemon-yellow. Compos.: a hydrated arsenate of uranium; formula $5U_2O_3 \cdot 2AsO_5 \cdot 20H_2O$.

trōc-īl-y, s. [TROOLY.]

trō-gī-næ, s. pl. [Mod. Lat. *trox*, genit. *trog(is)*; Lat. fem. adj. suff. *-inæ*.]

Entom.: A sub-family of Scarabæidæ, resembling the Geotrupinæ in the form of the head, but the legs are not adapted for burrowing. They feed on animal substance on the surface of the ground or on trees. Those which frequent the former situation are coloured like the sandy soil, and often coated with sand. The others are frequently metallic, and can roll themselves up like a ball.

trōg-lō-dytc, *trōg-lō-dīte, s. & a. [Fr. *troglodyte*, from Gr. *τρογλοδύτης (trōglodutēs)* = one who creeps into holes, a cave-dweller, from *τρογλή (trōglē)* = a cave, and *δύω (dūō)* = to enter, to creep into.]

A. As substantive:

1. Literally:

1. (P.): The name given by the ancient Greeks to various races of low civilization, who either excavated dwellings in the earth or used natural caverns as habitations. According to Strabo, they extended as far west as Mauritania, and as far east as the Caucasus; but the best known were those of southern

Egypt and Ethiopia. They were said not to possess the power of speech—a rhetorical method of stating that their language differed from that of the Greeks. Community of wives existed among them, and their general habits were rude and debased. At the present time the mountainous regions of Arabia are filled with caves which have been converted into permanent habitations by half-savage tribes of Bedouins, and it is probable that these belong to the same race as the troglodytic population of Ptolemy and other geographers. It was formerly thought that cave-dwellers were peculiar to Africa; but recent archaeological discoveries show that they occurred also in Europe and America, and the prehistoric men of Central Europe and Britain were to a great extent troglodytic. An interesting article on Troglodyte Remains in Southern Morocco appeared in the *Times*, Sept. 22, 1887.

"Some authors maintain that this custom [cannibalism] and that of human sacrifices, were widely spread among the troglodytes of the Stone Age."—*N. Joly: Man before Man*, p. 355.

2. Any individual of the Anthropoid genus Troglodytes. [TROGLODYTES, 2.]

* **II. Fig.:** One who lives in seclusion; one unacquainted with the affairs of the world.

B. As adj.: Of or belonging to the troglodytes; living in caves.

"The invertebrate animals did not attract the attention of the troglodyte artists."—*N. Joly: Man before Man*, p. 301.

trō-glōd-ŷ-tēs, s. [TROGLODYTE.]

1. Ornith.: Wren; a genus of Troglodytidæ or Troglodytinæ, from the Neotropical, Arctic, and Palearctic regions. Bill moderate, compressed, slightly curved, without notch, pointed; nostrils basal, oval, partly covered by a membrane; wings very short, concave, rounded; tail generally short; feet strong, middle toe united at base to outer but not to middle toe; tarsus rather long; claws long, acute, and curved. *Troglodytes parvulus* (Linnæus), the Wren, is British. [WREN.]

2. Zool.: A genus of Simiinæ (q.v.). Head not produced vertically; arms not reaching more than half down the shin; ribs thirteen pairs; os intermedium absent from the carpus; no ischiatic callosities; hair black, dap, or gray. The genus is confined to the West African sub-region, ranging from the coast about 12° north and south of the equator, from the Gambia to Benguela, and as far inland as the great equatorial forests extend. The number of species is not accurately determined; three, however, are well known, and have been carefully described: *Troglodytes gorilla*, the Gorilla; *T. niger*, the Common, and *T. calvus*, the Bald Chimpanzee. There are probably other species, since Livingstone met with what he supposed to be a new species in the forest region west of the Nile (SOKO), and another has been described by Gratiolet and Alix. [KOOLAKAMBA.]

trōg-lō-dŷt-īc, trōg-lō-dŷt-īc-ā, a. [Eng. *troglodyte* (s); *-ic, -ial*.] Pertaining or relating to the Troglodytes, their manners or customs.

trō-glō-dŷt-ī-dæ, s. pl. [Mod. Lat. *troglodytes*; Lat. fem. pl. adj. suff. *-idæ*.]

Ornith.: Wrens; a family of Passerine Birds, with seventeen genera and ninety-four species. They are rather abundant and varied in the Neotropical region, with a few species scattered through the Neartic, Palearctic, and parts of the Oriental region. The constitution of the family is by no means well determined. (Wallace.)

trō-glō-dŷ-tī-næ, s. pl. [Mod. Lat. *troglodyt(es)*; Lat. fem. pl. adj. suff. *-inæ*.]

Ornith.: A sub-family of Timaliidæ (q.v.), distinguished by the bill being long and curved, short in proportion to the body. [TROGLODYTES, 1.]

trōg-lō-dŷt-ism, s. [Eng. *troglodyte* (s); *-ism*.] The state or condition of Troglodytes; the state or custom of living in caves.

"Perhaps we shall not be far wrong if we regard Troglodytism as the primitive state of all, or the greater part of mankind."—*Chambers's Encyc.*, ix. 557.

trō-gōn, s. [Gr., pr. par. of *τρογών (trōgōn)* = to guaw.]

1. Ornithology:

(1) The type-family of Trogonidæ (q.v.), with twenty-four species, ranging from Paraguay to Mexico, and west of the Andes in Ecuador.

(2) Any individual of the genus Trogon, or the family Trogonidæ (q.v.).

2. Palæont.: Remains have been found in the Miocene of France. At that exceptionally mild period in the northern hemisphere these birds may have ranged over all Europe and North America; but, as the climate became more severe they were gradually restricted to the tropical regions, where alone a sufficiency of fruit and insect-food is found all the year round. (Wallace.)

trō-gōn-ŷ-dæ, s. pl. [Mod. Lat. *trogon*; Lat. fem. pl. adj. suff. *-idæ*.]

Ornith.: A family of Picarian Birds, with seven genera and forty-four species. They are tolerably abundant in the Neotropical and Oriental regions; and are represented in Africa by a single genus. Bill short, strong, with a wide gape; tail generally long, in some

LONG-TAILED TROGONS.

specimens very long; feet small, and often feathered almost to the toes, two of which are placed in front and two behind. They form a well-marked family of insectivorous forest-hunting birds, of small size, whose dense puffy plumage exhibits the most exquisite tints of pink, crimson, orange, brown, or metallic green, often relieved by delicate bands of pure white. In one Guatemalan species, *Pharomacrus macinno*, the Long-tailed Trogon or Quesal (q.v.), the tail coverts are enormously lengthened into waving plumes of rich metallic green, as graceful and marvellous as those of the Birds of Paradise. Trogons are unable to use their feet for climbing, and usually take their station on the branches of a tree, dashing upon insects as they fly past or upon some fruit at a little distance from them, and returning to their seat to eat what they have secured.

trō-gōn-thēr-ŷ-ūm, s. [Gr. *τρογών (trōgōn)*, pr. par. of *τρογών (trōgōn)* = to guaw, and *θηρίον (thērion)* = a wild beast.]

Palæont.: A genus of Castoriidæ, from the Post-tertiary deposits of Europe. It scarcely appears to be generically distinct from *Castor* (q.v.).

trō-gōph-īc-ūs, s. [Gr. *τροφή (trōphē)*, genit. *τροφῆος (trōphēos)* = a caterpillar, and *φλοιός (phloios)* = the bark of trees.]

Entom.: A genus of Staphylinidæ, with twelve British species.

trō-gō-sī-ta, s. [Gr. *τροφή (trōphē)*, genit. *τροφῆος (trōphēos)* = a caterpillar, and *σίτος (sitos)* = wheat, corn.]

Entom.: The typical genus of Trogositidæ (q.v.). *Trogosita mauritunica* is often found in meal bins, feeding on their contents.

trō-gō-sī-tī-dæ, s. pl. [Mod. Lat. *trogosit(a)*; Lat. fem. pl. adj. suff. *-idæ*.]

Entom.: A family of Necrophaga, or Clavicornia, with three British genera, each containing one species. Lower jaws with only one lobe, and the first joint of the tarsi reduced in size. They are long beetles, with the body compressed, often of metallic colours. About 150 are known, mostly feeding on wood.

trō-gō-sūs, s. [Mod. Lat., from Gr. *τροφή (trōphē)*, genit. *τροφῆος (trōphēos)* = a guawer.]

Palæont.: A genus of Tillotheridæ, called by Leidy *Anelippodus*. Founded on remains from the Eocene of Wyoming.

trōgue, s. [A.S. *trog* = a trough (q.v.).] **Mining:** A wooden trough forming a drain.

Trō-īc, a. [Lat. *Troicus*.] Of or pertaining to ancient Troy or the Troas; Trojan.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thère; pine, pīt, sirc, sir, marine; gō, pūt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīto, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā; qu = kw.

tról-líte, s. [After Dominico Troili of Modena, Italy; suff. *-íte* (*Mín.*)]
Mín.: An iron sulphide occurring only in meteorites, in disseminated nodules. Hardness, 4.0; sp. gr. 4.75 to 4.82; colour, tumbac-brown, resembling that of pyrrhotite (q.v.); streak, black. Compos.: sulphur, 36.86; iron, 63.04 = 100, which is equivalent to the formula FeS.

Tró-jan, a. & s. [Lat. *Trojanus*, from *Troja* = Troy.]

A. As adj.: Pertaining or relating to ancient Troy; as, the Trojan war.

B. As substantive:

I. Lit.: An inhabitant of ancient Troy.

II. Figuratively:

"Sam the butler's true, the cook a reverend Trojan." *Bonson & Flet.*: *Night Walker*, II. 1.

* 3. A cant name for a person of doubtful character.

"There are other Trojans that thou dreamst not of." *Shakesp.*: *Henry IV.*, II. 1.

tróke, v.t. [TRUCK.]

tróke, s. [TROKE, v.]

1. The act of trucking; exchange, barter, dealings, intercourse, truck.

2. A trinket; a small ware.

tróll (1), s. [TROLL, v.]

* 1. The act of going round or moving round; routine, repetition.

"The troll of their battle." *Burke*: *French Revolution*.

2. A song, the parts of which are sung in succession; & round.

3. A reel on a fishing-rod.

4. A trolly.

"This 'coach' is a low beach-cart, used in the conveyance of the fish from the seaside; it is properly called a troll, and owes the origin of its construction to the narrowness of the streets aforesaid." *Illustr. London News*, Sept. 23, 1861, p. 232.

troll-plate, s.

Mach.: A rotating disc employed to effect the simultaneous convergence or divergence of a number of objects; such as screw-dies in a stock, or the jaws of a universal chuck.

troll (2), tróid, tróidd, trów, s. [Old Norse *troll*; Sw. *troll*; Dan. *troll* = giant, monster, spectre, unearthly being. (*Grimm*: *Deut. Mythol.* (ed. Stallybrass), II. 527.)]

Scandinavian Mythology:

1. A comprehensive term, embracing supernatural beings of widely different character.

"We come across numerous approximations and overlaps between the giant-legend and those of dwarfs and waterprites, as the comprehensive name troll in Scandinavian tradition would of itself indicate." *Grimm*: *Deut. Mythol.* (ed. Stallybrass), II. 552.

2. A giant or giantess endowed with supernatural powers.

3. A witch, a sorceress; a night-riding hag. Sometimes extended so as to include the Valkyres.

"I saw thee ride on the hardie, loose-haired, loose-girt, in troll's garb." *Grimm*: *Deut. Mythol.* (ed. Stallybrass), III. 1054.

troll-flower, s.

Bot.: *Trollius europæus*.

troll, *troole, *troul, *tronie, *trowl, *trowie, v.t. & i. (O. Fr. *troller, trauler* = to run hither and thither, to range or hunt out of order; Fr. *tróler* = to lead, to drag about, to ramble, to stroll about, from Ger. *trollen* = to roll, to troll; cogn. with O. tróil-lé-íte, s. [After H. G. Trolle Wachtmeister, the Swedish chemist; suff. *-íte* (*Mín.*)]

Mín.: An amorphous mineral, with compact texture. Hardness, below 6.0; sp. gr. 8.10; lustre, somewhat vitreous; colour, pale green. Compos.: phosphoric acid, 47.8; alumina, 46.2; water, 6.0 = 100, corresponding with the formula, $Al_2O_3 \cdot PO_5 + \frac{1}{2} Al_2O_3 \cdot 3H_2O$. Found in an iron mine at Westana, Scania, Sweden.

tróil-ér, s. [Eng. *troll*, v.; *-er*.] One who trolls.

tróil-leý, tróil-ly, s. [TROLL, v.]

1. A form of truck which can be tilted over by removing pins which attach it to the frame.

"The train consists of three cars coupled together and a trolley for luggage or goods." *Daily Telegraph*, Sept. 2, 1887.

2. A narrow cart which can be either driven by the hand or drawn by an animal.

3. [ELECTRIC-TROLLEY; TROLLEY-RAILWAY.]

trolley-car, s. [TROLLEY-RAILWAY.]

trolley-line, s. The railway on which electric trolley cars are run.

trolley-railway, s. A system of electric street and road railways which is now rapidly being introduced in the United States and parts of Europe. The current of electricity is conveyed on a copper wire, usually overhead, though in some cases underground. In contact with this wire runs a Trolley, or small revolving wheel, which is connected by a conductor with the electric motor in the car, and supplies the current necessary to the motion of the car. Great speed can be attained, if necessary. [ELECTRIC-RAILWAY, ELECTRIC-TROLLEY.]

trolley-wire, s. [TROLLEY-RAILWAY.]

tróil-íng, pr. par., a., & s. [TROLL, v.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As subst.: The act of one who trolls; specifically applied to a method of fishing for pike with a rod and line and with a dead bait, such as a gudgeon, spoon-bait, &c.

"Trolling with a dead bait or spoon may result in a heavy trout, if not a pike." *Field*, Jan. 15, 1886.

tróil-lí-ús, s. [Latinised from Sw. *troll* (q.v.)]

Bot.: Globe-flower (q.v.); a genus of Helleboreæ (q.v.). Erect perennial herbs, with alternate palmately-lobed or cut sepals, five to fifteen, coloured; petals five to fifteen, small, linear, flat, with a pit above the contracted base; stamens numerous, fillicies five or more. Known species none, from the North Temperate and Arctic zones.

* **tróil-ól, v.t. or i.** [A redupl. of *troll*, v. (q.v.)] To troll; to sing in jovial, rollicking manner.

tróil-lóp, s. [Prob. from *troll*, v., and perhaps a contraction of *troll-about*.] [TRULL.]

1. A woman loosely dressed; a slattern, a drab, a slut, a woman of bad character.

"Yet the virtuous virgin resolves to run away with him, to live among bacditt, to wait upon his trollop, if she had no other way of enjoying his company." *Lady M. W. Montagu*: *Letter*, June 23, 1764.

2. A loose hanging rag. (*Scotch*.)

* **tróil-lóp-éé, s.** [TROLLOP.] A loose dress for females.

* **tróil-mý-dámes, s.** [Fr. *trou-madame* = a pigeon-hole: *trou* = a hole, and *madame* = a lady.] An old English game; pigeon-holes; nine-holes.

"A fellow I have known to go about with *trolmy-dames*: I knew him once a servant of the prince." *Shakesp.*: *Winter's Tale*, IV. 2.

tróm-bíd-í-dés, tróm-bí-dí-í-dés, s. pl. [Mod. Lat. *trombidium*; Lat. masc. or fem. adj. suff. *-ides*.]

Zool.: Harvest-mites; an extensive family of Acarina. Body stout, round, or oval, often somewhat oblong, frequently broader before than behind; sometimes densely clothed with a kind of pubescence; the two hinder pairs of legs far removed from the two fore pairs; eyes two. They are generally of some shade of red, often bright vermilion, sometimes more or less spotted with brown or black. There are several genera, some of which feed on the juices of plants, others attack man and the lower animals.

tróm-bíd-í-úm, s. [Etym. doubtful; *Agasiz* gives *τρομβίδης* (*trombédés*) = timid. This word is not found in Liddell & Scott; it occurs in Stephans (*Thesaurus Græcæ Linguæ*, edd. Hase & Dindorf), with the remark that it is probably a miswriting for *strombídēs* (*strombédés*) = like a spiral snail-shell.]

Zool.: The type-genus of Trombidides (q.v.), with many species, some of which in their larval stages are parasitic. The genus *Leptus* is founded on the larvae of several species of Trombidium. [SCARLET-MITE.]

tróm-bó-lite, s. [TRONBOLITE.]

tróm-bóné, s. [Ital., augmentative of *tromba* = a trumpet (q.v.)]

1. *Music*:

(1) A large, deep and loud-toned instrument of the trumpet kind, the name being an augmentative of *tromba*. It consists of two tubes, so constructed that one may slide in and out of the other, and thus form one tube that can be lengthened at will and made of varying pitch. There are three kinds of trombones, called after their compass the alto, tenor, and bass trombones. Soprano trombones have also been made, but they are rarely used. The alto trombone has a compass of more than two octaves and a half, and is also known as the trombone in E♭. It is written in the C clef, third line. The tenor trombone is also known as the trombone in B♭. It is written on the C clef, fourth line. The bass trombone is the lowest of all in its range of notes, and is known as the E♭. It is written on the F clef; is an octave lower than the alto, and a fifth lower than the tenor. Some of these instruments are fitted with pistons, whence they are called valve-trombones.

(2) A powerful reed stop in the organ, of eight feet or sixteen feet scale on the manuals and sixteen feet or thirty-two feet on the pedals.

2. *Ordn.*: A form of blunderbuss for boat-service.

třom'-měl, s. [Etym. doubtful.]

Metall.: A form of buddle or machina for separating the richer portions of slimes from the worthless.

třom'-mēm-ě-těr, s. [Gr. *τρόμος* (*tromos*) = a trembling, and *μετρον* (*metron*) = a measure.]

Physics: An instrument for measuring earth-tremors. It usually consists of a pendulum or pendulums, with means for observing the oscillations on a micrometric scale. (*Milne: Earthquakes*, ch. xix.)

třomp (1), * trompe (1), s. [Fr.]

Metall.: The water-blowing engine; used as a furnace-blast in Savoy, Carniola, and some parts of America. Water from a reservoir flows through a pipe, which is contracted just below the reservoir to divide the stream into a shower, and has oblique perforations, through which air enters and is carried down by the water, which impinges upon a plate in a drum, separating the air which is compressed in the upper part of the drum, flowing through a pipe to the blast-pipes.

*** třomp (2), * trompe (2), s.** [Fr. *trompe*.] A trumpet, a trumpeter.

"Withouten *tromp* was proclamation made." *Thomson: Castle of Indolence*, l. 28.

*** třom'-píl, s.** [O. Fr. *trompille*.] An aperture in a tromp. (*Webster*.)

*** tromp-our, s.** [O. Fr.] A trumpeter.

"The *trompoures* with the loud minstrelle." *Chaucer: Flower & Leaf*.

třon, s. [TRONE.]

- 1. A steelyard balance.
- 2. A wooden air-shaft in a mine.

třo'-na, s. [An Arabic name.]

Min.: A monoclinic mineral, mostly occurring fibrous or massive. Hardness, 2½ to 3; sp. gr. 2.11; lustre, vitreous; colour, grayish to white; translucent; taste, alkaline. Composition: carbonic acid, 40.2; soda, 37.8; water, 22.0 = 100, which yields the formula, 2NaO, 3CO₂ + 4H₂O. First found and used by the Arabs at Suckenna, Fezzan, Africa.

*** třon'-age (age as íg), s.** [Eng. *tron(e)* (3); -age.] A toll or duty paid for weighing wool; the act of weighing wool.

*** třon'-a-těr, s.** [Low Lat., from O. Fr. *trone* = a steelyard.] An officer in London whose duty was to weigh wool.

*** tronch-onn, s.** [TRUNCHEON.]

*** třon'-cō, a.** [Ital., for *troncato*, pa. par. of *troncare* = to cut off, to suppress; Lat. *truncō*.]

Music: Cut off, made short; a term directing a sound to be cut short, or just uttered and then discontinued.

CROSS TRONCONÉE DE MEMBRÉ.

třon'-cōn-ěe dě-mēm-brē, a. [Fr.] *Her.*: Said of a cross or other bearing cut in pieces and separated, though still reserving the form of the cross, or other bearing.

*** trōne (1), s.** [TRONE.]

trōne (2), s. [Etym. doubtful.] A small drain. (*Prov.*)

*** trōne (3), * trōnes, s.** [Low Lat. *trona*; O. Fr. *tronel*, *troneau* = a balance, a weight, from Lat. *tratinā* = a balance.] A kind of steelyard or beam formerly used for weighing heavy commodities.

*** trone-weight, s.** An ancient Scottish weight used for many home productions, as wool, cheese, butter, &c. In this weight the pound differed in various counties from 21 oz. to 28 oz. avoirdupois. The later tron stone or standard weight contained 16 tron pounds, the tron pound being equivalent to 1.3747 lbs. avoirdupois.

třoó'-lý, s. [Native name.]

Bot.: *Manicaria succifera*. [MANICARIA.]

třoóp, * tríp, * troope, * troupe, s. [Fr. *troupe* (O. Fr. *troupe*, from Low Lat. *troups*, prob. from Lat. *turba* = a crowd; Sp. & Port. *troupa*; O. Ital. *troupa*; Ital. *troupa*; Dut. *troep*; Dan. *troep*; Sw. *tropp*; Ger. *trupp*.]

*** troop-meal, adv.** By troops, in troops, in crowds.

"So *troop-meal*, Troy pursued awhile." *Chapman: Homer: Iliad* xvii. 634.

troop-ship, s. A ship for the conveyance of troops; a transport.

"Then we steer close alongside of her Majesty's great *troop-ship* the Crocodile, full of time-expired and invalid soldiers." *Daily Telegraph*, Dec. 4, 1885.

troóp, v. i. [TROOP, s.]

1. To collect in crowds; to assemble or gather in numbers.

"Nor, while they pick them up with busy bill, The little *trooping* birds wisely scare." *Thomson: Spring*, 138.

2. To march in a body or company.

"Nor do I as an enemy to peace, Troop in the throngs of military men." *Shakspeare: 2 Henry IV.*, iv. 1.

*** 3. To march in haste. (Generally followed by off.)**

"At whose approach ghosts . . . Troop home to churchyards." *Shakspeare: Midsummer Night's Dream*, iii. 2.

*** 4. To associate.**

"A snowy dove *trooping* with crowa." *Shakspeare: Romeo & Juliet*, l. 3.

třoóp'-ěr, s. [Eng. *troop*; -er.]

1. A private soldier in a body of cavalry; a horse-soldier.

"His old *troopers*, the Satans and Beelzebubs who had shared his crimes, and who now shared his perils, were ready to be the companions of his flight." *Macaulay: Hist. Eng.*, ch. xiii.

2. A troop-ship (q.v.).

"The high, white sides of the *trooper*, swarming with life." *Daily Telegraph*, Dec. 4, 1885.

třoó'-pí-ál, s. [Fr. *troupiale*, from *troupe* = a troop, from their habit of assembling in large flocks.]

Ornith.: A popular name for several species of the genus *Icterus*; often extended to two sub-families Icterinae and Agelaine. All the troopials are American, and in some respects resemble the Starlings and in others the Finches of the Old World. In the Icterinae the prevailing colours of the plumage are yellow and black, and the species are also known as Orioles. The Common Troopial, *Icterus vulgaris*, is about ten inches long; back and abdomen yellow; head, neck, breast, and tail black; white band on wings. The Orchard Troopial, *I. spurius*, resembles the Baltimore Oriole (q.v.) in general appearance, but is slenderer in form.

třoóp'-íng, pr. par. or a. [TROOP, v.]

¶ Trooping the colours:

Mil.: A ceremony observed in garrisons, when the whole of the guards are paraded previous to marching to their respective posts. These bodies are formed in line, on the flank and in front of which the colour is placed, protected by sentries. The band faces it on the opposite flank. After the guards are inspected, &c., the band advances in slow time to the colour, which is now provided with an escort; and, finally, the band, escort, and colour pass between the opened ranks of the guards in a series of single files until the

other flank of the line is reached. The colours are saluted by presenting arms, and the guards march past.

třoóst'-íte, s. [After Prof. G. Troost, of Nashville, Tennessee; auct. -ite (*Min.*).]

Min.: A variety of Willemite (q.v.), occurring in large opaque crystals, which are mostly impure from the presence of iron and manganese. Found with franklinite, &c., in the State of New Jersey.

třo-pse-ó-lá'-cě-ě-s, s. pl. [Mod. Lat. *tropeol(um)*; Lat. fem. pl. adj. suff. -acea.]

Bot.: Indian-cresses; an order of Hypogynous Exogena, alliance Malvales. Smooth, twisting or twining herbs of tender texture and acid taste. Peduncles axillary, one-flowered. Sepals three to five, generally with valvata aestivation, the upper one with a long spur; petals normally five, yellow, scarlet, orange, rarely blue, sometimes reduced to two or even one, convolute in aestivation; stamens six to ten; anthers two-celled; style one; stigma three to five; ovary one, three-cornered; three or five carpels; ovules solitary; fruit indehiscent; seeds large, without albumen, filling the cell in which they are. Known genera five, species forty-three. (*Lindley*.) All from the temperate parts of America. The order was formed by the elevation of the tribe Tropeoleae (1); now most botanists are reverting to the old arrangement.

třo-pse-ó-lě-ě-s, s. pl. [Mod. Lat. *tropeol(um)*; Lat. fem. pl. adj. auct. -ear.]

Botany:

- 1. A tribe of Geraniaceae, the equivalent of the order Tropeoleaceae (q.v.). (*Jussieu*, &c.)
- 2. The typical tribe of Tropeoleaceae, having irregular flowers and pendulous ovules.

třo-pse-ó-l'-íc, a. [Mod. Lat. *tropeol(um)*; -ic.] Derived from *tropeolum*.

Tropeolic-acid, s.

Chem.: An acid extracted from the herb and seed of *Tropeolum majus*, by heating with alcohol. It crystallizes in slender needles, insoluble in water, soluble in alcohol and ether.

třo-pse-ó-lům, třop-se-ó-lům, s. [Gr. *τροπαιον* (*tropeion*) = a trophy. So named from its peltate leaves.]

Bot.: Indian-cress or Nasturtium; the typical genus of Tropeoleaceae (q.v.). Calyx five-parted, the upper lobe spurred; petals normally five, unequal, the three lowest small or wanting; stamens eight, free; carpels three, kidney-shaped; fruit roundish, furrowed, indehiscent, the seed large, filling the cell. Climbing plants from South America. About twenty-seven species are cultivated in gardens. Those best known are *Tropeolum majus*, the great, and *T. minus*, the small, Indian-cress or Nasturtium. The leaves of the first are peltate, nerved, orbicular, somewhat lobed, the nerves not mucronate; petals obtuse. It was brought at first from Peru. The second species is smaller than the last, with peltate nerves, orbicular leaves, deep yellow flowers, streaked with orange and red. The berries of both species are gathered when green and made into a pickle, and used also as a garnish for dishes. *T. tricolorum* is a highly ornamental species, having the calyx wavy, scarlet, tipped with black, and the petals yellow. *T. canariense* is a climbing variety known as the Canary creeper. Of late years florists have succeeded in obtaining endless varieties of colours of tropeolum.

třo-pár'-ý-ön, s. [TROPERION.]

třope, s. [Lat. *tropeus* = a figure of speech, a trope, from Gr. *τροπος* (*tropos*) = a turning, a turn or figure of speech, from *τροπέω* (*trepeō*) = to turn; Fr. *trope*; Sp. & Ital. *tropeo*.]

1. Rhet.: A figurative use of a word; a word or expression used in a different sense from that which it properly possesses, or a word changed from its original signification to another for the sake of giving life or emphasis to an idea, as when we call a stupid fellow an ass, or a shrewd man a fox. Tropes are chiefly of four kinds: metaphor, metonymy, synecdoche, and irony (see these words); but to these may be added allegory, prosopopeia, antonomasia, and perhaps some others.

"Figures of words are commonly called *tropes*, and consist in a word's being employed to signify something that is different from its original and primitive; so that if you alter the word, you destroy the figure." *Blair: Rhetoric*, lect. 46.

fáte, fát, fare, amidst, whát, fall, father; wē, wēt, hère, camel, hēr, thère; pine, pít, sire, sir, marine; gō, pót, or, wōre, wōlf, wōrk, wōh, sōn; mūte, cūb, cūre, uníte, cūr, rúle, fúll; trý, Sýrian. æ, œ = ó; ey = á; qu = kw.

* 2. Roman Ritual: The name given to verses sung at High Mass, before or after, and sometimes in the middle of the Introit. Tropes were introduced by the monks as early as A.D. 1000, but were removed from the Missal on its revision under Pius V. (1566-72).

trōp'ēr, s. [TROPERION.]

trō-pēr'-ī-ōn, trō-pār'-ī-ōn, trōp'ēr, s. [TROPE.]

Roman Ritual: A book containing the tropes [TROPE, 2.], but frequently used also for a book containing Sequences. The word Troperion often occurs in Church inventories. (Addis & Arnold.)

trōph'-ī, s. pl. [Gr. τροφός (trophos) = one who feeds or nourishes; τρέφω (trepō) = to nourish.]

Entom.: The organs about the mouth in insects. These are of two types, the masticatory and the antorial, which are sometimes modified and occasionally combined. The trophi of Masticatory Insects, such as Beetles, consist of (1) an upper lip, or labrum; (2) a pair of mandibles, for biting; (3) a pair of maxillae, for chewing; (4) a lower lip, or labium. In the Suctorial Insecta, such as the Butterflies, the labrum and mandibles are rudimentary; the maxillae are greatly elongated, and form a spiral trunk, or antlia, by which the juices of flowers are sucked up.

trōph'-īc, *trōph'-īc-al, a. [Gr. τροφικός (trophikos) = nursing, tending, from τροφή (trophē) = nourishment.] Pertaining or relating to the direct influence of nourishment or nutrition.

trophio-nerves, s. pl.

Physiol.: Any nerves which either actually influence nutrition, or have been supposed to do so; as the fifth or trigeminal nerve, which has a certain influence on the nutrition of the eye. (Foster: Physiol., ch. v., § 5.)

trō-phīed, *tro-phyed, a. [Eng. trophy; -ed.] Adorned with trophies.

"The name that won't the trophy it arch to grace." Rowce: Lucan; Pharsalia, viii.

trōph'-īs, s. [Gr. τροφίς (trophis) = well-fed, stout, large.]

Bot.: A genus of Artocarpaceae. Flowers dioecious, spike axillary, males with four stamens, females with a single ovule. Fruit succulent. Natives of both the East and the West Indies. Tropis americana, the Ramoon tree, is about twenty feet high, and bears pleasantly flavoured drupes about the size of grapes. It is a native of the West Indies, where the leaves and twigs are eaten by cattle. The milky juice of T. asper, a small evergreen Indian tree, is applied to cracked heels and sore hands. It is astringent and septic, and the bark, in decoction, is used as a lotion in fevers; the rough leaves are employed to polish wood. T. spinosa is another Indian species; its fruit is eaten in curries.

trōph'-ōn, s. [Gr. τροφόν (trophon) = that which nourishes; food.]

Zool. & Paleont.: A sub-genus of Fusus, with thirty-eight recent species from the Antarctic and Northern Seas, the British coast, &c. Fossil in Chili and Britain.

Trō-phō'-nī-an, a. [See def.] Pertaining or relating to the Grecian architect Trophonius, or to his cave or his architecture. Trophonius is said to have built the celebrated temple of Apollo at Delphi. He had a temple at Lebadeia, and was worshipped as Jupiter Trophonius. In this temple was a celebrated cave, and those who descended into it were said to speak oracularly on their return; but the impressions produced by the descent were thought to be so saddening that the visitor remained a victim to melancholy the rest of his life. Hence arose the proverb applied to a serious man—that he looked as if he came out of the cave of Trophonius.

*trōph'-ō-pōl'-lĕn, s. [Gr. τροφός (trophos) = a feeder, and Lat. pollen (q.v.).]

Bot.: Turpin's name for the septum of an anther.

trōph'-ō-sōme, s. [Gr. τροφός (trophos) = a nurse, and σῶμα (sōma) = the body.]

Zool.: A term proposed by Prof. Allman for the whole assemblage of nutritive zooids of a Hydrozoon (q.v.).

*trōph'-ō-spĕrm, *trōph'-ō-spĕr'-mī-ŭm, s. [Gr. τροφός (trophos) = a feeder, and σπέρμα (sperma) = a seed.]

Bot.: A name used by Richard for the plantain (q.v.).

trō-phŷ, *tro-phĕe, s. [Fr. trophée = a trophy, the spoil of an enemy, from Lat. tropaeum = a sign of victory, from Gr. τροπαίων (tropaiōn) = a monument of an enemy's defeat, a trophy, prop. neut. sing. of τροπαίος (tropaios) = pertaining to a defeat, from τροπή (tropē) = a return, a putting to flight of an enemy by causing them to turn, from τρέπω (trepō) = to turn; Sp. & Port. trofeo.]

I. Ordinary Language:

1. A monument or memorial in commemoration of a victory. It consisted of some of the arms and other spoils of the vanquished enemy, hung upon the trunk of a tree or a pillar by the victors, either on the field of battle or in the capital of the conquered nation. If for a naval victory, it was erected on the nearest land. The trophies of the Greeks and Romans were decked out with the arms of the vanquished for land victories, with the beaks of the enemy's vessels for naval engagements. [ROSTRAL-COLUMN.] In modern times trophies have been erected in churches and other public buildings to commemorate a victory.

2. Anything taken and preserved as a memorial of victory, as flags, standards, arms, and the like.

"No hostile standard has been seen here but as a trophy."—Macaulay: Hist. Eng., ch. liii.

* 3. A memorial, a monument.

"Worn as a memorable trophy of predeceased valour."—Shakespeare: Henry V., v. 1.

4. Anything that is an evidence or memorial of victory or conquest.

II. Arch.: An ornament representing the stem of a tree, charged or encompassed with arms and military weapons, offensive and defensive.

trophy-creas, s.

Bot.: The genus Tropaeolum (q.v.).

*trophy-money, s. A duty formerly paid in England annually by housekeepers towards providing harness, drums, colours, &c., for the militia.

trō-phŷ-wōrt, s. [Eng. trophy, and wort.]

Bot.: The genus Tropaeolum (q.v.).

trōp'-īc (1), *trōp'-īck, *trop-īk, s. & a. [Fr. tropique, from Lat. tropicum, accus. of tropicus = tropical, from Gr. τροπικός (tropikos) = belonging to a turn; ὁ τροπικός κύκλος (ho tropikos kuklos) = the tropic circle, from τρέπος (trepōs) = a turn; Sp., Port., & Ital. Tropico.] [TROPE.]

A. As substantive:

I. Ordinary Language:

1. In the same sense as II. 1.

2. (Pl.): The regions lying between the tropics or near them on either side.

II. Technically:

1. Astron.: One of the two small circles of the celestial sphere, situated on each side of the equator, at a distance of 23°28', and parallel to it, which the sun just reaches at its greatest declination north or south, and from which it turns again towards the equator, the northern circle being called the Tropic of Cancer, and the southern the Tropic of Capricorn, from the names of the two signs at which they touch the ecliptic.

"Seven times the sun has either tropic view'd. The winter banish'd, and the spring renew'd." Dryden: Virgil; Eclog. i. l. 664.

2. Geog.: One of the two parallels of terrestrial latitude corresponding to the celestial tropics, being at the same distance from the terrestrial equator, as the celestial tropics are from the celestial equator. The one north of the equator is called the Tropic of Cancer, and that south of the equator the Tropic of Capricorn. Over these circles the sun is vertical when his declination is greatest, and they include that portion of the globe called the torrid zone, a zone about 47° wide, having the equator for a central line.

B. As adj.: Of or pertaining to the tropics; tropical.

"Hurra, hurra! Our watch is done!

We hail once more the tropic sun."

Scott: Birds of Triermain, iii. 24.

¶ The stars are brighter in the tropics than in the temperate zones, and astronomical observation is easier. Cyclones arise within the tropics. The characteristic vegetation of the tropics consists of gigantic endogens, as palms, some of which rise to a height of from 100 to 200 feet. Most polypetalous exogens are arborescent than in temperate climates. The Coniferae exist chiefly on mountains. Ferns abound in tropical islands, and deltas where water is plentiful, so that in some localities from 250 to 300 species may be gathered. The tropical type of vegetation was separated at a remote period into two portions, one in the Old World, the other in the New. Shells are brighter than in lands where the sun is less powerful, the birds more numerous and of gayier plumage, the feline tribe larger and in greater numbers. The Anthropidae have their appropriate seat in tropical lands.

tropic-bird, s.

Ornith.: A popular name for any species of the genus Phaethon (q.v.). They are tropical sea-birds, in habits and general appearance approaching gulls and terns, and resembling the latter in their mode of flight. Their powers of flight are great, and they are usually seen at considerable distances from the land, as they live almost entirely on the wing, and when they do not return to the distant shore to roost, rest upon the surface of the water. They are about thirty inches long, of which the long tail-feathers occupy about one-half. The general hue of the plumage is white; in two species, from the Atlantic Ocean, Phaethon aethiops (or candidus) and P. flavirostris, the tail-feathers are whitis; in the third species, P. phenicurus, from the Pacific Ocean, they are red, and are highly valued by the natives of the South Seas as ornaments. Tropic-birds nest in holes in cliffs and on rocky islands, the female laying only one egg, and the male sitting in a hole by her side, both with head inwards.

trōp'-īc (2), a. [Eng. (at)rop(ine); -ic.] Derived from atropine.

tropic-acid, s.

Chem.: C₉H₁₃O₃. A monobasic acid, obtained by digesting atropine and belladonna with baryta water. It crystallizes in needles or plates slightly soluble in water, and melts at 117°.

trōp'-īc-al (1), a. [Eng. tropic (1); -al.]

1. Of or pertaining to the tropics; being or lying within the tropics.

"Many reasons may be assigned for this, beside the accidental ones from the make of the particular countries, tropical winds, or the like."—Dampier: Voyages (an. 1688).

2. Characteristic of the tropics: as tropical heat.

3. Incident to the tropics: as tropical diseases.

tropical-lichen, s.

Pathol.: Prickly heat (q.v.).

tropical-year, s. The same as SOLAR-YEAR. [YEAR.]

trōp'-īc-al (2), a. Eng. trop(ē); -ical.] Figurative; metaphorical; of the nature of a trope.

"This is all which we mean besides the tropical and figurative presence."—Sp. Taylor: Real Presence, § 1.

*trōp'-īc-al-īŷ, adv. [Eng. tropical (2); -ly.] In a tropical or figurative manner; figuratively.

"He grants it in plain terms, that Christ's body is chewed, is attrite or broken with the teeth, and that not tropically but properly."—Sp. Taylor: Real Presence, § 3.

trōp'-īc-ō-pōl'-ī-tan, a. [Eng. tropic, and Gr. πολίτης (politēs) = a citizen.] Belonging to the tropics; fond only in the tropics.

"Tropico-politan groups."—Wallace.

trōp'-īc-or-īs, s. [Gr. τρόπις (tropis) = a ship's keel, and κόρις (koris) = a bug.]

Entom.: A genus of Scutata. Tropicoris rufipes is the Red-legged Bug; the sides of the prothorax are produced into broad-pointed processes; the prevailing colour is brown, with many large black punctures, and on the tip of the scutellum a reddish spot. Length, two-thirds of an inch.

bōil, bōŷ; pōut, jōwl; cat, cell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bel, del.

trop-i-dine, s. [Eng. *tropine*]; suff. *-id, -ine*.

Chem.: C₈H₁₃N. An oil obtained by heating tropine with concentrated hydrochloric acid, or with glacial acetic acid to 180°. It has the odor of conine, and boils at 162°.

trop-i-dō, pref. [Gr. *τρόπος* (*tropis*), late genit. τροπιδός (*tropidos*) = a keel.] Having a keel-like process or processes.

trop-i-dō-lēp'-is, s. [Pref. *tropido-*, and Gr. *λεπίς* (*lepis*) = a scale.]

Zool.: A genus of Iguanidæ, with fifteen species, ranging over the greater part of tropical America and north to California. Back not crested; throat with a fold on each side.

trop-i-dō-lēp'-is-ma, s. [Pref. *tropido-*, and Gr. *λεπίσμα* (*lepisma*) = that which is peeled off.]

Zool.: A genus of Scincidæ, with six species, peculiar to Australia. Tail elongate, round, tapering, armed; scales three- or five-keeled, slightly toothed behind.

trop-i-dō-lēp'-tūs, s. [Pref. *tropido-*, and Gr. *λεπίς* (*lepis*) = thin.]

Paleont.: A genus of Orthidæ, separated from Strophomena (q.v.), with two species from the Devonian of the United States.

trop-i-dō-nō-tūs, s. [Pref. *tropido-*, and Gr. *νότος* (*notos*) = the back.]

Zool.: A genus of Colubrine Snakes, subfamily Natricinæ, with numerous species, very widely distributed, absent only from South America. Body stout to slender, tapering to head and tail, belly round; head distinct, crown flat, occipital tract broad, snout narrow; tail tapering to a point; eye moderately large, pupil round; teeth small; scales keeled, pointed, truncate, or emarginate. One species is British, *Tropidonotus natrix* (= **Natrix torquata*), the Common Snake. [SNAKE.]

trop-i-dōph'-ōr-a, s. [Pref. *tropido-*, and Gr. *φορός* (*phoros*) = bearing.]

Zool.: The name given by Tröschel to the species of Cyclostoma (q.v.) which have the whorl spirally keeled. They are found in Madagascar and the adjacent islands and on the coast of Africa.

trop-i-dōph'-ōr-ūs, s. [TROPIDOPHORA.]

Zool.: A genus of Scincidæ, with two species from Cochinchina and the Philippines. Tail with four spinous keels above, and its sides smooth. Pre-anal plates three, large; the central one triangular.

trop-i-dō-rhyn'-chūs, s. [Pref. *tropido-*, and Gr. *ρύγχος* (*rhungchos*) = the snout.]

Ornith.: A genus of Meliphagidæ, with eighteen species, ranging from Moluccas and Lombok to New Guinea, Australia, Tasmania, and New Caledonia. [FAUVA-BIRD.]

trop-i-dō-stēr'-nūs, s. [Pref. *tropido-*, and Gr. *στέρον* (*steron*) = the breast, the chest.]

Entom.: A large genus of Hydrophilidæ, from North and South America. Some are metallic, others with yellow stripes.

trop'-ino, s. [Eng. (*atropine* (q.v.))]]

Chem.: C₈H₁₂NO. An organic base obtained by heating atropine with a saturated solution of baryta water, and precipitating the baryta with carbonic-acid gas. It has a strong alkaline reaction, is soluble in water, alcohol, and ether, melts at 62°, and boils at 229°. From its ethereal solution it crystallizes in colorless anhydrous tables.

***trop'-ist, s.** [Eng. *tropist*]; *-ist*.] One who deals in tropes; one who explains the Scriptures by tropes and figures of speech.

†trop-ō-lōg'-ic, *trop-ō-lōg'-ic-al, a. [Eng. *tropology*]; *-ic, -ical*.] Varied or characterized by tropes; changed from the original import of the words; figurative.

"When it is any of these, although we are not to recede from the literal sense; yet we are to take the second signification, the tropological or figurative." — *Ep. Taylor*: *Sermons*, vol. iii., ser. 11.

trop-ō-lōg'-ic-al-ly, adv. [Eng. *tropological*]; *-ly*.] In a tropological manner; figuratively.

"This was the general opinion concerning the Oreekish fables, that some of them were physically, and some tropologically allegorical." — *Cudworth*: *Intel. System*, p. 512.

***trō-pōl'-ō-giæ, v.t.** [Eng. *tropology*]; *-ize*.] To use in a tropological or figurative manner; to change to a figurative sense; to use as a trope.

"If Athena or Minerva be tropologized into prudence, then let the pegasus shew what substantial essence it hath." — *Cudworth*: *Intel. Syst.*, p. 620.

***trō-pōl'-ō-gy, a.** [Gr. *τρόπος* (*tropos*) = a trope; suff. *-ology*.] A rhetorical mode of speech, including tropes, or a change of some word from the original meaning.

"Not attaining the dæntology and second intention of words, they omit their superconsequences, coherences, figura, or tropologies, and are not persuaded beyond their literalities." — *Browne*: *Fulgur Errouris*, bk. i., ch. iii.

***trōss'-ērg, s. pl.** [Fr. *trousses*.] Trousers (q.v.).

"You rode like a kern of Ireland; your French hose off, and in your strait trowsers." — *Shakesp.*: *Henry V.*, iii. 7.

trōt, *trotte, v.t. & i. [Fr. *trotter* (O. Fr. *trotler*), from Low Lat. *tolato* = to trot; Lat. *tolutarius* = going at a trot, from *tolutus* = at a trot, from *tollo* = to lift (the feet); O. Dut. *tratten* = to trot; Welsh *troio*; Ger. *trotten*. (Skeat.) Perhaps onomatopoeitic.]

A. Intransitive:

1. To move faster than in walking, as a horse or other quadruped, by lifting one fore-foot and the hind-foot of the opposite side at the same time.

"When a horse trots, his legs are in this position, two in the air and two upon the ground, at the same time crosswise; that is to say, the near-foot before, and the off-foot behind, ara off the ground, and the other two upon it, and so alternately of the other two." — *Berenger*: *Hist. & Art of Horsemanship*, vol. ii., ch. iv.

2. To move or walk fast; to run.

B. Trans.: To cause to trot; to ride at a trot.

"The whips trotted the pack to Gravel-hill." — *Daily Chronicle*, Oct. 25, 1884.

trōt'-ting, pr. par. or a. [TROU, v.]

trotting-horse, s.

Zool. & Sport: A horse trained to trot at high speed without breaking into a gallop. Trotting horses are of two distinct races: (1) the Russian, which is Arabian or a Flemish stock, attaining high speed, but with bad knee-action; (2) the American, which is probably both Barb and Arabian on an English stock. The evolution of the trotting horse has principally taken place within the United States, the development of speed in trotters during the past half century having been remarkable. The trotting strains of Russia and England have made fair progress, but their performance is much inferior to that of the American trotter. The best early record was made at Philadelphia in 1810, when a Boston horse trotted a mile in 2 minutes, 48½ seconds. In 1844 Lady Suffolk reduced the time to 2:28. From that time forward the speed increased, until in 1884 Jay-Eye-See trotted a mile in 2:10; in 1885 Maud S. reduced the time to 2:08½; and in 1891 Sunol to 2:08¼. The introduction of the pneumatic tire sulky has enabled the speed to be still further increased. In 1892 Nancy Hanks made a mile in 2:04, and in 1893 Ayers P., harnessed with a running mate, reduced the time to 2:03½. The 1894 record is—for trotting, A.H., 2:03¼; for pacing, Robert J., 2:02½. These records have not since (1896) been lowered.

trōt-toir (oir as wår), s. [Fr.] The footway on each side of a street; the foot-pavement.

trōu-ba-dōur, s. [Fr., from Prov. *troubador*, *troubaire*, prob. from a Low Lat. *trouparius* or *troupar*, from Lat. *tropus* = a trope, a kind of singing, a song; Ital. *trouatore*; Sp. *trouator*; Port. *trouador*; *troubador*; O. Fr. *trouer* (Fr. *trouver*); Prov. *troubar*; Sp. & Port. *trouar*; Ital. *trouare* = to find out, to devise.] One of a class of poets which appeared first in Provence, in the south of France, at the end of the eleventh century. They were the inventors of a species of lyrical poetry almost entirely devoted to romantic and amatory subjects, and generally very complicated in its metre and rhymes. They flourished till the end of the thirteenth century. There is reason for supposing that the art of the troubadours, generally called the gay science, was derived from the East, coming into Europe through the Spaniards, and the troubadours of Provence learning from their neighbors of Spain. Troubadour poetry was cultivated in Provence, Toulouse, Dauphiné, and other parts of France south of the Loire, as well as in Catalonia, Aragon, and Valencia in Spain, and in the north of Italy. Troubadours frequently attached themselves to the courts of kings and nobles, whom they praised or censured in their songs; but it was a rule that some lady was selected, and to her, under some general or fanciful title, love songs, complaints, and other poems were addressed. The "love service" of the troubadours was often nothing more than a mere artificial gallantry, but there are instances on record where it became something more earnest. The poems of the troubadours were not always confined to subjects of gallantry, sometimes they treated of the conditions of society, the evils of the times, the degeneracy of the clergy, and other subjects.

trōub'-le (le as el), *trub-le, v.t. & i. [O. Fr. *trubler*, *troubler* (Fr. *troubler*), as if from a Low Lat. *turbulo*, from Lat. *turbula* = a dis-

2. To become troubled, disturbed, or thick.

"If the bawme be fyn and of his owne kynde, the water schalle nevere trouble."—Maunderville: Travels.

¶ Trouble is more general in its application than disturb; we may be troubled by the want of a thing, or troubled by that which is unsuitable: we are disturbed by that which actively troubles. Pecuniary wants are the greatest troubles in life; the perverseness of servants, the indisposition or ill behaviour of children, are domestic troubles; but the noise of children is a disturbance, and the prospect of want disturbs the mind. Trouble may be permanent; disturbance is temporary, and refers to the peace which is destroyed.

troub'-le (le as el), *trou-ble, a. & s. [TROUBLE, v.]

*A. As adj.: Troubled, disturbed, grieved, agitated. (In this use pronounced trū'blē.)

"Gold was his sword, and warlike troussees laced With things of gold, his manly legs embraced."—Mickle: Luand, II.

¶ Trousers, in their present form, were introduced into England about the end of the eighteenth century, but were not recognized as "drees" till some years later. The Duke of Wellington was refused admission to Almack's in 1814 because he wore black trousers instead of breeches and silk stockings, and Capt. Gronow met with a similar repulse at the Tuileries in 1816. They are now worn universally in civilized lands, the breeches having disappeared from the ordinary male costume.

*tróusse, s. [Fr.] Loppings from growing timber; trash. The word is still used in the midland counties to denote the dead branches worked into a newly-made hedge.

Ichthy.: The popular name for the fishes of the group Salmones as distinguished from the Salvelini, or Charri, belonging to the same family. [SALMONIDÆ.] Trout are found in almost all the lakes and rivers of the temperate and colder parts of the northern hemisphere. Like Salmon they are excellent food-fishes, but constantly inhabit fresh water. The Common River Trout (Salmo fario) is widely diffused in the eastern hemisphere, and abundant in the British Islands and the north of Europe. A specimen weighing twenty-

nine pounds is recorded, but such a size is extremely rare, and trout of a pound or a pound and a half in weight are considered fine fish. The head and eye are large; general form symmetrical, and comparatively stouter than that of the salmon; tail slightly forked, except in old fish when it becomes almost square; teeth numerous, strong, and curved. Numerous species are found in the United States and Canada, of which the Common Brook Trout or Speckled Trout (*Salmo fontinalis*) differs considerably from the common trout of Europe. It is abundant in the streams of the Northern and Middle States and in Eastern Canada, and grows occasionally to a considerable size, one weighing 10 lbs. having been taken. Usually, however, it is much smaller. This trout is a favorite game fish in the East. A much larger species, the Lake Trout (*Salmo confinis*) inhabits the depths of the great lakes, where it is sometimes caught of 60 lbs. in weight. It is a sluggish fish, affording poor sport to the angler, and its flesh of poor quality. There are several other species of lake trout, the largest and finest in quality being the Mackinaw Trout or Namaycush (*S. amethystus* or *namaycush*) of Lakes Huron and Superior, and the Canadian lakes. Another large species is the Siskiwit Trout (*S. siscowet*) of Lake Superior. In the lakes of New York and Pennsylvania occurs the Red-bellied Trout (*S. erythrogastrus*), which is sometimes two and a-half feet long. The Pacific slope has its own peculiar species, the Oregon Trout (*S. oregonensis*), which closely resembles the common trout of Europe, and is very abundant. In Europe the Great Lake Trout (*S. ferax*) is found in the lakes of Scandinavia and in some of those of the British Islands. The trout is a voracious fish, and devours almost any kind of animal food. It is active in pursuit of prey, small trout often leaping quite out of the water to take passing flies, and its avidity to take the artificial fly and its active play afterwards renders it one of the most favorite fish of the skilled angler.

trout-colored, a. White, with spots of black, bay, or sorrel: as, a *trout-colored* horse.

trout-stream, s. A stream in which trout breed.

trout-fül, a. [Eng. trout; *-fül*(*l*),] Abounding in trout.

Trou-vère, *Trou-veür, s. [Fr. *trouver* = to find.] A name given to the ancient poets of Northern France, and corresponding to the Troubadours of the South. Their compositions are more of an epic or narrative character. [TROUBADOER.]

trou-vër, s. [O. Fr. *trouver* (Fr. *trouver*) = to find.] [TROUBADOUR.]
Law: Properly, the finding of anything; hence—

(1) The gaining possession of any goods, whether by finding or by other means.

(2) (See extract.)

"The action of *trouver* and conversion was in its origin an action for recovery of damages against such person as had found another's goods, and refused to deliver them on demand, but converted them to his own use; from which finding and converting, it is called an action of *trouver* and conversion. The freedom of this action from a wager of law, and the less degree of certainty requisite in describing the goods, gave it formerly so considerable an advantage over the action of detinue, that actions of *trouver* were at length permitted to be brought against any man, who had in his possession, by any means whatsoever, the personal goods of another, and sold them or used them without the consent of the owner, or refused to deliver

them when demanded. The injury lies in the conversion: for any man may take the goods of another into his possession if he finds them; but no finder is allowed to acquire a property therein, unless the owner be for ever unknown; and therefore he must not convert them to his own use, which the law presumes him to do, if he refuses to restore them to the owner; for which reason such refusal alone is *prima facie* sufficient evidence of a conversion. The fact of the finding, or *trouver*, is therefore now totally immaterial; for if the plaintiff proves that the goods are his property, and that the defendant had them in his possession, it is sufficient. But a conversion must be fully proved; and then in this action the plaintiff shall recover damages, equal to the value of the thing converted, but not the thing itself, which nothing will recover but an action of detinue or replevin."
Blackstone: Comment: bk. iii., ch. 8.

trôw (1), s. [Perhaps the same as TROUT (q.v.).] A boat with an open well between the bow and stern portions, used in spearing fish.

Eng. : A certified industrial school established under the Industrial Schools Act, 1866, but used exclusively for children who have been sent thereto by a magistrate under sect. 9 of the Elementary Education Act, 1876, which provides that if either—

(1) The parent of any child above the age of five years, who is under this Act prohibited from being taken into full time employment, habitually and without reasonable excuse neglects to provide efficient elementary instruction for his child; or,

(2) Any child is found habitually wandering, or not under proper control, or in the company of rogues, vagabonds, disorderly persons, or reputed criminals; it becomes the duty of the local authority, after due warning, to complain to a magistrate, who may order the child to attend some certified efficient school willing to receive him, selected by the parent or by the court, and in case of non-compliance to order the child to be sent to a certified day industrial school, or, if there be no certified day industrial school, then to a certified industrial school. Truant-schools, of which there are about a dozen in England, are not recognized by law except as certificated industrial schools, from which they only differ in the character of their inmates.

"On Saturday afternoon the North London Industrial Truant-school at Walthamstow was publicly opened by the Earl of Aberdeen. The school has been established by the school boards of Hornsey, Tottenham, and Edmonton, for the reception of persistent truants boys from those parishes. It is the first school of its kind erected by the district school board."

1. *Mil.*: The suspension of arms by agreement of the commanders of the opposing armies; a temporary cessation of hostilities, for negotiation or other purpose; an armistice.

"Lord came the cry, 'The Bruce, the Bruce!'
No hope or in defence or *truce*."
Scott: *Lord of the Isles*, v. st.

2. An intermission of action, pain, or contest; a temporary cessation, alleviation, or quiet.

"There he may find
Truce to his restless thoughts, and enterlull
The irksome hours."
Milton: *P. L.*, II. 526.

¶ (1) **Flag of truce:**

Mil.: A white flag displayed as an invitation to the enemy to confer, and in the meantime a notification that hostilities shall cease.

(2) *Truce of God*: A suspension of arms which occasionally took place in the middle ages. It was introduced in A.D. 1040, when the Church forbade the barons to make any attack on each other between sunset on Wednesday and sunrise on the following Monday, or upon any ecclesiastical fast or feast-day. It also provided that no man was to molest a labourer working in the fields, or to lay hands on any implement of husbandry, on pain of excommunication. [PEACE OF GOD.]

trūck (1), * **trucke**, s. [TRUCK (1), v.]

1. Exchange of commodities; barter.

"No communication or *trucke* to be made by any of the petit merchants."
—Hæcklyt: *Voyages*, I. 228.

2. Commodities suitable for barter or small trade; hence, small commodities; specif., in the United States, vegetables raised for market.

3. Traffic; intercourse; dealing; as, I have no *truck* with him. (*Colloq. & Slang*.)

4. The practice of paying wages otherwise than in actual coin, whereby the employed person was sometimes defrauded of part of the wage he had contracted to receive; or of wage-paying at long intervals, the employer making intermediate advances and charging very high rates of interest. Truck is a very ancient evil. It was rampant in the fifteenth century, and one of the Norman-French statutes, 4 Edward IV., c. 1, s. 5, states that "before this time, in the occupations of cloth-making, the labourers have been driven to take a great part of their wages in unprofitable wares," and the employers were, by that act, required to pay in lawful money, under penalty of forfeiture to the labourer of treble wages. There were further enactments in the reigns of Elizabeth, Anne, George I., George II., and George III.; but these were all partial as to trades, and failed to check the practice. The Act 1 & 2 William IV., c. 37 extended the law, and prohibited "the payment in certain trades of wages in goods, or otherwise than in the current coin of the realm." The number of trades were largely extended, but many occupations were omitted. In 1870 the evils of the truck system were forced on the attention of the Legislature, and an act was passed authorising an inquiry by commission into any offence against acts prohibiting the truck system which had occurred in the two preceding years. The commission appointed under the Truck Commission Act, 1870, made two reports—one, in 1871, on England, Wales, and Scotland, showing very gross evils; and the other, in 1872, on the curious barter system prevalent in Shetland and other parts of Scotland amongst the knitters, fishermen, and kelp-gatherers. Similar barter practices were said to prevail in parts of Cornwall and Devon amongst knitters. No efficient legislation followed this commission, except as to the Leicester, Derby, and Nottingham hosiery trade. Mr. Sheriff Thoma, Vice-Admiral of Zetland, persistently but unavailingly pressed on Parliament and the public the case of the Scotch knitters; but no further action was taken until the autumn of 1886, when the Chief Inspector of Factories was directed to report upon the truck system in Scotland. This report, made in January, 1887, showed, amongst other glaring evils, that the system of advances and poundage was ruinous to the men; at some collieries as much as 1s. being charged per week on an advance of 16s., no advance being in any case made until the wage had been actually earned. By 50 & 51 Victoria, c. 46, the law against truck and requiring payment of wage in actual coin is extended to all persons within the Employers and Workmen's Act, 1875. Wherever advances had been made the employer is forbidden to withhold like advance, and prohibited from taking interest or discount. Orders given for goods to a store not kept by the employer are made as illegal as, under the principal act, if supplied by the employer. Any condition, direct or indirect, as to where wage should be spent, was prohibited, and dismissal for dealing or not dealing made unlawful. The truck system has extended to the United States, and has given rise to much dissatisfaction among workmen and to legislative enactments for its regulation or suppression. It is not found in the large manufacturing cities, but in smaller towns largely built up around a single manufacturing establishment. In the coal regions in connection with the mines, &c. It usually takes the form of a company store, at which the employees are expected or required to deal, and where they are often obliged to pay more than the ruling rates for goods. To force them to do this in some cases tokens are issued

in place of money, which are only taken in the company store. The latter process has been condemned by Act of Congress as an illegal issue of money, but the trucking system still continues in various illegitimate ways. In Canada the same evil is felt, the lumbermen of that country and the fishermen of Newfoundland protesting strongly against it. Protests have also come from the working classes of Mexico and from the Socialists of Germany, showing that the evil in question is very wide spread.

• **truck-man**, s. One who barter or trucks.

† **truck-shop**, s. A tommy-shop (q.v.).

truck-system, s. [TRUCK (1), s., 4.]

trūck (2), s. [Lat. *trochus*; Gr. *τροχός* (*trochos*) = a runner, a wheel, a disc; *τροχός* (*trochōs*) = to run.]

I. Ordinary Language:

1. A small wooden wheel, not bound with iron; a cylinder.

2. A low two-wheeled vehicle for conveying goods and packages. The hand-truck is an efficient vehicle for removing single packages of considerable weight; the curved bar in front being placed under the box, for instance, which is then tipped so as to balance back slightly against the bed, in which position it is transported upon a pair of heavy wheels of small diameter. The term is sometimes applied to certain hand-carts and two-wheeled barrows.

3. A waggon with a low bed, for moving heavy packages.

4. A low platform on wheels for moving buildings, heavy stone blocks, safes, &c.

5. (*Pl.*) A kind of game. [TRUCOS.]

¶ In Casaubon, *De Quatuor Linguis Commentatio*, pars prior (1650), p. 302, *Truypenie* is defined as "veterator vifer;" that is, a sly, cunning fellow, an old soldier.

trú-ér, s. [Eng. *truce*(e), v.; -er.] A truing-tool (q.v.).

trúff (1), * truffe, s. [See def.] Turf (a transposed form of the word still in use in Scotland; cf. *thirst* and *thrist*.)

"No holy truffe was left to hide the head."—Daines: Humours; Heaven on Earth, p. 48.

trúff (2), s. [Etym. doubtful.] A young salmon. (Prov.)

"— has forwarded me a specimen of the 'white fish of the Levenshire Dart with reference to examining whether it is a yearling peal or young of the sea trout, as the truffe are locally termed, or a hybrid."—Field, March 4, 1886.

trúff, v. t. [Etym. doubtful.] To steal. (*Scotch*.)

trúf'-fle, * trub, * trubbe, s. [Fr. *truffe*; Ital. *terrifolia*, dimin. of *tartufo*, from Lat. *terre tuber*, Phly's name for the truffle.]
Bot., &c.: Any subterranean fungal of the orders or sub-orders Hypozoa and Tubercaria (q.v.), and specially of the genus *Tuber* (q.v.). The greater part of the English truffles belong

fáte, fát, fáre, ámidst, whát, fáll, fáther; wé, wét, hère, eamel, hër, there; pine, pit, sire, sir, marine; gó, pót, or, wóre, wólf, wórk, whò, són; müte, cúb, cüre, quíte, eür, rúle, füll; trý, Sýrian. æ, œ = ð: ey = á; qu = kw.

to the species *Tuber aestivum*, better known as *T. cibarium*. It is about the size of a large walnut, black and warty externally, and has the flesh variously marbled. It occurs in Great Britain in beech and oak woods; it is found also in the East Indies and Japan, sometimes ten, twelve, or more inches below the ground, sometimes nearer the surface, but with nothing to indicate its presence. Hence dogs are trained to find it by its smell. It is eaten boiled or stewed. Another English species, *Tuber moschatum*, has a musky odour. The French truffle, *T. melanosporum*, resembles the English species, but has darker spores. The Piedmontese truffle, which bears a high reputation, is smooth externally, while the flesh is white tinged with pink. Pigs, in place of dogs, are used to find these species. The African truffle, *Terfezia leontis*, is abundant in Algiers, but as an esculent is deemed inferior to the English truffle.

"Happy the grotto'd hermit with his pulse,
Who wants no truffles, rich ragouts—or fishes."
Dr. Warton: *Fashion*.

truffle-dog, s. Any dog trained to find truffles by their smell.

"The truffle-dog is nothing more nor less than a bad small-sized poodle, and is never, or very rarely met with under the designation truffle-dog. Its cultivation is due to the existence of truffles, which it is employed to discover when they are lying in the ground by the help of its acute nose."—*F. Shaw: Book of the Dog, p. 197.*

truffle-worm, s.

Entom.: (See extract.)

"The truffle is subject to the attacks of many insects; a species of *Lecodes* deposits its ova in it, which in the pupa state feed upon the substance of the truffle; in this state they are called truffle-worms."—*Eng. Cyclop., s. v. Tuberales.*

truf-fled (le as el), a. [Eng. *truff(e)*; -ed.] Furnished, cooked, or stuffed with truffles; as, a *truffled turkey*.

trüg, s. [A variant of *trough* (q.v.).]

1. A hod for mortar. (*Bailey*.)

* 2. A measure of wheat, as much as was carried in a trough, three trugs making two bushels.

3. A kind of wooden vessel for carrying vegetables, &c. (*Prov.*)

* 4. A concubine, a trull.

"You're right about Lord Howe's Lord Howe's a trump."
E. & G. Travelling: Aurora Leigh, viii.

¶ To put to one's trumps: To reduce to the last expedient, or to the utmost exertion of power; to reduce to the last extremity.

"Some of the nobility have delivered a petition to him; what's it? I know not, but it has put him to his trumps; he has taken a month's time to answer it."
Beaumont & Flou: Cupid's Revenge, IV.

trümp (2), * trompe, * trumpe (2), s. [Fr. *trompe* = a trumpet or trumpet, prob. by insertion of *r* and *m*, from Lat. *tuba* = a tube, a trumpet; cf. Sp. *Port.*, & Prov. *trompa*; Ital. *tromba* = a trumpet; Russ. *truba* = a tube, a trumpet; Lith. *truba* = a horn.]

1. A trumpet (q.v.). (Now only used in poetic or elevated language.)

"Thy sacred song is like the trump of doom."
Longfellow: Dante.

2. A Jew's harp. (*Scotch.*)

¶ *Tongue of the trump:*

Lit.: The reed of a Jew's harp by which the sound is produced; hence, fig., the principal person in any undertaking; that which is essential to the success of anything. (*Scotch.*)

trümp (1), v.t. & i. [TRUMP (1), s.]

A. Trans.: In card-playing, to take with a trump; to play a trump card in order to win, or in accordance with the rules of the game.

"Z has shown weakness in trumps by trumping the spade."
Field, Jan. 2, 1858.

B. Intrans.: To play a trump card when another suit has been led.

* **trümp (2), * trompe, * trumpe, v.t.** [TRUMP (2), s.] To play upon a trumpet or trumpet; to blow or sound a trumpet.

"And the firsts angeell trumpide [saw] it, and hail was made."
Wycliffe: Apocrypha viii.

trümp (3), v.t. [Fr. *tromper* = to deceive; orig., to play on a trumpet or trumpet, whence the phrase *se tromper de quelqu'un* = to play with any one, to amuse one's self at another's expense; Fr. *trompe* = a trump (q.v.).]

I. Ordinary Language:

1. In the same sense as II. 1.

* 2. A trumpeter.

"He wisely desired that a trumpeter might be first sent for a pass."
Clarendon: Civil War.

3. One who praises or publishes praise, or is the instrument of propagating it. (*Colloq.*)

"To be the trumpeter of his own virtues."
Shakespeare: Much Ado, v. 1.

4. An ear-trumpet (q.v.).

5. A speaking-trumpet (q.v.).

II. Technically:

1. Music:

(1) A metal wind instrument of bright and penetrating tone, formed of a single tube of brass or silver, curved into a convenient shape, with a mouthpiece at one end, the other having a bell. Its part is usually written in the key of C with the treble clef, though by means of crooks or lengthening pieces the

three lengths; the first and third lying close together, and the second about two inches apart. The slide is connected with the second curve. It is a double tube, five inches in length on each side, by which the length of the whole instrument can be extended. Trumpets with pistons or valves capable of producing every chromatic sound within their compass are sometimes used, but the tone is by no means to be compared with the true trumpet tone.

(2) A stop of an organ having reed-pipes tuned in unison with the open diapason. The octave-trumpet or clarion stop is an octave higher.

2. *Rail.*: The flaring mouth of a railway-car draw-head which directs the entering coupling-link.

3. *Spinning:*

(1) The funnel which leads a sliver to the cylinders of a drawing-machine, or which collects a number of combined rovings, and leads them to condensing cylinders.

(2) A funnel-shaped conductor used in many forms of thread-machines and stop-motions in knitting, spinning, and doubling-machines.

¶ *Feast of trumpets:*

bël, böy; pôit, jowl; cat, çell, chorus, çhin, bench; go, gem; thin, ðis; sin, aç; expect, Xenophon, exist. -ing. -cian, -tian = shan. -tion, -sion = shün; -tion, -çiou = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bel, del

the seventh month (Tisri), which was to be kept as "a sabbath, a memorial of blowing of trumpets, an holy convocation." No servile work was to be done in it; but an offering of fire was to be presented to Jehovah (Lev. xxiii. 23-25). It preceded by ten days the Great Day of Atonement (27). In Numbers (xxix. 1-6), details are added as to the "offering of fire," which was to include a burnt offering, a meat offering, and a sin offering. The first of Tisri was New Year's Day of the civil year. It is still observed as a Jewish festival.

trumpet-call, s. A call by sound of trumpet.

"The loudly rung the trumpet-call;
Thundered the cannon from the wall."
Scott: *Marmion*, l. 51.

trumpet-major, s.

Mil.: A head-trumpeter in a band or regiment.

trumpet-marine, s.

Music. An instrument formed of a triangular chest, over one side of which is stretched a thick gut string, passing over a bridge slightly uneven on its feet, one side being fastened and the other free. When the string is set in vibration by means of a bow, the rapid impact of the loose foot of the bridge on the belly slightly checks the vibration and causes the sound to resemble that of the violin.

trumpet-shaped, a.

1. **Ord. Lang.**: Shaped like a trumpet.

2. **Bot.**: Hollow and dilated at one extremity like the end of a trumpet, as the corolla of *Caprifolium sempervirens*.

trumpet-shell, s.

Zool.: *Triton variegatus* from the West Indies, Asia, and the South Seas. The shell, which is a foot or more in length, is white mottled in irregular spiral rows with ruddy brown and yellow, deepening into chestnut at the point; interior white; lip with smooth white ridge on a black ground. It is employed by the Australian natives and the South Sea Islanders as a trumpet. To fit the shell for this purpose a round hole is bored at the side, about one-fourth the length from the tip, and a loud hoarse sound is produced by blowing across the hole, as a performer plays the flute. When blowing, the right hand is placed in the cavity of the shell.

TRUMPET-SHAPED FLOWER.

* **trumpet-tongued, a.** Proclaiming loudly, as with the voice of a trumpet.

"So clear in his great office, that his virtues
Will plead like angels, trumpet-tongued, against
The deep damnation of his taking off."
Shaksp.: *Macbeth*, l. 7.

trumpet-tree, trumpet-wood, s.

Bot.: *Cecropia peltata*. [CECROPIA.]

trumpet-weed, s.

Botany:

(1) The American name for *Eupatorium purpureum*. It has a purple stem five or six feet high, leaves petioled by fours or fives, and purple flowers. Found on low grounds in the United States, flowering in August and September.

(2) The name given at the Cape of Good Hope to a large sea-weed, *Ecklonia buccinatis*, the stems of which, often twenty feet long and hollow above, are used by native herdsmen as trumpets to collect the cattle together. They are also employed as siphons.

trumpet-wood, s. [TRUMPET-TREE.]

trüm'-pēt, v. t. & i. [TRUMPET, s.]

A. Transitive:

1. To publish by sound of trumpet; hence, to blaze or noise abroad; to proclaim.

"He must not live to trumpet forth my infamy."
Shaksp.: *Pericles*, l. 1.

2. To praise extravagantly.

"And yet their oracle,
Trumpet it as they will, is but the saioe."
Matthew Arnold: *Empedocles on Etna*, l. 2.

B. Intrans.: To make a loud, ringing sound like a trumpet. (Used especially of the loud sound made by an elephant.)

"From time to time . . . Jumbo trumpeted loudly and made vain trials of his weight and strength against the sides of his cage."
Daily Telegraph, Sept. 17, 1885.

trüm'-pēt-ēr, *trum-pet-ter, s. [Eng. trumpet; -er.]

I. Ordinary Language:

1. One who sounds or blows a trumpet.

"Heralds and trumpeters were sent to summon the Castle in form."
Macaulay: *Hist. Eng.*, ch. xiii.

2. One who proclaims, publishes, or noises anything abroad; one who denounces; often now one who publishes the praise of himself or another.

"The trumpeters of our unlawful intents."
Shaksp.: *All's Well*, iv. 2.

II. Technically:

1. **Ichthy.**: *Lutris hecateia*, one of the most important food-fishes of the southern hemisphere. It ranges from thirty to sixty pounds in weight, and is considered by the colonists the best flavoured of any of the fishes of New Zealand, Tasmania, and South Australia. Large numbers are smoked and sent into the interior.

2. **Ornith.**: Any species of the genus *Poephia* (q.v.). They are South American birds, allied to the Crane, inhabiting the forests, frequenting the ground in search of grain for food, and often betraying their presence by their loud call, whence both their popular and scientific names are derived. The best known species, *Poephia crepitans*, is very beautiful. The breast is adorned with brilliant changing blue and purple feathers, with metallic lustre; head and neck like velvet; wings and back gray, and belly black. They run with great awiftness, and are capable of domestication, attending their master in his walks with as much apparent affection as his dog. They have no spurs, but such is their high spirit and activity, that they brow-beat every dunghill fowl in the yard, and force the Guinea birds, dogs, and turkeys to own their superiority.

trüm'-pēt-īng, s. [TRUMPET.]

Mining.: A small channel cut behind the brickwork of the shaft.

† **trüm'-pēt-ry, s.** [Eng. trumpet; -ry.] The sounding or sounds of a trumpet; trumpets collectively.

trüm'-cāte, v. t. [TRUNCATE, o.] To shorten by cutting abruptly; to lop; to cut short.

trüm'-cāte, a. [Lat. truncatus, pa. par. of trunco = to cut off, to reduce to a trunk; truncus = a trunk, a stock.] [TRUNK.]

1. **Ord. Lang.**: Cut short; truncated.
"The centres of the lumbar are more truncate."
Trans. Amer. Philos. Society, xlii. 198.

2. **Bot.**: Terminating very abruptly, as if a piece had been cut off, as the leaf of the Tulip-tree (q.v.).

TRUNCATED LEAF OF TULIP-TREE

trüm'-cāt-ēd, pa. par. & a. [TRUNCATE, v.]

A. As pa. par.: (See the verb).

B. As adjective:

1. **Ord. Lang.**: Cut off short or abruptly.

"Those who wear any thing on their heads, resembled in this respect, our friends at Nookta; having high truncated conic caps, made of straw, and sometimes of wood, resembling a seal's head well painted."
Cook: *Third Voyage*, bk. 1v., ch. v.

II. Technically:

1. **Min. (Of a crystal):** Having a plane surface where a solid angle might theoretically have been expected. But the term truncated suggests an erroneous idea; the solid angle has not been cut off; it never existed.

2. **Zool.**: The same as DECOLLATED (q.v.).

truncated-cone (or pyramid), s. The portion of a cone or pyramid included between the base and a plane oblique to the base passed between it and the vertex.

truncated-roof, s.

Arch.: A roof with a nearly level top surface and canted sides.

TRUNCATED ROOF. (N.W. Front of Chelsea Hospital.)

trüm'-cā-tél'-la, s. [Mod. Lat., dimin. from truncatus = truncated (q.v.).]

Zool.: Looping-snail; a genus of Littorinidae (Woodward), of Aciulidae (Zate), with fifteen species widely distributed. Operculum shelly, with erect radiating lamellae; aperture of shell ovate; last whorl separate, peristome continuous, expanded. Widely distributed on shores and seaweed between tide-marks, and can survive many weeks out of water. They walk like the Geometric caterpillars, by contracting the space between their lip and foot. They are found semi-fossil, along with human skeletons, in the modern limestone of Guadeloupe. (Woodward.)

trüm'-cā-tion, s. [Fr. truncation, from Lat. truncationem, accus. of truncatio, from truncatus, pa. par. of trunco = to truncate (q.v.).]

† 1. **Ord. Lang.**: The act of truncating, or of cutting short; the act of cutting off.

"Decrease judgment of death or truncation of members."
Prynne: *Huntley's Breviate*, p. 48.

2. **Crystall.**: A term used to signify that change in the geometrical form of a crystal which is produced by the cutting off of an angle or edge, so as to leave a face more or less large in place of the edge or angle. When the face thus produced does not make equal angles with all the contiguous faces, the truncation is said to be oblique.

II. 4. **Truncation of a volcanic cone:** [CONE, s. II. 4.]

trüm'-cā-ti-pén'-næ, s. pl. [Lat. truncatus = cut short, and pl. of penna = a feather, pl. = a wing.]

Entom.: A sub-division of the family Carabidae, comprehending those which have the wing cases truncated at their apex. It includes many sub-families, one of the most notable being the Brachiniinae. [ARTILLERY-BETLE.]

trünch, s. [O. Fr. tronche, from tronc = a trunk (q.v.).] A stake or small post.

trün'-cheón, *tron-chion, *tron-chon, *tron-choun, *trun-chion, s. [O. Fr. tronson, tronchon = a truncheon, or little trunk; Fr. tronçon, dimin. from tronc = a trunk, stock, or stem.] [TRUNK.]

Whose hand the erminial truncheon held,
That feudal strife had often quelled."
Scott: *Marmion*, iv. 4.
- 6. A tree, the branches of which have been
lopped off to produce rapid growth.

trün'-cheón, v.t. [TRUNCHEON, s.] To beat
with a truncheon or staff; to cudgel.

"A captain were of my mind, they would truncheon
you out for taking their names upon you before you
have earned them."—Shaksp.: *2 Henry IV.*, ii. 4.

trün'-cheóned, a. [Eng. truncheon, s.; -ed.]
Furnished with or bearing a truncheon.

* **trün'-cheón-éer, * trün'-cheón-ér, s.**
[Eng. truncheon; -er, -er.] One who bears or
is armed with a truncheon.

"When I might see from far some forty truncheon-
eers draw to her succour."—Shaksp.: *Henry VIII.*,
v. 3.

* **trüncked, a.** [Lat. truncus = (a.) maimed,
mutilated, (s.) the trunk of a tree.] Trun-

Sp., Port., & Ital. *tronco*.] [TRUNCATE, TRUN-
CHEON.]

I. Ordinary Language:

1. The woody stem of trees, as of the oak,
ash, elm, &c.; that part of the plant which,
springing immediately from the earth, rises in
a vertical direction above the surface of the
soil and forms the principal bulk of the indi-
vidual, sending out branches whose structure
is similar to that of itself; the stem or body
of a tree apart from its roots and limbs;
stock, stalk.

2. The body of an animal apart from the
limbs, or after the limbs have been separated
from it.
"Who trembled, trunk and limbs, like some huge oak
By a fierce tempest shaken."
Wordsworth: *Excursion*, bk. vi.

3. The main body of anything considered
relatively to its ramifications or branches: as,
the trunk of an artery, the trunk of a line of
railway.

4. The proboscis or snout of an elephant;
a similar or analogous organ in other animals,
as the proboscis of an insect, by which it sucks
up the blood of animals or the juice of vegeta-
bles.
Leviathan that at his gills
Draws in, and at his trunk spouts out, a sea."
Milton: *P. L.*, VII, 416.

5. A tube, usually of wood, to convey air,
dust, broken matter, grain, &c.: as,

(1) An air-trunk to a mine or tunnel.

(2) A dust-trunk from a cotton-cleaner,
smut-machine, or factory floor.

(3) A broken-material trunk, to convey
graded coal to a waggon or heap, broken

trún-nióned (1 as *y*), a. [Eng. *trunion*; -ed.] Provided with trunnions, as the cylinder of an oscillating steam-engine.

* **trún-sion, s.** [Lat. *trusus*, pa. par. of *trudo* = to push.] The act of pushing or thrusting.

"The operation of nature is different from mechanism, it doing not its work by *trusion* or pulson."—*Cudworth: Intellectual System*, p. 156.

trúss, *trusse, s. & a. [Fr. *trousse* = a package, a bundle, in pl. = trousseurs (q.v.)] [Trauss, v.]

A. *As substantive*:

I. *Ordinary Language*:

* 1. A bundle, a package.

"Osmunde . . . made a great *trusse* of herbs or grass, wherein he wrapped the child."—*Fabyan: Chronicle*, ch. lxxxvi.

2. A bundle of hay or straw tied together. A *truss* of hay is 56 lbs. of old or 60 lbs. of new hay, and thirty-six *trusses* make a load. A *truss* of straw varies in weight in different places.

"He had not been able to get one *truss* of hay for his horses without going six or six miles."—*Macaulay: Hist. of Eng.*, ch. xli.

3. A tuft of flowers formed at the top of the main stalk or stem of certain plants; an umbel.

"The flowers are pure white, and are borne in *trusses* without any undue crowding."—*Field*, Oct. 4, 1885.

II. *Technically*:

1. *Arch.*: An ornamented corbel, serving to support an entablature or balcony, or to conceal the ends of the beams which really support the structure; in the latter case it is frequently made of galvanized sheet iron.

2. *Carp.*: A frame to which rigidity is given by staying and bracing, so that its figure shall be incapable of alteration by the turning of the bars about their joints. The simplest frames

are of wood, and of few parts. More imposing structures are more complicated, the parts being employed in resisting extension or compression. Composite *trusses* employ both wood and iron; in fact, few of any importance are destitute of bolts and tie-rods. In the simplest form of a *truss* the tie-beam is suspended by the king-post from the apex of the angle formed by the meeting of the rafters. In the more complex form the tie-beam is supported by the queen-posts from two points.

3. *Naut.*: The iron hoop, stirrup, and clasp by which the middle of a lower yard is secured to the mast. It consists of a hoop on the mast, tightened by means of screws, whose open heads engage the eyes of a stirrup, which is swivelled to the hoop on the yard.

4. *Shipbuild.*: A short piece of carved work fitted under the taffrail; chiefly used in small ships.

5. *Surg.*: An instrument to keep hernia reduced, that is, to retain the intestines within the abdominal cavity. The essential feature is a spring or bandage resting on a pad, which is kept above the orifice of protrusion. The pad is usually kept to its place by a spring which reaches around the body terminating opposite to the ruptured part. The spring is cushioned, and sometimes has pads to give it bearing on special parts.

* B. *As adj.*: Round and thick.

"The tiger-cat is about the higness of a bull-dog, with short legs and a *truss* body, shaped much like a mastiff."—*Dampier: Voyages*, an. 1764.

truss-beam, s.

Build.: An iron frame serving as a beam, girder, or summer. A wooden beam or frame with a tie-rod to strengthen it against deflection. This *trussing* may be done in two ways: (1) by inserting cast-iron struts, thus placing the whole, or nearly the whole, of the woodwork in a state of tension; (2) by wrought-iron tension-rods, which take the whole of the tension, whilst the timber is thrown entirely into compression.

truss-bridge, s. A bridge which depends for its stability upon the application of the principle of the *truss*. Short bridges of this class may be formed by a single *truss*; larger structures are composed of a system of *trusses* or bays so connected that the spaces between the abutments and the piers may each be regarded as a single compound *truss*.

truss-hoop, s.

1. *Cooper.*: A hoop placed around a barrel to strain the staves into position, bringing them together towards the chine, and leaving the bulge at the middle portion.

2. *Naut.*: A hoop around a yard or mast to which an iron *truss* is fixed.

truss-piece, s.

Build.: A piece of filling between compartments of a framed *truss*.

trúss, *trusse, v.t. [O. Fr. *trusser*, *trusser* (Fr. *trousser*) = to *truss*, to bind, from Lat. *torqus*, pa. par. of *torqueo* = to twist; Cf. Ital. *torciare* = to twist, wrap, tie fast.]

9. That which is committed or entrusted to one; something committed to one's charge, care, or faith; a charge given or received in confidence; something which one is bound in honour and duty to keep inviolate.

"To violate the sacred *trust* of silence."—*Milton: Samson Agonistes*, 428.

10. Something committed to one's care, for use or safe-keeping, of which an account must be rendered.

"Although the advantages one man possesseth more than another, may be called his property with respect to other men, yet with respect to God, they are only a *trust*."—*Swift*.

* 11. The quality or state of being reliable or trustworthy.

"A man he is of honesty and *trust*."—*Shaksp.: Othello*, I. 4.

II. *Law*:

1. A confidence reposed by one person, called the *trustor*, or *celui que trust*, in conveying or bequeathing property to another (called the *trustee*), that the latter will apply it for the benefit of a third party (called the *cestui que trust* or beneficiary), or to some specified purpose or purposes. The purposes of a *trust* are generally indicated in the instrument, whether deed or will, by which the disposition is made. *Trusts* are divided gene-

rally into simple trusts and special trusts, the corresponding terms in Scots law being proprietary trusts and accessory trusts. Simple trusts are those in which the trustee holds the legal estate subject to the duties implied by law. Special trusts are those in which the trustee has some special purpose to execute or carry out. Trusts may be created by the voluntary act of a party, or by the operation of law. [Uae, s.]

trŷ-ēr, s. [TRIER.]

trŷ-gōn, s. [Gr. *τρῦγων* (*trugōn*) = a kind of roach with a pricker in the tail.]

1. *Ichthy.*: Sting-ray; the type-genus of Trygonidae (q.v.). Tail very long, tapering, armed with a long arrow-shaped spine, serrated on both sides; body smooth or with tubercles; nasal valves coalescent into a quadrangular flap; teeth flattened. Some twenty-five species are known, chiefly from the tropical parts of the Indian and Atlantic Oceans, though some are from the fresh waters of eastern tropical America. *Trygon pastinaca*, the Common Sting-ray, extends from the south coast of England and the east coast of North America through the Atlantic and Indian Ocean to Japan. It lives on shallow, sandy ground, rarely takes the bait, and is commonly caught by accident in nets. The flesh is red, and is said to have a rank flavour.

2. *Palaont.*: [TRYGONIDÆ, 2].

trŷ-gōn-i-dæ, s. pl. [Mod. Lat. *trygon*; Lat. fem. pl. adj. snif. -idæ.]

1. *Ichthy.*: Sting-rays; a family of Batoidei, with five genera, from tropical seas. Pectoral fins continued without interruption to the snout, where they become confluent; tail long and slender, without lateral longitudinal folds; vertical fins absent, or, if present, imperfectly developed, often replaced by a strong serrated spine.

2. *Palaont.*: The family is represented by two genera, *Trygon* and *Urolophus* in the Eocene of Monte Bolca and Monte Postale.

trŷ-gōn-ō-rhī-nā, s. [Mod. Lat. *trygon*, and Gr. *ῥίς* (*rhīs*), genit. *ῥίνος* (*rhinos*) = the snout.]

Ichthy.: A genus of Rhinobatidae, allied to *Rhinobatus*, from South Australian seas.

trŷ-īng, pr. par., a., & s. [TRV, v.]

A. As pr. par.: (See the verb.)

B. As adj.: Adapted or calculated to try, or to put to severe trial; severe, afflictive, difficult.

"They were doubtless in a most *trying* situation."—*Macaulay: Hist. Eng.*, ch. xiv.

C. As subst.: Testing, proving, proof.

"The *trying* of your faith worketh patience."—*James* I. 3.

trying-plane, s.

Join.: The plane used after the jack-plane, which prepares the surface. The trying-plane is long, and levels the surface, trying it for straightness.

trying-square, s. The same as TRV-SQUARE (q.v.).

trying-up machine, s.

Wood-work.: A machine for planing and trying-up scantling, with revolving cutters, driven at a high velocity.

trŷ-mā, s. [Gr. *τρῦμα* (*truma*) = a hole.]

Bot.: A compound fruit, superior by abortion, one-celled, one-seeded, with a two-valved, indehiscent endocarp, and a coriaceous or fleshy, valveless sarcocarp. Example, the fruit of the walnut. (*Lindley*.) The term has been deemed superfluous, and it has been proposed to call the fruit of the walnut a *magma*, or even a *drupe*.

* **trŷne, a.** [Lat. *trīnus*.] Threefold, trine.

* **trŷne-compass, s.** The threefold compass of the world—earth, sky, and air.

trŷ-pā-nō-ūs, s. [Gr. *τρῦπανον* (*trupanon*) = a borer, an auger. (See def.)]

Entom.: A genus of Histeridae. Small beetles, with a triangular head and a mouth adapted for boring. They fix themselves on the trunk of a tree denuded of its bark, and, revolving after the manner of a gimlet, bore holes into the wood. All the species are foreign.

† **trŷ-pān-ōc-ō-rāx, s.** [Gr. *τρῦπανον* (*trupanon*) = a borer, and *κόραξ* (*korax*) = a crow.]

Ornith.: A genus of Corvidæ separated from *Corvus* by Kaup.

"Some ornithologists have broken up the genus *Corvus* still further than was done when the *Fins, Jays*, and a few other natural groups were removed from it; but, as regards the European members, with no great success. Thus, the Raven being left as the type-species, the Crow, Rook, and Daw have been placed in genera respectively called *Corone, Trypanocorus*, and *Colaptes*, all the invention of Kaup."—*Farrell: British Birds* (ed. 9th), II. 384.

trŷ-pān-ō-sō-mā, s. [Gr. *τρῦπανον* (*trupanon*) = a borer, and *σῶμα* (*sōma*) = the body.] [TRYPANOSOMATA.]

trŷ-pān-ō-sō-mā-ta, s. pl. [Mod. Lat., pl. of *trypansomata* (q.v.).]

Zool.: An order of Infusoria Flagellata. Endoparasitic animalcules, flattened or lamellate, one or more of the lateral borders forming a frill-like undulating membrane, by the vibrations of which progress is effected; one extremely sometimes attenuate, and somewhat resembling a flagellum; oral or ingestive apparatus undefined. The order contains a single genus *Trypanosoma*, with two species: *Trypanosoma sanguinis*, found in the blood of frogs, and *T. eberthi*, from the intestines of domestic poultry. (*Kent*.)

trŷp-āu-chēn, s. [Gr. *τρῦπα* (*trupa*) = a hole, and *αὐχῆν* (*auchēn*) = the neck.]

Ichthy.: A genus of Gobiidae, with three species, from the coasts of the East Indies. Body elongate, covered with minute scales; head compressed, with a deep cavity above the operculum on each side (whence the generic name); one dorsal, continuous with anal and caudal, ventrals united.

trŷ-pē-tā, s. [Gr. *τρῦπητής* (*trupētēs*) = a borer.]

Entom.: A very large genus of Muscidae. Small flies, with transparent wings covered with dark spots. They frequent the Compositæ; the larvae feed on the substance of the plant, often producing gall-like excrescences.

trŷ-pē-thō-lī-dæ, s. pl. [Mod. Lat. *tryptellium*]; Lat. fem. pl. adj. suff. -idæ.]

Bot.: A family of Lichens, tribe Gastero-thalameæ.

trŷ-pē-thō-lī-ūm, s. [Gr. *τρῦπη* (*trupē*) = a hole, and Gr. *θήλη* (*thēlē*) = a nipple.]

Bot.: The typical genus of Trypethelide (q.v.). The thallus produces a number of distinct pustules, with uninvolved perithecia containing a gelatinous nucleus producing asci and sporida. Generally from tropical and sub-tropical climates.

trŷ-phē-nā, s. [TRIPHENA.]

trŷst, *trīat, *tryste, s. [A variant of *trust* (q.v.); cf. Icel. *tręysta* = to confirm, to rely on, from *tręust* = trust, protection.]

* 1. Trust, dependence, reliance.

"Lady, in you is all my *tryste*."

Erl of Tolous, 550.

2. An appointment to meet; an appointed meeting.

3. A market. (*Scotch.*)

"My first gude-man was awa at the Falkirk *tryste*."—*Scott: Antiquary*, ch. xv.

4. A rendezvous.

¶ To *bide tryst*: To meet one with whom

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, oūb, cūre, unīte, oūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā; qu = kw.

an engagement has been made at the appointed time and place; to keep an engagement or appointment.

tryst, v.t. & i. [TRYST, s.]

A. Transitive:

1. To engage a person to meet one at a certain time and place; to make an appointment with one. (Scott.)

2. To bespeak; to order or engage by a certain time: as, To tryst a pair of boots. (Scott.)

B. Intrans. : To engage to meet at a certain time or place; to make an appointment.

tryst'er, s. [Eng. tryst; -er.] One who sets or makes a tryst; one who makes an appointment to meet.

tryst'ing, pr. par. or a. [TRYST, v.]

trysting-day, s. An appointed day of meeting or assembling, as of troops, friends, &c.

trysting-place, s. An arranged meeting-place; a place where a tryst or appointment is to be kept. (Byron: Parisina, iv.)

tsan-tjan, s. [Chinese.]

Lit. : A seaweed, Fucus cartilaginosus, sometimes used in China as a substitute for edible birds' nests.

tsar, s. [CZAR.] The title of the Emperor of Russia.

tsar-î-na, tsar-îf-sa, s. [CZARINA.] The title of the Empress of Russia.

tschak-möck (t silent), s. [CHAMECK.]

tschëff-kîn-ite, s. [After the Russian General Tschewkin, or Tschëffkin; suff. -ite (Min.); Ger. tschewkinait.]

Min. : A very rare mineral, only a few specimens being known, one of which is in the mineral collection of the British Museum (Natural History). Amorphous; hardness, 5 to 5.5; sp. gr. 4.508 to 4.549; lustre, vitreous; colour, black; streak, dark-brown; opaque. Compos. : a silico-titanate of lanthanum, didymium, cerium, sesqui- and protoxide of iron, and lime. Found in the Ilmen Mountains, Urals, Russia.

tschër-mäk-ite, s. [After Dr. G. Tschernak, of Vienna, mineralogist; suff. -ite (Min.).]

Min. : A massive mineral, showing two cleavages inclined to each other at an angle of 94°. Hardness, 6.0; sp. gr. 2.64; colour, grayish to white; lustre, vitreous, phosphorescent. An analysis gave: silica, 66.57; alumina, 15.80; magnesia, 8.00; soda, with a trace of potash, 6.30; water, 2.70=99.87, which gives the formula, 3ROSiO2 + Al2O3.2SiO2. This has been lately shown to be probably an analysis of impure material, and as Des Cloizeaux has determined the optical properties to correspond with those of albite, the later analysis of Pisani, which is near that of this mineral, suggests that the substance is but albite.

tschër-mig-ite, s. [After Tschernig, Bohemia, where found; suff. -ite (Min.).]

Min. : A member of the group of slims, in which the potash is represented by ammoniac. Crystallization isometric, occurring in octahedrons, and fibrous. Hardness, 1 to 2; sp. gr. 1.50; lustre, vitreous; colour, white, transparent to translucent. Compos. : sulphate of ammonia, 14.6; sulphate of aluminas, 37.8; water, 47.6=100, whence the formula, NH4OSO3 + Al2O3.3SO3 + 24H2O. Manufactured and extensively used in place of potash-slim.

tschët-wërt, tschët'-wërt, s. [CHETVERT.]

tschû-dî, tschû'-dic, a. [TCRUDI, Tschudic.]

Tschëh, Czëch (Ts, Cz as Ch), s. [Slavic.]

Ethnol. (PL) : A branch of the Slavic race, inhabiting Moravia and Bohemia.

tsë-höng, s. [Chinese.] A red pigment used by the Chinese for painting on porcelain. It consists of a mixture of alumina, ferric oxide, and silica, with white lead. (Weale.)

tsët-së, s. [Native name.]

Entom. : Glossina moritans, a dipterous insect, slightly larger than the house-fly, from Africa, ranging from 18-24° south latitude. It is brown, with four yellow transverse bars

on the abdomen, beyond which the wings project considerably. According to Livingstone—who in one of his journeys lost forty-three oxen by the attacks of this insect—the bite is almost certain death to the ox, horse, and dog, but innocuous to man, the ass, the mule, and wild animals generally. The head is armed with a proboscis adapted for piercing the skin, and the fly lives by sucking blood. At first no effect is perceived, but in a few days after an ox has been bitten, the eyes and nose begin to run, the coat stares, a swelling appears under the jaw, and sometimes at the navel, emaciation and flaccidity of the muscles ensue, followed by purging, staggering, in some cases madness, and finally death. On dissection the cellular tissue under the skin is found to be injected with air, as if a quantity of soap-bubbles were scattered over it.

tsing-ly-ön, s. [Chiü.] A red colour used for porcelain painting in China, consisting chiefly of stannic and plumbic silicates, together with small quantities of oxide of copper, or cobalt and metallic gold. (Weale.)

T-square, s. [The letter T, from the shape, and square.] A draughtsman's ruler. The blade is set at right angles to the helve, and the latter slips along the edge of the drawing-board, which forms a guide. The helve is made of two parallel pieces, in one of which the blade is mortised. The other portion of the helve is adjustable on the set-screw to any angle, so as to rule parallel oblique lines, or to form an oblique scale for the triangles, which are the usual rules in plotting and projecting. To some T-squares is attached a shifting member on one side of its tongue, so as to give the latter any angle with the base line of the drawing. The tangent-screw and protractor admit accurate angular adjustment.

tu-a-të-ra, tu-a-ta'-ra, s. [Native name.]

Zool. : Sphenodon punctatum, a large lizard from New Zealand. Olive, sides and limbs with minute white specks, beneath yellowish; the spines of the nuchal and dorsal crests yellow, of the caudal brown; the scales of the back, head, tail, and limbs small, granular, nearly uniform; with irregular folds in the skin, which are fringed at the top with a series of rather larger scales; an oblique ridge of larger scales on each side of the base of the tail, and a few shorter longitudinal ridges of rather smaller ones on each side of the upper part of the tail. (Dieffenbach: New Zealand, ii, 204.) Many of these animals have from time to time been kept in the gardens of the Zoological Society, Regent's Park, London. They are apparently carnivorous, and in captivity were fed on raw meat, living frogs, small lizards, earthworms, mealworms, snails, young birds, or mice. In the New Zealand court of the Colonial Exhibition, held in London in 1886, there was a model of the rocks and small caves inhabited by the Tuatera. These rocks and caves were frequented by small sea-birds, who selected the same places for breeding, and there is little doubt that the lizards fed on the eggs and young of these birds. The Tuatera is remarkable as being the only living representative of the order Rhycho-sauria (q.v.), and it was in the Tuatera that the parietal or unpaired eye was first observed. [UNPAIRED-EYE.]

tüb, * tubbe, s. [Dut. tobbe; Low Ger. tubbe. Origin doubtful.]

I. Ordinary Language:

1. An open wooden vessel, formed with staves, hoops, and heading; a small cask, half-barrel, or piece of cooper-work, with one bottom and open above: as, a wash-tub, meal-tub, mash-tub, &c.

8. The amount which a tub contains, reckoned as a measure of quantity: as, a tub of tea (60 lbs.), a tub of camphor, &c.

9. A term of contempt for an old-fashioned, slow-sailing vessel.

"I laughed, for I knew the Osceola—an old tub, built in East Boston, never made more than ten knots an hour."—Scribner's Magazine, Nov., 1876, p. 81.

II. Mining:

1. A corve or bucket for raising coal or ore from the mine.

2. A casing of wood, or of cast-iron sections bolted together, lining a shaft.

3. One form of chamber in which ore or slimes are washed to remove lighter refuse.

¶ A tale of a tub: An idie or silly fiction; a cock-and-bull story.

"You shall see in us that we preached no lies, not tales of tubs, but even the true word of God."—Covendale: An Exhortation to the Cross, (1854.)

* tub-drubber, s. A tub-thumper; a ranting preacher. [TUB-PREACHER.]

"The famed tub-drubber of Covent Garden."—T. Brown: Works, iii, 198.

* tub-fast, s. A process of treatment for the cure of venereal disease by awaiting in a heated tub for a considerable time, during which the patient had to observe strict abstinence. (Shakesp.: Timon, iv, 3.)

tub-fish, s. [SAPPHIRINE-GURNARD.]

tub-man, s.

Lit. : A barrierer who has a prealdence in the Exchequer Division of the High Court, and a particular place in court. [POSTMAN.]

* tub-preacher, * tub-thumper, s. A term of contempt for a dissenting minister; hence, a ranting, ignorant preacher or speaker.

"Our thoroughfares are needed, of course, to serve such more useful class of people than the oleaginous tub-thumpers."—Observer, Sept. 27, 1885.

tub-saw, s. A cylindrical saw for cutting staves from a block, giving them their transversely rounded shape.

tub-wheel, s. A form of waterwheel which has a vertical axis and radial spiral floats, which are placed between two conical cases attached to the axis. The water is precipitated from a chute upon the wheel, and follows the spiral canals of the wheel until it is discharged at the bottom. It is a combination of the horizontal and common recoil wheel. The water, having exerted a certain percussive force, flows downward, and passes out as in the downward-discharge turbine.

tüb, v.t. & i. [TUB, s.]

A. Transitive:

I. Ordinary Language:

That fumes beneath his nose."

Cowper: *Task*, v. 55.

2. A telescope, or that part of it into which the lenses are fitted and by means of which they are directed as used.

"There lands the fiend, a spot like which perhaps
Astronomer in the sun's flaming orb
Through his glazed optic tube yet never saw."
Milton: *P. L.*, III. 590.

II. Technically:

1. *Anat.*: A canal, as the Eustachian tube (q.v.). Sometimes it has the Latin form *Tuba*.

2. Botany:

(1) The narrow, hollow portion of a monopetalous corolla, or of a monosepalous calyx, formed by the adherence of the edges of the petals or sepals to each other, so as to constitute a channel. The surface of such a tube is called the throat. A tube may be long or short, cylindrical or angular, &c.

(2) The stamiferous body formed when the stamens adhere to each other more or less completely by their filaments or their anthers, or both.

3. *Chem.*: [TEST-TUBE.]

4. *Hydr.*: The barrel of a chain-pump.

5. *Ordn.*: A primer or ordnance; a small cylinder placed in the vent of a gun, and containing a rapidly burning composition, whose ignition fires the powder of the charge.

6. *Physiol.*: The narrow, lengthened pipes or laterally enclosed channels by which the fluids of animals or vegetables are transmitted from one part of the structure to the other.

7. *Steam*: A pipe for water or fire in a steam-boiler. It would be well to call water-pipes tubes and fire-pipes flues; but the practice is to call them flues or tubes according to their relatively large or small diameter respectively. [TUBULAR-BOILER.]

8. *Surg.*: A pipe or probe introduced into the larynx by the mouth or nostrils to aid in restoring respiration in asphyxia.

† (1) *Lightning-tube*: [FLUORITE.]

(2) *Pneumatic tubes*: A name given to a means of connecting stops and keys of an organ with distant soundboards and sliders by admitting a sudden puff of compressed air into one end of a tube, to the other end of which a leather disc is attached, which is immediately forced upwards, and acts upon any necessary mechanism.

(3) *Tube of safety*: [SAFETY-TUBE.]

tube-brush, s. [FLUE-BRUSH.]

tube-cast, s. A cast, generally microscopic, formed within some capillary tube of the body, voided with the urine in albuminuria. [BRIOT'S DISEASE.] It may be bloody, epithelial, fatty, fibrinous, granular, or waxy.

tube-clamp, s. A grab. [GRAB (1), s., 2.]

tube-cleaner, s. [FLUE-CLEANER.]

tube-clip, s. A kind of tongs used for holding test or other heated tubes in chemical manipulations.

tube-cock, s. An indiarubber tube which is fitted into a pipe and compressed by a screw-valve when it is desired to stop the flow of liquid.

tube-compass, s. A compass having tubular legs containing sliding extension-pieces adjustable to any required length by means of set-screws. One leg carries a reversible needle-point and pencil-holder, and the other a reversible needle-point and pen.

tube-condenser, s. A bent tube, provided with a stopper at each end, through which a small tube is inserted, used in obtaining solutions of ammonia and other gases which are absorbable in water.

tube-door, s.

Steam: A door in the outer plate of a smoke-chamber, which may be opened to allow the tubes to be examined or cleaned.

tube-feet, s. pl.

Zool.: Ambulacral tubes; a series of contractile and retractile tubes by means of which locomotion is effected by the Echinoides. The name is also applied to similar, but not homologous, organs in Star-fishes.

tube-ferrule, s.

Steam: A short sleeve for fastening tubes in tube-sheets.

tube-filter, s.

Wells: A perforated chamber at the end of a driven well tube or the suction-tube of a pump, to prevent gravel or other foreign matters from getting into and choking the pump.

tube-flower, s.

Bot.: *Clerodendron Siphonanthus*, a verbena-cous plant, having a funnel-shaped white corolla and a long tube. Introduced into Britain from the East Indies in 1796.

tube-flue, s.

Steam: A furnace-tube through which flame passes.

tube-makers, s. pl.

Zool.: The Tubicolæ (q.v.).

tube-packing, s.

Wells: A bag of flax-seed or ring of rubber to occupy the space between the tube of an oil-well and the bored hole, to prevent access of water to the oil-bearing stratum.

tube-plate, s. A flue-plate (q.v.).

tube-plug, s.

Steam: A tapered plug of iron or wood, used for driving into the end of a tube when burst by the steam.

tube-pouch, s. The artillery-man's leather pouch for carrying friction-primers. It has two loops, by which it is fastened to the belt. The priming-wire and gunner's gimlet are carried with it.

tube-retort, s. [RETORT, s., 2.]

tube-scaler, s. A flue-cleaner (q.v.).

tube-sheet, s. A flue-plate (q.v.).

tube-well, s. An iron pipe of small diameter, pointed, and having a number of lateral perforations near the end, driven into the earth by a small pile-driver hammer until a water-bearing stratum is reached. Where the depth exceeds fourteen feet, two or more sections of pipe are screwed together. A small pump is attached to the top. The device is said to have been originally used in America for obtaining brine. By means of it water can be obtained very quickly from small depths.

† **tūbe (2), s.** [An abbreviation of *tuber* (q.v.).]

tube-root, † tuber-root, s.

Bot.: *Colchicum autumnale*.

tūbe, v.t. [TUBE (1), s.] To furnish with a tube or tubes.

"While the tubed engine feels the inspiring blast."
Wordsworth: *Thanksgiving Ode*, Jan. 13, 1816.

tūbe-form, a. [Eng. *tube* (1), and *form*.] In the form of a tube; tubular, tubiform.

tū-bēr, s. [Lat. = a swelling, a protuberance, a tumour, from the same root as *tumid*, *tumour*, &c.]

1. *Anat.*: A knob, a tubercle, a knot, an eminence, a swelling, as *tuber annulare* = the *pons varolii* of the cephalon; *tuber calcis*, the large posterior extremity of the heel.

2. *Botany*:

(1) A thickened, annual, succulent underground stem, covered with buds, from which new plants or other tubers are produced. In most if not in all tubers a great quantity of amylaceous matter is stored, rendering many of them highly nutritious as food. Example, the Potato.

(2) Truffle; the typical genus of Tuberales (q.v.). Internal parts composed of interlacing branched filaments, forming fleshy convolutions with serpentine cavities between them. The branches of the filaments, free at the surface of the lacuna, bear spherical asci, or saccæ, each with four yellowish-brown globular spores. *Tuber cibarium* or *estivum* is the Common Truffle. [TRUFFLE.]

3. *Surg.*: A knot or swelling in any part.

tuber-root, s. [TUBE-ROOT.]

tū-bēr-ā'-qē-sē, tū-bēr-ā'-qē-i, s. pl. [Mod. Lat. *tuber*; Lat. fem. pl. adj. suff. -qē-sē, or masc. -qē-i.]

Bot.: An order or sub-order of Ascomycetes, growing under the ground or upon its surface. Their form is more or less globular, their texture solid and fleshy, with sinuous cavities lined by asci, containing four or eight finely reticulated or spinulose spores. Ultimately the internal substance either dries and becomes hard, or falls into a flocculent powder. [TRUFFLE.]

tū-bēr-ā'-ēd, a. [Lat. *tuberatus*, pa. par. of *tubero* = to swell out, from *tuber* = a bump, a swelling.] [TUBER.]

Her.: Gibbona; knotted or swelled out.

tū-bēr-cle, s. [Fr., from Lat. *tuberculum*, double dimin. of *tuber* = a swelling.] [TUBER.]

1. *Anat.*: A small protuberance, a blunt eminence, as the tubercles of the ribs, of the tibia, &c.

2. *Botany*:

(1) A very small tuber. (*Lindley*.)

(2) Any small warty excrescence.

(3) [TUBERCULUM (2).]

3. *Pathol.*: A growth, usually taking the shape of minute rounded masses (whence the name tubercle; see etymology), which is apt to spring up in the lungs, intestines, mesenteric glands, larynx, &c., of persons of scrofulous constitution. It is found in two forms; gray (miliary or true) and yellow tubercle. The former consists of gray granulations about the size of a millet seed. It contains lymphoid, epitheloid, and giant cells, with free nuclei and intercellular substance. The giant cell occupies the centre, and it is found also in other producta than tubercle. The yellow is found in larger masses than the gray tubercle; it is softer and more friable, and presents an opaque yellow appearance. It is developed by osseous

degeneration from true tubercle. Koch attributes the production of tubercle to a bacillus which he has discovered and described. PHthisis.]

"Evidence for the prosecution went to show that the lungs of the cow were affected with tubercle in an advanced stage."—Field, Dec. 19, 1885

¶ I Gray Tubercle of Rolando :

Anat. : A mass of gray matter approaching the surface of the metulla oblongata behind the restiform body of the brain.

(2) Tubercles of Lover :

Anat. : A slight projection, better marked in the quadrupeds than in man, between the two orifices of the right auricle of the heart. Quain considers the name somewhat misleading.

tū-bēr-ōled (le as el), a. [Eng. tubercle(s); -ed.]

- 1. Ord. Lang. : Having tubercles; affected with tubercles.
2. Bot. : Covered with little excrescences or warts, as the stems of Cotyledon tuberculata.

tū-bēr-cy-la, s. pl. [Pl. of Lat. tuberculum (q.v.).]

Pathol. : An order of skin diseases in Willan's classification, characterized by the formation of small hard tumours or tubercles.

tū-bēr-cy-lar, a. [Eng. tubercle(s); -ar.]

- 1. Full of knobs or pimples; tuberculate.
2. Affected with tubercles; tuberculose; as, tubercular phthisis.

tū-bēr-cy-late, tū-bēr-cy-lāt-ēd, a. [Eng. tubercle(s); -ate, -ated.]

- I. Ord. Lang. : Tubercular, tuberculose.
II. Technicality :
1. Bot. : The same as TUBERCLED (q.v.).
2. Zool. : Warty, covered with small rounded knobs. (Owen.)

tuberculated-leprosy, s. Pathol. : A form of Elephantiasis graeca, in which the morbid action chiefly affects the cutaneous and mucous surfaces.

tū-bēr-cylo, s. [Lat. tuberculum = a tubercle (q.v.).]

Bot. (Pl.) : The fleshy lobes constituting the roots of some plants, as terrestrial orchids, dabbias, &c.

tū-bēr-cy-lin, s. A liquid preparation from attenuated cultures of the Bacillus tuberculosus, proposed by Prof. Koch, of Berlin, in 1890-91, as a hypodermic cure for tuberculosis.

tū-bēr-cy-li-zā-tion, s. [Lat. tuberculum]; Eng. suff. -ization.]

Pathol. : The act of morbidly affecting with tubercles; the act of rendering tubercular. "In tubercularization of the bronchial glands."—Tanner: Pract. of Med. (ed. vii.), p. 75.

tū-bēr-cy-lōse, tū-bēr-cy-lōs, a. [Fr. tuberculeux, from tubercle = a tubercle (q.v.).] Tubercular; affected with tubercles; suffering from tuberculosis.

"The question of the risk incurred by the consumption of the meat and milk of tuberculous animals is by no means satisfactorily determined."—Field, Dec. 19, 1885.

tū-bēr-cy-lō-sis, s. [Mod. Lat., from Lat. tuberculum (q.v.).]

Pathol. : Tubercular disease, often hereditary, or else produced by any cause lowering the vital health, such as bad ventilation, impure air, over-crowding, dampness of soil and atmosphere, excessive sexual indulgence, mental labour, depressing circumstances, prolonged lactation, &c. The chief seats of the disease are the brain, intestines, kidney, liver, and lungs. It is akin to scrofula and the strumous diathesis. Acute tuberculosis is nearly always fatal. Cod-liver oil, iron, and tonics are frequently beneficial, especially quinine. It also affects the lower animals.

tū-bēr-cy-lōs-ī-tŷ, s. [Eng. tuberculos(e); -ŷy.] The quality or state of being tuberculous; a swelling, a knob.

tū-bēr-cy-lūm, s. [Lat.]

- 1. Science : A tubercle (q.v.). Used in anatomy, &c., as tuberculum sellæ = the Olivary process.
2. Bot. : A convex shell without an elevated rim, found in some lichens, as Verrucaria. Called also Cephalodium.

tū-bēr-ŷ-ēr-ōŷa, a. [Lat. tuber = a tuber; ŷ connect., and ŷero = to bear.] Bearing or producing tubera.

tū-bēr-ŷ-form, a. [Lat. tuber = a tuber; ŷ connect., and forma = form.] Shaped like a tuber.

* tū-bēr-ōn, s. [Sp. tiburón.] A shark. "A shark or tuberon that lay gaping for the flying-fish hard by."—Nash.

tū-bēr-ōse, a. & s. [Lat. tuberosus = full of swellings, from tuber = a swelling, a tuber (q.v.).]

- A. As adj. : Having knobs or tubers; tuberosus.
B. As substantive :
Bot. : Polianthes tuberosa. [POLIANTHES.]

tū-bēr-ōs-ī-tŷ, s. [Eng. tuberos(s); -ŷty.]

- I. Ordinary Language :
1. The quality or state of being tuberosus.
2. A swelling or prominence.
II. Anat. : A broad and rough eminence on a bone.

"Presents an overlapping articular face between the fossæ for a corresponding tuberosity of the neck of the astragalus."—Trans. Amer. Philosoph. Society, xlii, 169.

tū-bēr-ōŷa, a. [Fr. tubereux, from Lat. tuberosus = tuberos (q.v.).]

1. Ord. Lang. : Having prominent knobs or excrescences; tuberos.

"The thalamid, epidid, testes, testiculi, and the other tuberos parts, are so many distinct harbours, of the said spirits, ministering to the several species of sense and phancy."—Grew: Cosmo. Sacra, bk. I, ch. v.

2. Bot. (Of an underground stem) : (1) Much swollen, after the manner of a tuber; (2) bearing tubers.

tū-bēr-ōŷ-ness, s. [Eng. tuberosus; -ness.]

The quality or state of being tuberosus; tuberosity.

tūb-fūl, s. [Eng. tub, and ful(l).] As much as a tub will hold; a quantity sufficient to fill a tub.

tūb-fū-cān-lis, s. [Lat. tubus = a tube, and aulis = a stalk or stem.]

Palaeobot. : A genus of Tree-ferns, from the Permian.

* tū-bīc-in-āte, v. t. [Lat. tubicen, genit. tubicinis = a trumpeter, from tuba = a trumpet.] To blow or sound a trumpet.

tūb-ŷ-nēr-la, s. [Mod. Lat., dimin. from Lat. tubicen, genit. tubicinis = a trumpeter; tuba = a trumpet, and cano (perf. cecini) = to sing or play.]

Zool. : A genus of Balanidae, parasitic on Cetacea. Compartments six, of equal breadth; shell sub-cylindrical, wider at top than at base, and belted by several transverse ridges.

tū-bīo-ō-las, s. pl. [Mod. Lat., from Lat. tuba = a tube, and colo = to inhabit.]

1. Zoology :

(1) In Walcknaer's classification a group of Spiders enclosing themselves or their cocoons in silken tubes. The genera are included in the family Tegenariidae (q.v.).

(2) Segentary Annelids, Tubicolous Annelids; a sub-order of Annelida. They fabricate tubes either by gluing together particles of sand and shells, or by secreting a chitinous or calcified shelly substance, into which they can withdraw themselves by means of tufts or bristles in the sides of the body. Some live in mud or in holes in rocks, and others drag their tubes after them. Head indistinct, proboscis short, jaws not present; branches either absent or limited to three segments behind the head, except in the Lug-worm, where they are placed on the median segments. They are widely distributed, and are said to feed on vegetable matter.

2. Paleont. : The Tubicolous Annelids [1. (2)] are known from the Silurian onwards.

tū-bīo-ō-lar, a. [Mod. Lat. tubicol(ar); Eng. adj. suff. -ar.] Of or pertaining to the TUBICOLE (q.v.).

"Tubicolar Annelids are known from the Silurian rocks."—Nicholson: Paleont. (ed. 2nd), i, 510.

* tū-bī-cōle, s. [TUBICOLE.] Any individual of the order Tubicolæ.

* tū-bī-cōl-ī-das, s. pl. [Mod. Lat., from Lat. tuba = a tube, and colo = to inhabit.]

Zool. : A family of Conchiferous Molluscs, erected by Lamarck for the genera Aspergillum, Clavagella, Fistulana, Septaria, Teredo, and Terebrina. The family has now lapsed: Aspergillum, Clavagella, and Fistulana (merged in Gastrochena) are classed with the Gastrochænidæ; Septaria is merged in, and Terebrina is made a sub-genus of, Teredo, which belongs to the Pholadidæ.

tū-bīo-ō-loŷa, a. [Lat. tubus = a tube, and colo = to inhabit.] Inhabiting a tube; tubicolar.

"The protecting tube of the Tubicolous Annelids."—Nicholson: Paleont. (ed. 2nd), i, 510.

tū-bī-corn, s. [Lat. tubus = a tube, and cornu = a horn.]

Zool. : A ruminant quadruped, having horns composed of a bony axis enclosed within a sheath of the same material.

* tū-bīf-ēr-a, s. pl. [Lat. tubus = a tube, and ŷero = to bear.]

Zool. : The fourth order of Polyplaria, in the classification of Lamarck. Now approximately the same as Alcyonidæ.

tū-bī-fōx, s. [Lat. tuba = a tube, and factio = to make.]

Zool. : The type-genus of Tubificidæ (q.v.), formerly classed with the Naidæ.

tū-bī-fīc-ŷ-das, s. pl. [Mod. Lat. tubifex, genit. tubificis]; Lat. fem. pl. adj. suff. -idas.]

Zool. : A family of Oligochaeta Limnicola, with numerous genera, living in cylindrical tubes of mud on the bottom of streams. Mouth segments united and often lengthened; skin transparent, appearing of a deep red in the water; the part within the tube of a pale straw colour; four rows of recurved setæ present, either simple or forked.

tū-bī-form, a. [Lat. tubus = a tube, and forma = form.] Having the form of a tube; tubular, tubeform.

tū-bī-nār-ōs, s. pl. [Lat. tuba = a tube, and nares = the nostrils.]

Ornith. : Petrels; an order of the class Aves, named from the character prevalent throughout the group, of the external nares, which are prolonged into a more or less lengthy cylindrical tube, lying usually on the dorsal surface of the beak, and opening by one or two apertures. They are holohirnal,

schizognathous birds, with a large, broad, depressed, pointed vomer, and truncated mandible; anterior toes fully webbed, and the hallux either very small and reduced to one phalanx or absent; with a tufted oil-gland, and large supra-orbital glands furrowing the skull. They have an enormous glandular proventriculus, and small gizzard of unusual shape and position. They are divided into two families, Oceanitidæ and Procellariidæ.

tū-bī-nār-ŷ-al, a. [Mod. Lat. tubinares]; Eng. adj. suff. -ial.] Of or belonging to the Tubinares (q.v.).

"One branch of this stock has since become greatly modified in the Tubinarian direction."—Report of Challenger Expedition; Zoology, iv, 64.

tūb-ŷng, s. [Eng. tub(e); -ing.]

- 1. The act of making or providing with tubes.
2. A length of tubes; a series of tubes; material for tubes; as, indiarubber tubing.

bōl, bōy; pōnt, jōwl; cat, cell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ŷng. -cian, -tian = çhan. -tion, -sion = çhün; -tion, -sion = çhün. -cious, -tious, -sious = çhūs. -ble, -dle, &c. = beł, deł

Tü-bing-en, s. [Ger. *Tuebingen, Tübingen*. See def.]

Geog.: A small town on the Neckar, eighteen miles from Stuttgart.

Tubingen School, s.

Church Hist.: The name given to two schools of theology whose chief representatives were connected with the University of Tübingen, either as professors or students.

1. *The Old School*: This was essentially orthodox. Its founder was Gottlob Christian Storr (1746-1803), appointed professor of philosophy at Tübingen in 1775 and professor of theology two years later. He accepted unreservedly the divine authority of the Scriptures, and sought by grammatical and historical exegesis to build up a system of theology, and laid especial emphasis on the evidential value of miracles. He came into conflict with Kant, and criticized his *Religion within the Limits of Pure Reason* somewhat severely. Storr's theological system is contained in his *Doctrinae Christianae pars theoretica e sacris litteris repetita* (1793). Among his immediate followers were the brothers Johann Friedrich (1759-1821) and Karl Christian Flatt (1772-1843). Friedrich Gottlieb Süsskind (1767-1829), and Ernst Gottlob Bengel (1769-1826), a grandson of the great commentator.

2. *The Modern School*: The principles of this school, founded by Ferdinand Christian Baur (1792-1860), also professor of theology at Tübingen, were in direct opposition to those of Storr. In 1835 Baur published his book on the Pastoral Epistles, in which he attempted to prove that they were the work of the second century; and in 1845 he denied the authenticity of all the Epistles attributed to Paul, except that to the Galatians, 1 and 2 Corinthians, and Romans (with the exception of the last two chapters, the genuineness of which he called in question). He considered that Peter and John were Jewish in their views, only distinguished from their brethren by their faith in Christ as the promised Messiah. Paul maintained a doctrine that the Crucifixion made Christ the Saviour of the world, and elaborated a theory of justification which to them was strange, and of religious freedom which to them was abhorrent. For the sake of peace they were for a while silent, but the animosity broke out in the Apocalypse, which referred to St. Paul and his teachings when denouncing the Nicolaitans. In 1844, in the *Theologische Jahrbücher* (the organ of the school), and in a book on the Gospels, in 1847, Baur attempted to show that the fourth gospel was not genuine. He maintained that it was written for the purpose of reconciling Judaistic and Pauline Christianity, and consequently belonged to the second century. Among the allies and followers of Baur were Zeller, who edited the *Theologische Jahrbücher*; Schwieger (Post-Apostolic Age), Ritschl (*Gospel of Mark* and *Gospel of Luke*), Kostlin (*Doctrinal System of John*), Hilgenfeld, and Holsten. As Baur grew older he modified his views greatly, and his *Christianity of the First Three Centuries* (1853) is a more conservative work than his previous writings. He asserts the pure morality of Christianity, while he denies its miracles. Since the death of Baur some of the Tübingen school have admitted the possibility of miracles as a necessary deduction from Theism, and the judgment concerning the fourth gospel has been modified, and in some respects reversed. [PAULINISM.] *The Life of Jesus* of Strauss (1832), was the outcome of the teachings of the new Tübingen school. The object of the book is to show that the gospel narrative concerning Jesus is a philosophic myth—the expression of an idea in the form of an imaginary biography. But in the *New Life of Jesus* (auth. trans., 1865, p. 213) he says, "I have, mainly in consequence of Baur's hints, allowed more room than before to the hypothesis of conscious and intentional fiction." According to Prof. H. Schmidt, of Breslau, the historical and critical studies of Baur, though they led him to unsound conclusions, prepared the way for the brilliant achievements in the departments of Church history and doctrine of the present generation, and must ever be a starting-point for the history of early Christianity.

Tubingen-theology, s.

Church Hist.: The teachings of the Tübingen School (q.v.). It is a term of wide and varied meaning, sometimes expressing little more

than Paulinism (q.v.), at others embracing extreme Rationalism.

"A strong reaction has long since set in against these negative views, even in Tübingen itself, so that what has recently been known as the *Tübingen Theology* is likely soon to be a thing of the past."—*McClintock & Strong: Cyclop. Bib. Lit.*, v. 578.

tü-bip'-ör-a, s. [Lat. *tuba* = a tube, and *porus* = a passage.]

1. *Zool.*: Organ-pipe Coral; a genus of Alcyonidae, constituting the sub-family Tubiporinae (sometimes elevated to family of Alcyonaria, as Tubiporidae). There are several species from the Red Sea and the Pacific. They increase by the production of a wall of calcareous apicules and a kind of corallum.

2. *Paleont.*: Etheridge chronicles one species from the Lower Jurassic.

tü-bí-póre, s. [TUBIPORA.] Any member of the family Tubiporidae, or Organ-pipe coral.

tü-bí-pör'-í-dæ, s. pl. [Mod. Lat. *tubipora*(a); Lat. fem. pl. adj. suff. *-idæ*.] [TUBIPORA.]

tü-bíp-ò-rí-næ, s. pl. [Mod. Lat. *tubipora*(a); Lat. fem. pl. adj. suff. *-inæ*.] [TUBIPORA.]

tü-bíp'-ò-ríte, s. [Mod. Lat. *tubipora*(a); suff. *-ite*.]

Paleont.: A fossil Tubipora.

tü-bí-tó-læ, s. pl. [Lat. *tuba* = a tube, and *tela* = a web.]

Zool.: A synonym of Tegenariidae (q.v.).

tü-bí-válve, s. [Lat. *tubus* = a tube; Eng. *valve*.] Any annelid of the order Tubicolidae (q.v.).

* **tüb'-stër, s.** [Eng. *tub*, s. l. 3.; suff. *-ster*.] A tub-preacher or tub-thumper.

"He says the tubster that would be rich . . . must play the thief."—*T. Brown: Works*, iii. 68.

tüb'-u-lar, a. [Lat. *tubulus*, dimin. of *tubus* = a tube.]

1. *Ord. Lang.*: Having the form of a tube or pipe; consisting of a tube or pipe.

2. *Bot.*: Approaching a cylindrical figure and hollow, as the calyx of many Silenes.

tubular-boiler, s.

Steam: A name properly applicable to a steam-boiler in which the water circulates in vertical, horizontal, or inclined pipes, the fire encircling them.

tubular-bridge, s. A bridge formed by a great tube or hollow beam, through the centre of which a roadway or railway passes. The most remarkable ones ever constructed are those across the Conway and the Menai Straits, on the Chester and Holyhead line of railway. The tubes of the Menai bridge are

CONWAY TUBULAR BRIDGE IN PROCESS OF CONSTRUCTION.

composed of wrought-iron plates, from $\frac{3}{4}$ to $\frac{1}{2}$ of an inch thick, the largest being about 12 feet in length, strongly united by rivets, and stiffened by angle-irons, and vary in exterior height, which is 30 feet at the centre of the bridge, diminishing to 22 feet 9 inches at the abutments. Their exterior width is 14 feet 8 inches, or 13 feet 8 inches in the clear, inside. The first locomotive passed through it in March, 1850.

tubular-crane, s. A crane whose hollow jib is made of riveted boiler-plate.

tubular fabric-loom, s.

Weaving: A machine for weaving hollow goods, such as bags, skirts, and other tubular fabrics.

tubular-girder, s. A hollow girder, of any shape made of plates secured together. The tubular bridge is but the largest kind of tubular girder.

tubular-glands, s. pl.

Anat.: One type of glands found in the mucous membranes. They are minute tubes formed by recesses or inversions of the basement membrane, and are lined with epithelium. They abound in the stomach.

tubular nerve-fibres, s. pl.

Anat.: One of two types of nerve-fibres, characterized by being tubular. They are more widely diffused and more abundant than those of the other type. Called also White, Medullated, or Dark-bodied Nerve-fibres.

tubular-rail, s. A railway-rail having a continuous longitudinal opening which serves as (1) a duct for water, or (2) a steam-pipe to prevent the accumulation of ice or snow.

tü-bü-lär'-í-a, s. [Mod. Lat., from Lat. *tubulus* = a little tube.]

Zool.: The type-genus of Tubulariidae (q.v.); stems simple or branched, rooted by a filiform stolon, the whole invested by a polypary; polypites flask-shaped, with filiform tentacles disposed in two verticils, the oral short and surrounding a conical proboscis, the aboral long and forming a circle near the base of the body; gonophores borne on peduncles springing from the body of the polypite between the two circles of tentacles, containing fixed spores.

† **tü-bü-lär'-í-æ, s. pl.** [TUBULARIA.]

Zool.: Agassiz's name for the Corynida-Gymnoblæstea, or Gymnoblæstic Hydrozoa of Allman.

tü-bü-lär'-í-an, a. & s. [TUBULARIA.]

A. As adj.: Of or pertaining to the Tubularia (q.v.).

B. As subst.: Any individual of the genus Tubularia.

† **tü-bü-lär'-í-dæ, s. pl.** [Mod. Lat. *tubularia*(a); Lat. neut. pl. adj. suff. *-idæ*.]

Zool.: A synonym of Corynida (q.v.).

development under Henry VII, the first of the Tudor line.

"The superb chapel which that monarch erected at Westminster is the best specimen that can be adduced for giving the reader a proper and correct idea of the Florid or Tudor style."—*Quint: Enceps. Architecturae* (ed. Papworth), p. 188.

2. A term applied specifically to late Perpendicular work. (*Gloss. of Arch.*)

3. In domestic architecture the term is applied to three phases of, or developments from the Perpendicular:

(1) The Early Tudor, from the reign of Edward IV. to that of Henry VII. inclusive. Of this style there are no perfect buildings, and only few traces remaining, as at Sudley in Gloucestershire [See illus. under TOURELLE] and Hurstmonceux in Sussex. The Plaisance begun at Greenwich in the reign of Henry VI. and completed by Edward IV., and the palace of Shene, built by Henry VII., have totally disappeared; but, according to the Survey of 1649, the palace at Shene abounded with bay windows of capricious design, with rectangular and semi-circular projections, and was adorned with many octagonal towers, surmounted with bulbous cupolas of the same plan, having their angles enriched with crockets.

(2) Tudor, in vogue during the reign of Henry VIII. The plan of the larger mansions of this period was quadrangular, comprising an inner and base court, between which stood the gate-house. On the side of the inner court facing the entrance were the great chamber, or room of assembly, the hall, the chapel, the gallery for amusements, on an upper story,

HEAD OF TUDOR DOORWAY. (Vestry Door, Alderbury Church, Oxon.)

running the whole length of the principal side of the quadrangle, and the summer and winter parlours. The materials were either brick or stone, sometimes both combined. Moulded brick-work and terra-cotta were also employed for decorative purposes. Among the more striking peculiarities were the gate-houses, the numerous turrets and ornamental chimneys, the large and beautiful bay and oriel windows, hammer-beam roofs, and janelled wainscoting round the apartments.

¶ The term Tudor is used by some authorities to include (1) and (2).

(3) Late Tudor, or Elizabethan. [ELIZABETHAN-ARCHITECTURE.]

1. Ord. Lang.: (See extract under TULCHAN-BISHOP.)

2. Church Hist.: A tuelchan-bishop (q.v.). *Such bishops were called tuelchans by the people.—McCulloch & Strong: Cyclop. Bib. Lit., x. 518.

tulochan-bishop, s.

Church Hist. (Pl.): The name given by the people to the bishops appointed in the Scotch Church under the Concordat of Leith, A.D. 1572, which provided for the restoration of the old hierarchical titles under the control of the General Assembly. The men who consented to take the titles bound themselves, as the price of their elevation, to receive only a small part of the revenues, the larger portion going to Morton and his colleagues.

*A 'tulechan' is, or rather was, for the thing is long since obsolete, a milkmaid stuffed into the rude similitude of a calf—sometimes to deceive the imperfect perceptive organs of a cow. At milking time the tuelchan, with head duly bent, was set as if to suck; the fond cow, looking round, fancied that her calf was busy and that all was right, and so gave her milk freely, which the cunning maid was draining in white abundance into her pail all the while. The Scotch milkmaids in those days cried, 'Where is the tuelchan? is the tuelchan ready?' So of the histopis, Scotch birds were eager about the Church lands and tithes, to get rents out of them freely, which was not always easy. They were glad to construct a form of tithes to please the King and Church, and make the milk come without disturbance. The reader now knows what a tuelchan-bishop was. A piece of mechanism constructed not without difficulty, in Parliament and King's Council, among the Scots, and torn asunder afterwards with dreadful clamour, and scattered to the four winds, so soon as the cow became awake to it!—Carlyle: Cromwell, l. 36.

tü-lê, s. [See def.]

Bot.: The name given by the Mexican Spaniards in California to Scirpus lacustris, the Club-rush or Bulrush, which grows abundantly in certain places in the country; two lakes in Upper California being called, in consequence, the Tule Lakes. In addition to its uses, mentioned in the article Scirpus (q.v.), it has been employed as a material for paper-making.

tü-lip, *tü-li-pan, s. [Fr. tulipe; Ital. tulipano; Turk. tulband, the vulgar pronunciation of tulband = a turban; Pers. dūband, which Skeat considers to be from Hindostanæc; Sp. tulipa = a small tulip, tulipán = a tulip; Port. tulipa. So named because the gay colours and the form of a tulip suggest those of some turbans.]

1. Bot.: The genus Tulipa, and spec. Tulipa Gesneriana, the Garden Tulip. Stem smooth and one-flowered, petals and filaments also smooth; flower erect, the lobes of the stigma decurrent and deeply divided, the leaves ovate, lanceolate, glaucous, and smooth. It was brought in seed from the Levant to Augsburg in 1559. There the sinner year Geener saw, described, and figured it; soon after which it was cultivated throughout Germany. When it reached Holland, the future seat of the Tulipomania (q.v.), is not known. It was introduced into England from Vienna about the end of the sixteenth century. Tulips flourish best in rich loam and sand. More than a thousand varieties are known, and others are being obtained at intervals from seed. The most valuable kinds should be taken up after they have ceased flowering, and dried and kept till autumn, when they should be replanted. They require protection against continued rain or hard frost, which are apt to make them rot.

† 2. Gunnery: The increase of thickness at the muzzle of a gun. Only occasionally found in modern breechloaders.

tulip-ear, s. An upright or prick-ear in dogs. (Vero Shaw.)

It belongs to the natural order Magnoliaceæ, and is a large and stately tree, sometimes from 100 to 140 feet high, with a trunk three feet in diameter. The leaves are roundish, ovate, and three lobed, the middle lobe truncated. The flowers resemble tulips in size and appearance. The bark has a bitter, aromatic taste, and contains a bitter principle, called Liriodendrin, which has been used as a

substitute for quinine. [See illustration under ANURF.]

2. Paritium elatum.

tulip-wood, s.

Bot. & Comm.: The wood of Physoclymna Moribunda.

tü-lip-a, s. [TULIP.]

Bot.: Tulip; the typical genus of Tulipæ. Bulb of few thick convoluted scales; leaves radical and cauline, the lower ones sheathing; flowers usually solitary, rarely two on each stem; perianth campanulate, of six segments, without a nectariferous depression; stamens six; anthers fixed by the base, erect, noble, linear, bursting inwards; stigma sessile, three-lobed; ovary trigonous; fruit capsular, seeds many. Known species twenty, from Europe and the North and West of Asia. It has a one-flowered, somewhat drooping stem; the leaves of the perianth ovate, fragrant, acuminate, bearded at the extremity; the flowers yellow; the stamens hoary at the base, the stigma obtuse. It increases by throwing out a long, aine fibre from its root, at the extremity of which a bulb and, in due time, a fresh flower appears. T. Gesneriana is the Garden Tulip. [TULIP.] T. Oculis-Solis, the Agen Tulip, so called from Agen in France, where it grows, has large and bell-shaped flowers of a fine scarlet colour, each petal marked at its base with a broad black and yellow spot. It is wild in France, Germany, Italy, &c. T. suaveolens, the Early Dwarf or Van Thol Tulip, is a native of Southern Europe, blooming in March and April. T. Celsiana, the Small Yellow, and T. biflora, the Two-flowered Yellow Tulip, the latter with fragrant flowers, are wild near the Volga, &c. T. Chusiana is the Red and White Italian Tulip. The bulbs of T. stellata, growing in the Himalayas, the Salt Range, &c., are eaten.

*tü-lip-ist, s. [Eng. tulip; -ist.] A cultivator of tulips. (Browne: Urne Buriall. Ep. Ded.)

tü-lip-ô-mâ-ni-ø, tü-lip-mâ-ný, s. [Eng. tulip; ø connect., and mania (q.v.).]

An extravagant passion for the possession of tulips or tulip-bulbs. Tulips were introduced into Holland late in the sixteenth century, and the soil and climate being favourable, their cultivation formed an important branch of industry, and the plants became more and more in request as they increased in variety and beauty. The Dutch merchants therefore made the purchase and sale of these bulbs a part of their regular trade, and supplied other European nations with their importations. What was at first a legitimate trade afterwards developed into the wildest speculation, which rose to its greatest height between 1634 and 1637. For a single bulb of the species Semper Augustus, 13,000 florins were once paid, and for three, 30,000 florins, and equally extravagant sums for other kinds. Men then dealt in bulbs as they do now in stocks and shares. At length the fictitious trade collapsed. Many persons who had suffered ruinous losses broke their contracts; confidence in the ultimate realisation of the money which the bulbs were supposed to represent then vanished, and ruin spread far and wide.

II. Surg.: Any morbid parasitic growth, generally, though not always attended by swelling. Tumors are primarily divided into two classes, the first innocent, including non-malignant, solid, benign, or sarcomatous, and the second malignant growths. Tumors of the first type occur in comparatively few tissues, and do not alter the adjacent parts unless the tumor produces pressure and partial inflammation; they have no tendency to ulcerate or slough, and, if extirpated by a surgical operation, they do not grow again. They vary considerably in structure, being fatty, cellular, fibrous, fibroid or tendinous, encysted, vascular, cartilaginous, osseous, or fibro-cartilaginous. Fatty and cartilaginous tumors often reach a size so large that they weigh many pounds. They should be excised while yet they are small. A tumor of the second type, on the contrary, may arise in almost any part of the body, although some parts are more liable than others to attacks. They tend to propagate their morbid action to the adjacent parts, or, by means of the blood, even to spots remote from their formative seat; they go on to ulcerate or slough, and, when extirpated by surgical operation, grow again, either at the original or some other place. The cancer and tubercle are leading types of malignant tumors. A third type of tumor, the semi-malignant, is intermediate between the first two, and includes some forms of sarcomatous and of melanotic tumor, the painful subcutaneous tumor or tubercle, naevi, polypi, &c. Melanosis is commoner in horses than in the human subject, and chiefly in white or gray horses. Various tumors are interthoracic, affecting the heart, the lungs, &c. There are also tumors of the brain, of the liver, the rectum, &c.; and in women the uterus and the vagina are especially liable to be affected with tumor.

"I have pass'd the boisterous sea and swelling billows of this tumultuary life."—Howell: Letters, bk. II, let. 73.

*tū - mūlt - tū - āte, v.t. [Lat. tumultuatus, pa. par. of tumultuor, from tumulus = a tumult (q.v.).] To make or raise a tumult.

"But the injury being once owned by a retribution, and advanced by defiance, like an opposing torrent it tumultuates, grows higher and higher."—South: Sermons, vol. VIII, ser. 7.

*tū - mūlt - tū - ā - tion, s. [Lat. tumultuatio.] [TUMULTUATE.] Commotion; irregular, disorderly, or turbulent movement; tumult.

"That in the sound the contiguous air receives many strokes from the particles of the liquor, seems probable by the sudden and eager tumultuation of its parts."—Boyle.

tū - mūlt - tū - ōus, a. [Fr. tumultueux, from Lat. tumultuosus, from tumulus = a tumult (q.v.).]

1. Full of tumult, disorder, or confusion; disorderly, turbulent.

"A tumultuous council of the chief inhabitants was called."—Macaulay: Hist. Eng., ch. xii.

2. Conducted with tumult or disorder; noisy, uproarious, boisterous.

"The debate was sharp and tumultuous."—Macaulay: Hist. Eng., ch. xiii.

3. In disorder or confusion. "The Trojans rush tumultuous to the war." Pope: Homer; Iliad IV, 253.

*4. Agitated, disturbed, as by passion or the like.

"His dire attempt, which nigh the birth Now rolling, boils in his tumultuous breast." Milton: P. L., IV, 16.

5. Turbulent, violent.

"Furiously running in upon him with tumultuous speech, he violently caught from his head his rich cap of sables."—Knotter: Hist. Turkei.

*tumultuous-petitioning, s. Lave: The offence of stirring up tumult or riot under the pretence of petitioning, as was considered to be done at the opening of the

Parliament of 1640. By 13 Car. II., l. 5, it is enacted that no petition to the House of Parliament for any alteration in Church or State shall be signed by above twenty persons, unless the matter thereof be approved by three justices of the peace, by the major part of the grand jury (sixteen men) in the country, and in London by the Lord Mayor, Aldermen, and Common Council, and that no petition shall be presented by more than ten persons at a time. The penalty was not to exceed £100 fine, or three months' imprisonment. By 1 Will. & Mary, l. 2, it was declared that the subject has a right to petition, and that commitments and prosecutions for such petitioning are illegal. Since then there has been no barrier in the way of sending to the Legislature petitions with as many signatures as can be obtained. (English.)

tū - mūlt - tū - ōus - lŷ, adv. [Eng. tumultuous; -ly.] In a tumultuous, disorderly, or turbulent manner; with tumult and disorder.

"[They] tread tumultuously their mystic dance." Poe: Callimachus to Jupiter.

tū - mūlt - tū - ōus - nēss, s. [Eng. tumultuous; -ness.] The quality or state of being tumultuous; tumult, disorder, turbulence.

"This is enough, I hope, to make you keep down this boiling and tumultuousness of the soul, lest it make you either a prey, or else companion for devils."—Hammond: Works, IV, 614.

tū - mū - lūs (pl. tū - mū - lŷ), s. [Lat. = s mound, a heap.]

Anthrop.: A mound raised over a tomb, or, more rarely, as a memorial of some person or event. Tumuli are found in large numbers in all parts of the world. Many date from prehistoric times, and they are mentioned in the earliest writings of the human race. In the Bible three instances of this mode of burial occur (Josh. vii. 26, viii. 29; 2 Sam. xviii. 17); s. tumulus was raised over Patroclus (II. xxiii. 255), and Dercennus, King of Latium (Æn. xi. 850) was interred in a similar manner, there being no authority in the poem for the "marble tomb" in which Dryden makes him lie. This method of interment continued down to historical periods, and is still practised among savage races. Not improbably some traces of it linger in civilized communities in the practice of throwing earth upon the coffin at a funeral. In size tumuli vary greatly, the larger probably marking the graves of chiefs or persons of distinction. Tumuli are very numerous in the United States, the work of the former people called the Mound Builders, and probably to some extent of modern Indians. Some of these mounds are very large, the larger ones being probably intended for other purposes than burial. The largest of these is at Cahokia, Illinois. It is 90 feet high and measures 700 by 500 feet at base. At Upsala, in Sweden, there are three large and high tumuli close together, popularly supposed to be the burial-places of Odin, Thor, and Freya. Most of the tumuli in Scandinavia, where they are extremely numerous, consist of large mounds, in which there is a passage leading into a central chamber, round the sides of which are placed the bodies of the dead. These tumuli closely resemble the dwelling-houses of Arctic people, such as the Esquimaux. In England there is very rarely any chamber, the mound being raised over a simple stone vault or chest. Inside the chambers or vaults are found the bones or ashes of the dead, or, possibly, of the victims of funeral sacrifice (Hom.: II. xlii. 175, Paus., IV, 2, Herod., IV, 71, Cæs.: de Bello Gal., IV, 19), together with stone or bronze implements, pottery, ornaments, and bones of animals, probably the relics of burial feasts. The determination of the age of tumuli is a very difficult problem; as a general rule, where the bodies have been buried in a sitting or contracted position, the tumulus belongs to the Neolithic Age; where the body has been cremated, to the Bronze Age; and where the body is in an extended position, to the Iron Age.

tūn, *tonne, *tunne, s. [A.S. tunne = a barrel; Sw. & Icel. tunna; Dan. tønne; Ger. tonne = s cask; Low Lat. tunna, tonna; Fr. tonneau; Gael. tunna; Irish tunna, tonna; Wel. tynell. Ton and tun are doublets.]

I. Ordinary Language: 1. A name originally applied to all large casks or similar vessels for containing liquids or the like.

"And ever stich hath so the tappe ronne, Till that almost all empty is the tonne." Chaucer: C. T., 3, 89L

2. Hence, a certain measure or quantity, such as might be contained in such a vessel, as the old English tun of wine, which contained four hogsheads or 252 gallons. All higher measures than the gallon are now illegal in Britain. The Great Tun of Heidelberg, constructed in 1751, is capable of containing 800 hogsheads, or 283,200 bottles, but it has not been used since 1760.

* 3. A ton weight of 2,240 pounds.

4. A certain quantity of timber, consisting of forty solid feet if round, or fifty-four feet if square.

* 5. A large quantity.

"Draw *some* of blood out of thy country's breast."
Shakespeare: Coriolanus, iv. 5.

6. The fermenting vat of a brewery.

* 7. A drunkard.

* 8. A flue; a shaft of a chimney.

"My *nave* bows with the *tin* *turns* of chimney."
Bury Wills, p. 23.

II. *Zool.*: A popular name sometimes applied to the shells of the genus *Dolium*, from their shape.

* **tun-bellied**, *a.* Having a large, protuberant belly.

tun-belly, *s.* A large, protuberant belly, like a tun.

"A double chin and a *tun-belly*."
J. Brown: Works, iii. 152.

* **tun-dish**, *s.* A funnel.

"Filling a bottle with a *tun-dish*."
Shakespeare: Measure for Measure, iii. 2.

tun, *v.t.* [*TUN, s.*] To put into a tun or cask.

"If in the must, or wort, while it worketh, before it be *tuned*, the burrage stay a time, and be often changed with fresh, it will make a sovereign drink for melancholy."
Bacon.

tun'-a-ble, **tune'-a-ble**, *a.* [*Eng. tune; -able.*]

1. Capable of being put in tune or made harmonious.

2. Harmonious, musical, cheerful, melodious.
"The breeze, that murmurs through yon caves,
Enchants the ear with *unusable* delight."
Grainey: Sugar-Cane, iii.

* **tun'-a-ble-ness**, *s.* [*Eng. tunable; -ness.*] The quality or state of being tunable; harmony; harmoniousness; melodiousness.

* **tun'-a-ble-ly**, *adv.* [*Eng. tunable(ly); -ly.*] In a tunable manner; harmoniously, melodiously.
"In summer he [merle or blackbird] singeth clear and *tunably*, in winter he stotteth and stammereth."
P. Holland: Plinie, bk. x., ch. xxxix.

Tun'-bridge, *s.* [*See def.*] The name of a town in Kent, England.

Tunbridge-ware, *s.* A kind of small cabinet-work, covered with a peculiar veneer made by gluing together long strips of different coloured woods into a solid mass longitudinally from which slices are taken horizontally.

Tunbridge Wells sand, *s.*

Geol.: The uppermost beds of the Hastings sand. They are from 160 to 280 feet thick, and may be divided into an Upper and Lower Tunbridge Wells sand, the latter associated with Cuckfield clay. They are separated by a clay called the Grinstead clay, which is of fluvionarine origin. (*Etheridge.*)

tund-ing, *s.* [*Lat. tundo = to beat.*] A word used in Winchester college to describe a punishment there administered by senior pupils termed prefects or præpositors, and consisting of a flogging administered between the shoulders with a ground ash. When any grave offence had been committed the punishment was public.

"The public *tundings* were almost always fairly conducted, being generally adequate but not excessive."
School-life at Winchester College.

tun'-dra, *s.* [*Russ.*] A term applied to the immense stretches of flat, boggy country, extending through the northern part of Siberia and part of Russia, where vegetation takes an arctic character, consisting in large measure of mosses and lichens. They are frozen the greater part of the year.

tune, *s.* [*Fr. ton = a tune or sound, from Lat. tonum, accus. of tonus = a sound, from Gr. tonos (tonos) = a tone (q.v.).*]

I. *Ordinary Language*:

* 1. A sound, a tone.

"Nor are mine ears with thy *tonus's* *tune* delighted."
Shakespeare: Sonnet 1.

2. In the same sense as *I. 1.*

3. Correct or just intonation in singing or playing; the condition or quality of producing or of being able to produce tones in unison, harmony, or due relation with others; the normal adjustment of the parts of a musical instrument, so as to produce its tones in correct key-relationship, or in harmony or concert with other instruments.

"Out of *tune*, out of *tune* on the strings."
Shakespeare: Two Gentlemen, iv. 2.

4. Hence, harmony, concord.

"A continual parliament I thought would but keep the common weal in *tune*, by preserving laws in their due execution and vigour."
Alex. Charles.

5. Frame of mind; mood; temper; for the time being; hence, to be in *tune* = to be in the right disposition, mood, or temper.

"It is not the walking merely, it is keeping yourself in *tune* for a walk."
Burroughs: Pepsaton, p. 248.

II. *Technically*:

1. *Music*: A rhythmical melodious succession or series of musical tones produced by one voice or instrument, or by several voices or instruments in unison; an air; a melody. The term, however, is sometimes used to include both the air and the combined parts (as alto, tenor, bass) with which it is harmonized.

"That I might sing it to a *tune*."
Shakespeare: Two Gentlemen, 1. 2.

2. *Phrenol.*: An organ situated above the outer part of the eyebrow. When well developed it enlarges the lower and lateral part of the forehead. It is supposed to enable one to appreciate the relations of sounds which are heard by the ear. Called more rarely the organ of Melody.

* *To the tune of*: To the aim or amount of. (*Colloq.*)

tune, *v.t. & i.* [*TUNE, s.*]

A. *Transitive*:

1. To put into such a state as to produce the proper sounds; to cause to be in tune.

"To *tune* his lute, or, if he will it more,
On tones of other times and tongues to pore."
Byron: Lara, l. 21.

2. To sing with melody or harmony; to sing or play harmoniously.

"The little birds that *tune* their morning's joy."
Shakespeare: Rape of Lucrece, l. 107.

3. To give a special tone or character to; to attune. (*Spenser: F. Q., VI. x. 7.*)

* 4. To put into a state proper for any purpose, or adapted to produce a particular effect; to accommodate.

"Had even *tuned* his bounty to sing happiness to him."
Shakespeare: All's Well, iv. 2.

B. *Intransitive*:

1. To form melodious or harmonious sounds.

"Whilst *tuning* to the water's fall,
The small birds sang to her."
Drayton: Cynthia.

2. To utter inarticulate musical sounds with the voice; to sing without using words; to hum a tune.

tune'-a-ble, *a.* [*TUNABLE.*]

tuned, *a.* [*Eng. tune(ē); -ed.*] Having a tune or tone. (Usually with a qualifying adjective.)

"Mean-time the shrill *tuned* bell . . .
Tinkles far off."
Warton: Act & Aecyon.

tune'-ful, * **tune'-full**, *a.* [*Eng. tune; -full.*] Harmonious, melodic, musical.

"[I] even to myself never seemed
So *tune-ful* a poet before."
Cooper: Catharina.

tune'-ful-ly, *adv.* [*Eng. tune-ful; -ly.*] In a tune-ful, melodious, or harmonious manner; melodiously, musically.

"The praises of God *tune-ful* performed."
Atterbury: Sermons, vol. IV., ser. 9.

tune'-ful-ness, *s.* [*Eng. tune-ful; -ness.*] The quality or state of being tune-ful; melodiousness.

tune'-less, * **tune-lesse**, *a.* [*Eng. tune; -less.*]

1. Unmusical, inharmonious. (*Scott: Rokeby, l. 4.*)

2. Not employed in making music; not giving out musical sounds.

"In hand my *tuneless* harp I take."
Spenser: Sonnet 44.

3. Not expressed rhythmically or musically; unexpressed; silent; without voice or utterance.

tun'-er, *s.* [*Eng. tune(ē), v.; -er.*] One who tunes; specif., one whose occupation is to tune musical instruments.

tūng, *s.* [*Native name.*] (See compound.)

tung-oil, *s.*

Chem.: A slightly acrid oil expressed from the nuts of various species of Elaeococca, a native of Japan. In Japan it is used as an article of food; in China for painting boats, furniture, &c., and in the Mauritius for burning.

* **tun-grove**, *s.* [*A.S. tūn = a town, and grēve = a reeve.*] A town reeve, or bailiff. (*Covell.*)

tūng'-tāte, *s.* [*Eng. tungst(ē); -ate.*]

Chem.: A salt of tungstic acid.

* Tungstate of iron, tungstate of iron and manganese = *Wolfram*; tungstate of lead = *Stolzite*; tungstate of lime = *Scheelite*.

tūng'-stēn, *s.* [*Sw. tungsten = heavy stone; Ger. schwerstein.*]

1. *Chem.*: Wolfram. A hexad metallic element, symb. W; at. wt., 184; sp. gr. 17.4; found as ferrous tungstate in the mineral wolfram, and obtained as a dark-gray powder by strongly heating tungstic oxide in a stream of hydrogen. It is a white, nearly infusible metal, very hard and brittle, unaffected by air or by water at the ordinary temperature, insoluble in hydrochloric and dilute sulphuric acids, but oxidized by concentrated sulphuric acid, and by nitric-acid. It forms two classes of compounds, in which it is quadrivalent and divalent respectively.

2. *Min.*: The same as SCHEELITE (q.v.)

tungsten-methyl, *s.*

Chem.: W(CH₃). Obtained by heating a mixture of tungsten and methylic iodide at 240° in a sealed tube for several days. It crystallizes in colourless tables, melting at 110°.

tūng'-stēn'-ic, *a.* [*Eng. tungsten; -ic.*] Tungstic (q.v.)

tūng'-stic, *a.* [*Eng. tungst(en); -ic.*] Contained in or derived from tungsten (q.v.)

tungstic-acid, *s.*

1. *Chem.*: H₂O·WO₃. Prepared by digesting native calcium tungstate in nitric or hydrochloric acid, and washing out the soluble calcium salt with water. It is of a straw-yellow colour, is insoluble in water and acids, but dissolves readily in solutions of the fixed alkalis and in ammonia.

2. *Min.*: [TUNGSTITE].

tungstic-chloride, *s.*

Chem.: WCl₅. Hexachloride of tungsten. Produced by heating a mixture of tungstic oxide and charcoal in a current of chlorine. It forms dark violet scales, having a bluish metallic iridescence. Its vapour has a reddish-brown colour.

tungstic-dichloride, *s.*

Chem.: WCl₄. Obtained by heating tungstic chloride in hydrogen gas. It is a loose, gray powder, destitute of crystalline structure, and readily decomposed by water.

tungstic-ochre, *s.* [TUNGSTITE]

tungstic-oxide, *s.*

Chem.: WO₃. Trioxide of tungsten. A yellow powder obtained by dissolving tungstic acid in ammonia, evaporating to dryness, and heating in contact with air. It is insoluble in most acids, but soluble in alkalis.

tūng'-stite, *s.* [*Sw. tungsten = heavy stone; sulf. -ite (Min.).*]

Min.: A mineral occurring mostly as an earthy encrustation, but has been found in distinct cubic crystals at St. Leonard, near Limoges, France. Colour, bright yellow or yellowish-green. Compos.: oxygen, 20.7; tungsten, 79.3 = 100, with the formula WO₃. Called also Tungstic acid and Tungstic ochre.

tūng'-stōus, *a.* [*Eng. tungst(en); -ous.*] Pertaining to tungsten.

tungstous-oxide, *s.*

Chem.: WO₂. Dioxide of tungsten. A brown powder produced by exposing tungstic oxide to hydrogen at a temperature not exceeding dull-redness. It is insoluble in water and acids, and, when heated in the air, takes fire, being reconverted into tungstic oxide.

Tūn-gūs'-ic, *a.* [*Turanian native name.*] A term applied to a group of Turanian tongues spoken by tribes in the north-east of Asia.

fāte, **fāt**, **fāre**, amidst, **whāt**, **fāll**, father; **wē**, **wēt**, here, camel, her, there; pine, pit, sire, sir, marine; **gō**, **pōt**, or, **wōre**, **wōlf**, **wōrk**, **whō**, **sōn**; **mūte**, **cūb**, **cūre**, **unite**, **cūr**, **rūle**, **fūll**; **trý**, **Sýrian**, **sē**, **ce = ā**; **sy = ā**; **qu = kw**.

The most prominent dialect is the Manchu, spoken by the tribes who conquered China in 1644. These tongues are of a very low grade of development, having no verb, and possessing no distinction of number and person in their predicative words.

tūn'-hoof, *tun-hove, s. [Ety. doubtful.] Bot.: Nepeta Glechoma. [ALSHOOF.]

tū-niō, *tū-nick, s. [Lat. tunica = an under-garment worn by both sexes; Fr. tunique; A.S. tunice, tunec; Sp. & Port. tunica; Ital. tonica, tunica.]

I. Ordinary Language:

- 1. In the same sense as II. 3.
2. A kind of loose garment formerly worn by both sexes of all ages, now only worn by women and boys. It is drawn in at the waist, and does not reach much below it.

II. A military coat.

III. Technically:

1. Anat.: A membrana which covers some part of organ, as, the abdominal tunica, the tunics of the stomach, the eye, &c.

2. Bot.: A coat; any loose membranous skin not formed from epidermis, spec:

(1) The outer covering of one kind of bulb. [TUNICATED BULB.]

(2) The outer and inner integuments of a seed, the former called the external and the latter the internal tunic.

"Their fruit is locked up all winter in their gema, and well fenced with neat and close tunicks."—Derham: Physico-Theology. (Todd.)

3. Class. Antiq.: A very ancient form of garment in constant use among the Greeks [CHITON], and ultimately adopted by the Romans. The Roman tunic was a sort of shirt worn under the toga, and buckled round the waist by a girdle. It reached an inch or two below the knees, and the sleeves were so short that they merely covered the shoulders; for although tunics hanging down to the ankles (tunicae talares), and with sleeves extending to the wrists and terminating in fringes (tunicae manicatae et fimbriatae) were not unknown towards the close of the republic, they were always regarded as indications of effeminate foppery. Senators alone had the right of wearing a tunic with a broad, vertical stripe of purple (latus clavus) in front, the garment being hence called tunica lativiva while the tunic of the Equites was distinguished by a narrow stripe, and hence called tunica angusticlavia.

"To him seven talents of pure ore I told Twelve cloaks, twelve veils, twelve tunics stiff with gold."—Pope: Homer; Odysee xxiv, 321.

4. Eccles.: The same as TUNICLE, 2 (q.v.).

5. Mil. Antiq.: A military surcoat; the garment worn by a knight over his armour.

6. Zool.: Two integuments, the external and the internal tunic, covering the Tunicata, the former is generally coriaceous or cartilaginous, and called also the test; the latter is of muscular fibres. [TUNICATA.]

tū-nic-ar-ŷ, s. [Lat. tunica = a tunic; Eng. suff. -ary.]

Zool.: Any individual of the Tunicata (q.v.).

tū-ni-cā-ta, s. pl. [Neth. pl. of Lat. tuniciatus, par. of tunico = to clothe with a tunic (q.v.).]

Zool.: Sea-squirts; a group of animals now usually made a sub-kingdom, with one class, Ascidiida, containing three sub-orders, or families, of which Ascidia, Salpa, and Pyrosoma are the types. They are all marine, and

are protected by a leathery elastic integument, or tunic, which takes the place of a shell. None attains a length of more than a few inches, and some are minute and almost microscopic. They have no distinct head, and no separate organs of prehension or locomotion. They possess an alimentary canal suspended within the integument; the mouth opens into a large chamber which usually occupies the greater part of the cavity of the mantle, and which is known as the respiratory sac, or bronchial sac, its walls are perforated by numerous apertures. This sac opens into the oesophagus, which is followed by the stomach and intestine coiled upon itself, and terminating in the cloaca, which opens near to the mouth. The heart consists of a simple contractile tube, open at both ends. The nervous system consists of a single ganglion, situated at one side of the mouth. All the Tunicata are free during the earlier portion of their existence; at a later period most are fixed; some are simple, while others present various degrees of combination; and, with few exceptions, the sexes are combined in a single individual. They form a connecting link between the Vertebrata and the Invertebrata, from the fact that many of them in the larval state are furnished with a notochord, which atrophies in the adult. Ray Lankester (Degeneration, p. 41) considers them "degenerate vertebrata standing in the same relation to fishes, frogs, and men, as do the barnacles to shrimps, crabs, and lobsters."

tū-ni-cāte, s. & a. [TUNICATA.]

A. As subst.: Any individual of the order Tunicata.

B. As adj.: The same as TUNICATED (q.v.).

tū-ni-cāt-ēd, a. [TUNICATA.]

Bot. & Zool.: Having a tunic or coat; covered with a tunic.

tunicated-bulb, s.

Bot.: A bulb of which the outer scales are thin and membranous, and cohere in the form of a distinct covering, as in the hyacinth and onion.

tū-ni-cin, s. [Lat. tunica = an under garment; suff. -in.]

Chem.: C6H10O5. A substance extracted from the mantle of the Ascidia by successive treatment with water, alcohol, ether, acids, and alkalis. It is a colourless mass, and exhibits most of the characteristics of cellulose.

tūn-i-cle, s. [O. Fr., from Lat. tunicaula, dimin. from tunica = a tunic (q.v.).]

1. A small and delicate natural covering; a fine integument.

"The said medicine likewise is good for to extend and dilate the orifices that make the ball or apert of the eye."—P. Holland: Plinns, bk. xiv., ch. xiii.

2. Eccles.: A close-fitting vestment formerly worn by deacons, now worn by bishops under the dalmatic, and by sub-deacons. It is not so long as a dalmatic and has narrower sleeves. Sometimes called a tunic.

tūn-īng, pr. par., a., & s. [TUNE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As subst.: The art or operation of adjusting a musical instrument so that the various sounds may be all at due intervals, and the scale of the instrument brought into as correct a state as possible.

tuning-fork, s.

Music: An instrument of steel, consisting of two prongs branching from a short handle, which, when set in vibration, gives a musical note. It was invented by John Shore, Royal Trumpeter, in 1811. Though the pitch of forks varies slightly with changes of temperature, or by rust, &c., they are the most accurate means of determining pitch. They are capable of being made of any pitch within certain limits, but those most commonly used are the notes A and C, giving the sounds represented by the second and third spaces in the treble staff. The vibration-number of the note C varies from 518 (French diapason-normal) and 528 (Scheibler-medium) to 540 and 544 (Philharmonic).

tuning-hammer, tuning-key, s.

Music: An instrument consisting of a shank

of metal with a cross-handle of wood or metal. The end of it is hollowed so as to fit on the ends of the tuning-pins of pianofortes, harps, &c., and by it these instruments are tuned by increasing or decreasing the tension of the strings. Called also a wrench or wrest.

tuning-pin, s.

Music: A movable pin, around the upper end of which the string of a pianoforte, harp, &c., is twisted, the other end of the string passing round a fixed pin. The instrument is tuned by turning the tuning-pins with a tuning-hammer.

Tū-nis'-i-an, a. & s. [See def.]

A. As adj.: Of or pertaining to Tunis, a town and state in North Africa, or its inhabitants.

B. As subst.: A native or inhabitant of Tunis.

tūn'-kēr, s. [Ger. tunken = to dip.]

Church Hist.: Another form of the word Dunker. [DUNKERS.]

tūn'-nage (ag as īg), s. [TONNAGE.]

Tunnage & poundage:

Hist.: Duties on every tun of wine and pound of goods either imported into or exported from England. They began about A.D. 1348, and were equivalent to the present customs. They were granted for life to several kings, beginning with Edward IV. It was one grave cause of the quarrel between Charles I. and his subjects that in 1628 he levied tunnage and poundage by his own arbitrary authority. They were abolished by 27 Geo. III c. 13, passed in 1787.

tūn'-nel, *tun-nell, s. [O. Fr. tonnel (Fr. tonneau) = a tun, a cask, dimin. from tonne = a tun (q.v.); cf. Fr. tonnelle = a round-topped arbour, an alley with arched top.]

I. Ordinary Language:

1. A cask or similar vessel.

* 2. A funnel (q.v.).

"In the midst of complication and intricacy, as evident and certain, as is the apparatus of cocks, pipes, funnels, for transferring the cider from one vessel to another."—Paley: Nat. Theol., ch. xv.

3. The shaft of a chimney; a flue, a chimney.

"One great chimney, whose long tunnel thence The smoketh forth threw."—Spenser: F. Q., II. li. 23.

4. A tunnel-net (q.v.).

II. Technically:

1. Engin.: A horizontal or slightly inclined gallery beneath the surface of the ground; generally used for an aqueduct or for the passage of a railway, roadway, or canal. In the construction of railroads it is frequently necessary to pierce the hills, so as to preserve a line of road as nearly level as practicable. The method of proceeding with tunnelling depends mainly upon the kind of material to be excavated. This having been generally ascertained by borings and trial shafts, the work is commenced by sinking the working shafts, which must be sufficiently capacious to admit readily of lowering men and materials, raising the material excavated, fixing pumps, and also for starting the heading of the intended tunnel when the required depth is reached. Besides the trial and working shafts, air-shafts are sunk for the purpose of effecting ventilation in the works below. Tunnels when not driven through solid rock have usually an arched roof, and are lined with brickwork or masonry.

2. Mining: A level passage driven across the measures or at right angles to the veins which it is its object to reach. This distinguished from the drift or gangway, which is led along the vein when reached by the tunnel.

tunnel-borer, s.

Engin.: A ram, operated by compressed air, for making excavations through rock.

tunnel-head, s.

The cylindrical chimney at the top; or, as it is often called, the mouth of the blast-furnace.

tunnel-kill, s.

Lime-burn.: A kiln in which lime is burnt by coal; as contradistinguished from a flame kiln, in which wood is used.

tunnel-net, s.

Fish.: A net with a wide mouth and narrowing to its length.

TUNIC.

TUNICATED BULB AND SECTION.

A. LONGITUDINAL, B. TRANSVERSE, SECTION OF A TUNICATE.

a Atrial or Excurrent chamber; b Branched sac; g Gill-slits; s Stomach; t Test; f Muscular coat or mantle. The arrows indicate the direction of the currents.

tunnel-shaft, tunnel-pit, s.
Engin. : A shaft dug from a surface to meet a tunnel at a point between its ends

tūn'-nel, v.t. & t. [TUNNEL, s.]
A. Transitive :
1. To form cut or drive a tunnel through or under.
2. To form like a tunnel; to hollow in length.
3. To catch in tunnel-nets.
B. Intrans. : To form, cut, or drive a tunnel; as, *To tunnel* under the English channel.

tūn'-ny, s. [THYNNUS.]
Ichth. : *Thynnus thynnus*, the best known and most important species of its genus, abundant in the Mediterranean, and ranging to the south coast of England and Tasmania. Body thick, dark blue above, grayish beneath; head large and conical, one-fifth the length of the body; pectoral fin long, reaching nearly to end of dorsal, the spines of which are rather short; tail so widely forked as to be almost crescentic. Specimens ten feet long, and weighing 1,000 lbs., have been taken, but fish of half that size are considered large. The flesh, which is pink, is highly esteemed, either fresh or preserved, and the tinned (*thon mariné*) finds a ready sale in England, where the fresh fish is not obtainable. Salted tunny, called *salsamentum* was much esteemed by the Romans (*Mar.*, X. xviii. 12). Tunny are usually captured in the Mediterranean in funnel-like nets, the fish entering the wide mouth, and being driven to the narrow end, where they are killed with lances and harpoons. The American Tunny, *T. secundo-dorsalis*, nearly black above, silvery on the sides, white beneath, and somewhat larger than the common species, is found on the coasts of New York and northwards to Nova Scotia. It is commercially important, not only as a food-fish, but for the oil it yields, twenty gallons being often obtained from a single fish.

tūp, s. [Prob. akin to *top*; cf. Low Ger. *tuppen*, *tuppen* = to push, to butt.] a ram.
"Aod it might be a tupp's head, for they were to season."—Scott: *Rob Roy*, ch. xxiv.
tup-man, s. One who breeds or deals in rams.

tūp, v.t. & t. [TUR, s.]
A. Transitive :
1. To butt, as a ram. (*Prov.*)
2. To cover, as a ram.
*An old black ram
Is tupping your white ewe.*—Shakespeare: *Othello*, I. 1.
B. Intrans. : To butt, as a ram; to cover ewes.
"And while thy rams *doe tup*, thy ewes do twyn.
Doe thou in beautiful shade (from men's rude dyn)
Adde pinyons to thy fame."
Browne: *To Master W. Browne*.

tū'-pa, s. [The name given by the Indians of Chili to a plant of the genus *Tupa*.]
Bot. : A genus of Lobeleea. Tall herbs or undershrubs, with irregular purple, scarlet, yellow, or greenish flowers. *Tupa Feuilloi*, a Chili plant, yields a dangerous poison. The root is chewed to relieve toothache.

tū-pai'-a, s. [Latinised from Malay name.]
Zool. : Ground-squirrel; the type-genus of *Tupaidea* (q.v.), with seven species; most abundant in the Malay Islands and Indo-Chinese countries, but one species is found in the Khasia Mountains and one in the Eastern Ghauts, near Madras. The species closely resemble each other in general appearance, differing chiefly in the size and the colour and length of the fur. Nearly all have long bushy tails like squirrels.

tū-pai'-i-dæ, s. pl. [Mod. Lat. *tupaia*(a); Lat. fem. pl. adj. suff. *-idæ*.]
1. *Zool.* : A family of Insectivora, with two genera, *Tupaia* and *Ptilocercus*, to which some authorities add a third, *Hylomys*. Squirrel-like shrews, with bushy tails, partially arboreal, but also feeding on the ground and among low bushes. Patagium absent; limbs short and robust. They are especially Malayan, with outlying species in northern and continental India.
2. *Paleont.* : Oxygomphus, from the Tertiary deposits of Germany, is believed to belong to this family; as is *Omyma*, from the Pliocene of the United States.

tū'-pě-16, s. [Native Indian name.]
Comm. : The wood of the trees of the genus *Nyssa* (q.v.) and the trees themselves. The wood is difficult to split, its fibres being much interwoven. It is of little value.

tū quō'-quē, phr. [Lat. = thou also.] An answer or argument in which the person assailed retorts with the same or a similar charge upon the assailant. Used also adjectively, as a *tu quoque* argument.

tūr, s. [TOOR.]
tū'-rā'-cīne, s. [Mod. Lat. *turac*(o); -ine (*Chem.*)]
Chem. : A red pigment found in the wing-feathers of the *Touracos*. (CORYTHAIX, TOURACCO.) It is extracted by means of dilute alkalis, from which it may be precipitated by acids. It differs from all other natural pigments in containing copper to the amount of 5.9 per cent., which cannot be separated without destroying the pigment. The spectrum of turacine has two black absorption bands.

tū-ra-ni'-rā, s. [Gulanan name.] (See compound.)
turanira-wood, s.
Bot. & Comm. : The wood of the bastard bully-tree of Guiana, *Bumelia retusa*.

Tu-rā'-nī-an, a. [From *Turan*.] [ARYAN.]
Philol. : A term applied to one of the great classes into which human speech has been divided. It is also called *Altaic*, *Scythian*, *Agglutinate*, and *Polysynthetic*.
"The term *Turanian* must be confined to those Ugro-Altaic languages which, as it seems to me, have been proved by Schott and others to be related to one another (extending from Finland on the one side to Manchuria on the other)."—Sage: *Comparative Philology*, p. 21.

tū-rätt, s. [Native name.]
Zool. : The Hare Kangaroo (q.v.).

tūr'-ban, *tol-i-bant, *tu-li-bant, *tu-li-pant, *tur-band, *tur-bant, *tur-ban-to, *tur-ri-bant, *tur-bond, s. [Fr. *turban*, *turban*, *tolapan*, *turban*, from Ital. *turbante* = a turban, from Turk. *tulband*, vulgar pron. of *duband* = a turban, from Pers. *dulband*, from Hind. *duband* = a turban.] [TULIP.]

I. Ordinary Language :
1. A wrapper worn round the head by Orientals. Turbans are an extremely ancient form of head-covering, and consist of long pieces—sometimes several yards—of fine linen, muslin, silk, taffeta, or fine woollen material, which is twisted and coiled round the head in a cushion-like form. They are worn by all classes, both indoors and out of doors. In Turkey, turbans vary in size and material according to the occupation, rank, or country of the wearer. Learned men affect a full, white turban; the descendants of Muhammad always wear a dark green turban, and the Christians of Lebanon wear a gracefully folded white turban. Some of the Eastern peoples adopt striped, coloured silks, with fringes, placing several fezzes one over the other, making a cumbersome, conical mound, and round these they wrap silken scarves. In Turkey, the red fez, with a tassel of dark-blue silk, has been extensively adopted, especially among the upper classes and on the sea-coasts. In India, the use of the turban is being rapidly discontinued by the higher classes, who have adopted in its place a brimless cap, which is frequently enriched by embroidery of gold, silver, or silken threads on coloured velvet.
"And some had a piece of white or leather-coloured cloth wound about the head like a small turban, which our people thought more becoming."—Cook: *First Voyage*, bk. 1, ch. 22.
* 2. A kind of head-dress worn by ladies.
II. Zool. : The whole set of whorls of a shell. (*Goodrich & Porter*.)

* **turban-crowned, a.** Wearing a turban.
turban-shell, s.
Zool. : A popular name in America for an echinus deprived of its spines. (*Dana*.)

turban-stone, s. A carved representation of a turban, usually placed over tombstones in Mohammedan cemeteries.
"A headstone which, if it is not the *turban-stone* that is usually found in Turkish tombs of modern date, is most singularly like it."—Ferguson: *Rude Stone Monuments*, p. 404.

turban-top, s.
Bot. : A popular name for a fungus of the genus *Helvella*.

* **tūr'-band, s.** [TURBAN.]
tūr'-band, a. [Eng. *turban*; -ed.] Wearing a turban.
"Where Phidias toiled, the turbaned spoilers brood."
Praed: *Athena*.

tūr'-ban-less, a. [Eng. *turban*; -less.] Destitute of or not wearing a turban.
"Then we saw a vision of a brown turbanless head at the back of the verandah."—Field, Oct. 15, 1887.

tūr'-bar-ý, *tūr'-bar-ic, s. [Low Lat. *turbaria*.] [TURF, s.]
1. *Ord. Lang.* : A place where turf is dug.
"The animal is undoubtedly found in the turbaries of Britain."—Darwin: *Early Man in Britain*, ch. viii.
2. *Law* : The right of digging turf on another man's land.
"Common of *turbary* is a liberty of digging turf upon another man's ground."—Blackstone: *Comment.*, bk. II., ch. 2.

tūr'-bēl-lār'-i-a, s. pl. [Mod. Lat., from *turbo* (q.v.).]

Zool. : An order of Platyhelminthes; flat worms of low organization, ribbon-shaped, leaf-shaped, oval, broad, or long, inhabiting fresh or salt water, or damp localities on land. The smallest are not larger than some of the Infusoria, which they approach in appearance, while the largest are many feet long. Only one genus, *Alaurina*, is divided into distinct segments, and the outer surface of the body is everywhere beset with vibratile cilia. The aperture of the mouth is sometimes situated at the anterior end of the body, sometimes in the middle, or towards the posterior end of its ventral face. In many the oral aperture is surrounded by a flexible muscular lip, which sometimes takes the form of a protrusile proboscis. All have water-vessels, opening externally by ciliated pores, and pseud-hemal vessels; most possess eyes, and some have auditory sacs. Some are monoecious, and others dioecious; in most the embryo passes by insensible gradations into the form of the adult, but some undergo a remarkable metamorphosis. The Turbellaria are variously divided by different authors. Huxley divides them into *Aprocta* (having no anal aperture) and *Proctocha* (having an anal aperture). The first group contains the *Rhabdocela* and *Dendrocoela* of other authors; the second is equivalent to the *Rhynchocela* or *Neimertea* (q.v.).

tūr'-bēl-lār'-i-an, s. & a. [TURBELLARIA.]
A. s. subst. : Any individual of the *Turbellaria* (q.v.).
B. s. adj. : Of or belonging to the *Turbellaria* (q.v.).

turbellarian-worms, s. pl.
Zool. : The *Turbellaria* (q.v.).

tūr'-bēth, s. [TURPETH.]
tūr'-bid, *tur-bide, a. [Lat. *turbidus*, from *turbo* = to disturb; Sp. *turbido*; Ital. *torbido*.]

1. Having the lees disturbed; hence, muddy, discoloured, thick, not clear; foul with extraneous matter.
"Whither, thou turbid wave?
Whither, with so much haste?"
Longfellow: *The Wave*.

2. Vexed, inquiet, disturbed.
"I had divers fits of melancholy, and such turbid intervals that use to attend close prisoners."—Hovell: *Letters*, bk. II., let. 30.

* **tūr'-bīd'-i-tý, s.** [Eng. *turbid*; -ity.] The quality or state of being turbid; turbidness.

tūr'-bīd-ly, adv. [Eng. *turbid*; -ly.]
1. In a turbid manner; muddily.
* 2. Proudly, haughtily.
"A person of small merit is anxiously jealous of imputations on his honour, because he knows his title is weak; one of great merit turbidly rejects them, because he knows his title is strong."—Young: *Estimation of Human Life*.

tūr'-bīd-ness, s. [Eng. *turbid*; -ness.] The quality or state of being turbid; muddiness, thickness.

* **tūr'-bīl'-lōn (li as y), s.** [Fr. *tourbillon*, dimin. from Lat. *turbo*, genit. *turbis* = a whirlwind.] A vortex, a whirl.
"Each of them is a sun, moving on its own axis, in the centre of its own vortex or turbillion."—Steele: *Spectator*, No. 472.

* **tür-bin-ä-çé-ús** (or **geus** as **shús**), *a.* [Low Lat. *turba* = turf.] Of or pertaining to peat or turf; turfy, peaty.

"The real turbineous flavour."—Scott: *St. Roman's Well*, 1. 235.

* **tür-bin-äto, tür-bin-ät-éd, a.** [Lat. *turbo*, genit. *turbinis* = a whirlwind, a top.]

1. Ordinary Language:

1. Shaped like a whipping-top.
2. Whirling in the manner of a top.

"Let mechanism here make an experiment of its power, and produce a spiral and turbinated motion of the whole moved body without an external director."—Bentley: *Sermon* 4.

II. Technically:

1. Bot.: Having the figure of a top. [TOP-SHAPED.]

2. Zool.: Resembling the shell of Turbo (q.v.); spirally conical, with a round base.

"An irregular contortion of a turbinated shell, which common eyes pass unregarded, will ten times treble its price in the imagination of philosophers."—*Idler*, No. 54.

turbinated-bones, s. pl.

Anat.: Spongy bones, having many air cavities, so as to give them a spongy appearance. They are found in the interior of the nose, have an oblong figure, sharp at the point, and constitute the superior and inferior parts of the ethmoid bone.

* **tür-bin-äte, v.t.** [TURBINATE, *a.*] To revolve like a top; to spin, to whirl.

* **tür-bin-ä-tion, s.** [TURBINATION, *v.*] The act or state of spinning or whirling like a top.

"They had a most perfect acquiescence in that their turbation."—*Allistree: Sermons*, pt. 1, p. 124.

* **tür-bine, s.** [Lat. *turbo*, genit. *turbinis* = a whirlwind, a top.]

Mech.: A term formerly confined to horizontal water-wheels, the revolution of which is due to the pressure derived from falling water, but now applied generally to any wheel driven by water escaping through small orifices subject to such pressure. The turbine was invented by Fourneyron in 1823, and the first one was made in 1827. In the original form the water enters at the centre, and, diverging from it in every direction, then enters all the buckets simultaneously, and passes off at the external circumference of the wheel. The pressure with which the water acts on the buckets of the revolving wheel is in proportion to the vertical column of water, or height of the fall, and it is conducted into these buckets by fixed curved girders secured upon a platform within the circle of the revolving part of the machine. The eflux of

TURBINE.

the water is regulated by a hollow cylindrical sluice, to which stops are fixed, which act together between the guides, and are raised or lowered by screws that communicate with a governor, so that the opening of the sluice and stops may be enlarged or reduced in proportion as the velocity of the wheel requires to be accelerated or retarded. The varieties of the turbine are very numerous. In the central discharge turbine the buckets expose their concavities outward to receive the impact of the water from the surrounding chutes. In the Jonval turbine the water is received above and the discharge is downward, that is, parallel to the axis of rotation. In the other forms the water is introduced at the outside and takes a curved course, discharging downward; or, being introduced from the centre, is curved downward; or a turbine above delivers the water into a turbine below, rotating in a different direction; or several turbines on one shaft receive water

from a series of chutes, so that one or more wheels may be used, as expedient. The axis may be horizontal, or the axis being vertical, the water may be received from below. Turbines are divided into high and low pressures, the former being relatively small, revolving at a high rate and driven by elevated heads of water. The low pressure turbines are relatively larger, contain a larger volume, and run at a slower rate. In the Black Forest, turbines are running with heads of seventy-two and 354 feet, and having diameters of twenty and thirteen inches respectively. Low pressure turbines are doing good duty with large volumes of water having only nine inches head.

* **tür-bi-nél-la, s.** [Mod. Lat., dimin. from Lat. *turbo* (q.v.).]

Zool. & Palæont.: A genus of Muriceæ, with seventy recent species, widely distributed in tropical and sub-tropical regions. Shell thick, spire short; columella with several transverse folds; operculum claw-shaped. [SHANK-SHELL.] Fossil species, seventy, from the Miocene onward.

* **tür-bin-i-dæ, s. pl.** [Mod. Lat. *turbo*, genit. *turbini* (is); Lat. fem. pl. adj. suff. *-idæ*.]

1. *Zool.*: A family of Holostomatus Gastropoda, with several genera, feeding on seaweed, and widely distributed, mostly in tropical and sub-tropical seas. Shell spiral, turbinated, or pyramidal; operculum calcareous and paucispiral, or horny and multi-spiral. Animal with a short proboscis, eyes at the outer base of long and slender tentacles, head and sides bordered by fringed lobes and filaments. The shells of nearly all the species are brilliantly pearly when the epidermis and outer layer are removed, and in this state many are used for ornamental purposes.

2. *Palæont.*: The family is of high antiquity, dating back to the Lower Silurian. [Turbo, 2.]

* **tür-bin-ite, * tür-bite, s.** [Lat. *turbo*, genit. *turbini* (is); suff. *-ite*.] A fossil turbo.

* **tür-bin-ö-li-a, s.** [From Lat. *turbineus* = cone-shaped.]

Zool. & Palæont.: A genus of Turbinolide (q.v.). Corallum simple and conical, with a styliform columella, but without pali; costæ very prominent, spaces between them marked with rows of dimples, which look like perforations, but do not penetrate to the visceral chamber. Most of the species are fossil, and are characteristic of the Eocene.

* **tür-bin-ö-li-dæ, s. pl.** [Mod. Lat. *turbino* (ia); Lat. fem. pl. adj. suff. *-idæ*.]

Zool. & Palæont.: A family of Aporosa, with numerous genera. Corallum simple or compound, but never possessing a coenenchyma; septa well developed, usually regularly granulated on the two sides, but their free edges not denticulated; interseptal loculi open and free from dissepiments or synaptæ; costæ well-marked and straight; wall imperforate. The family appears first in the Liás, has numerous representatives in the Chalk, and attains its maximum in the Eocene, after which it begins to decline.

* **tür-bin-ö-li-næ, s. pl.** [Mod. Lat. *turbino* (ia); Lat. fem. pl. adj. suff. *-inæ*.]

Zool. & Palæont.: The typical sub-family of Turbinolide. Hard parts consisting simply of the cup, the wall, the septæ, and the costæ. The recent species often lives on the bed of the deep sea.

* **tür-bit (1), s.** [Prob. a corrupt. of Dut. *korbeek* = short-beak.] A variety of the pigeon, remarkable for its short beak. The head is flat and the feathers on the breast spread both ways.

* **tür-bit (2), s.** [TURBOT.]

* **tür-bite, s.** [TURBINITE.]

* **tür-bith, s.** [TURBETH.]

* **tür-bö, s.** [Lat. = any violent circular motion, a whipping-top.]

1. *Zool.*: The type-genus of Turbinide (q.v.), with numerous species, all native of tropical seas. Shell with solid convex whorls tapering to an apex, often with furrows or tubercles, aperture large and rounded, shell pearly within; operculum shelly and solid, callous outside, and smooth, grooved, or variously mammillated, internally horny and pauci-

spirally; in some species it resembles tufts deposited by a petrifying spring. Animal with pectinated head lobes.

2. *Palæont.*: A great number of fossil species have been described, commencing in the Lower Silurian, but there is considerable doubt as to the true position of many of the older forms. [Nicholson.]

* **tür-böt, * tür-bat, * tür-bét, * tür-bote, * tür-büt, s.** [Fr. *turbot*, from Lat. *turbo* = a whipping-top, a spindle, a reel, from its rhomboidal shape. Cf. Lat. *rhombus* = (1) a circle, (2) a turbot; Low Lat. *turbo* = a turbot; Irish *turbít* = a turbot, a rhomboid; Gael. *turbard*; Welsh *turbwt*.]

Ichthy.: *Rhombus maximus*, the most highly valued of the Pleuronectidae, or Flat-fishes, for the table. The Turbot is a broad fish, scaleless, with numerous flattened, conical tubercles on the upper side; the lower eye is a little in front of the upper eye, and the lateral line makes a semicircular curve above the pectoral fin. In colour it varies from gray to brown, often with spots of a darker hue. Turbot are migratory fish, travelling in companies where the bottom is sandy. They feed chiefly on small fish, crabs, and shell-fish; but the bait used is always some fish of bright colour and tenacious of life, for, though turbot are very voracious, they will never touch a bait that is not perfectly fresh. This species is wanting on the coast of the United States, *A. maculatus* being the only American representative of the genus. It is found on the coasts of New York and New England, but is of little value for food from its extreme thinness of body, which has gained it the popular name of "window pane." It is rarely over a pound in weight. On the English coasts turbot usually weigh from five to ten pounds, though large fish range to twenty-five pounds, and one of double that weight is on record as having been taken near Plymouth. The Turbot was known and prized by the Romans, and the fourth satire of Juvenal celebrates the fact that Domitian convoked the Senate to decide how a monster turbot that had been brought to him should be cooked (cf. *Mart.* xiii. 81).

* **tür-bu-leşce, tür-bu-leş-çy, s.** [Fr. *turbulence*, from Lat. *turbulentia*, from *turbulatus* = turbulent (q.v.).] The quality or state of being turbulent; a state of disorder, tumult, or agitation; tumultuousness, disorder, commotion, agitation.

"Since the turbulence of these times, the same moderation shines in you."—*Hovell: Letters*, bk. 1, let. 54.

* **tür-bu-leş, a.** [Fr., from Lat. *turbulentus*, from *turbo* = to disturb; *turba* = a crowd; Sp. & Port. *turbulento*; Ital. *turbolento*.]

1. Disturbed, tumultuous, rough, wild.

"It hath been a turbulent and stormy night."

Shakspeare: Pericles, III. 2.

2. Restless, quiet; disposed to insubordination and disorder; riotous, wild, rough, disorderly.

"An ally of so scrupulous and turbulent a spirit."

—*Maccaday: Hist. Eng.*, ch. xxi.

* 3. Producing commotion, agitation, disorder, or confusion.

"Nor envied them the grape, / Whose heads that turbulent liquor fills with fumes."—*Milton: Samson Agonistes*, 652.

turbulent-school, s.

Literature: A name sometimes given to certain German novelists who wrote between 1750 and 1800 in the style of Mrs. Radcliffe, laying their scenes chiefly in the feudal ages. The best known are Crasmer, Spiers, Schlenker, and Veit Weber.

* **tür-bu-leş-ly, adv.** [Eng. *turbulent*; *-ly*.] In a turbulent manner; with violent agitation; tumultuously, refractorily.

"In sorrow's tempest turbulently tost."

Smart: Ode on St. Cecilia's Day.

* **Türco-ışm, s.** [Eng. *Turk*; *-ism*.] The religion, manners, character, or the like, of the Turks.

"That irreparable damage to Christianity by which Turcies and Infidelity have gotten so much ground."—*Clarendon: Religion & Policy*, ch. x.

* **Tür-cö, s.** [Tunk.] The name given by the French to the Arab tirailleurs or sharpshooters in their army.

* **tür-cöis, s.** [TURQUOISE.]

* **Tür-cö-mán, s.** [TURKOMAN.]

Tür-có-phíl, Tür-kó-phíle, s. [Eng. Turk. and Gr. $\phi\iota\lambda\epsilon\omega$ (*phíleō*) = to love.] One who is on the side of the Turks in their efforts to keep the Slavonic Christians under their domination.

"There are not two opinions on the subject even among the most enthusiastic *Turcophilists*."—*Times*, June 16, 1876.

Tür-có-phíl-ísm, s. [Eng. *Turcophil*; -*ísm*.] The views or feelings of a *Turcophil* (q.v.).

"Free from the exaggerated... *Turcophilism* of England in 1877."—*Athenaeum*, Feb. 10, 1887.

türd, *toord, s. [A.S. *tord*.] Excrement, dung.

"And he answerings aside to him, Lord, suffer also this year: til the while I deluce aboute, and sende *toordis*."—*Wycliffe*, Luke xlii.

tür-dí-dæ, s. pl. [Mod. Lat. *turd(us)*; Lat. fem. pl. adj. suff. -*dæ*.]

Ornith.: Thrushes; a family of Passeræ or of Turdiformes, almost universally distributed. Bill rather strong, sides somewhat compressed; wings long; tail moderate. The family is of uncertain extent, varying greatly in different classifications. Wallace makes it consist of twenty-one genera, containing 205 species, while other authorities divide it into two sub-families (Turdine and Sylvine), which are by many considered to be entitled to rank as families.

tür-dí-for-mæs, s. pl. [Mod. Lat. *turdus* (q.v.), and *formá* = form.]

Ornith.: Thrush-like Birds; a sub-order of Acronyidi, or Singing Birds (PASSERES), chiefly from the eastern hemisphere. Their distinguishing characteristic is the presence of ten primary feathers in the wing, the first of which is markedly reduced in size. The sub-order is divided into two groups, Coliormorphæ (Crow-like Passeræ) and Cichlormorphæ (Thrush-like Passeræ).

tür-dí-næs, s. pl. [Mod. Lat. *turd(us)*; Lat. fem. pl. adj. suff. -*næs*.]

Ornith.: A sub-family of Turdidae (q.v.), containing *Turdus* and closely allied genera. The plumage is completely moulted in the first autumn before migration, so that the young in their first winter plumage differ very slightly from adults. Bill as long as head; nostrils open, in small groove; wings with first quills very short; tail long and broad; tarsi long, outer toe longer than inner, united to middle at base, hind toe long and strong.

tür-düs, s. [Lat.]

Ornith.: The type-genus of Turdidae (q.v.), whose species are universally distributed. They abound in the Palaearctic, Oriental, and Neotropical regions, are less plentiful in the Nearctic and Ethiopian, and very scarce in the Australian region. Bill moderate, straight, convex above; point of upper mandible compressed, notched, and slightly decurved; gape with a few hairs; nostrils basal, lateral, oval, partly closed by a membrane; wings with the first feather very short, second shorter than the third or fourth, which are usually the longest; tarsus longer than middle toe, outer toe connected with middle toe at base. The genus has a number of representatives in the United States, some known as Thrushes, others by other titles. Chief among them is the Wood Thrush (*T. mustelinus*), a favorite singer. All the Thrushes are esteemed as game birds.

tu-reen', *tör-reen', *tör-rino', s. [Fr. *terrine* = an earthen pan, as if from Lat. *terrinus* = earthen, from *terra* = earth.] A large, deep vessel for holding soup or other liquid food at table.

"At the top a fried liver and bacon were seen. At the bottom was tripe in a winged *tureen*."—*Goldenith: The Haunch of Venison*.

türf, *torf, *turfo, *tyrf (pl. **türfs, *turfas, *túrves**), s. [A.S. *turf* (dat. *tyrf*) = turf, cogn. with Dut. *turf* = peat; Icel. *torf* = a turf, sod, peat; Dan. *törv*; Sw. *torf*; O. H. Ger. *zurba*; Ger. *torf*; Fr. *tourbe*; Éansc. *dartha* = a kind of grass.]

1. The surface or sward of grass lands, consisting of earth or mould filled with the roots of grass and other small plants, so as to adhere and form a kind of mat; a piece of earth covered with grass, or such a piece torn or dug from the ground; a sod.

"To preserve it with *turfe* and moss against the Inlure of riu and cold."—*P. Holland: Pline*, bk. xvii, ch. xiv.

2. A kind of blackish, fibrous, peaty sub-

stance, cut from the surface of the ground and used as fuel; peat (q.v.).

¶ (1) *On the turf*: Making one's living by running or betting on race-horses.

(2) *The turf*: The race-course; hence, the occupation or profession of horse-racing.

turf-ant, s.

Entom.: *Formica flava*, the Common Yellow Ant of Britain.

turf-built, a. Formed or composed of turf.

turf-clad, a. Covered with turf.

"The *turf-clad* heap of mould which covers the poor man's grave."—*Knox: Essays*, No. 83.

turf-cutter, s. A paring-plough.

turf-drain, s. A kind of pipe-drain constructed with turfs cut from the surface of the soil.

turf-hedge, s.

Husbandry: A bank around a field, made of turfs or sods.

turf-hog, s.

Zool.: *Sus palustris*. The English name is a translation of the German *Torfschwein* of Rüttmeyer. There appear to have been two races—one wild and one domestic. Remains are found in the Swiss Lake Dwellings.

"It is, therefore, very probable that it [the common hog] was domesticated in the same region as the dog and the *turf-hog*."—*Darwin: Early Man in Britain*, ch. viii.

turf-house, s. A hovel made of sods.

turf-knife, s. An implement for tracing out the sides of drains, trenches, &c. It has a scimitar-like blade, with a tread for the foot, and a bent handle.

turf-moss, s. A tract of turfy, mossy, or boggy land.

turf-plough, s. A plough adapted to remove the sods from the surface of the ground preparatory to deep ploughing, or for destroying grubs, &c.

Tür-keÿ, tür-keÿ, * Tür-kie, * Tür-ky, s. [Fr. Turquie = Turkey, from Turco = a Turk (q.v.).]

1. Geog. (Of the form Turkey) : An empire in the south-east of Europe and south-west of Asia.

2. Ornith. (Of the form turkey) : Any species of the genus *Meleagris* (q.v.). It arose from the misconception that these birds, which were first introduced into England about 1541, came from Turkey, instead of from America, as was really the case. They are the largest of the Game Birds, and for that reason have been domesticated for a great length of time. All the species have the head naked, with wattles or folds of bright naked skin, which becomes much more brilliant when the bird is excited or angry, and a curious tuft of long hair on the breast. The plumage is always more or less metallic. The Common Turkey, *Meleagris gallopavo*, is brownish-yellow on the upper parts of the body, and each feather has a broad resplendent black edge, hinder portions of the back-feathers and tail-coverts dark reddish-brown, striped with green and black; breast yellowish-brown, darkest at sides; belly and sides brownish-gray; rump-feathers pale black with a darker edge; fore parts of head and throat pale sky blue, warts on face bright red. They often weigh from twenty to sixty pounds, and measure at least three feet in height; but the wild birds are much finer than the domesticated race, which, contrary to the general rule, has degenerated under the care of man. They are gregarious, and inhabit the eastern portion of North America, feeding on grass, grain, insects, fruit, &c. The domes-

ticated birds may be seen in every farm-yard, and large numbers are bred and fattened for table use, it being the favorite bird for Christmas and Thanksgiving feasts in the United States. The Ocellated Turkey, *M. ocellata*, a very fine and brilliantly-colored species, having eye-like markings on the tail-feathers and upper wing-coverts, is found in Honduras and Yucatan. The other species, *M. mexicana*, from Central America, Mexico, and the table-lands of the Rocky Mountains, closely resembles *M. gallopavo*, and is popularly known as the Mexican Turkey.

Turkey-berries, s. pl.

Bot. : The berries of various species of *Rhamnus*, used for dyeing. [AVIGNON-BERRY.]

A. As adj. : Of or pertaining to Turkey or the Turks.

B. As subst. : The language spoken by the Turks, the Osmanli.

Turkish-bath, s. A hot air bath, the temperature varying from 116° to 165°. The patient may remain in the calidarium for forty minutes to an hour. The bath must be taken before a meal, when the stomach is empty, and should be avoided altogether when fatty degeneration of the heart or vessels, or when tendencies towards vertigo or syncope exist. A Turkish bath clears the pores of the skin, rendering the latter healthy, induces free perspiration, eliminates noxious matters from the blood, increases the force and rapidity of the circulation, and imparts a sense of elasticity and vigour to the system. It is useful in many cutaneous affections, as gout and rheumatism, in albuminuria, neuralgia, &c. The Turkish bath has been introduced into most of our cities.

Turkish-dog, s.

Zool. : A variety of *Canis familiaris*, from hot climates, and distinguished by want of hair and diseased teeth, which the animals lose at an early age. Buffon imagined that the race sprang from European dogs, which had been taken from a temperate climate to one considerably hotter, and there acquired some cutaneous disease.

Turkish-grayhound, s.

Zool. : A small-sized dog, somewhat resembling an English grayhound in shape, but entirely hairless, or with only a few hairs on the tail. It is of no value as a sporting dog, but makes a faithful and affectionate pet.

tur-ment-ise, s. [TORMENTISE.]

tūr-mēr-ic, s. [Fr. *terre-merite*; Low Lat. *terra-merita* (lit. = excellent earth); probably, in the opinion of Skeat, a corruption of Arab. *karikum, kurkum* = saffron.] [CURCUMA.]

1. *Bot. & Comm.*: *Curcuma longa*, a native of Ceylon. The specific name is given from the length of the leaves: about a foot. The spike rises from the midst of them, and produces pale cream-coloured flowers. It is extensively cultivated over India, the crop being a very profitable one, yielding, according to Atkinson, after all expenses are paid, about thirty-one rupees per acre.

2. *Comm. & Pharm.*: The rhizome of *Curcuma longa* [1]. The best is in small short pieces, externally yellow, internally deep orange. [TURMERIC-PAPER.] It is used as a condiment in curry-powder. It is not employed in British pharmacy, but in Hindoo medicine it is administered internally in disorders of the blood, and is applied externally in pain and bruise; the juice is said to be antihelmintic; the fumes of the burning root are deemed useful in coryza; in decoction they are applied to relieve catarrh and purulent ophthalmia. A paste made of the flowers is used in ringworm and other parasitic diseases.

turmeric-paper, s.

Chem.: Unsized white paper dipped into an alcoholic solution of turmeric. It is a very delicate test for alkalis and their carbonates, the yellow colour of the turmeric being changed to a brown.

turmeric-tincture, s. A tincture consisting of bruised turmeric and proof spirit.

turmeric-tree, s.

Bot.: An unidentified species of Zieria, a reewort from Australia. The inner bark, which is very yellow, yields a dye, and the yellow close-grained wood is valuable for ornamental purposes. (*Treas. of Bot.*)

tūr-mēr-ōl, s. The result of the treatment of oil of turpentine with petroleum.

tūr-mōil, s. tur-moyle, s. [Ety. doubtful; perhaps from O. Fr. *tremouille, trameil* the hopper of a mill, as being always in motion, from Lat. *tremo* = to tremble.] Harassing labour, confusion, tumult, disturbance, commotion.

"Calmly she gazed around in the turmoil of men."
Longfellow: Children of the Lord's Supper.

***tūr-mōil, v.t. & i.** [TURMOIL, s.]

A. Trans.: To harass with commotion; to disturb, to agitate, to molest.

"But thus *turn'd* from one to other stour
I wist my life, and did my daies devour
In wretched anguish and incessant woe."
Spenser: F. Q., IV. ix. 39.

B. Intrans.: To be disturbed; to be in commotion or agitation.

tūrñ, *tourne, *tourn-en, *torne, *turne, *tura-en, v.t. & i. [Fr. *tourner*; O. turn-table, s.

1. *Railway-eng.* : A platform which rotates in a horizontal plane, and is used for shifting rolling-stock from one line of rails to another. Devices common to all are the platform, which has one or more tracks of rails on its upper surface ; rollers on which it turns, gearing for rotating it, a central pivot on which it rotates, a circular track on which the rollers move, and solid foundations for this track and for the central pivot. One common form consists of a platform, centrally supported on a series of frusto-conical rollers turning on arms radially projecting from a collar, which revolves around the axis of the table. The apexes of the cone would, if they were complete, meet at a point in their axis. They are interposed between two annular castings correspondingly bevelled, the lower of which is fixed, and serves as a track, and the upper is attached to and turns with the table. Flanges on the inner ends of the rollers prevent their being pushed outwardly by the pressure. In a modified arrangement, small conical rollers, turning between the large rollers and plates on the ends of the arms which carry them, are substituted for the flanges. Adams' turn-table floats in a water-tank.

Turner's cerate, s. A cerate consisting of prepared calamine, yellow wax, and olive oil.

Turner's yellow, s. [*PATENT-YELLOW.*]

tür-'nör-a, s. [*Named by Linnaeus after Wm. Turner, Prebendary of York, who published a New Herbal in 1561, and died in 1568.*]

Bot.: The typical genus of Turneraceæ (q.v.). Herbs or undershrubs, with more or less deeply-divided leaves, each with two glands at the base. Flowers generally single and axillary, rarely racemose and terminal; calyx five-parted, coloured; petals and stamens five; capsule one-celled, with three parietal placentae, bursting into three pieces. From the West Indies and South America. The herbage of some species is aromatic. *Turnera opifera* is astringent, and is given in Brazil against dyspepsia. 2. *ulmifolia* is considered tonic and expectorant.

tür-'nör-ä-'cē-a, s. pl. [*Mod. Lat. turner(a); Lat. fem. pl. adj. suff. -acēa.*]

Bot.: Turnerads; an order of Hypogynous Exogones, alliance Violales. Herbs tending to become shrubby, with simple or stellate pubescence. Leaves alternate, exstipulate, generally with two glands on the petiole. Flowers usually axillary, their pedicel sometimes cohering with the petiole; bractlets two; calyx inferior, often coloured; petals five, yellowish, rarely blue, inserted into the tube of the calyx; stamens five, similarly inserted; styles three, more or less chiving; ovary superior, one-celled, with three parietal placentae; ovules indefinite in number; fruit a capsule, three-valved, one-celled, opening down to the middle; seeds reticulated. From the West Indies and South America. Known genera two; species sixty. (*Lindley.*)

tür-'nör-äd, s. [*Mod. Lat. turner(a); Eng. suff. -ad.*]

Bot. (Pl.): The Turneraceæ. (*Lindley.*)

tür-'nör-ite, s. [*After C. M. Turner, of Rooknest, Surrey; suff. -ite (Min.).*]

Min.: A variety of Monazite (q.v.) occurring in small crystals associated with adularia, &c., in the Dép. de l'Isère, France, and also in Switzerland. Hardness, above 4.0; lustre, adamantine; colour, mostly shades of yellow; transparent to translucent.

Tür-'nör-iteş, s. pl. [*SOUTHCOTTIANS.*]

türn-'ör-ÿ, s. [*Fr. tournerie.*]

1. The act of turning articles in a lathe.
2. Articles made by turning in a lathe.

"Tupbridge. . . is famous for its excellent turnery ware."—*Aikin: England Delimited.*

3. A place where articles are turned in a lathe.

* **tür-'noÿ, s.** [*TOURNEY.*] A tournament.

"And if aught else great bards beside
In sage and solemn tunes have sung
Of turnneys, and of trophies hung."
Milton: St. Peter's.

tür-'niç-'ÿ-dæ, s. pl. [*Mod. Lat. turnicæ, genit. turnic(ia); Lat. fem. pl. adj. suff. -idæ.*]

Ornith.: Bush Quails; a family of Gallinaceous Birds, ranging over the eastern hemisphere, from Spain, through Africa and Madagascar, and over the whole Oriental region to Formosa, then north again to Peking, and south to Australia and Tasmania. They are small birds, with slender bodies, moderate-sized, rounded wings, with the first quill longest or the first three of equal length; tail of from ten to twelve feathers, almost concealed beneath the tail-coverts; beak medium-sized, straight, thin, high at culmen and slightly arched at tip; nostrils covered with a small fold of skin; tarsi long; toes three, sometimes four.

türn-'iñg, pr. par., a., & s. [*TURN, v.*]

A. & B. As *pr. par. & particip. adj.*: (*See the verb.*)

C. As *substantive*:

I. Ordinary Language:

1. The act of one who, or of that which turns.

"The turning of a weather board or tin cap upon the top of a chimney."—*Paley: Nat. Theol.*, ch. xx.

2. A bend or bending course; a meander, a

flexure, a curve; a deviation or divergence from a straight line or course.

"We discovered 20 islands lying all across the land, being small and pleasant to the view, high and having many turnings and windings between them."—*Hackluyt: Voyages*, III. 300.

3. A place or point where a road or street diverges from another; also, a road, lane, or street diverging from another.

"Turn upon your right at the next turning."—*Shakespeare: Merchant of Venice*, II. 2.

4. The act or operation of giving circular and other forms to wood, metal, bone, iron, or other substances, by causing them to revolve in a lathe, and applying cutting instruments, so as to produce the form required; or by making the cutting instrument revolve, when the substance to be formed is fixed. [*LATHE.*] In most cases, the substance to be formed revolves on an axis, which is fixed.

5. A process for smoothing thrown pottery, consisting in turning off the exterior surface of the partially dried vessels, which are in what is called the green state. The moistened surface of the vessel adheres to the top of the rotating disk, while the turner removes a long ribbon of clay by means of a cutting tool. This being completed, and the green handle cemented on by slip, the vessel is cut loose by a wire, and sent to be fired.

6. (*Pl.*): The chips detached in the process of turning wood, &c.

II. Technically:

1. *Mil.*: A manoeuvre by which an enemy or position is turned.

2. *Obstetrics*: [*VERSION.*]

turning-bridge, s. A swing-bridge (q.v.).

turning-carrier, s. [*CARRIER, s., II. 3. (1).*]

turning-chisel, s. A chisel used by turners for finishing work after being roughed out by the gouge.

turning-engine, s. A lathe.

turning-gauge, s. An instrument to assist in setting over the tail-stock of the lathe, so that a given taper in a given length of work may be obtained.

turning-in, s. The process of strapping a dead-eye; that is, bending a rope tightly around it in the score.

turning-lathe, s. [*LATHE.*]

turning-machine, s. A machine for turning boot-legs after the seams have been sewn and rolled.

turning-mill, s. A form of horizontal lathe or boring-mill. It has a compound slide-rest and boring-bar.

turning-off, s. A term used in soap-making, when the soap piled in the warehouses changes colour by exposure to the air.

turning-piece, s. A camber top-board used as a centring for a discharging arch.

turning-plate, s.

1. A circular plate above the front axle, where the bed moves upon it as the carriage turns from one corner course; a fifth wheel.

2. A turn-table (q.v.).

turning-point, s. The point on or at which a thing turns; the point at which motion in one direction ceases, and motion in another, either contrary or different, begins; hence, applied figuratively to the point or state at which a deciding change takes place as from bad to good, or from decrease to increase, or their opposite.

"This is the hour of your trial, the turning-point of existence."
Longfellow: Children of the Lord's Supper.

turning-saw, s. A scroll-saw (q.v.).

turning-up, s.

Bookbind.: Taking the round out of the back, while the fore edge is cut.

turning-white, a. [*ALBESCENT.*]

* **türn-'iñg-nöss, s.** [*Eng. turning; -ness.*] The quality or state of turning; tergiversation.

"So nature formed him, to all turnings of sleights; that though no man had less goodness, no man could better find the places whence arguments might grow of goodness."—*Sidney.*

tür-'nöp, * tür-'nöp, * tur-'neppe, s. [*Etym. doubtful. The latter element is evi-*

dently A.S. *nep* = a turnip, from Lat. *napus*; cf. Irish & Gael. *neip* = a turnip. The former element is probably from Fr. *tour* = a wheel, to signify the round shape, as if it had been turned, from *tourner* = to turn (q.v.).

Bot., Agric., Hort., &c. : *Brassica Rapa*, or *R. Rapa depressa*, formally made a distinct species of the genus, but reduced by Sir J. Hooker to a sub-species of *B. campestris*. It is a biennial crucifer. The root is an orbicular or oblong, fleshy tuber; the radicle leaves lyrate, hispid, not glaucous; the lower stem leaves incised; the upper cordate, ovate, acuminated, amplexicaul, smooth, more or less toothed; the flowers yellow; the valves of the pod convex. In its undeveloped state it is found wild in cornfields in various parts of Europe, flowering from April to August. It has been cultivated from the times of the Greeks and Romans, and the great development has been towards increased size and fleshiness. It has long been introduced into the United States, and is cultivated in fields and kitchen gardens, but is not an important crop. It has run into several varieties, one of the best being the early Dutch. It is used as an ingredient in soups, broths, and stews, and is cut into figures for garnishing. The early shoots may be boiled as greens, and are antiscorbutic. Turnips intended for feeding cattle, from December to February, should be sown from the middle of May to the end of June; if they are designed to supply food till May, they are not sown before the latter part of July or the beginning of August. They should be sown by a drill machine, which method not merely economises seed, but produces heavier crops. They succeed best in light soil, consisting of a mixture of sand and loam. The rotation of crops properly begins with turnips, which clear the soil of weeds and furnish it with manure for other agricultural plants.

turnip-cutter, s. A machine for elicing roots for animal feed.

turnip-flea, turnip-jack, s.

Entom. : *Haltica* (or *Phyllotreta*) *memorum*. It owes its popular name to its leaping or skipping powers, but is really a very small beetle, with long and strong hind legs and simple shining hisck wings, with two yellowish stripes down the wing cases, and ochreous legs. It commits great ravages in turnip-fields by devouring the seed-leaves as soon as they appear above ground. The female lays her eggs on the under-side of the leaf, in which the larvæ mines, and makes a tortuous gallery.

turnip-fly, s.

Entom. : A popular name for two insects which are quite distinct, and belong to different orders, but are both destructive to turnips. (1) *Athalia centifolia*, a hymenopterous insect, the larvæ of which is known by the popular name of "nigger," on account of its black colour; (2) *Anthomyia radicum*, a two-winged fly of the family Muscidae. The larvæ live upon the roots of the turnip, often doing great damage.

turnip-jack, s. [TURNIP-FLEA.]

turnip-moth, s.

Entom. : A night-moth, *Agrotis segetum*, the caterpillar of which feeds on the interior of turnips. The eggs are laid in June on or near the ground. The caterpillar, when hatched, attacks not merely turnips, but other culinary vegetables, such as carrots, cabbage-plants, mangrel wurzel, radishes, and many other plants. It also eats garden flowers, as the Chins Aster. The mature insect has the antennæ strongly clubbed in the male, simple in the female; the fore wings are nearly square, in colour pale gray-brown in the male, darker in the female, the hind wings with spots and shades of brown.

turnip-radish, s.

Bot. : A variety of *Raphanus sativus*. [RAISH, RAPHANUS.]

turnip saw-fly, s.

Entom. : *Athalia spinarum*, about a quarter of an inch long, of a reddish-yellow colour. The larvæ feed on leaves of turnips and other cruciferous plants, to which they do great damage.

turnip-shaped, a.

Bot. : Having the figure of a depressed sphere; napiform.

turnip-tops, a. pl. The young leaves and buds of the turnip, which are now used in many places as greens. They were formerly held in slight esteem. (See extract.)

"Drowned puppies, stinking sprats, all drenched in mud,
Dead cats, and turnip-tops, come tumbling down the flood."
Swift: Descript. of a City Shower.

tür-nix, s. [From Lat. *coturnix* (q.v.).]

Ornith. : The type-genus of Turnicidae (q.v.), with twenty-three species, having the characteristics and range of the family. They frequent open plains, stony tracts covered with grass, or mountain sides, and are exceedingly shy except at the breeding season, when they become extremely pugnacious, the hens being as jealous and combative as their mates, and some of the Asiatic species are trained, as fighting-cocks were formerly in England. They nest on the ground under a tussock of grass, and the female lays four pear-shaped eggs.

türn-kéy, s. [Eng. *turn*, and *key*.]

1. A person who has the charge of the keys of a prison; a warder.

"The mere oath of a man who was well known to the turnkeys of twenty jails was not likely to injure anybody."—*Macaulay: Hist. Eng.*, ch. xviii.

* 2. A tooth-key (q.v.).

3. A contrivance for drawing stumps of trees from the ground.

türn-pike, s. [Eng. *turn*, and *pike*; so called because it took the place of the old horizontal turnstile, which was made with four horizontal pikes or arms, revolving on the top of a post. (See *stale*.)]

I. Ordinary Language :

* 1. A frame consisting of two bars crossing each other at right angles, and turning on a post or pin, placed on a road or footpath to hinder the passage of beasts, but admitting a person to pass between the arms; a turnstile.

"I move upon my axle like a turnpike."—*Ben Jonson: Staple of News*, lit. l.

2. A gate set across a road to stop carriages, carts, &c., and sometimes passengers, from passing till the toll for the repair of the road is paid; a toll-bar; a toll-gate.

"By this time they had reached the turnpike at Mile End."—*Dickens: Pickwick*, ch. xxii.

3. A turnpike-road (q.v.).

"The road is by this means so conditionally torn that it is one of the worst turnpikes round London."—*Defoe: Tour thro' Great Britain*.

4. A winding stair; a turnpike-stair.

II. Mil. : A beam filled with spikes to stop passage; a cheval-de-frise.

turnpike-man, s. A man who collects the tolls at a turnpike.

turnpike-road, s. A road on which turnpikes, or toll-gates, were established by law, and which are or were formerly made and kept in repair by the tolls collected from carriages, carts, wagons, cattle, &c., which travelled on them. Many turnpike roads in the vicinity of cities have been converted into common roads, and the tolls abolished.

"In contemplation of a turnpike-road."
Cooper: Retirement, 505.

turnpike-stair, s. A winding stair, constructed around a central newel or post.

* **türn'-pike, v.t.** [TURNPIKE, s.] To form, as a road, in the manner of a turnpike-road; to throw into a rounded form, as the path of a road.

türn'-sick, a. & s. [Eng. *turn*, and *sick*.]

* A. As adj. : Giddy; vertiginous; dizzy.

"If a man see another turn swiftly and long; or if he look upon wheels that turn, himself waxeth turn-sick."—*Bacon*.

B. As subst. : A disease of sheep; gid or sturdy.

türn'-sole, türn'-söl, * torn-sole, s. [Fr. *turnesol*, from *tourner* = to turn, and *soleil* = the sun. Named because the plant was supposed to turn its flowers towards the sun.]

1. Botany :

(1) *Euphorbia helioscopia*. It is an annual, generally glabrous plant, with obovate leaves, serrate upwards, an umbel of five principal branches, trifid or bifid, and reticulated and pitted seeds. Its milky juice is used to destroy warts.

(2) *Crotophora tinctoria*, and the purple dye made of its inspissated juice. [CROZOPHORA.]

(3) The genus *Heliotropium*. (Loudon, &c.)
(4) The genus *Helianthus* (q.v.), spec. *H. annuus*. [SUNFLOWER.]

2. Art. : A blue pigment obtained from the lichen *Roccella tinctoria*, also called Archil.

türn'-spit, s. [Eng. *turn*, and *spit* (1), s.]

1. A person who turns a spit.

"A place he will grow rich in,
A turnspit in the royal kitchen."
Swift: Miscellanies.

2. A variety of dog, allied to the terrier, formerly employed to turn the spit for roasting meat in a kitchen, for which purpose they were attached to or enclosed in a kind of wheel. [THREAD-WHEEL.] The breed, which is now rare, arose from a cross of the terrier with larger breeds; the body long and heavy, with disproportionately short, and generally crooked legs.

türn'-stile, s. [Eng. *turn*, and *stile* (2).] A post surmounted with four horizontal arms, which revolve as a person pushes by them. Turnstiles are usually placed on roads, bridges, or the like, either to prevent the passage of beasts, vehicles, or the like, while admitting the passage of persons, or to bar a passage temporarily till toll is paid; they are also frequently placed at the entrance to public buildings, or places of amusement, where entrance money is to be collected, or where it is desired to ascertain the number of persons admitted.

"A turnstile is more certain
Than, in events of war, dame Fortune."
Butler: Hudibras, l. 2.

turnstile-register, s. A device for registering the number of persons who pass through a turnstile at the entrance to a toll-bridge or building, and serving as a check on the collector.

türn'-stone, s. [Eng. *turn*, v., and *stone*, s.]

Ornith. : A popular name for any of the *Streptopitænae*; specifically applied to *Streptopitæna interpres*, from its habit of turning over small stones on the sea-shore in search of its insect food. It is very widely distributed, being found in nearly every part of the globe, its breeding places being the shores of the Arctic Ocean, in America, Asia, and Europe. The total length is rather more than eight inches; upper parts chestnut-red, with black spots; lower parts white, part of neck and breast black.

türn'-täll, s. [Eng. *turn*, and *tall*.] A coward.

Tu-ro'-ni-an, a. & s. [Fr. *Turonien*. (See *def.*)]

A. As adj. : Of or belonging to the Turones, an ancient people of Celtic Gaul; of or belonging to Touraine, the modern name of their country, Tours, its great city, or the rocks there developed. [B.]

B. As substantive :

Geol. : The French equivalent of part of the English Lower White Chalk without flints.

türn'-pén-tine, s. [O. Fr. *turpentine* = turpentine, from Lat. *terebinthinus* = made from the terebinth-tree; Gr. *τερεβινθακος* (*terebinthos*), from *τερεβινθος* (*terebinthos*) = terebinth (q.v.); Dut. *turpentin*; Dan., Sw., & Ger. *terpentin*; Low Lat. *terbentina*.]

Ord. Lang. & Chem. : The name applied to turpentine-oil, and to the crude oleo-resinous juice which exudes from incisions in the bark of pines, firs, and other coniferous trees. The species which chiefly furnish common turpentine are *Pinus palustris*, *P. Teda*, and *P. Pinaster*. The oleo-resin flowing from them has the consistency of treacle, is of a pale-yellow colour, with a pungent odour and taste peculiar to itself. It alters much with heat and exposure. Strasbourg turpentine is from *Abies pectinata*. [CHIAN-TURPENTINE, VENICE-TURPENTINE.]

turpentine-camphor, s.

Chem. : A term applied, sometimes to the solid monohydrochlorate, sometimes to the solid hydrate of turpentine-oil. (Watts.)

turpentine-oil, s.

1. Chem. : C₁₀H₁₆. The volatile oil distilled from crude turpentine, and existing in the wood, bark, leaves, and other parts of coniferous trees. These oils, according to the source from which they are obtained, exhibit con-

fâte, fát, fáre, amidst, whát, fáll, father; wê, wêt, hère, camêl, hór, thère; pine, pít, síre, sír, marine; gô, pôé, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; trý, Sýrian. æ, œ = ē; ey = â; qu = kw.

siderable diversities in their physical as well as in their optical properties. The several varieties when rectified are colourless mobile liquids, having a peculiar aromatic but disagreeable odour. They are insoluble in water, slightly soluble in aqueous alcohol, miscible in all proportions with absolute alcohol, ether, and carbon disulphide. They dissolve iodine sulphur, phosphorus, also fixed oils and resinous oils. The two principal varieties are French turpentine-oil, from *Pinus maritima*, and American turpentine-oil, from the turpentine collected from *P. palustris*, of the Southern States. The former has a specific gravity of 0.864, boils at 161°, and turns the plane of polarization to the left. American turpentine-oil has the same specific gravity and boiling point, but turns the plane of polarization to the right. Both oils absorb oxygen from the air, and acquire powerful oxidizing properties from the probable formation of an organic peroxide, $C_{10}H_{14}O_4$. Turpentine absorbs chlorine with such energy as sometimes to set it on fire. It belongs to a group of volatile oils to which the name of terpenes has been given. They are derived from plants of the coniferous and aurantiaceous orders, yielding, for example, turpentine and lemon oils respectively. Turpentine-oil is of great importance in the arts, and is especially employed for giving consistency to oil paints and varnishes, conferring on them drying properties.

2. **Pharm.**: In small doses it is absorbed and acts as a stimulant, antispasmodic, and astringent. It produces diuresis, and communicates to the urine passed a smell like that of violets. It can arrest hemorrhage in the capillary vessels. It is generally administered as an enema to destroy tenia, ascariæ, &c., in the intestines. Applied externally, it is a powerful rubefacient. (*Garrod.*)

turpentine-shrub, s.

Bot.: *Silphium terebinthaceum*, the Prairie Burdock, a tall herbaceous plant with large, cordate, radical leaves, and bright yellow flowers. It is a native of North America, whence it was introduced into Great Britain in 1765.

turpentine-tree, s.

Botany:
1. *Pistacia Terebinthus*. [TEREBINTH-TREE.]
2. *Bursera gummiifera*. [BURSEREA.]
3. *Tristania albicans*. [LONDON.] It is an Australian shrub of the Myrtle order.

turpentine-varnish, s.

Chem.: A solution of resin in oil of turpentine.

turpentine-vessels, s. pl.

Bot.: Tubes formed in the interstices of tissue in the Conifers, and into which turpentine or other secretions naturally drain during the growth of these trees. (*Træus. of Bot.*)

* **tür-pén-tine, v. l.** [TURPENTINE, s.] To rub with turpentine.

tür-péth, s. [Fr. *turbith, turbit*; Sp. *turbith*; Pera. *turbet, turbid*; Arab. *turbund*; Hind. *turbud*; Beng. *terri*; Sansc. *turbit, tripit*.]

Bot. & Pharm.: The root of *Ipomœa Turpethum*, which is found wild throughout India and Ceylon to a height of 3,000 feet. The Sanscrit writers mention two varieties of the plant, a white and a black one. The first is unidentified; the last is given by the natives of India as a drastic purgative in rheumatic and paralytic affections. (*Calcutta Exhib. Rep.*)

turpeth-mineral, s.

1. **Chem.**: $H^+GSO_4 \cdot 2H_2O$. Turbeth-mineral. Basic mercuric sulphate. A lemon-yellow powder obtained by boiling mercuric sulphate with water, or by adding a solution of aodic sulphate to a hot dilute solution of mercuric nitrate. It is very slightly soluble in cold, more so in hot water, turns gray on exposure to the air, and when heated is resolved into mercuric sulphate and mercuric oxide.

2. **Paint.**: A pigment of a beautiful lemon-yellow colour, but so liable to change by the action of light or impure air, that notwithstanding it has been sometimes employed, it cannot be used safely, and hardly deserves attention.

tür-péth-ic, a. [Eng. *turpeth(in)*; -ic.] Contained in or derived from turpethin (q.v.).

turpethic-acid, s.

Chem.: $C_{10}H_{16}O_6$. An amorphous yellowish mass, produced by the action of bases on turpethin. It has an acid reaction and bitter taste, is soluble in water, and resolved by mineral acids into glucose and turpethollic-acid.

tür-pé-thin, s. [Mod. Lat. (*Ipomœa turpethum*); -in.]

Chem.: $C_{10}H_{16}O_6$. A purgative resin, extracted from the root of *Ipomœa Turpethum* by alcohol. It has a brownish-yellow colour, is inodorous, insoluble in water and ether, soluble in alcohol, and melts at 183°. In concentrated sulphuric-acid it slowly dissolves, forming a red solution.

tür-pé-thôi-ic, a. [Eng. *turpeth(in)*; suff. -ol, -ic.] Derived from or containing turpethin.

turpethollic-acid, s.

Chem.: $C_{10}H_{16}O_6$. An inodorous substance prepared from turpethin by boiling with mineral acids. It crystallizes in slender microscopic needles, soluble in alcohol, slightly soluble in ether, and melts at 88°, decomposing at a higher temperature.

* **tür-pí-fý, tür-pí-fie, v. l.** [Lat. *turpis* = disgraceful, and *facio* (pass. *fi*) = to make.] To calumniate.

"Thus turpise the reputation of my doctrine."—*Skenev*: *Wanstead Play*, p. 630.

tür-pin s. [A corrupt. of *terrapin* (q.v.).] A freshwater or land tortoise.

tür-pln'-y-a, s. [Named after M. Turpin, a French naturalist and artist.]

Bot.: A genus of Staphyleaceæ. Inflorescence in terminal panicles, calyx five-parted, petals five, inserted on a ten-lobed disk; stamens five; filamenta awl-shaped; styles three; fruit three-celled, each cell with two or three seeds. Trees or shrubs from the West and East India. The fruits of some species are eaten. The leaves of *Turpinia pomifera* are used in India as fodder.

tür-pis cân'-ga, phr. [Lat. = a disgraceful cause.]

Soots Law: A base or vile consideration on which no action can be founded. This would be called in English a "consideration *contra bonos mores*," or against public feeling.

tür-pí-tude, s. [Fr., from Lat. *turpitude* = baseness, from *turpis* = base, disgraceful.] Inherent baseness or vileness of principle, words, or actions; foulness, depravity.

"The turpitude of the drama became such as must astonish all who are not aware that extreme relaxation is the natural effect of extreme restraint."—*Maccaulay*: *Hist. Eng.*, ch. III.

tnr-quoise (as tür-kôise, or tür-kwâs), tur-kols, *tur-koise, *tur-cas, *turkys, s. [Fr. *turquoise* = a turquoise or Turkish stone; prop. fem. of *Turquois* = Turkish, from Ital. *turchese* = a turquoise, from Low Lat. *turchesia*, from *turchesius* = a turquoise, from *Turcus* = a Turk (q.v).]

1. **Min.**: An amorphous mineral occurring in reniform nodules and incrustations. Hardness, 6.0; sp. gr. 2.6 to 2.83; lustre, waxy to dull; colour, sky-blue, bluish-green, apple-green; streak, white; rarely sub-transparent, mostly opaque. Compos.: phosphoric acid, 32.6; alumina, 46.9; water, 20.5 = 100, whence the formula, $2Al_2O_3 \cdot PO_5 + 5H_2O$. Probably the Callais, Callaina, and Callaica of Pliny. A gem-stone much used in ancient times in Persia, and in pre-historic times by the ancient Mexicans under the name of chalcihuitl. Originally found in Persia, where the best stones for jewellery purposes are still obtained, although the locality of the Mexican chalcihuitl has lately been discovered. One of the largest nodular masses preserved is exhibited in the Mineral Collection of the British Museum (Natural History), South Kensington, which was obtained from the Emperor of China's Summer Palace.

"Ount upon her! It was my turquoise: I had it when I was a bachelor."—*Shakspe*: *Merchant of Venice*, III. I.

2. **Hort.**: A kind of olive.

tür (1), s. [Native name.]
Music: A Burmese violin with three strings.

* **tür (2), s.** [Etyim. doubtful.]
Bot.: *Ulex europæus*. (*Brit. & Holland.*)

tür-ræ'-a, s. [Named after Turra of Padua, an Italian botanist, who died in 1607.]

Bot.: A genus of Mallee (q.v.). Calyx five-toothed, petals five, ligulate; stamens united into a tube; style one; ovary with five, ten, or twenty cells. Ornamental trees or shrubs from Southern Africa, Madagascar, Mauritius and the eastern parts of India.

tür-räl, s. [Prob. a dimin. from Fr. *tour* = a turn.] A tool used by coopers.

tür-rét (1), s. [O. Fr. *tourrette*; Fr. *tourret* = a small wheel.]

Saddlery: The same as TERRET (q.v.).
"The silvery turrets of his harness."—*Do Quincy*: *English Mail Coach*.

tür-rét (2), *tor-et, *tour-et, *turrette, s. [O. Fr. *tourrette*, dimin. from *tor, tur* (Fr. *tour*) = a tower (q.v.).]

1. **Arch.**: A small tower attached to and forming part of another tower, or placed at the angles of a church or public building, especially in the style of Tudor architecture. Turrets are of two kinds—such as rise immediately from the ground, as staircase turrets, and such as are formed on the upper part of a building by being carried up higher than the rest, as bartizan turrets.

"Now like a maiden queen she will behold,
From her high turret, hourly suitors come."
—*Dryden*: *Amus Astrucibus*.

2. **Bot.**: *Carex cœspitosa*. Perhaps the same as Torret in White's *Nat. Hist. of Selborne*. (*Britten & Holland.*)

3. **Mil. Antig.**: A movable building of a square form, consisting of ten, or even twenty stories, and sometimes 180 feet high, usually moved on wheels, and employed in approaches to a fortified place for carrying soldiers, engines, ladders, &c.

4. **Rail.**: The elevated central portion of a passenger-car, whose top forms an upper story of the roof, and whose sides are glazed for light and pierced for ventilation. (*Amer.*)

5. **Ordn.**: A cylindrical iron tower, rising above the deck of a man-of-war, and made to rotate, so that the guns may be brought to bear in any required direction. Most vessels of war of any size are constructed on the turret-system. The first American vessel constructed with a turret was Ericsson's *Monitor*; the first English were the *Monarch* (1866) and the *Captain* (1867).

"In fact, the *Captain* is best described as a *Prince Albert*, with two turrets instead of four, with the masts and sails of a full-rigged ship, and with the lower upper deck protected from the sweep of the sea by a forecastle and poop at either end, these erections being connected by means of a narrow platform of flying deck, stretching along above the turret. It is unnecessary to enter further into details beyond the statement that the *Monarch's* sides bore 7-inch armour, and her turrets 8-inch and 10-inch, while the *Captain* had 8-inch and 7-inch side armour, with eight and 10-inch turret armour."—*Brit. Quarterly Review*, LVII. 114. (1873.)

turret-clock, s. A clock adapted for an elevated position in a church or other tower.

turret-gun, s. A gun specially adapted for use in revolving turrets of vessels.

"Masts must be supported, and the supports obstruct the fire of the turret-gun to some extent."—*Brit. Quarterly Review*, LVII. 114. (1873.)

turret-head, s. The top or summit of a turret.

"Fair Margaret, from the turret-head,
Heard, far below, the coopers' tread."
—*Scott*: *Lay of the Last Minstrel*, III. 2.

turret-lathe, s.

Metal-work.: A screw-cutting lathe, having a slide provided with a polygonal block or turret, having apertures in each face for receiving dies, which are secured thereon by set-screws.

turret-ship, s. An ironclad ship of war, with low sides, and having its armament placed in a tower or turret which is capable of revolution, so as to bring the embrasure opposite to the gun, which is pointed in any direction and temporarily unmasked while firing.

"Not long after Captain Cole was authorized, in conjunction with Messrs. Laird, of Birkenhead, to design another vessel, embodying his views of what a sea-going turret-ship should be, and as the result the elevated *Monarch* was ordered to be built just a year after the *Monarch* had been begun."—*Brit. Quarterly Review*, LVII. 132. (1873.)

tür-rét-éd, *tör-rét-téd, a. [Eng. *turreted*; -ed.]

1. Furnished with a turret or turrets.
"A turreted manorial hall."
—*Wordsworth*: *Excursion*, bk. V.

böül, böy; pöüt, jöwi; cat, çell, chorus, çhin, bench; go, çem; thin, çis; sin, aç; expect, Xenophon, exist. ph = f

*2. Formed like a turret; rising like a tower.

"Take a turreted lamp of tin, in the form of a square; the height of the turret being thrice as much as the length of the lower part, whereupon the lamp standeth."—*Bacon: Nat. Hist.*

tür-ri-bánt, s. [TURBAN.]

tür-ric'-u-late, tür-ric'-u-lät-öd, a. [Lat. *turricula*, dimin. from *turris* = a tower (q.v.).] Resembling a turret; having the form of a turret; as, a *turriculated* shell.

tür-ri-lép'-ás, s. [Lat. *turris* = a tower, and Mod. Lat. *lepas* (q.v.).]

Palæont.: A genus of Lepididæ, from the Upper Silurian rocks. The peduncle was furnished with intersecting rows of plates, which, when detached, are not unlike the shells of certain Pteropoda. Barrande regarded the fossil (to which he gave the name *Plumulites*) as the capitulum of a Lepidoid, in which the peduncle is wanting or rudimentary.

tür-ri-líte, s. [TURRILITES.] Any individual of the genus *Turrilites* (q.v.). (*Woodward: Mollusca*, ed. Tate, p. 200.)

tür-ri-li-tép, s. [Lat. *turris* = a tower, and Gr. *λίθος* (*lithos*) = a stone.]

Palæont.: A genus of Ammonitidæ, with thirty-seven species, ranging from the Ganit to the Chalk of Europe. Shell sinistral, spiral, whorls in contact; aperture often irregular.

tür-ri-öd, a. [Eng. *turret*; *-öd*.] The same as **TURRICULATE** (q.v.).

tür-ri-tél'-lā, s. [Mod. Lat., dimin. from Lat. *turris* = a tower.]

1. Zool.: Tower-shells; the type-genus of *Turritellidæ* (q.v.), with seventy-three species, universally distributed, ranging from the lamiarian zone to a depth of 100 fathoms. Shell **TURRITELLA TURRITELLATA**, turreted, many-whorled, and apically striated; aperture small and rounded, peristome thin; operculum with a fimbriated margin.

2. Palæont.: Fossil species, 172, from the Neocomian onward.

tür-ri-tél'-li-dæ, s. pl. [Mod. Lat. *turritella*(s); Lat. fem. pl. adj. suff. *-idæ*.]

1. Zool.: A family of Holostomatous Gasteropoda, with five genera. Shell tubular or spiral; upper part partitioned off; aperture simple; operculum horny, many-whorled. Animal with a short muzzle; eyes immersed at outer bases of the tentacles; mantle margin fringed; foot very short; branchial plume single.

2. Palæont.: They appear to have commenced about the middle of the Jurassic period, abounding in the Tertiaries, and attaining their maximum in existing seas.

tür-ri-tis, s. [Lat. *turritis* = fortified with towers; *turris* = a tower; because the leaves become gradually smaller upwards, so that the plant assumes a pyramidal form.]

Bot.: Tower-mustard; a genus of *Arabidæ* (q.v.), having the pod elongated, compressed, and two-edged, the valves nerved or keeled, the calyx nearly equal at the base. *Turritis glabra* (= *Arabis perfoliata*) is a Crucifer, with its stem one to two-and-a-half feet high, with oblong, lanceolate, glaucous leaves, the radical ones toothed or sinuate at the base, the cauline ones sagittate; the flowers yellowish-white, the pods long and erect. Found in Norfolk, Suffolk, and some other parts of England, flowering from June to August.

tür-tle (1), tür-tür, s. [A.S., from Lat. *turtur* = a turtle-dove; a word probably of imitative origin, from the coo of the pigeon; Ger. *turtel-taube* = a turtle-dove; Ital. *tortora*, *tortola*; Fr. *tourter*.] The same as **TURTLE-DOVE** (q.v.).

"And of faire Brittomart ensample take,
That was as trow in love as turtle to her mate."
Spenser: F. Q., III. xi. 2.

turtle-dove, s.

1. Ornith.: *Turtur communis*, widely distributed in the warmer parts of the Old World. It is a beautiful bird, of somewhat slender form, a summer visitant to the southern and eastern counties of England, arriving in May and departing in September. The male is

about a foot long, with the head light bluish-gray, the back grayish-brown, the scapulars and small wing-coverts black, with broad rust-red margins, the breast pale grayish-purple, the neck with two large black spots barred with white. The female is rather smaller, with similar plumage, but of duller tints. They feed on grain and vegetables, often frequenting fields of beans and peas. They make a slight, flat nest of a few twigs, in which two glossy, creamy-white eggs are deposited about the middle of May, and the parent birds take turns at incubation, sometimes rearing two broods in a season. The note is a soft, mournful "coo," often uttered when the bird is on the ground. From its habit of pairing for life, and its fidelity to its mate, the turtle-dove has long been a symbol of conjugal affection.

2. Script.: Heb. *תור* (*tor*), an onomatopoeic name from the cackling of the bird, generally in connection with *תור* (*yonal*) = dove.] Probably either *Turtur communis* or *T. risorius*. The latter bird is about ten inches in length; tail short; general colour gray, tinged with red, upper parts greenish brown, with a black collar on the back of the neck.

tür-tle (2), s. [A corrupt, of Port. *tartaruga*; Sp. *toruga* = a tortoise, a turtle.]

1. Zool.: The popular name for any species of the Chelonidæ. They may be distinguished by their long, compressed, fin-shaped, non-retractile feet, with the toes enclosed in a common skin, from which only one or two claws project. The carapace is broad and much depressed, so that when these animals are on shore, and are turned over on their backs, they cannot regain the natural position. Large interspaces between the extremities of the ribs and portions of the sternum always remain cartilaginous, so that the carapace is far lighter than in the Tortoises. The head is large and globose, and cannot be retracted within the shell; it is covered above with asymmetrical horny shields, and the jaws are armed with sharp, horny sheaths. Turtles are marine animals; their pinnate feet and light shell render them excellent swimmers. They sometimes live at a

GREEN TURTLE.

great distance from land, to which they periodically return to deposit their soft-shelled eggs (from 100 to 250 in number) in the sand. They are found in all the inter-tropical seas, and sometimes travel into the temperate zones. The flesh and eggs of all the species are edible, though the Indian turtles are less valuable in this respect than those of the Atlantic. The most highly valued of the family is the Green Turtle (*Chelonia viridis*), from which turtle-soup is made. It attains a large size, sometimes from six to seven feet long, with a weight of from 700 to 800 pounds. The popular name has no reference to the colour of the carapace, which is dark olive, passing into dingy white, but to the green fat so highly prized by epicures. The Edible Turtle of the East Indies (*C. virgata*) is also highly prized; but, according to Tennent (*Ceylon*, i. 189), at certain seasons they "are avoided as poisonous, and some lamentable instances are recorded of death which was ascribed to their use." The Hawk's-bill Turtle (*C. imbricata*), which yields tortoiseshell (q.v.), is also prized; but the flesh of the Loggerhead Turtle (q.v.) and of the Leather-back is of little value.

2. Frequently used for turtle-soup (q.v.).

"Turtle and venison all his thoughts employ."
Cooper: Progress of Error, 220.

3. Print.: The segmental plate in which a form is locked up in a rotary press. The column-rules are wider at the top than the bottom, to hold the type firmly, and are secured by screws. The edge of the side-stick has

a series of beveled projections, and is pressed against the forms by a piece having similar beveled projections and worked by a screw.

† To turn turtle: [TOURN, v., † 36.]

turtle-back, s. The roofing or cover of a deck, curved so as to resemble the shell of a turtle; as a hurricane-deck.

"Fitted with platforms on her turtle-backs fore and aft."—*Daily News*, Feb. 21, 1857.

* **turtle-footed, a.** Slow-footed.

"Turtle-footed peace." *Ford*

turtle-head, s.

Bot.: The genus *Chelone* (q.v.).

turtle-shell, s.

1. A beautiful species of *Murex*. (*Goodrich*.)
2. Tortoiseshell.

turtle-soup, s. A rich soup, in which the chief ingredient is (or should be) the flesh of the turtle. It is always served at state and civic banquets. [*MOCK-TURTLE*.] Sir Henry Thompson, in a paper read at one of the Conferences connected with the Fisheries Exhibition held in London in 1883, stated that "conger eel, as few people seem to be aware, is the source of all turtle-soup when at its best, the turtle furnishing only the garnish and the name." This statement gave rise to much correspondence at the time.

turtle-stono, s.

Geol.: A popular name for a septarium (q.v.).

"Septaria have been polished as marble . . . in Dorsetshire, where they have been locally termed *turtle-stones*."—*Woodward: Geol. England & Wales*, p. 226.

tür-tle, v. i. [TURTLE (2), s.] To fish or hunt for turtles.

"He occasionally goes off on a *türting* expedition."—*Field*, Sept. 24, 1857.

tür-tlér, s. [Eng. *turtle*(s), v.; *-er*.] One who fishes or hunts for turtles.

"The Jamaica turtles visit these keys with good success."—*Dampier: Discourse of Winds*, ch. iv.

tür-ting, s. [TURTLE, v.] The act of hunting for or catching turtles.

* **tür-tür, s.** [Lat.]

1. Ord. Lang.: A turtle-dove.

"A peyre of *turturis* or twele culver briddis."—*Wycliffe's Luke*, li.

2. Ornith.: A genus of Columbidae, with twenty-four species, from the Palearctic, Ethiopian, and Oriental regions, and Anstro-Malaya. Bill rather slender, tip of upper mandible gently deflected, nostrils at base covered with two soft, tumid, bare substances; tarsi rather shorter than middle toe, which is longer than the outer; tail of twelve feathers, rather long, and considerably rounded or graduated; wings rather long and pointed. [TURTLE-DOVE.]

* **türveg, s. pl.** [TURF, s.]

tür-wär, s. [Native name.] A tanning bark obtained in India from *Cassia auriculata*.

Tüs-can, a. & s. [Lat. *Tuscanus*; Ital. *Toscana*; Fr. *Toscane*.]

A. As adj.: Of or pertaining to Tuscany in Italy.

B. As substantive:

1. Ord. Lang.: A native or inhabitant of Tuscany.

2. Arch.: The Tuscan order of architecture.

† *Tuscan style of Architecture, Tuscan order:* A style of architecture which originated in the north of Italy, on the first revival of the arts in the free cities, and beyond which it has never yet travelled, except in some examples which were introduced by Inigo Jones in the first church of St. Paul, Covent Garden, and by Sir Christopher Wren in porticoes at St. Paul's Cathedral. It is a simpler variety of the Doric (q.v.), with unfuted columns and without triglyphs.

TUSCAN.

Tuscan-shrew, s.

tūs'-ōr, s. [TUSK.] A tusk or tush of a horse.

tūsh, v. twish, interj. [From the sound.] An exclamation indicating rebuke, contempt, or impatience; yshaw! pish!

"Tush, say they, how should I od perceive it? Is there knowledge in the Most High?"—Psalm lxxlii. 11.

tūsh, s. [A softened form of tusk (q.v.).] A long pointed tooth; a tusk; applied especially to certain of the teeth of horses.

"Strong as a sea-beast's tushe, and as white."—A. O. Schweinhorn: Trisram of Lyonsse, 1.

tūshed, a. [TUSKED.]

tūsh (1), *tosch; *tosche, *tusch, *tux, s. [A.S. tūsa, tūz; cogn. with O. Fries. tusk, tūsch; prob. for tūc = with the notion of double tooth, or very strong tooth, from A.S. tūsa = double. (Skeat.)]

I. Ordinary Languages:

1. (Pl.): Two abnormally long teeth, protruding from the month, and constituting offensive weapons. In the elephant, the narwhal, the dugong, &c., these enlarged teeth are incisors, whilst in the boar, the walrus, the hippopotamus, &c., they are canines.

"This beast (when many a chief his tusks had slain) Great Meleager stretched along the plain."— Pope: Homer: Iliad ix. 661.

2. The share of a plough; the tooth of a harrow or the like.

II. Technically:

1. Carp.: The bevelled shoulder on the back of a tenon of a binding joist, to strengthen it.

2. Locksmith.: A sharp projecting point or claw which forms a means of engagement or attachment. Used in the parts of locks in which bolts, tumblers, &c., are thus provided so as to be touched, dropped, raised, &c., by the key directly or by intermediate devices.

*tūsk (2), s. [TUSK.]

*tūsk, v.t. [TUSK (1), s.] To gnash the teeth as a boar; to gnaw the tusks.

"Nay, now you puffe, tusk, and draw up your chin, Twirl the poore chain you run a fastling in."— Ben Jonson: Epigram 107.

tūsh'-kar, s. [A corrupt of Icel. torfshéri, from torf = turf, and skera = to cut.] An iron instrument with a wooden handle, used for cutting peats. (Scottch.)

tūsked, a. [Eng. tusk (1), s.; -ed.]

1. Ord. Lang.: Furnished with tusks.

"The tusked boar out of the wood Uprune it by the roots."— Milton: Psalm lxxx.

2. Her.: Having tusks of such or such a tincture. (Said of boars, elephants, &c.)

tūsk'-er, s. [Eng. tusk (1), s.; -er.]

1. An elephant that has its tusks developed; one of the males of the Asiatic species.

"One of the finest tuskers any of those present had ever seen."—Field, Dec. 26, 1885.

2. A wild boar with well-developed tusks.

"A tuskler who had, however, no idea of running away."—Echo, Nov. 26, 1887.

tūsk'-y, a. [Eog. tusk (1), s.; -y.] Having tusks; tusked.

"The scar indented by the tuskly boar."— Pope: Homer: Odyssey xxiv. 865.

tūs'-sao, s. [TUSSOCK.]

tūs'-seh, s. [TUSSER.]

tūs'-sēr, tūs'-sōr, tūs'-seh, s. (Native Indian name.) The silk spun by the Tusser Silkworm (q.v.). The centres of the traffic are in Bengal, the Central Provinces, Berar, and the Nizam's country. There are generally two crops of the insect during the year. The cocoons are purchased in May and June by the rearers from those who have collected them from the jungle; the female cocoons are the larger. They are almost perfectly smooth, of a gray colour, with darker veins across the outer surface. When mature, the largest are about two inches long by one and a-quarter broad, those of average size about an inch and a-half long. The inner layer of the fibre is quite loose, forming a soft cushion for the insect within. The silk, when obtained, has a glossy or vitreous look. It is now manu-

factured in Europe as well as in India, being largely used for cloaks and mantles designed for winter wear. No kind of silk so closely imitates seal-skin or leopards' skin. It is used in the manufacture of Utrecht velvet, and has the rigidity requisite to render it a valuable material for carpets. (Calcutta Exhib. Report).

tusser-silk-worm, s.

Entom.: Antherea mytilata, a common Indian silkworm, which yields a rather coarse-looking, but very durable silk. It is wild throughout the low hills of the central tableland of India, being absent from the Himalaya mountains and from the alluvial plains. It feeds on many shrubs and trees.

*tūs'-sio'-ŋ-lar, a. [Lat. tussicularis, from tussis = a cough.] Of or pertaining to a cough.

tūs-sī-la-gin'-ē-sē, s. pl. [Mod. Lat. tussilago, genit. tussilaginis (ē); Lat. fem. pl. adj. suff. -ēs.]

Bot.: A tribe of Tubuliflorae. Leaves alternate, all radial, broad; outer flowers female, very slender, and tubular or ligulate; florets of the disk tubular, usually bisexual; anther cells not tailed; arms of the style connate, pubescent, with bifid, conical tips. (Sir J. Hooker.)

tūs-sī-lā'-gō, s. [Lat. = coltsfoot (see def.), from tussis = a cough, from the use of the plant as a cough medicine.]

Bot.: Coltsfoot; the typical genus of Tussilagines (q.v.). Heads yellow, solitary, many-flowered; receptacle naked; involucre of a single row of equal, linear scales; florets of the ray long, narrow, in many rows, female; those of the disk few, male, both yellow; pappus pilose; achene terete. Closely akin to Petasites, but differs by the pistillate flowers having a (sometimes minute) ligule. Only one known species, Tussilago Farfara. [COLTSFOOT.]

*tūs'-sis, s. [Lat.]

Pathol.: A cough, a catarrh.

tūs'-sle, *tūs'-sel, *tus'-tle, s. [TUSSELE, v.] A struggle; a contest; a scuffle.

"Does he wear his head? Because the last we saw here had a tussle."— Byron: Vision of Judgment, xviii.

tūs'-sle, *tus'-tle, *tūz'-zle, v.t. & t. [A variant of tussle (q.v.).]

A. Intrans.: To struggle; to scuffle.

"Did tussle with red-eyed pole-cat."— Percy: Reliques; St. George for England.

B. Trans.: To struggle with.

"Muzzle and tussle and bug thee."—Centurio: Busby Body (1709), p. 44.

tūs'-sōck, tūs'-sūck, tūs'-sac, s. [A dimin. from Dan. tusk = a tuft, a tassel; Sw. dial. tuss = a wisp of hay; cf. Welsh tussy, tussy = a wisp, a bundle.]

1. A clump, a tuft or small hillock of growing grass.

"Both were constructed in thick tussocks of coarse grass or rushes."— Scribner's Magazine, Dec. 1875, p. 170.

2. A tuft or lock, as of hair or the like; a tangled knot.

"Such laying of the hair in tussocks and tufts."— Latimer.

3. The same as TUSOCK-GRASS (q.v.).

4. The same as TUSOCK-MOTH (q.v.).

tussock-grass, s.

Bot., &c.: Dactylis cespitosa (= Festuca flabellata), a grass forming tufts five to six feet high in the Falkland Islands, Tierra del Fuego, the Straits of Magellan, Cape Horn, &c. It was first discovered by Comumerson in the Straits of Magellan in 1767. Its appropriate habitat is the sea-shore, where it will grow even on sand dunes. Either as green fodder or as hay, it is said to be unvalued as food for cattle, horses, &c. Pigs and other animals grub up the sweet roots, which they eat eagerly. It forms great tufts, remarkable for their size, being sometimes five or six feet high, while the long, gracefully curving blades are from five to eight feet long and an inch broad at base. It has been grown with success in the Orkney Islands, the Hebrides, and other places near the sea where there is a peaty soil. The young shoots are boiled and eaten as asparagus. The inner part of the stem above the root is soft, crisp, and has the flavor of a hazel nut. It is often eaten by the Falkland islanders. It is in danger of being exterminated, from the avidity with which it is

eaten by cattle and pigs, and is now confined to local patches in the shore regions.

tussock-moth, s.

Entom.: The genus Daaychira, belonging to the family Liparidae. The antennae are crenulated in the female; the fore legs are very hairy. The larva is very beautiful, with tufts of coloured hair down the back.

tūs'-sōck-ŷ, a. [Eng. tussock; -y.] Abounding in or resembling tussocks or tufts.

"We emerged on tracts of tussocky grass, interspersed here and there in park-like fashion with clumps of trees."—Daily Telegraph, March 9, 1884.

tūs'-sūck, s. [TUSOCK.]

tūs'-sōrē, s. [TUSSEER.]

tūt, interj. [From the sound; cf. Fr. trut = tush, tut.] An exclamation denoting impatience, rebuke, or contempt; yush! pish!

"Tut, this was nothing but an argument."—Shakespeare: 2 Henry VI, i. 2.

*tūt, v.t. [TUT, interj.] To speak contemptuously and slightly.

"Tutting over the globe or the sun."—Lycion: Castors, bk. viii, ch. lii.

*tūt, s. [Etyim. doubtful.]

1. An imperial crown of a golden globe, with a cross on it; a mound. (Bailey.)

2. A hassock.

"Paid for a tut for him that draws the bellows of the organ to sit upon."—Churchyarders' Accounts of Chould, 1837.

*tūt'-tage (age as ig), s. [Lat. tutus = safe.] Tutelage (q.v.).

*tūt'-ta-mēt, s. [Lat. tutamentum, from tutus = safe.] Protection, guardianship.

"The holy cross is the true tutament."— Davies: Holy Rode, p. 1a.

tū-tā'-nī-a, s. [Etyim. doubtful.] A white alloy for tableware, &c. German: copper, 1; tin, 48; antimony, 4. Spanish: steel, 1; tin, 24; antimony, 2.

tū-tēl'-age (age as ig), s. [Lat. tutela = protection, from tutus = safe; tuor = to protect.]

1. Guardianship, protection. (Applied to the person.)

"He submitted without reluctance to the tutelage of a council of war nominated by the lord-lieutenant."—Macaulay: Hist. Eng., ch. xvii.

2. The state of being under a guardian or protector; care or protection enjoyed.

tū-tēl'-lar, tū-tēl'-lar-ŷ, a. [Lat. tutelaris, from tutela = guardianship, tutelago (q.v.); Fr. tutelaire.]

1. Guarding, protecting; having the charge, care, or protection of a person or thing; guardian.

"Where wast thou then, sweet Charity! where then Thou tutelary friend of helpless men?"— Cooper: Charity, 142.

2. Tending to guard or protect; protective.

*tūt'-tēle, s. [Lat. tutela.] Tutelage.

"He was to have the tutelle and ward of his children."— Howell: Letters, l. 2, 15.

tū-tēn'-äg, tu-tēn'-age, *tu-tān'-ago, s. [Hind.]

1. A white alloy, of copper, 50; nickel, 19; and zinc, 31, used for table-ware, &c. It resembles Packfong, Chinese white copper, albat, and German silver. The alloy has various names and proportions of the ingredients; a small quantity of lead or iron is added in some formulae.

2. Zinc or spelter.

tū-ti-ōr-ism (ti as shī), s. [Eccles. Lat. tutorismus, from tutor, compar. of Lat. tutus = safe.]

Church Hist. & Theology: Mitigated Rigorism; the doctrine which, while holding that obedience to the law is always the safer and better way, allows that an opinion of the highest intrinsic probability in favour of liberty may sometimes be followed. [RIGORISM.]

"The arguments adduced by its advocates really tend to Tutorism."—Addis & Arnold: Cath. Doct., p. 622.

tū-ti-ōr-ist (ti as shī), a. & s. [Eng. tutor(ism); -ist.]

A. As adj.: Of, pertaining to, or guided by the principles of Tutorism (q.v.).

B. As substantive:

II. Scots Law: The guardian of a boy or girl in pupilarity. By common law a father is tutor to his children. Failing him, there may be three kinds of tutors: a tutor-nominate, a tutor-at-law, or a tutor-dative. A tutor-nominate is one nominated in a testament, &c., by the father of the child or children to be placed under guardianship. A father may nominate any number of tutors. A tutor-at-law is one who acquires his right by the mere disposition of law, in cases where there is no tutor-nominate, or where the tutor-nominate is dead, or cannot act, or has not accepted. A tutor-dative is one named by the sovereign on the failure both of tutor-nominate and tutors-at-law.

***4.** A whoremonger.

twéed, *s. & a.* [Usually derived from the name of the river which falls into the sea at Berwick. It is said, however, that some cloth called on an invoice *twecels*, or *twecled*, that is, woven diagonally, having been sent to London, the word, which was blotted or imperfectly written, was misread *twéed*, and as the cloth was manufactured in the valley of the Tweed, and the designation *twéed* was consequently an appropriate one, it was allowed to stand, even after the error had been detected. (*Weekly Times*, Feb. 21, 1875.)]

A. As substantive:

Fabric: A light, twilled woollen fabric for men's wear, with an undivided surface. Two colours are generally combined in the same yard. The beat is made of all wool, but in inferior kinds shoddy and cotton are also introduced.

twéé'-dle-dée', *s.* [TWEEDLE, s.] TWEEDLEDUM.]

twéé'-dle-düm', *s.* [TWEEDLE, s.] A word used only in the phrase, the distinction between *twéedledum* and *twéedledee*. The suggestion is that the only difference between th; two is in sound—a distinction without a difference. The expression arose in the eighteenth century, when there was a dispute between the admirers of Bononcini and those of Handel, as to the respective merits of those musicians. Among the first were the Duke of Marlborough and most of the nobility; among the latter the Prince of Wales, Pope, and Arbuthnot.

"Some say, compared to Bononcini, That Myther Handel's but a ninny Others aver that he to Handel Is scarcely fit to hold a candle. Strange all this difference should be 'Twixt *twéedledum* and *twéedledee*."
J. Byron.

twelve-tables, s. pl. The name given to the earliest code of Roman law (*Lex Duodecim Tabularum*), made by the decemvirs 451-449 B.C., and covering civil, criminal, and religious offences. These were looked upon as forming the basis of all Roman law, and in the time of Cicero, school boys were required to commit them to memory. They were principally derived from early Roman legislation. They left many of the older laws intact, and these reappear in Justinian's code. Commentaries were from time to time added to the original tabula. [TABLE, s.]

twelve-wired bird of paradise, s.

Ornith.: *Seleucides alba*, from New Guinea.

Its general plumage appears at first sight to be velvety black, but on closer examination it is found that every part of it glows with the most exquisite metallic tints—rich bronze, intense violet, and, on the edges of the breast-feathers, brilliant green. An immense tuft of dense plumes of a fine orange-buff colour springs from each side of the body, and six of these on each side terminate in a black curled shaft. (Wallace.)

A. As substantive:

1. Ordinary Language:

I. Literally:

(1) In the same sense as II.

"As the twilight begimeth, you shall have about you two or three hundred foxes, which make a marvellous wawling or howling."—*Hackluyt*: *Voyages*, I. 400.

(2) A dim, faint light generally; slight shade or gloom.

*2. *Fig.*: A dubious, doubtful, or uncertain medium through which anything is seen or examined; a partial revelation or disclosure.

"In the greatest part of our government he has afforded us only the twilight of probability, suitable to our state of mediocrity."—*Locke*.

II. Astron.: The faint diffused light which

appears a little before sunrise, and again for some time after sunset, the amount and duration of the light varying materially in different latitudes and at different seasons. Popularly, the term is only applied to the evening twilight, the morning twilight being called dawn. Twilight is produced by the diffused reflection of light from and amongst the atmosphere after the direct rays of the sun have ceased to reach the earth. When the sun descends below the horizon, its rays pass through the atmospheric strata, and some of them are reflected towards the earth and illuminate its surface. At first the light, falling on the lowest and densest strata, is reflected in great abundance, but as the sun descends to a greater distance below the horizon, the rays fall on higher, and therefore rarer, atmospheric strata. Consequently fewer rays undergo reflection, and as the sun descends, the strength of the twilight diminishes in the same proportion, till at

fáte, fát, fáre, amidst, whát, fáll, father; wé, wét, hère, camél, hër, thère; pine, pít, síre, sír, marine; gó, pót, or, wóre, wólf, work, whó, sòn; míte, óub, cùre, qúlte, cùr, rúle, fúll; trý, Sírian. sè, cè = è; ey = ã; qu = kw.

last the solar rays fall on strata so rare as to be incapable of reflecting light, and the twilight accordingly disappears. In the morning the change from darkness to light takes place in a similar manner, but in inverted order.

In the twilight phenomena the effect of refraction must also be taken into consideration. The refractive power upon the rays of light possessed by the atmosphere has the effect of bending these rays from a straight into a downward curved line, so that on reaching the eye they appear to come from a point in the sky higher than their true source. The result is that the sun when actually upon the horizon appears to be several degrees above it, and its last rays are visible to us when it is actually some distance below the horizon. Refraction thus increases the apparent length of the day, hastening the morning and retarding the evening twilight. As the polar zones are approached this effect increases, until at a high latitude the twilight may extend throughout the night. A striking feature of twilight is its rich color effects on the sky and the clouds, due to the dispersal of the more refrangible rays of light, and the preponderance of red and yellow beams in the light that reaches the eye.

B. As adjective:

I. Literally:

1. Not clearly or brightly illuminated; obscure, gloomy, shaded.

"When the sun begins to fling His flaring beams, sue, goddess, bring Toe arched walks of twilight groves."

Milton: *R. Penserose*, 128.

twill, v.f. [Low Ger. twillen = to make double, to fork into two branches, as a tree; twill, twille, twel = a forked branch, any forked thing. From the base twi-, as in twig, twine, twist, &c.] To weave in such a manner as to produce a kind of diagonal ribbed appearance upon the surface of the cloth.

twill (1), * twear, * tweel, s. [TWILL, v.]

1. A diagonal appearance given to a fabric by causing the weft-threads to pass over one warp thread, and then under two, and so on; instead of taking the warp-threads in regular succession, one down and one up. The next weft thread takes a set oblique to the former, throwing up one of the two deposited by the preceding. The fabrics thus woven are very numerous—satin, blanket, merino, bombazene, kerseymer, &c. When the threads cross each alternately, in regular order, it is called plain weaving; but in twill, the same thread of weft is flushed, or separated from the warp, while passing over a number of warp-threads, and then passes under a warp-thread. Twills are used for the display of colour, for strength, variety, thickness, or durability.

2. The fabric so woven.

twill (2), s. [Cf. Sw. dial. twill = to turn round like a spindle, to become entangled as thread; Norw. twilla = to twist into knots, as a thread; twilla = a twist or knot in a thread.] A reed, a quill; a spool to wind yarn on.

twilled (1), a. [TWILL, v.] Woven so as to present a kind of diagonal ribbed appearance on the surface:—*as, twilled cloth.*

Tŷ-būrn, s. [English.] The place of execution for criminals convicted in the county of Middlesex down to Nov. 7, 1783, when it was transferred to Newgate, at which this first execution took place on Dec. 9 in the same year. The name Tyburnia was given, about the middle of the nineteenth century, to the district lying between Edgware Road and Westbourne and Gloucester Terraces and Craven Hill, and bounded on the south by the Bayswater Road, but it soon fell into disuse.

"The name is derived from a brook called Tyburn, which flowed down from Hampstead into the Thames."—*R. Chambers: Book of Days*, ii. 357.

* ¶ (1) *To fetch a Tyburn stretch*: To be hanged; to come to the gallows.

"Or else to fetch a Tyburn-stretch Among the rest." *Tusser: Husbandry*, p. 214.

(2) *To preach at Tyburn Cross*: To be hanged (in allusion to the speeches made by condemned criminals just before their execution.)

"That soldiers starve or preach at Tyburn Cross." *Gascoigne: Nicols Atlas*, p. 55.

* **Tyburn-pickadill, s.** A halter.

"Till they put on a Tyburn-pickadill."

Taylor: Praise of Hempseed.

* **Tyburn-ticket, s.** A ticket granted (under 10 & 11 Will. III., c. 23, § 2) to prosecutors who had secured a capital conviction. This ticket exempted the prosecutor "from all manner of parish and ward offices within the parish wherein such felony was committed, which certificate shall be enrolled with the clerk of the peace of the county, on payment of 1s. and no more." This Act was repealed by 58 Geo. III., c. 70, passed June 3, 1818. Tyburn-tickets were transferable, and often sold for a high price (see extract). A Tyburn-ticket and the form of transfer was given in *Notes & Queries* (2nd ser., xi. 395, 437).

"Last week, says the *Stamford Mercury* of March 27, 1818, a Tyburn-ticket was sold in Manchester for 290l."—*Notes & Queries*, 2nd ser., xi. 236.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sire, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, oūh, cūre, unite, oūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā; qu = kw.

*Tyburn-tiffany, s. A halter. (With allusion to Tyburn as a place of execution.)
*Tyburn-tippet, s. A halter.
*Tyburn-tree, s. The gallows.

Ty-chōn'-ic, a. [See def.] Of or pertaining to Tycho Brahe or to his system of astronomy. Tycho was a nobleman of Swedish descent, whose grandfather had settled in Denmark. He was born at Knudsthorp on Dec. 14, 1546, three years after the death of Copernicus, carried on his chief observations first in an observatory of Uraniberg, built for him on the island of Hven or Hoëne in the Baltic, and, on losing his Danish appointment, near Prague, where he died, Oct. 13, 1601. The leading points of the system were: (1) that the fixed stars all move round the earth, a view existing in the Ptolemaic system; (2) that all the planets, the earth only excepted, move round the sun, an opinion beyond that of Ptolemy, and to a large extent, though not fully adopting, the leading tenet of the Copernican system; (3) the sun with its attendant planets revolves round the earth; (4) that the orbits of the planets cannot have the solidity of an imagined primum mobile, since they are intersected in various directions by the orbits of comets.

ty-coon', s. [Jap. taikun. (See def.)] A title assumed by the Shogun, or generalissimo of Japan, between 1854 and 1868, in order to impress the ambassadors of the Western Powers with the belief that he was the real ruler of the country.

*Prior to the recent revolution [in 1868] the foreign treaties were concluded with the ministers of the Shogun at Yedo, under the erroneous impression that he was the Emperor of Japan. The title of taikun (often misspelt tycoon) was then for the first time used; it means literally the 'great ruler,' and was employed for the occasion by the Tokugawa officials to convey the impression that their chief was in reality the lord paramount. -Encyc. Brit. (ed. 9th), xiii, 682.

*ty-de, s. [TIDE, s.]
*ty-dy, s. [TIDY, s.] Some unidentified kind of singing-bird. (Drayton: Poly-Olbion, a 3.)
*teo, v.t. [TIE, v.]

tye, s. [TIE, s.]
I. Ord. Lang.: A tie, a bond, a fastening.
II. Technically:
1. Mining: An inclined trough for separating ore by means of a flowing stream of water. The slimes are allowed to flow in a thin wide stream upon the upper part of the trough, then disturbed by a broom, and collected, according to relative weight and quality, at different parts of the length of the trough. The sorts are known as heads, middles, and tails; the first going to pile, the second is re-tyed, the third is refuse.
2. Naut.: A rope by which a yard is hoisted. It passes through the mast; one end is attached to the middle of the yard, and the other end is hooked to a purchase composed of the tye-block and fly-block, by which the hoisting is effected.

tye-block, s.
Naut.: An iron-bound swivelled block, bolted into an eye in the hoop round the yard; through it the tye for hoisting the yard is rove.

*ty-ër, s. [Eng. tye = tie; -er.] One who tyes or quilts.

tye-foón', s. [TYPHOON.]

*tyg, s. [Etyim. doubtful.] Some kind of drinking vessel.
*Three-handed tyg, a drinking cup of the time, so handled that three different persons, drinking out of it, and each using a separate handle, brought their mouths to different parts of the rim. -Catalogue of Spectacles. (Latham.)
The name is still applied in Oxford to an ordinary round pot with three handles, much used for cups, &c.

ty-gër, s. [TIGER.]
1. Ord. Lang.: A tiger (q.v.).
2. Her.: A beast more resembling a lion than a tiger, having a pointed nose, and a tufted mane, legs, and tail. It is seldom used, and is condemned by good heralds.

*ty-grësse, s. [TIGRESS.]
*ty-grish, a. [TIGRISH.]
ty-ing, s. [TYE, s.]
Mining: The operation of washing tin or copper ores. (TYE, II. 1.)

tyke, s. [TRUCK.]
1. A dog.
*The large number of free and independent tykes who scorn mastership. -Daily Telegraph, Dec. 5, 1888.
*2. A low fellow.
3. A Yorkshireman. (Slang Dict.)

tyle, s. [TILE, s. (2).]
tyle-berry, s.
Bot.: Jatropha multifida. An American shrub cultivated in India gardens, where it is known as the Coral plant, the flowers having a considerable resemblance to coral.

ty-lër, s. [TILER.]
ty-lö-, pref. [Gr. τύλος (tylos) = a knot or cellus, a knob, a protuberance.] Having a swelling or protuberant process or processes.

ty-lö-di-na, s. [Mod. Lat., from Gr. τύλος (tylos).] [TYLO-]
Zool. & Palæont.: A genus of Pleurobranchiæ with three recent species, from the Mediterranean and Norway. Shell limpet-like, depressed, apex anti-central, with a minute spiral nucleus. One fossil species, from the Tertiary.

ty-lö-dön, s. [Pref. tylo-, and Gr. δόνος (odon), genit. δόντος (odontos) = a tooth.]
Palæont.: A genus of Vivarridae, from the Eocene Tertiary of Europe. The animals were about the size of a Glutton.

ty-löph-ör-a, s. [Pref. tylo-, and Gr. φόρος (phoros) = bearing; named from the ventricose pollen masses.]
Bot.: A genus of Stapelieæ. Twinning herbs or undershrubs, with opposite membranous leaves. Corolla five-parted; the corona five-leaved; the leaflets simple, fleshy; foliicles smooth, tapering towards the apex, compressed, somewhat angular on one side. Tylophora asthmatica is an Indian twiner, downy when young, with opposite, petioled, linear leaves, and purplish flowers. The roots, which consist of fleshy fibres from a small head, are acrid, and are used on the Coromandel coast as a substitute for ipecacuanhas. Dr. Roxburgh the botanist, Dr. J. Anderson, and others, have borne high testimony to its utility in this respect. The dried leaves are emetic, diaphoretic, and expectorant. Dy-mock says that T. fasciata, found in various Indian hills, is used as a poison for rats.

ty-löp'-ö-da, s. pl. [Pref. tylo-, and Gr. ποός (pous), genit. ποδός (podos) = a foot.]
Zool. & Palæont.: A group of Selenodont Artiodactyles, equivalent to the family Camelidae (q.v.).
ty-lö-säu-rüs, s. [Pref. tylo-, and Gr. σαύρος (sauros), σαύρα (sauira) = a lizard.]
Palæont.: A genus of Mososauridae from the Cretaceous rocks.

ty-lö-sis, s. [Gr. τύλωσις (tylōsis) = a making or becoming callous.]
Bot.: The filling up of punctated vessels with cellular tissue.

ty-lös'-tö-ma, s. [Pref. tylo-, and Gr. στόμα (stoma) = a mouth.]
1. Zool.: A genus of Vampyri (q.v.); muzzle short, nose-leaf free in front and on sides; ears large, separate, lower lip with a V-shaped space in front, margined by warts; wing-membrane extending almost to the base of the toes, interfemoral membrane very large, extending beyond the feet. There are two species from Brazil and Surinam.
2. Palæont.: A genus of Tornatellide (q.v.), with four species, from the Lower Cretaceous rocks of Portugal. Shell ventricose, smooth or punctate-striate, spire moderate, suture ovate-lunate; outer lip periodically thickened inside and expanded, rising slightly; under lip callous, spread over body-whorl.

tym-bal, s. [Fr. timbale, from Arab. thabal a tymbal; Ital. timballo, taballo.]
Music: A kind of kettle-drum.
*A tymbal's sound were better than my voice. -Prior: Cherty.

tým-p, s. [TYMPANUM.]
Metall.: A space in the bottom of a blast-furnace, adjoining the crucible.

tým-plate, s. A plate in front of the hearth of a blast-furnace.
tým-stone, s. The stone which forms the front of the hearth in a blast-furnace.

tým-pan, *tim'-pan, *tim-pane, s. [Fr., from Lat. tympanum.] [TYMPANUM.]
1. Arch.: A triangular space or table in the corners or sides of an arch, usually hollowed, and enriched with branches of laurel, olive, oak, &c., and sometimes with emblematical figures.
*2. Music: A drum, a kettle-drum.

3. Print.: A rectangular frame hinged by one edge to the carriage of a printing-press, and having stretched across it a piece of cloth or parchment. The blank sheets are laid upon the tympan, in order to be brought down upon the forme to receive the impression. The blank sheet is fitted upon the tympan-sheet, which is of the same size as the paper to be printed, and forms a guide for placing it. The blank sheet is held by the frisket. The inner tympan is a smaller frame covered with canvas, and the two tympana hold the blanket between them.
4. A framework covered with some tenae material.
*In my present invention I make use of the vibrations given to a diaphragm or tympan by speaking into a resonant case. -Piper, March 29, 1868.

tým-pan-sheet, s.
Print.: A sheet of paper like that to be printed, laid on the tympan as a guide for position in placing the sheets to be printed.

tým-pan-al, a. [Eng. tympan; al.] The same as TYMPANIC (q.v.).

tým-pan-î, s. pl. [TYMPANO.]

tým-pän'-ic, a. & s. [Eng. tympan(um); -ic.]
A. As adjective:
1. Ord. Lang.: Like a drum or tympanum; acting like a drum-head.
2. Anat.: Of, belonging to, or connected with the tympanum.
*The tympanic bone is produced upwards and outwards and forms a tube with everted lip. -Trans. Amer. Philol. Society, xiii, 295. (1873.)

B. As substantive:
Anat. (Pl.): The bones which give attachment to the membrana tympani of the ear or its homologue; the tympanic ring and auditory process with the post-glenoid part of the temporal bone.

tympanic-bones, s. pl.
Anat.: [TYMPANIC, B.]

tympanic-plate, s.
Anat.: A lamina, the surface of which forms the anterior wall of the external auditory meatus and the tympanum, while the posterior one looks toward the glenoid fossa. It is developed from the outer surface of the tympanic ring.

tympanic-ring, s.
Anat.: An imperfect circle in the fetus, open superiorly, and enclosing the tympanic membrane.

tým-pan-î-tës, s. [Lat., from Gr. τυμπανίτης (tympanitês) = the disease defined in the article.]

Pathol.: Distension of the perietes of the abdomen, remaining unchanged under different positions of the body, not yielding readily to pressure, and when the pressure is withdrawn, elastically returning to its former state, while, if struck, there is a resonance like that of a drum. The distending medium is air within or external to the intestinal canal. The Greeks and Romans considered it a form of dropsy; afterwards it became distinguished as dry dropsy. It is sometimes one symptom of hysteria.

tým-pan-î'-ic, a. [Eng. tympanit(ês); -ic.] Pertaining or relating to tympany or tympanites; affected with tympany or tympanites.
*Producing a tympanitic action in that organ. -Kingsley: Livenshoe, ch. xii.

tým-pan-î-tis, s. [Gr. τυμπανίτις (tympanitis) = a kettle-drum; suff. -itis.]
Pathol.: Inflammation of the liolog membrane of the tympanum.

böl, böy; pöüt, jöwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing -cian, -tian = şhan. -tion, -sion = şhün; -fion, -şion = zhün. -cious, -tious. -acious = şhüs. -ble, -dic, &c. = bəl, ðəl

***tým'-pan-ize, v. l. & t.** [O. Fr. *tympantiser*; Lat. *tympantizo*; Gr. *τυμπανίζω* (*tympantízo*).] [TYMPANUM.]

A. Intrans. : To act the part of a drummer. (Coles.)

B. Trans. : To make into a drum; to stretch the skin of, as on a drum.

"If this be not to be seen asunder as Essay, stood as Jeremy, made a drum or tympantized, as though saints of God were."—*Oley*; *Life of G. Herbert*, M. 2. b. (1671.)

tým'-pan-ō (pl. **tým'-pan-ī**), * **tím'-pan-ō, s.** [Ital.] [TYMPANUM.]

Music. : A kettledrum (said especially of the kettledrums of an orchestra).

tým-pan-ō-, pref. [TYMPANUM.]

Anat. : Of, pertaining to, or connected with the tympanum.

tympano-hyal, a. & s.

A. As adj. : Of or pertaining to the tympanum and the hyoid bone. Used in the term, the *tympano-hyal* bones.

B. As subst. : The styloid process of the temporal bone, the stylo-hyals. (*Flower*.)

tým-pan-ōph'-ōr-a, s. [Gr. *τύπανον* (*týpanon*) = a kettle-drum, and *φορός* (*phorós*) = bearing.]

Palaeobot. : A genus of Fossil Ferns from the Lower Oolite of Yorkshire. Known British species two.

tým'-pan-ūm, s. [Lat., from Gr. *τύπανον* (*týpanon*) = a drum, a roller, area of a pediment, panel of a door, from *τύπανον* (*týpanon*) = a drum, from *τύπτω* (*typtō*) = to strike.]

I. Ord. Lang. : A drum, a framework covered with some tense material.

II. Technically :

1. Anat. : The drum, middle ear, or middle chamber of the ear; a narrow, irregular cavity in the substance of the temporal bone, placed between the inner end of the external auditory canal and the labyrinth. Its roof is formed by a thin plate of bone situated on the upper surface of the petrous bone, its floor is a narrow space, its outer wall is formed mainly by a thin, semitransparent membrane—the *membrana tympani*—which closes the inner end of the external auditory meatus; its inner wall is uneven, its anterior extremity is narrowed by the gradual descent of the roof, and is continued into the Eustachian orifice, and its posterior one has at its upper part a large, and several small openings leading into the mastoid cells. The tympanum receives the atmospheric air from the pharynx through the Eustachian tube, and contains a chain of small bones by means of which the vibrations communicated from without to the *membrana tympani* are in part conveyed across the cavity to the sentient part of the internal ear. (*Quain*.)

2. Architecture :

(1) The triangular panel of the fastigium or pediment of any building, comprehended between its corona and that of the entablature.

TYMPANUM.
(From Doorway, Escondine.)

(2) The space between the top of a door and the arch enclosing it.

(3) The die of a pediment.

(4) The panel of a door.

3. Bot. : The same as Epiphragm (q.v.).

4. Hydraul. Engin. : An ancient form of wheel for elevating water. Its original form was like that of a drum, whence its name. It was a cylinder with radial partitions and small openings in the periphery, which admitted a certain quantity of water into the chambers thus formed as those portions of the periphery came in turn to be submerged. As the wheel revolved, such portions of water were

carried up and flowed along the partition toward the axis around which the water was discharged, being elevated to a height nearly equal to the radius of the wheel. The wheel was driven by floats on the periphery or side of the wheel, or by means of animal or manual power, and had several modifications.

5. Mach. : A kind of hollow tread-wheel, wherein two or more persons walk, in order to turn it, and thus give motion to a machine.

6. Music. : A hand-drum or tambourine, but covered with parchment, back and front. It was used in conjunction with various kinds of harps, lyres, and pipes, cymbals of metal, the straight brass trumpet and curved brass horn, the castanets of wood and metal.

"Ireland [with oge] uses the harp and pipe, which he calls *tympantum*."—*Drayton*: *Poly-Olision*, s. 6.

tým'-pan-ý, * tym-pan-ic, s. [Fr. *tympante*, from Gr. *τυμπανίας* (*tympantías*) = a kind of dropsy in which the belly is stretched tight like a drum.]

1. Lit. : The same as TYMPANITES (q.v.).

"So that as in a tympany their very greatestes was their disease."—*Fulter*: *Worthies*; Cambridgehire.

2. Fig. : Inflation, conceit, bombast, turgidity.

"In the first leaf of my defence, I fore-told you so much; as finding nothing in that swollen bulk, but a moor unsound tympante, instead of a truly solid conception."—*Br. Hall*: *A short answer*. (Freel.)

Tým-dár'-i-dæ, s. pl. [Lat. = the sons of Tyndarus; Gr. *Τυνδαρεος* (*Tyndareos*), * *Τυνδαρος* (*Tundaros*). See def.]

1. Class. Mythol. : Castor and Pollux, the sons of Tyndarus, king of Lacedæmon and husband of Leda.

2. Meteor. : One of the names given to two meteors or balls adhering to the rigging of a ship during certain states of the weather. More generally called Castor and Pollux.

* **týne, v. t.** [TINE, v.]

* **týne** (1), s. [TINE, s.]

* **týne** (2), s. [TEEN.] Anxiety, pain, sorrow.

* **tý-ný, a.** [TINY.]

* **týp'-al, a.** [Eng. *typ(e)*; -al.] Of or pertaining to a type; constituting or serving as a type; typical.

týpe, * tipe, s. [Fr., from Lat. *typum*, accus. of *typus* = a figure, an image, a type, from Gr. *τύπος* (*typos*) = a blow, a mark, a figure, a type, a character of a disease, from *τύπτω* (*typtō*) = to strike, to beat; Sp. & Ital. *tipo*.]

1. Ordinary Language :

(1) Distinguishing mark or stamp; sign, emblem, characteristic.

"Thy father bears the type of King of Naples."—*Shakesp.*: *3 Henry VI.*, l. 4.

(2) An allegorical or symbolical representation of some object (called the antitype); a symbol, a sign, an emblem. [II. 6.]

"Informing them by types And shadows of that destined seed to bruise The serpent, by what means he shall achieve Mankind a deliverance."—*Milton*: *P. L.*, xii. 322.

(3) An example or specimen of any class which is considered as eminently possessing or exhibiting the properties or character of the class; the ideal representation of a group combining its essential characteristics; a general form or structure pervading a number of individuals. (Used especially in natural science.)

(4) In the same sense as II. 5.

"He who wishes to trace the art in its gradual progress, from the wooden and immovable letter to the movable and metal type, and to the completion of the whole contrivance, will receive satisfactory information from the annals of the elaborate Metairie."—*Rnoz*: *Essay* 185.

II. Technically :

1. Art :

(1) The original conception in art which becomes the subject of a copy.

(2) The design on the face of a medal or coin.

2. Biology :

(1) A common plan to which certain groups of animals conform; hence, often used as equivalent to sub-kingdom, or the first great division of a sub-kingdom. To Lamarck is due the credit of a great advance in general morphology, by pointing out that mammals, birds, reptiles, and fishes possess one essential in common—a spinal column interposed between a cerebro-spinal and a visceral cavity,

which is absent in all other animals. Hence, he classed the former as Vertebrata and the latter as Invertebrata. The labours of other naturalists soon established the fact that the Invertebrata did not conform to one common plan or type; and in 1795 Cuvier showed that at least three morphological types, as distinct from each other as they are from the Vertebrata, existed among the Invertebrata: Mollusca, Articulata, and Radiata. Von Baer, some years later, came to the same conclusion on embryological grounds. [ZOOLOGY.]

"Even the hiatus between the Vertebrata and the Invertebrata is partly, if not wholly, bridged over; and though among the Invertebrata there is no difficulty in distinguishing the more completely differentiated representatives of such types or common classes as those of the Anthropoda, the Annelida, the Mollusca, and the Forifera, yet every year brings forth fresh evidence to the effect that just as the plan of the plant is not absolutely distinct from that of the animal, so that of the Vertebrata has its points of community with certain of the Invertebrates; that the Arthropod, the Mollusk, and the Echinoderm plans are united by that of the lower worms, and that the plan of the latter is separated by no very great differences from that of the Coleoptera and that of the Sponge."—*Huxley*: *Anat. Insect. Anim.*, pp. 49, 50.

(2) A typical representative. (Applied to an individual, a species, a genus, a subfamily, or a family having the characteristics of the group under which it is immediately comprised.)

"The type of a genus should be the species which best exhibits the characters of the group, but it is not always easy to follow out this rule; and consequently the first on the list is often put forward as the type."—*Woodward*: *Mollusca* (ed. Tate), p. 49.

3. Chem. : The type-theory assigns the constitution of compounds to certain simple bodies such as hydrogen, water, ammonia, and marsh gas, CH₄, and proceeds on the assumption that the hydrogen of the type substance is replaced by the element or compound radical entering into combination with it. In this view the alcohols may be regarded

as belonging to the water type, $\text{H} \left\{ \begin{matrix} \text{H} \\ \text{O} \end{matrix} \right.$, and to be formed by the substitution of H in $\text{H} \left\{ \begin{matrix} \text{H} \\ \text{O} \end{matrix} \right.$

by the alcohol radical—e.g., ethylic alcohol is represented as $\text{C}_2\text{H}_5 \left\{ \begin{matrix} \text{H} \\ \text{O} \end{matrix} \right.$. In like manner the

whole series of amines and amides may be referred to the ammonia type, in which one or more atoms of H are replaced by radicals. Triethyl amine may thus be regarded as being ammonia, in which all the hydrogen is replaced

by ethyl = $\text{C}_2\text{H}_5 \left\{ \begin{matrix} \text{H} \\ \text{N} \end{matrix} \right.$. Oxamide again is shown

with a divalent radical replacing two atoms of hydrogen in a double molecule of ammonia—oxamide = $\text{C}_2\text{O}_2 \left\{ \begin{matrix} \text{H} \\ \text{N}_2 \end{matrix} \right.$. The type-theory was

systematized by Gerhardt some years ago, but it is now largely superseded by the use of formulae representing a more accurate acquaintance with the internal constitution of chemical compounds.

4. Pathol. : The order in which the symptoms of a disease succeed each other. The type may be continued, intermittent, or remittent.

5. Printing :

(1) A parallelepipedon or square prism with a raised letter on the upper end, used in printing. [PRINTING.]

(2) Types collectively; the quantity of types used in printing. Types must be of a uniform height, and perfectly true in their angles, otherwise they could not be locked up in a forme (q.v.). The parts of a type are known as body, face, shoulder, nick, groove, and feet. The fine lines at the top and bottom of a letter are called serifs; the parts of the face of some letters, such as *j* and *k*, which project over the body, are called kerns. Type is distinguished by names indicating the size of the body and the consequent number which will go in a given space; by the different sizes or styles of face on a given body; by the case, as upper or lower, caps or small letter; by peculiar style or ornamental characteristic.

(a) As to size: Semi-nonpareil, brilliant, gem, diamond, pearl, ruby, nonpareil, emerald, minion, brevier, bourgeoisie, long printer, small pica, pica, English, great primer, canon, &c. [See these words.]

(b) As to face: Full, heavy or fat, light, condensed, elongated, compressed.

(c) As to case: Caps or upper case; small letters, or lower case.

(d) As to style: Roman, Gothic, black letter, script, German text, Gothic, antique, sans serif, old style, hair fine, &c.

fâte, fât, fâre, amidst, whât, fáll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôt, or, wôre, wôlf, wôrk, whô, sôn; mûte, oûb, oûre, unîte, cûr, rûle, fûll; trý, Sýrian. æ, œ = ê; ey = â; qu = kw.

A font or font is a complete assortment of any given kind of type, the number of each letter being in proportion to the frequency of its occurrence in printed matter, thus:

a ... 2,000	h ... 2,000	o ... 5,000	u ... 4,500
b ... 2,000	i ... 2,000	p ... 2,400	v ... 1,500
c ... 4,000	l ... 800	q ... 400	w ... 2,500
d ... 4,000	m ... 800	r ... 7,000	x ... 500
e ... 14,000	n ... 1,000	s ... 5,000	y ... 2,000
f ... 2,000	u ... 2,000	t ... 10,000	z ... 800
g ... 3,000	v ... 2,000		

A complete font of type, including roman and italic, with capitals, figures, points, and signs, consists of 226 different characters.

6. *Theol.*: An object, office, institution, individual, or action by which Christ, his life, death, atoning sacrifice, was prefigured. [TYPOLOGY.]

¶ For the difference between *type* and *figure* see FIGURE.

¶ *In type*: Set up, ready for printing; having all the types duly arranged so that an impression can be taken when desired.

type-block, s. A block having upon it raised figures representing letters or numbers.

type-casting, s. The same as TYPEFOUNDING (q.v.).

type-casting and setting machine, s. One which makes its type from matrices, and sets them in a row, or in galley, as the letter-keys of the machine are manipulated in the order of the copy.

type-composing machine, s. [TYPESETTING MACHINE.]

type-dressing machine, s. A machine forming a substitute for the usual mode, which is to rub the type by hand upon the plane surface of a stone, using as an auxiliary a scraper or file.

type-founder, s. One who casts or manufactures types.

type-founding, s. The act, art, or practice of casting or manufacturing movable metallic types for use by printers.

type-foundry, type-foundry, s. A place where types are manufactured.

type-gauge, s. A stick or rule having upon its sides or edges the measure of the various sizes of type, so as to readily indicate the number of lines by laying it alongside a column of matter or proof, or the ems in a line by placing it along the line.

type-high, a. Of the height or length of printed type = $\frac{1}{11}$ of an inch.

type-metal, s. A white alloy for casting type, composed of lead, antimony, and tin. Large type has the largest proportion of lead; small type has more antimony to render it harder and enable it to resist wear. Type is sometimes faced with copper or with nickel, to render it more durable. The nickel has the additional advantage of not acting on or being affected by the chemicals in the ink.

Type-metal [is] the alloy of lead and antimony used to casting printer's types, the usual proportions being one part of antimony to three of lead, but a superior and harder kind of type is sometimes made by alloying two parts of lead with one of antimony and one of tin. Both these alloys take a sharp impression from the mould or matrix, owing to their expansion on solidification, and they are hard enough to stand the work of the press, without being brittle or liable to fracture. — *Brandis & Cox.*

type-setter, s.
1. One who sets up type; a compositor.
2. A type-setting or composing machine (q.v.).

type-setting, s. The act or process of setting up or arranging types in the composing-stick, ready to be printed from.

Type-setting machine: A composing-machine for type. There are several varieties of machines for this purpose. The older styles have separate grooves, receptacles, or galleys for each sort, and the mechanical arrangement is such that on touching a key, arranged with others like the key-board of a piano, the end type of a row is displaced, and is conducted in a channel or by a tape to a composing-stick, where the types are arranged in regular order in a line of indefinite length, and from whence they are removed in successive portions to a justifying-stick, in which they are spaced out to the proper length of line required. Another and later machine casts the type as set, assembling the same, properly justified, on galley. It acts automatically,

working from a perforated roll previously prepared by a very ingenious machine somewhat resembling a type-writer. The term is also improperly applied to the *linotype*, a machine which casts type lines from assembled matrices.

Type-setting telegraph: A form of telegraph in which the message at the receiving end is set up in type. The title is also held to mean, but does not correctly define, the instrument in which certain letters are made to deliver an impression in consecution, and so spell out the message.

type-wheel, s. A disk having raised letters on its periphery, employed for printing or stamping, and in some forms of telegraph.

type-write, v.t. To write with a type-writing machine.

type-writer, s.

1. A mechanical contrivance for superseding the use of the pen, and by which letters are produced by the impression of inked types. Type-writers are of various kinds, but all are furnished with (1) a movement for bringing the type to a common printing point; (2) a contrivance for inking the type on the paper; and (4) a contrivance for spacing words and lines. The type-writers ordinarily in use are about the size of a sewing-machine, and are worked by means of keys, each communicating with a lever terminating in a sort of transverse bar or crutch head which carries a type on each extremity. By means of two keys at opposite ends of the board the paper carrier is moved backwards or forwards, so that in one position it receives a blow from one end of the transverse bar, and in the other position from the second end. In an older and simpler form of type-writer each key governs a lever furnished with a single character, instead of one at each end. The types are inked by means of an inking-ribbon, placed directly over the point where all the types strike the paper; it is made to move a slight distance every time a key is struck, so that every type touches it in a fresh place. The work produced by a type-writer is as legible and nearly as uniform as ordinary printing, and the average speed of a good operator is from fifty to seventy words a minute.

2. A person who uses or operates a type-writing machine.

type-writing, s. & a.

A. *As subst.*: The act or art of producing letters and words with a type-writer; the work done with a type-writer.

B. *As adj.*: Of, belonging to, or produced by means of a type-writer (q.v.).

type-writist, s. One who type-writes.

type-written, a. Produced or copied by means of a type-writer (q.v.).

type, v.t. [TYPE, s.]

*1. To exhibit or represent by a type or symbol beforehand; to prefigure.

*2. To exhibit an example or copy of; to represent, to typify.

3. To reproduce by means of a type-writer (q.v.).

type-script, s. A type-written document, as distinguished from manuscript.

† **typh, s.** [TYPHUS.] (See compound.)

typha, s. [Lat. *typha*; Gr. *τύφη* (*typhē*) = a cat's tail. See def.]

Bot.: Reed-mace, Cat's tail, or Bulrush. Spikes cylindrical, perianth consisting only of hairs, stamens monadelphous, anthers somewhat wedge-shaped, ovaries stalked, fruit minute, seed cylindrical, testa striate. Known species six or eight, from temperate and tropical countries. One of these, *Typha latifolia*, known popularly by the titles above given, is a common plant in the United States, being found in muddy pools and ditches, and in the shallow edges of streams. It is a smooth-

stemmed, tall plant with spikes six to ten inches long, composed of slender, downy flowers, packed solid. The leaves are sword-shaped and erect. The plant is from three to six feet high. This species occurs also in Europe and is widely spread over the world, as is also a smaller species, *T. angustifolia*. In India the typhas are used for mat-making and stuffing chairs, and the fibre of *T. angustifolia* has been tried successfully for paper-manufacture. Elephants are fond of an Indian species, *T. elephantina*, whence the name, and its roots bind the soil. In Europe the pollen of the Typha is sometimes used like that of Lycopodium in the manufacture of fireworks. Mixed with water it forms a kind of bread eaten in Selnde, Western Australia, and New Zealand. The rhizomes abound in starch, and are used in Kashmir as food. They are somewhat astringent and diuretic, and are given in Eastern Asia in dysentery, gonorrhoea, and the measles. The down of the ripe fruit has been applied in India, like medicated cotton-wool, to ulcers and wounds.

typha'-phæ'-sæ, s. pl. [Mod. Lat. *typha*(s); Lat. fem. pl. adj. suff. -*æces*.]

Bot.: Typhada or Bulrushes; an order of Endogena, alliance Arales. Herbaceous plants growing in marshes or ditches. Rootstock creeping, stem without nodes, leaves rigid, ensiform, with parallel veins, apathe none. Flowers in cylindrical spikes or heads, monocious, the males uppermost; sepals reduced to three or more scales, or even to a bundle of hairs; corolla none. Males: stamens three or six; filaments long, sometimes monadelphous. Females: styles short; stigmas simple; ovary one- rarely two-celled; fruit dry, indehiscent, one-celled, one-seeded, made angular by mutual pressure. They are found chiefly in the northern hemisphere and the temperate parts. Known genera two, Typha and Sparganium (q.v.), species thirteen (*Linley*), twelve (*Sir J. Hooker*).

ty'-phád, s. [Lat. *typha*(s); Eng. suff. -*ad*.]
Bot. (Pl.): The Typhaceæ. (*Linley*.)

typh-i-a, s. [TYPHUS.]
Pathol.: Typhoid fever (q.v.).

typh'-ine, s. [Eng. *typha*(s); -*ine*.]
Med.: A term proposed by Dr. William Farr for the special zymotic principle by which he considered typhus fever was propagated.

ty'-phín'-i-a, s. [Mod. Lat., from *typhus* (q.v.).]
Pathol.: Relapsing fever.

* **typh'-ia, s.** [Gr. *τύφος* (*typhos*) = smoke.]

Zool. & Palæont.: A genus of Muricidae, with nine species, from the Mediterranean, West Africa, Cape, India, and Western America, to a depth of fifty fathoms. Shell like Murex, but with tubular spines between the varices, of which the last is open, and occupied by the excurrent canal.

typh-lich'-thýs, s. [Gr. *τυφλός* (*typhlos*) = blind, and *ἰχθύς* (*ichthys*) = a fish.]

Ichthy.: A name given to those individuals of the genus *Amblyopsis* (q.v.), in which the ventral fins are absent.

typh-li'-na, s. [TYPHLINE.]

Zool.: A genus of Typhlopidæ, with one species, *Typhlina lineata*, from Java, Sumatra, and Penang. Snout covered with large shields; lower jaw without teeth.

typh-li'-nō, s. [Gr. *τυφλίνος ὄφις* (*typhlinos ophis*) = a kind of snake, resembling the blind-worm.]

Zool.: A genus of Typhlopidæ, with one species, from the Cape of Good Hope.

typh-li'-tis, s. [Gr. *τὸ τυφλόν* (*to typhlon*) = the cæcum; suff. -*itis*.]

Pathol.: Inflammation of the cæcum, with pain and tenderness in the right iliac fossa, constipation, sometimes going on to perforation, producing perityphitis. [Former designation of the disease now known as appendicitis (q.v.).]

typh'-lō'-nūs, s. [Gr. *τυφλός* (*typhlos*) = blind, and *ὄνος* (*onos*) = a sea-fish mentioned by Aristotle.]

Ichthy.: A genus of Ophidiidæ. Head large, compressed, most of the bones cartilaginous; eye not visible externally; scales thin, small,

bōil, bōy; pōut, jōwī; cat, çell, chorn, çhin, bench; go, ðem; thin, thīs; sin, aš; expect, Xenophon, exist. ph = ł -elian, -tian = shañ. -tion, -sion = ahún; -ñion, -ñion = zhün. -cion, -tious, -sions = shūa. -ble, -dle, &c. = bəl, ðəl.

deciduous; villiform teeth in jaws, on vomer and palatine bones. A deep-sea fish, of which only two specimens are known, from a depth of more than 2,000 fathoms in the Western Pacific.

*typh-lōph-thāl-mōg, a. pl. [Mod. Lat., from Gr. τυφλός (typhlos) = blind, and ὄφθαλμός (ophthalmos) = the eye.]

Zool.: An old group of Scincidae, with two genera, Dibamus and Typhline (q.v.). They are now more generally ranged under Typhlopidae (q.v.).

typh-lōp-i-dæ, *typh-lōps-i-dæ, a. pl. [Mod. Lat. typhlops; Lat. fem. pl. adj. suff. -i-dæ.]

Zool.: Blind Burrowing Snakes; a family of innocuous Snakes, in some classifications elevated to a sub-order, with two groups, Catodontes (having teeth only in the lower jaw) and Epanodontes (with teeth only in the upper jaw). There are four genera, with seventy species, distributed in tropical and sub-tropical regions. Body long, cylindrical, vermiform, and rigid; vestiges of hind-limbs present in the shape of rod-like bones; eyes present, but small, and covered by the more or less transparent ocular and pre-ocular shields; scales smooth, imbricated alike on back and belly. This family contains forms which are most remote from the true Ophidian type, and which, in older classifications, formed the group Typhlophthalmes (q.v.). They live under ground, their rigid body and short curved tail being adapted for burrowing. After rain they occasionally appear above ground, and then they are very agile in their serpentine movements. The eye, which is scarcely visible in many species, can give to them only a vague and indistinct perception of light. They are oviparous, and feed on worms and small insects. The tongue is forked, and, as in other snakes, frequently exerted.

typh-lōps, s. [Gr. τυφλός (typhlos) = blind, and ψ (psi) = the eye.]

Zool.: The typical genus of Typhlopidae (q.v.), with over sixty species, having approximately the range of the family. Body long, slender, cylindrical; head depressed, rounded; tail short, rounded at the extremity, and armed with a spine; scales small.

typh-lō-scīn-cūs, s. [Gr. τυφλός (typhlos) = blind, and Mod. Lat. scincus (q.v.).]

Zool.: A genus of Acontidae, with one species from Ternate. It is closely akin to Acontia (q.v.).

ty-phōid, a. [Gr. τύφος (typhas) = smoke, cloud, stupor, arising from fever; εἶδος (eidos) = resemblance.] [TYPHUS.] Of, pertaining to, or resembling typhus (q.v.).

¶ Often used substantively = Typhoid-fever (q.v.).

typhoid-fever, s.

Pathol.: A kind of continued fever which is known by many names. It was called "typhoid" and "abdominal typhus" from its supposed resemblance to typhus or gaul fever. It is often known as "low fever" and "slow fever," from its duration; and as "autumnal" or "fall" fever, from the time of the year at which it is most prevalent. The term "enteric fever" was applied to it from the fact that the intestines are always attacked in this disorder; but "gastric fever" is a misnomer, for there is never any organic disease of the stomach. Typhoid fever results from the introduction of a specific poison into the system, and is said to be due to the development of a specific bacillus. It is not contagious, and the poison appears to be communicable only from the discharges. The diffusion of the disease is generally due to the excrement of some patient finding its way into the drains, and thence into wells, or into streams or rivers, the water of which is used for drinking purposes. Hence it is of the highest importance that the excreta of patients suffering from typhoid should be thoroughly disinfected, and, if possible, buried at some distance from any dwelling-house; but, as in large towns this latter precaution is impossible, disinfectants must be liberally used. In places where the supply of water is from wells, all drinking-water should be boiled, and it is a wise precaution during an epidemic to have the milk scalded, as the prevalence of typhoid in London in 1873 was clearly traced

to the contamination of the milk by the excreta of a man who had died of typhoid on a milk-farm. The period of incubation usually extends over two weeks, being preceded by loss of appetite, languor, headache, dizziness, and bleeding from the nose in many cases. From the tenth to the twelfth day the rash usually appears. It is very slight, and, unless care is taken, may be entirely overlooked. The spots are rose-coloured, about the size of pin's head, disappearing on pressure, but reappearing as soon as the pressure is removed. The patient suffers from debility and diarrhoea, and there is dulness over the region of the spleen, which is enlarged. The stools are of a pea-soup colour, and the special lesion observed is enlargement of and deposit in Peyer's glands and the moutre solitary glands of the smaller, and sometimes of the large intestine. Sometimes the mental condition is irritable, with illusions and hallucinations, and patients speak in a loud voice and gesticulate wildly. In the third week the symptoms continue with undiminished vigour, and sometimes increase in intensity, with stupor to such a degree that great difficulty is experienced in rousing the patient. In favourable cases, in the fourth week there is a change for the better; the temperature falls, the symptoms are alleviated, the sleep becomes more natural, the motions firmer and less frequent, and the appetite slowly returns. After the thirtieth day, in the majority of cases, no more spots appear, the fever is at an end, and the patient passes slowly into a stage of convalescence. In typhoid fever relapses are common, and dangerous complications, especially of the lungs, may ensue. If the ulceration of the intestines proceeds so far that they are perforated, death almost invariably follows, and in all cases the mortality is high. The main chance of recovery depends on careful nursing, under the direction of a skilled medical man. The chief treatment consists in reducing the temperature, usually by large doses of quinine. The fever produces intense thirst, and plenty of fluid should be given. From the ulcerated state of the bowels, solid food must be strictly avoided, beef-tea, mutton broth, arrowroot, milk, and eggs being the best forms of nourishment. Stimulants are rarely needed in the early stages of the disease, but may be used with advantage, under medical direction, if the heart's action is weak and the pulse intermittent. [TYPHUS.]

ty-phō-mā-nī-a, s. [Gr. τύφος (typhos) = typhus, and μανία (mania) = madness.]

Pathol.: The low muttering delirium which accompanies typhoid-fever.

ty-phō-nī-ūm, s. [Gr. τυφώσις (typhōsis) = of or belonging to Typhon, fatusion.]

Bot.: A genus of Dracunculaceæ, closely akin to Arum, but with a single erect ovule in the ovary, and a more sharply pointed spadix. The very acrid roots of *Typhonium orbiculare*, a native of Eastern Asia, are used in India as poultices.

ty-phōon, *ty-phōn, s. [Chin. tai-fung = great wind. The spelling has been influenced by comparison with Gr. τυφῶν (typhōn) = a whirlwind.]

Meteor.: The name given to a type of storm common on the coast of Tonquin and China as far north as Ningpo and the south-east coast of Japan. Typhoons resemble the storms of Western Europe in their general characteristics, but they are often accompanied by a high wave, which, advancing inland, causes great destruction of life and property. Typhoons occur from May to November, but are most frequent in July, August, and September. (See extract.)

"The chief points of difference between the hurricanes and typhoons of the tropics and the cyclones of higher latitudes are these:—Tropical cyclones are of smaller dimensions, show steeper barometric gradients, and therefore stronger winds, and advance at a slower rate over the earth's surface. Another point of difference is that a large number of the hurricanes of the West Indies and the typhoons of Eastern Asia first pursue a westerly course, which gradually becomes more easterly, and on arriving about lat. 20° they recurve, and thereafter pursue a course to north-eastwards."—*Encyc. Brit.* (ed. 9th), xvi. 155.

ty-phūs, a. [TYPHUS.] Pertaining or relating to typhus (q.v.).

ty-phūs, s. [Gr. τυφός (typhus).] [TYPHOID.] Pathol.: Typhus-fever; a contagious fever, which occurs mainly in temperate and cold climates, and often rages as an epidemic. It is also known as "spotted," "epidemic," or

"contagious" fever, and was formerly called "camp" or "gaol" fever, from its prevalence in camps and prisons. It is most prevalent amongst females and young people, but the highest rate of mortality from the disease occurs amongst adult males. The contagion is communicated through the air, and probably proceeds from the breath, which has a peculiar foul smell. It is not communicated from the clothes or excreta, and consequently, by properly isolating the patient, the spread of the fever may be prevented. The period of incubation is supposed to range from a few hours to several days. The earliest symptoms are heaviness and listlessness, with a confusion of ideas, which afterwards develops into delirium; an eruption of round, dark, reddish-brown spots then makes its appearance, the temperature is high, the pulse very rapid, and the patient suffers from extreme weakness. The condition of the bowels varies in different patients, for there may be either diarrhoea or constipation. The duration of an uncomplicated case of typhus varies from twelve to twenty-one days. The greatest danger is usually during the second week of the illness, death seldom ensuing before the seventh day. The treatment of typhus consists in placing the patient under the best possible hygienic conditions, keeping up the strength with beef-tea, mutton-broth, milk, eggs, arrowroot, &c., and in alleviating the most prominent and distressing symptoms, such as relieving thirst, by the free administration of cooling drinks, controlling sleeplessness, headache, and delirium by small doses of opium, keeping the bowels open by mild laxatives, &c. Stimulants should not be given to children, and many adults do well without them, but alcohol may be advantageously used in the case of old persons, or where the patient has been accustomed to the free use of stimulants. When recovery takes place, it is generally very rapid, a great change in the condition of the patient often occurring in twenty-four or forty-eight hours. The only complication at all common is a form of pneumonia.

ty-pōg-ra-phy, s. [Gr. τύπος (typos) = a type, and γραφή (graphē) = to write; Fr. typographie.]

1. Typical, figurative, or emblematical representation. 2. The art of printing; the art or operation of impressing letters and words on paper by means of types.

ty-pō-līte, s. [Gr. τύπος (typos) = a mark, and λίθος (lithos) = a stone.] An old name for a stone or fossil which has on it impressions or figures resembling plants or animals.

ty-pōl-ō-ē-y, s. [Gr. τύπος (typos) = a type; εἶδος (eidos) = a type; -ology.]

1. A discourse on types, especially those of Scripture. 2. The doctrine of types. A department of theology which investigates Scripture types, and the principles applicable to their interpretation. It starts from the position that the leading truths of revealed religion were the same under the Patriarchal, the Jewish, and the Christian dispensations. These truths were, however, revealed to the earlier worshippers more or less obscurely, being expressed by symbols, instead of stated directly in words. Each type employed had a twofold meaning and purpose—it was a symbol of some religious truth and predictive of the antitype, Christ. [SACRIFICE, II. 4.]

ty-pō-thēr-ī-ūm, s. [Gr. τύπος (typos) = a type, and θήριον (thērion) = a wild beast.]

Palæont.: Another name for the genus Mesotherium (q.v.).

ty-pōth-ē-ta (pl. ty-pōth-ē-ta), s. [Gr. τύπος = a type, and θέτω (theto) = to lay down.]

1. The art and lore of typography. 2. A member of an association or guild made up of printers and publishers. [T-] 3. (Pl.) The name of various societies of printers and publishers. [T-]

tyr-an, v.t. [TYRAN, s.] To act the tyrant; to tyrannize over.

ty-ran-nio-al, ty-ran-nio, a. [Fr. tyrannique, from Lat. tyrannicus; Gr. τυραννικός (tyrannikos) = pertaining to or characteristic of a tyrant; Sp. tiranico; Ital. tirannico.]

1. Pertaining to or characteristic of a tyrant; suiting a tyrant; despotic, cruel, arbitrary.

"They blame Lewis the XI. for bringing the administration royal of France, from the lawful and regular reign, to the absolute and tyrannical power and government."—Smith: Commonwealth, bk. I, ch. vii.

2. Acting like a tyrant; arbitrary, cruel, despotic, imperious.

"[Tyrant] by the ancient Greeks, was applied to all kings, as well the just and merciful, as the cruel, and whom we now call tyrannical."—Pott: Antiquities, bk. II, ch. xii.

ty-ran-nio-al-ly, adv. [Eng. tyrannical; -ly.] In a tyrannical, despotic, cruel, or arbitrary manner; like a tyrant; with unjust or arbitrary exercise of power.

"Brutus being chosen Consul of Rome, . . . chased out of the city Tarquinius Superbus, who reigned tyrannically."—P. Holland: Plutarch, p. 744.

ty-ran-nio-al-ness, s. [Eng. tyrannical; -ness.] The quality or state of being tyrannical; tyrannical disposition or practice.

ty-ran-ni-ō-dal, a. [Eng. tyrannicide(-); -al.] Pertaining or relating to tyrannicide, or to one who kills a tyrant.

"Its blossom sheathed the sheer tyrannicidal sword."—A. C. Swinburn: Athens.

ty-ran-ni-ōide, s. [Lat. tyrannicidium = the killing of a tyrant; tyrannicida = one who kills a tyrant, from tyrannus = a tyrant, and cædo (in compos. -cido) = to kill; Fr. tyrannicide.]

1. The act of killing a tyrant.

"Tyrannicide, or the assassination of usurpers and oppressive princes, was highly extolled in ancient times."—Bacon: Principles of Morals, § 2.

2. One who kills a tyrant.

"The adulatory verses made in commemoration of these illustrious tyrannicides."—Comberland: Observer, No. 49.

ty-ran-ni-ōs, s. pl. [Mod. Lat. tyrann(us); Lat. fem. pl. adj. suff. -inos.]

Ornith.: Tyrant-birds, Tyrant Shrikes; a family of Passerine Birds, formerly made a sub-family of Muscipadæ. Bill long, broad and flat at base, sides compressed to tip, which is hooked; nostrils hidden by plumes and bristles; wings long and pointed; tail moderate; tarsi broadly scaled; outer toe longer than inner, united to middle at base; claws short and sharp. They form an extensive and characteristic American family, ranging over the whole continent, from Patagonia to the arctic regions, and are found in the chief American islands. Five sub-families are reckoned: Conopophagæ, Tanipterinæ, Platyrhynchinæ, Elaïnæ, and Tyranninæ, embracing altogether seventy-one genera and more than 300 species.

ty-ran-ni-ōs, s. pl. [Mod. Lat. tyrann(us); Lat. fem. pl. adj. suff. -inos.]

Ornithology: 1. A sub-family of Muscipadæ, equivalent to the modern Tyrannidæ (q.v.).

2. The typical sub-family of Tyrannidæ, with seventeen genera and eighty-nine species, having the range of the family.

* **tyre (2), s.** [TIRE (3), s.]

* **tyre, v.t.** [TIRE (1), v.]

tyr-reo'-ite, s. [After the Island of Tyree or Tyrie, Scotland, where found; suff. -ite (Min.).]

Min.: A powder obtained from the pink marble of Tyree, Scotland. It was found by Hedde to be composed of sesquioxide of iron, 38.22; alumina, 8.23; protoxide of iron, 8.16; protoxide of manganese, 0.39; magnesia, 29.94; lime, 2.21; water, 12.47; phosphoric acid, 4.71; silica, 1.02 = 100.36. As pointed out by E. S. Dana, no name should have been given to such a mixture.

Tyr-i-an, a. & s. [Lat. *Tyrius*.]

A. As adjective:

- 1. Pertaining or belonging to ancient Tyre.
- 2. Being of a purple colour.

B. As subst.: A native or inhabitant of Tyre.

* **Tyrian-cynosure, s.**

Astron.: Ursa Minor.

"And thou shalt be our star of Arcady, Or Tyrian cynosure."—Milton: *Comus*, 344.

Tyrian-purple, s. A celebrated purple dye formerly prepared at Tyre from shell-fish. [MUREX, PURPORA.]

tyr'-ite, s. [After the Norwegian God of War, Tyr; suff. -ite (Min.).]

Min.: A mineral occurring in pyramidal crystals, embedded in orthoclase, but implanted on black mica, at localities near Hampeyr, Arendal, Norway. Hardness, 6.5; sp. gr. 5.13 to 5.56. Compos.: essentially a columbate of yttrium, cerium, and iron. Is referred by most mineralogists to Fergusonite (q.v.).

tyr'-o-ic, s. [Prop. *tiro*, from Lat. *tiro* = a recruit, a novice, a tiro; root doubtful.] A beginner in learning; one who is engaged in learning, or who has only mastered the rudiments of any branch of knowledge; a novice.

* **tyr-ō-qin-i-ūm, * tyr-ō-qin-y, s.** [Lat. *tirocinium* = the state of a tiro, from Lat. *tiro* = a tiro.] The state or condition of being a tiro, beginner, or novice; novitiate, apprenticeship. [TIROCINIUM.]

tyr-ō-glyph-ūs, s. [Gr. *τυρός* (*tyros*) = cheese, and *γλύφω* (*glyphō*) = to hollow.]

Zool.: A genus of Acaridae, separated from the original genus *Acarus* (q.v.), to include the Cheese-mites. [CHEESE-MITE.]

Tyr-ō-lēse, a. & s. [See def.]

A. As adj.: Pertaining or relating to the Tyrol; as, a Tyrolean air.

B. As subst. (Sing. or Pl.): A native of the Tyrol; the people of the Tyrol.

Tyr-rō-lī-ēnne, s. [Fr.]

Music.: A song accompanied with dancing; a popular Tyrolean song or melody, especially one in which rapid alternation in melodic progressions of the natural and falsetto voice is introduced.

tyr-rō-lite, s. [After Tyrol, Austria, where first found; suff. -ite (Min.); Ger. *tyrolit*, *kupferschaum*.]

Min.: An orthorhombic mineral occurring in radiating groups of thin plates, also massive. Hardness, 1.0 to 2.0; sp. gr. 3.02 to 3.098; lustre on cleavage faces pearly; colour, pale apple- and verdigris-green, sometimes inclining to blue; translucent to sub-translucent; sectile. Compos.: arsenic acid, 29.2; protoxide of copper, 50.3; water, 20.5 = 100, with the resulting formula, $5CuO \cdot AsO_5 \cdot 9H_2O$; the analysis, however, showed 13.65 per cent. of carbonate of lime, probably present as an essential constituent, in which case the foregoing formula will be subject to modification.

* **tyr'-ōne, s.** [Lat. *tironem*, accus. of *tiro* = a tiro (q.v.).] A tiro.

* **tyr'-ōn-ism, s.** [Eng. *tyron(e)*; -ism.] The state of being a tiro.

tyr-ō-sine, s. [Gr. *τύρος* (*tyros*) = cheese; -ine (Chem.).]

1. *Chem.*: $C_8H_{11}NO_2$. A crystalline nitrogenous body discovered by Liebig, obtained by decomposing aluminous substances such as casein, &c., by caustic potash. It forms stellate groups of long slender needles, having a silky lustre, soluble in boiling water and in alcohol, insoluble in ether.

2. *Pathol.*: Tyrosine is often found in the urine during acute atrophy of the liver.

tyr-ō-tōx-i-cōn, s. [Gr. *tyros* = cheese, and *τοξικόν* = poison.] A poisonous crystalline ptomaine contained in decayed milk or milk products, such as ice-cream, &c.

Ty'-son, s. [Dr. Edward Tyson (1649-1708), F.R.S., an able comparative anatomist, discoverer of the glands.] (See compound.)

Tyson's glands, s. pl.

Anat.: Numerous sebaceous glands round the cervix penis and corona glandis. Called also *Glandulæ odoriferæ*. (Quain.)

ty'-sōn-ite, s. [After S. T. Tyson; suff. -ite (Min.).]

Min.: A mineral forming the central portion of certain hexagonal crystals, the exterior of which consists almost entirely of bastnaelite (the hamartite of Nordenskiöld), which has been derived by alteration from tysonite. Hardness, 4.5 to 5; sp. gr. 6.12 to 6.14; lustre, somewhat resinous; colour, pale wax-yellow; streak, nearly white. Analyses yielded, cerium, 40.19; lanthanum and didymium, 30.37; fluorine, 29.44 = 100, which corresponds to the formula, $(Ce, La, Di)_2F_8$. Occurs in Jelopar at Pike's Peak, Colorado.

* **ty'the, s.** [TITHE.]

* **ty'th-ing, s.** [TITHING.]

tzar, s. [CZAR.]

tzar-i-na, czar-it'-za, s. [CSARINA.]

tzōf'-zē, s. [Native name.]

Music.: An Abyssinian instrument of the guitar kind, formed of a long carved neck attached to a gourd. It has frets and one string usually made of the tough fibre of a palm-tree.

U.

U, the twenty-first letter and the fifth vowel of the English alphabet. It is one of the three primitive vowels, from which the various vowel sounds in the Aryan languages have been developed. Its true primary sound was that which it still retains in most of the European languages—viz., that of *oo* in *cool, tool, wood, &c.*, corresponding to the French *ou*, as in *cour, tour, &c.*, the sound being sometimes short (marked in this book \hat{u}) and sometimes long (marked \bar{u}). The Anglo-Saxon long \bar{u} (marked with an accent) has commonly become in modern English the diphthong *ou* or *oo*, as A.S. *thū* = thou, *nū* = now, *mūth* = mouth, &c. After *r*, and after the sounds *sh* and *zh*, *u* has generally retained its old long sound, as in *rule, truth, &c.* In A.S. *rūm* = room, *brūcan* = brook (v.) the original long sound is retained, though the form is altered. The old short sound of *u* is still retained in *bull, full, pull, put, &c.*, but as a rule this sound became changed (probably about the middle of the seventeenth century) to the sound heard in *cut, tun, fun, &c.* (marked \hat{u}), a sound then new to English, not being mentioned by any writer before 1653. This sound, which is very similar to that of the unaccented French *e*, is characteristic of English, and is often given to the vowels *a, e*, when unaccented, as in *cavalry, camel, &c.* It is also given to the vowel *o*, even when accented, as in *money, come, honey, among, &c.* A modified form of it often occurs before *r*, as in *bur, cur, fur, &c.*, and sometimes before *rr*, as in *knurr, purr, &c.*

(marked \bar{u}). This sound is sometimes given to *a, i, o*, and *y* before *r*, as *ariculer, her, fir, work, martyr*. In the sixteenth or seventeenth century arose the practice of using *gu* to represent a hard *g* before an *s*, as in *guess*, a French practice, borrowed from *gu*; and to this, and the wish to indicate a long vowel by a final *e*, must be attributed *plague, vague, fatigue, rogue, &c.* The final *-gue* does not, however, always indicate a preceding long vowel; cf. *epilogue, synagogue, tongue, &c.* The use of *u* for *w* in *perausade, &c.*, is modern, also limited from its use in *qu*. The long sound of *u*, as in *mule, duke, confuse, &c.* (marked \bar{u}), and modified by *r*, as in *cure, pure* (marked \bar{u}), is not a simple vowel, an *i* sound being more or less distinctly introduced before it, or fused with it. The corresponding short sound is heard in *unit, unity, &c.* (marked \hat{u}). In some dialects, and in America, this sound is also sometimes given to *u* after *r*. *Duke* is sometimes vulgarly pronounced with the same sound, as *dook*. The original sound of short *u* is now only retained in *bury, burial, busy, and business*. The long sound of *u* as in *mule*, is also represented by other combinations, as by *-ue*, in *due, sue, &c.*; by *-ew*, in *few, dew, &c.*; and by *ui* in *suic*. *U* [u] used in later spelling as a final *u*, owing to a rule made by no one knows whom, no one knows why, and no one knows when, that no English word end in *u*. (*Edis: Early English Pronunciation*, ch. vi. § 3, p. 579.) In the thirteenth and fourteenth centuries *ue* = French *eu*. *U* has several sounds: (1) \hat{u} , as in *suit, fruit, &c.*; (2) \bar{u} , as in *build, guild*; (3) \bar{u} , as in *guide*; (4) \bar{u} , as in *masquito*; (5) \bar{u} , as in *anguish, languid*. In *buy, buy, buyer, buying, &c.*, the *u* is silent, as also in *plague*. (For *qu*, see under *Q*.) In the best period of Roman literature the *u* sound was expressed by the character *u*, a character which did not exist in the Anglo-Saxon alphabet, its sound, when it occurred between two vowels, being represented by *f*, or occasionally by *u*. In later times *u* and *v* stood indifferently for either sound, the capital being generally written *V*. In this respect *U* and *V* stand to each other as *I* and *J*. In almost all English dictionaries, up to a comparatively recent date, words beginning with *U* and *V* were combined. In printing, where the sheets are marked by the letters *A, B, C, &c.* (standing for 1, 2, 3, &c.), the signs *J, v*, and *u*, are ignored, so that, for this purpose, the letters of the alphabet are only twenty-three. In respect to its order in the alphabet, its form, and its history in general, *U* corresponds with the Greek *Υ* or *υ*. Greek words containing the diphthong *ou*, when Latinised, were spelt with a *u*; while Greek words with *v*, when Latinised, were spelt with *y*.

U, as an initial is used for United, as in U.K. = the United Kingdom; U.S. = United States; U.S.A. = United States of America; U.P. = United Presbyterian (Scotch); U.C. or A.U.C. = in dates belonging to Roman history is a contraction for *Ab urbe condita* = from the building of the city (of Rome), as U.C. 400 = in the year of Rome 400.

U, as a symbol is used, in chemistry, for uranium.

ū-a-ka'-ri, s. [South American Indian name of the animal.]

Zool.: The Scarlet-faced Saki. [SAKI.]

* **ū-ar-ān, ū-rān, s.** [Arab. *uqran* = the monitor of the Nile.]

• ū-bī-cā-tion, s. [Lat. ubi = where.] The state of being in a place; local relation; whereness.

"Relations, ubications, duration, the vulgar philosophy admits to be some thing; and yet to enquire in what place they are, were gross."—Glanvill: Essay, No. 2.

• ū-bī-š-ty, s. [Mod. Lat. ubietas, from Lat. ubi = where.]

Philos.: The presence of one thing with regard to another; the presence of a thing in place; the state or condition of being in a place. According to the Schoolmen, Ubiety might be:

(1) Circumscriptive, as when all the parts of a body are answersible to the parts of space in which it is, and exclude any other body.

"Thou wouldst have led me out of my way if that had been possible.—If my ubiety did not so clearly resemble ubiqity, that in Anywhere and Every-where, I know where I am, and can never get lost till I get out of Wherever itself into Nowhere."—Southey: The Doctor, ch. xxi.

(2) Definitive, as when a human soul is limited in its presence to the same place as a human body.

"Notwithstanding her uncertain tenure of ubiety, she patiently yielded to her lot."—Hudson: Life of Waterson, p. 52.

(3) Repletive, as when God is present through every portion of space. This last form is sometimes called Ubiquity.

• ū-bī-quār-ī-an, a. [Lat. ubique = everywhere; Eng. suff. -arian.] Existing everywhere; ubiquitous, ubiquitary.

"Have ye, ye sage intendants of the whole A ubiquitous presence and control!"—Copper: Precinctum, 366.

• ū-bī-qui-ō-us, a. [Lat. ubique = everywhere.] Ubiquitous.

"Thou stretch ubiquitous measureless expanse."—Baconson: Hymn to the Deity, p. 10 (1782).

• ū-bī-quist, s. [Fr. ubiquiste.] [USIQUIRY.] Church History:

1. (Pl.): The same as USIQUITARIAN, 2. "All the Ubiquists, however, are not agreed."—Rees: Cyclop., s. v. Ubiquist.

2. A term applied in the University of Paris to such doctors in theology as are not restrained to any particular house, either to that of Navarre or Sorbonne. (Rees.)

• ū-bī-qui-tāir, * ū-bī-qui-taire, a. [Fr. ubiquitaire, from Lat. ubique = everywhere.] Ubiquitary, ubiquitous.

"Him whom earth, air, or fire, Not the vast void Of Heaven can hold 'Cause he's ubiquitous."—Howell: Letters, bk. 1, let. 12.

• ū-bī-qui-tār-ī-an, s. & a. [Eng. ubiqitary; -an.]

A. As substantive:

1. Ord. Lang.: One who exists everywhere; one who is omnipresent.

2. Church Hist. (Pl.): A name applied to those who, confusing the two natures, taught that Christ, as man, was omnipresent, as did the Apollinarians and Eutycheians in the early Church. Luther re-asserted the ubiquity of Christ's body in his controversy with the Zwinglians as to the reception of the body of Christ in the sacrament, and in a sermon of 1527 (Quod Verba Stent), and in the Confessio Major of 1528 declared that Christ's body was not only in heaven and in the Eucharist, but everywhere, and this of necessity. The Calvinists, Zwinglians, and Melancthon opposed, and the latter pointed out that the doctrine of ubiquity led to a denial of the Real Presence which it was intended to support. This tenet, however, was inserted in the Formula of Concord (A. D. 1577), though no mention was made of it in the Augsburg Confession (A. D. 1530).

"It is indeed obvious that every Lutheran who believes the doctrines of consubstantiation, whatever he may pretend, must be a Ubiquitarian."—McClintock & Strong: Cyclop. Bib. Lit., s. 623.

B. As adjective:

1. Ord. Lang.: Omnipresent.

2. Church Hist.: Of or belonging to the Ubiquitarians. [A. 2.]

"The former supporting the Ubiquitarian theory."—McClintock & Strong: Cyclop. Bib. Lit., s. 623.

• ū-bī-qui-tār-ī-nēss, s. [Eng. ubiqitary; -ness.] The quality or state of being ubiquitous; existence everywhere; omnipresence.

"Not to speak of the ubiqitaryness of some hands, the same being always present at all petitions."—Fuller: Church Hist., bk. x, p. 24.

• ū-bī-qui-tār-ī, a. & s. [Lat. ubique = everywhere.]

A. As adj.: Existing everywhere or in all places; omnipresent, ubiquitous.

"She . . . manages her time so well that she seems ubiquitous."—Orpington: Marriage à-la-mode, l. 1.

B. As substantive:

1. One who exists everywhere or is omnipresent.

"This knight, in relation to my book, may be termed an ubiquitous, and appear amongst statesmen, soldiers, lawyers, writers."—Pulter: Worthies; Kent. (Sir P. Sidney).

2. Any individual of the sect called Ubiquists (q. v.).

• ū-bī-qui-tēs-gēnt, a. [Eng. ubiqit(ous); -escent.] Becoming ubiquitous.

"Follow the trolley track (for the ubiquitous trolley car has made its appearance here too)."—The [Phila.] Call.

• ū-bī-qui-tism, s. [Eng. ubiqit(y); -ism.] The doctrine of the Ubiquitarians. [USIQUITARIAN, 2.]

• ū-bī-qui-tist, s. [Eng. ubiqit(y); -ist.] The same as USIQUITARIAN (q. v.).

• ū-bī-qui-tois, a. [Eng. ubiqit(y); -ous.] Existing or being everywhere; omnipresent.

• ū-bī-qui-tois-ly, adv. [Eng. ubiquitous; -ly.] In a ubiquitous manner; in a manner involving real or seeming omnipresence.

• ū-bī-qui-ty, s. [Fr. ubiquité, as if from a Lat. ubiquitate, accus. of ubiquitas, from ubique = everywhere; Ital. ubiquità.]

1. This quality or state of being ubiquitous; existence or presence in all places at the same time; omnipresence.

"The reason you do not apprehend ubiquity to be necessarily connected with self-existence."—Clarke: Answer to Seco. Letter.

2. The doctrine that the body of Christ is present everywhere by virtue of its union with his divine nature. It was adopted in 1577 as a mode of explaining the Eucharistic Presence by those who composed the Formula of Concord. The term soon ceased to have a definite meaning, some divines affirming that Christ during his mortal life was everywhere present, whilst others dated his ubiquity from his ascension into heaven.

"No one equal urged by the apostles against the Galatians for giving premission with Christ but may be as well enforced against the Lutherans holding ubiquity."—Walton: Life of Hooker.

* 3. Locality, neighbourhood.

"In any street 'Is that ubiquity."—Ben Jonson. (Todd.)

¶ Ubiquity of the king: Law: (See extract).

"A consequence of this prerogative is the legal ubiquity of the king. His Majesty, in the eye of the law, is always present in all his courts, though he cannot be personally distribute justice. His judges are the mirrors by which the king's image is reflected. It is the regal office, and not the royal person, that is always present in court, always ready to undertake prosecutions, or pronounce judgment, for the benefit and protection of the subject. And from this ubiquity it follows that the king can never be absent, for a monarch is the decider in all civil or criminal, or the non-appearance of the plaintiff in court. For the same reason also in the forms of legal proceedings, the king is not said to appear by his attorney, as other men do, for he always appears in contemplation of the law in his own proper person."—Blackstone: Comment., bk. 1, ch. 7.

• ū-bī-sū-prā, phr. [Lat. = where above.] In the place or passage above mentioned; noting reference to some passage or page previously named or referred to.

• ū-cō-wal-līst (as vs v), s. [See def.]

Church Hist. (Pl.): A sect who derived their name from Uke Walles, a native of Friesland, who published his opinions in 1637. He taught the doctrine of Universalism, and held that the period of time between the birth of Christ and the descent of the Holy Ghost was one of deep ignorance, during which the Jews were deprived of divine light, and that therefore their sins would not be visited with severity. His followers did not long retain his name as a badge of separation, and became merged in the Mennonites (q. v.), to whose doctrines their founder strictly adhered.

• ū-dāl, a. [Icel. dǫdal = ancestral possessions, allodium (q. v.).] A term applied to that right in land which prevailed in northern Europe before the introduction of the feudal system. Udal tenure still prevails in Orkney and Shetland. This tenure, which was completed by undisturbed possession, provable by witnesses, has been held by the Court of Session to be the same as allodial (q. v.).

• ū-dāl-lēr, ū-dāl-man, s. [Eng. udal; -man.] One who holds property by udal right; a freeholder without feudal dependencies.

"The Udallers are the allodial possessors of Zealand, who hold their possessions under the old Norwegian law, instead of the feudal tenures introduced among them from Scotland."—Scott: Pirate, ch. 1. (Note.)

1. The glandular organ or bag of cows and other quadrupeds, in which the milk is secreted and retained for the nourishment of their young.

"Sweet milk Delicious, drawn from udders near dry."—Copeley: Homer; Odyssey iv.

* 2. A teat, a dug.

"A Honeys, with udders all drawn dry, Lay couching head on ground."—Shakep.: As You Like It, IV. 2.

• ūd-dōred, a. [Eng. udder; -ed.] Furnished with or having an udder or udders.

"Marian, that soft could stroke the udder'd cow."—Gay: Shepherd's Week; Tuesday, II.

• ūd-dōr-lēss, a. [Eng. udder; -less.] Destitute of an udder; hence, figuratively, deprived of nourishment from a mother; motherless.

"All ye gentle girls that foster up Udderless lambs."—Keats: Endymion, l.

• ūd-dō-väl-līte, s. [After Uddevalla, or Uddevalla, Sweden, where found; suff. -līte (Mtn.).]

Min.: A variety of Menaccites (q. v.), containing about 10 per cent. of titanium and 70 per cent. of sesquioxide of iron.

• ū-dōm-ō-tēr, s. [Lat. udus = moist, wet, and Eng. meter.] A resin-gauge (q. v.).

• ūg-gūr, ūg-ar, ūg-oōr, ūg-oō-roq, s. [Hind. ugūr; Sans. ugūrā.]

1. Bot.: Aquilaria Agallocha, a large evergreen tree with alternate, lanceolate, stalked leaves, a top-shaped leathery calyx, downy on the outside, the limb divided into five segments, reflexed; no petals; ten woolly scales (sterile stamens); ten fertile stamens; a two-celled ovary, and each cell with a single suspended ovule, winged on the side. In the interior of old trees are found irregular masses of harder and darker-coloured wood, the Eagle-wood (q. v.) of commerce. A native of Eastern Bengal, Burmah, the Malay Peninsula and Archipelago.

2. Comm.: An oil derived from No. 1. Wood chips are boiled, and the water thus impregnated is distilled to produce the oil. It is valued as a perfume. Orientals burn it in their temples on account of its fragrance, and Napoleon I. used it for the same reason to illuminate his palace. It has been given in rheumatism.

• ūgh (gh guttural), interj. [From the sound made.] An exclamation or expression of horror, disgust, or recoil. (Usually accompanied with a shudder.)

ûl-gêr, s. [Fr. *ulcère*, from Lat. *ulcerem*, accus. of *ulcus* = an ulcer; Sp. & Ital. *ulcera*; cogn. with Gr. *ἔλκος* (*hêlkos*) = a wound, a sore, an abscess.]

L. Lit. & Med.: A chasm, a solution of continuity, produced in some external or internal surface of the body by the process of absorption, the absorbers, whether lymphatics or veins, but chiefly the former, being more actively concerned in the formation of such chasm. This is corroborated by the fact that when old sores break out afresh, the substance forming the bond of union first gives way, and even in the case of old fractures, the callus is removed, and the extremities become again disunited, as happened amongst the crew of the *Centurion*, in Lord Anson's memorable voyage. This was first pointed out by John Hunter. While the ulcerative process is going on, the securing arteries, which in health bring and deposit new materials to every part of the body as the old are removed, lose this power, and are even taken away, as well as the rest of the organisation, including the absorbers themselves. The cicatrix formed by the healing of an ulcer is then a substitute for the old and original skin, but inferior to it in vital power. Ulcers are of three kinds: healthy, unhealthy, and specific. The first is the simple sore, or simple prurient ulcer; the second comprises the indolent, irritable, phagedenic, and varicose, with others dependent on disorder of the digestive functions; and the third, such as the scrofulous, cancerous, and venereal. The great object in the management of ulcers is to keep the surrounding skin clean and dry, and to produce a healthy surface on the sore itself; the latter object is now frequently obtained by skin-grafting, with permanently favourable results.

2. *Fig.*: Anything which eats into or festers in any body; a moral sore.

***ûl-gêr, v.t.** [Lat. *ulcero* = to make sore.] [ULCER, s.] To ulcerate.

"This . . . ulcers men's hearts with profaneness."—*Puller: Holy & Profane State*, V. vi &

***ûl-gêr-a-ble, a.** [Eng. *ulcer*; -able.] Capable of being ulcerated.

ûl-gêr-âte, v.t. & i. [Lat. *ulceratus*, pa. par. of *ulcero* = to make sore, from *ulcus*, genit. *ulceris* = an ulcer.]

A. Trans.: To affect with or as with an ulcer or sores.

"A tendency more deeply to ulcerate their minds."—*Burke: Letter to Sir H. Langrish*, &c.

B. Intrans.: To be formed into an ulcer; to become ulcerous. (*Lit. & fig.*)

ûl-gêr-â-tion, s. [Fr., from Lat. *ulcerationem*, accus. of *ulceratio*, from *ulceratus*, pa. par. of *ulcero* = to ulcerate (q.v.).]

1. The process of forming into an ulcer;

the process of becoming ulcerated; the state or condition of being ulcerated, as ulceration of the bowels, the heart, the intestines, the larynx, &c.

"The part hath been long affected with ulceration."—*Wiseman: Surgery*, ch. ii.

2. An ulcer.

ûl-gêr-â-tive, a. [Eng. *ulcerat(e)*; -ive.]

1. Of or relating to ulcers.

Pathol.: [NOMA.]

ûl-gêred, a. [Eng. *ulcer*, a.; -ed.] Having become an ulcer; affected with an ulcer or ulcers; ulcerated, ulcerous.

"Breathings hard drawn the ulcered palate tear."—*May: Lucan & Pharsalia*, bk. iv.

ûl-gêr-ôis, a. [Lat. *ulcerosus*, from *ulcus*, genit. *ulceris* = an ulcer (q.v.); Fr. *ulceroux*; Sp. & Ital. *ulceroso*.]

1. Having the nature or character of an ulcer; discharging purulent or other matter.

"The ulcerous barky sourd of leprosy."—*Browning: Paracelsus*, iv.

2. Affected with an ulcer or ulcers; ulcerated.

"People All swollen and ulcerous."—*Shakesp.: Macbeth*, iv. 5.

***ûl-gêr-ôis-ly, adv.** [Eng. *ulcerous*; -ly.] In an ulcerous manner.

ûl-gêr-ôis-ness, s. [Eng. *ulcerous*; -ness.] The quality or state of being ulcerous or ulcerated.

***ûl-cûs-çle, *ûl-cûs-cûle, s.** [Lat. *ulcusculum*, dimin. from *ulcus* = an ulcer (q.v.).] A little ulcer.

ûl-lê, s. [MEXICAN.] The Ule-tree (q.v.).

ule-tree, s.

Bot.: *Castilleja elastica* and *C. Markhamiana*, which yield caoutchouc. They are Mexican trees, having male and female flowers alternating on the same branch, the latter consisting of numerous ovaries in a single cup.

ûl-lê-ma, s. [Arab. *ulema*, pl. of *alim* = wise, learned, from *alima* = to know.] The collective name of the hierarchical corporation of learned men in Turkey, who have the advantages of freedom from military service, and who furnish judges, ministers of mosques, professors, and have charge of the department of the government relating to sacred matters. This body is composed of the Imams, or ministers of religion, the Muftis, or doctors of law, and the Cadis, or administrators of justice.

ûl-lêx, s. [Lat. = a shrub resembling rose-mary.]

Bot.: *Furze*, whin, or gorse; a genus of Cytisacæ. Very thorny shrubs, with leaves trifoliate when young, simple when old. Flowers yellow; axillary calyx two-partite, with a small scale or bractea on each side of the base; the segments nearly entire, or the upper one with two, the lower with three, teeth; standard scarcely longer than the calyx, bifid; keel erect, blunt; legumæ scarcely longer than the calyx, turgid, few-seeded. Known species twelve, from the west and the south of Europe, and northern Africa. Two are British, *Ulex europæus*, the Common Furze, whin, or gorse, and *U. nanus*, the Dwarf Furze. The former has the calyx somewhat hairy, the hairs slightly spreading, the teeth nearly obsolete, the bracts large, ovate, and lax; the latter, besides being smaller in all its parts, and flowering later in the year, has the pubescence of the calyx adpressed, the teeth lanceolate, the bracts minute the wings about the length of the keel.

ûl-lêx-ite, s. [After G. L. Ulex, who first correctly analyzed it; suff. -ite (*Min.*)]

Min.: A mineral occurring in roundish masses or nodules, consisting of delicate fibres or capillary crystals. Found at various localities, but notably in Peru and Tarajaca, South America, associated with various other species, and also in Nova Scotia in massive gypsum. Hardness, 1.0; sp. gr. 1.65; lustre, when first broken, silky; colour, white. Compos.: boric acid, 45.63; lime, 12.26; soda,

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sîre, sir, marine; gô, pôt, or, wôre, wolf, wôrk, whô, sôn; mûte, cûb, cûre, ûnite, cûr, sûle, fûll; trÿ, Sÿrian. æ, œ = ô; ey = â; qu = kw.

670; water, 35-32=100; whence the formula, (NaO₂BO₂+2CaO2BO₂)+18aq. Is known in Tarapaca under the name Tiza.

• **ū-lġ-ġn-ġeo, a.** [Lat. *uliginosus*, from *uligo*, genit. *uliginis* = ooziness; Fr. *uliginex*; Ital. *uliginoso*.]

1. **Oral Lang.**: Oozy, oozy, muddy, slimy.
2. **Bot.**: Growing in swampy places.

• **ū-lġ-ġn-ġus, a.** [ULIGINOSÆ.] Muddy, oozy, slimy.

"Put the impure and *uliginous*, as that which proceeds from stagnated places, is of all other the most vile and pestilent."—*Bovyn*: *Pumfugium*.

ūl-lage (age as *ġg*), s. [O. Fr. *ouillage*, *ouillage* ("ceillage de vin = the filling up of leaky wine vessels," *Cotgrave*), from *euiller*, *ouiller*, *ouiller*, = to fill up a vessel that has leaked, to fill to the brim, prob. from *eur*, *eur*, *ore* = the border, brim of a thing, from Lat. *ora* = the brim.]

Comm.: The quantity which a cask wants of being full; the wantage of a cask of liquor.

ūl-mā-nġ-a, s. [Named after Ullman, the discoverer of one species.]

Palæobot.: A genus of Coniferae, apparently a Taxoid, bearing genuine cones. Known species two, *Ullmannia selaginoides* and *U. Brownii*. They occur in the Magnesian Limestone of Durham, the Middle Permian of Westmoreland, and the Kupferschiefer and Rothliegendes (Lower Permian) of Germany.

ūl-mann-ite, s. [After J. C. Ullman, who discovered it; suff. -ite (*Minn.*); Ger. *nickel-spiessglaser*, *nickelspiessglanzers*, *antimonnickel-glanz*, *nickelantimonglanz*, *antimon-arsenik-nickelglanz*; Fr. *antimoine sulfuré nickelifère*.]

Mín.: An isometric mineral rarely occurring in crystals; cleavage, cubic. Hardness, 5 to 5.5; sp. gr. 6.2 to 6.51; lustre, metallic; colour, steel-gray to silver-white. Compos.: nickel, 27.7; antimony, 57.2; sulphur, 15.1 = 100. The antimony is, however, sometimes partly replaced by arsenic. Formula, NiS₂+K(SbAs). Found in Nassau, Siegen, Prussia, &c., and lately in very sharp, bright cubes in Sardinia.

ūl-lū-ōūs, s. [MELLOCA.]

ūl-mā-ġō-ōūs, s. pl. [Mod. Lat. *ulm(us)* (q.v.); Lat. fem. pl. adj. suff. -*acea*.]

Bot.: Elmworts; an order of Perigynous Exogens, alliance Rhamnales. Trees or shrubs, with alternate, rough, generally deciduous leaves, each having at its base a pair of deciduous stipules; flowers loosely clustered, never in perfect or polygamous catkins; calyx membranous, inferior, campanulate, irregular; petals none; stamens definite; stigmas two, distinct; ovary two-celled, each with a solitary pendulous ovule; fruit one- or two-celled, membranous or drupaceous; seed solitary. Natives of northern, and of mountainous parts in southern Asia, of Europe, and of North America. Known genera nine, species sixty (*Lindley*); genera three or four, species about eighteen (*Sir J. Hooker*).

ūl-mā-ġō-ōūs (or *cecus* as *shūs*), a. [ULMACEÆ.]

Bot.: Of or pertaining to the Ulmaceæ (q.v.).

ūl-mār-ġic, a. [For *etym.* and def. see compound.]

ulmaric-acid, s.

Chem.: Salicylic acid obtained from *Spirea ulmaria*.

ūl-mō-ōs, s. pl. [Lat. *ulm(us)*; Mod. Lat. fem. pl. adj. suff. -*ea*.]

Bot.: The typical tribe of Ulmaceæ (q.v.). Ovary two-celled, ovules anatropous.

ūl-mġc, a. [Eng. *ulm(in)*; -*ic*.] Contained in or derived from ulmin (q.v.).

ulmic-acid, s.

Chem.: C₂₄H₁₈O₉. A body isomeric with ulmin, obtained by neutralizing the ammoniacal solution of ulmin with an acid. It is precipitated in brown gelatinous floes, soluble in pure water, but insoluble in water containing free acid.

ūl-mġn, s. [Lat. *ulm(us)* = an elm; -*in* (*Chem.*)]

Chem.: C₂₄H₁₈O₉. A dark-coloured sub-

stance, obtained by boiling sugar for some time with dilute hydrochloric, nitric, or sulphuric acid, and washing the deposit with water. It forms black or brown scales, insoluble in water and alcohol, partially soluble in ammonia.

ūl-mōūs, a. [Eng. *ulm(in)*; -*ous*.] Of or pertaining to a substance containing ulmin or ulmic acid.

ulmose-substances, s. pl.

Chem.: Humous substances. Names given to various brown or black substances found in vegetable mould, peat, &c., resulting from the putrefaction of animal or vegetable substances in presence of air and water.

ūl-mūs, s. [Lat. = an elm.]

1. **Bot.**: Elm; the typical genus of Ulmaceæ (q.v.). Flowers perfect; calyx persistent, campanulate, or conical at the base, with three to eight divisions; stamens five; filaments straight in aestivation; ovary two-celled; seed-vessel a samara winged all round. Known species about thirteen. Distribution that of the order. The American or White Elm (*Ulmus americana*) is a magnificent tree, sometimes 100 feet high, with a trunk 60 or 70 feet high before giving forth its long, pendulous, graceful branches. The Slippery Elm (*U. fulva*) is also common in the basin of the Mississippi. Its bark yields an abundant mucilage, of value in medicine. The English Elm (*U. campestris*) is a large, handsome tree, whose timber is of much value. The bark of *U. Waltichiana*, a large deciduous tree from the North Western Himalaya, contains a strong fibre especially derived from the flower-stalk. An oil is expressed from *U. integrifolia*, another large deciduous tree, a native of the Indian and Burmese hills.

2. **Chem., &c.**: Humus; decaying wood. (*Rosier*). [ULMACEOUS.]

3. **Palæobot.**: The genus occurs in the Middle Eocene of Bournemouth.

ūl-nā, s. [Lat., from Gr. *ὤλεν* (*ōlenē*) = the elbow.]

1. **Anat.**: A long prismatic bone, at the inner side of the forearm, parallel with the radius, with which it articulates. It is the larger, and longer of the two bones, and consists of a shaft and two extremities, the upper of which forms a large part of the articulation of the elbow-joint. At the upper extremity behind is a large process, the olecranon, and a smaller one, the coronoid process, in front, separated by the sigmoid or semilunar fossa, which receives the articular trochlea of the humerus. The ulna diminishes in size from above downwards, and is very small at the lower extremity, which is separated from the twist by an inter-articular fibro-cartilage.

BONES OF ARM AND HAND. a. Humerus; b. Radius; c. Ulna; d. Carpus; e. Metacarpus; f. Phalanges.

* 2. **Old Law**: An ell.

ūl-nād, adv. [Eng. &c., *uln(a)*, and Lat. *ad* = to, towards.] In the direction of the ulna; towards the ulnar aspect.

• **ūl-nago** (age as *ġg*), s. [ALNAOE.]

* **ūl-nā-ġēr, s.** [ALNAEER.]

ūl-nār, a. [Lat. *ulna* = the elbow.]

Anat.: Of or pertaining to the ulna.

ulnar-artery, s.

Anat.: The larger of the two branches into which the brachial artery divides. It commences just below the bend of the elbow, and runs along the inner side of the forearm, in an arched direction and at varying depth, to the hand, where it forms the superficial palmar arch. It gives off several branches.

ulnar-nerve, s.

Anat.: A branch of the brachial plexus, distributed to the muscles and integument of the forearm and hand.

ulnar-veins, s. pl.

Anat.: Two veins distributed to the forearm: (1) the posterior, arising from the basilic vein; (2) the anterior, arising from the median basilic.

ū-lō-dēn-drōn, s. [Gr. *ὄλη* (*ōlē*) = a scar from a wound, and *δένδρον* (*dēndron*) = a tree.]

Palæobot.: A genus of Lepidodendreae. Trunk simple (?), covered with the rhomboidal scars of the leaf-stalks; the branches dichotomous, with densely imbricated leaves, and strobiliform fruit. Eleven species from the carboniferous rocks of Britain.

ū-lō-rrhā-ġġ-s, s. [OLORRHŒY.]

† **ū-lōt-riġh-an, s.** [ULOTRICHĪ.] Any individual of the Ulotrichi (q.v.).

ū-lōt-riġh-ġ, s. pl. [From Gr. *ὀλόθριξ* (*olothrix*), genit. *ὀλόθριχος* (*olothrichos*) = having crisp, curly hair like negroes: *ὄλος* (*oulos*) = crisp, curly, and *θρίξ* (*thrix*) = hair.]

Ethmol.: One of the two primary groups into which Bory St. Vincent divided mankind. They are distinguished by crisp, woolly, or tufted hair. The Ulotrichi may be further subdivided into Dolichocephali, or Long-headed, comprising the Bushmen, Negroes, and Negritoes; and Brachycephali, or Short-headed, comprising only the Mincopies of the Andaman Islands, probably the result of an intermixture of stocks. [LEIOTRICHĪ.]

ū-lōt-riġh-ōūs, a. [Eng. &c., *ulotrich*(?) -*ous*.] Having crisp, curly hair.

Ūl-ster, s. & a. [According to Chalmers the original Gaelic name was *Ulladh* (pron. *Ulla*), and the Scandinavians, who settled in this part of Ireland, aided the termination -*stadr*, or -*ster*, then forming *Ulla-ster* (*Ulster*).]

A. As substantive:

- 1. The most northern of the four provinces of Ireland.
- 2. [ULSTER KING-AT-ARMS.]

"—produced two coats, one of which an *ulster*, he stated was pledged by the defendant."—*Evening Standard*, Nov. 12, 1885.

B. As adj.: Of or pertaining to the province of Ulster.

Ulster-badġe, s.

Her.: The badge of the province of Ulster, a sinister hand, erect, open and couped at the wrist (gules). This "red hand" was assigned by James I. as a badge to the baronets who were to colonize Ulster, and is now borne by all baronets. [BARONET.]

ULSTER-BADGE.

Ulster-custom, s. The same as TENANT-RIGHT (q.v.).

Ulster king-at-arms, s. The chief heraldic officer for Ireland. The office was created by Edward VI. in 1552.

ūlt, contr. [ULTIMO.]

ūl-tēn-ite, s. [After Ullenthal, Tyrol, where found; suff. -*ite* (*Minn.*).]

1. **Mín.**: A name suggested for a bronzite (q.v.), found associated with anthophyllite in the Ulten Valley, Tyrol.

2. **Petrol.**: A rock consisting of garnet, kyanite, and mica, found in the Ullenthal, Tyrol.

ūl-tēr-ġ-ōr, a. & s. [Lat. = further, compar. of *ulter* = beyond; Fr. *ulterior*; Sp. *ulterior*; Ital. *ulteriore*.] [ULTRA.]

A. As adjective:

- 1. Being, situated, or lying beyond or on the other side of any line or boundary.
- 2. Not at present in view, or under consideration; in the future or in the background; more remote or distant.

"The *ulterior* accomplishment of that part of Scripture which once promised God's people that kings should be its nursing fathers."—*Boyle*: *Style of Holy Scripture*, p. 211.

B. As subst.: The futher side; the remote part.

ulterior-object, s. An object beyond that which at the time is avowed.

"The Jacobite minority, whose *ulterior objects* were, of course, to upset the reigning House."—*Daily Chronicle*, Jan. 18, 1883.

ūl-tēr-ġ-ōr-ġy, adv. [Eng. *ulterior*; -*ly*.] In an ulterior manner; more distantly or remotely.

ŭl-ti-ma, a. & s. [Lat. fem. sing. of *ultimus* = last, *ultima* (q.v.)]

A. As adj.: Most remote; furthest, last, final. [ULTIMA THULE.]

B. As substantive:

Gram.: The last syllable of a word.

ultima ratio, phr. The last reason or argument.

Ultima ratio regum: The last reason of kings—resort to arms or war.

Ultima Thule, s. [THULE.]

ŭl-ti-mate, a. [Lat. *ultimatus*, pa. par. of *ultimo* = to come to an end; to be at the last; from *ultimus* = last, super. of *ulter* = beyond.] [ULTRA.]

1. Farthest; most remote or distant in place or position.

2. Most remote in time; last, terminating, final.

"I would be at the worst; worst is my port,
My harbour and my ultimate repose."
Milton: P. R., III. 209.

3. Last in a train or progression or of consequences; arrived at as a final result; being that to which all the rest is directed, or which cannot be gone beyond.

"This is the great end, and *ultimate* design of all true religion."—*Clarke: On the Evidences*, prop. xlii.

4. Incapable of further analysis or resolution; not admitting of further division or separation; as, the *ultimate* elements of a body.

¶ For the difference between *ultimate* and *last*, see *LAST*, a.

¶ *Prime and ultimate ratios*: [RATIO, ¶ 6.]

ultimate-analysis, s. [ANALYSIS, II. 6.]

***ŭl-ti-mate, v.t. & i.** [ULTIMATE, a.]

A. Transitive:

1. To bring to an end; to terminate, to end.

2. To bring into use or practice.

B. Intrans.: To come to an end; to terminate.

ŭl-ti-mate-ly, adv. [Eng. *ultimate*; *-ly*.] As an ultimate or final result; at last; finally; in the end or final result.

"In that our knowledge is founded and from that it ultimately derives itself."—*Locke: Human Understanding*, bk. II, ch. I.

***ŭl-ti-mā-tion, s.** [ULTIMATE, a.] A last or final offer or concession; an ultimatum.

"Lord Bellingbrooke was likewise authorised to know the real *ultimatum* of France upon the general plan of peace."—*Swift: Hist. Four Last Years of Queen Anne*.

ŭl-ti-mā-tum (pl. **ŭl-ti-mā-tūms**, or **ŭl-ti-mā-ta**), s. [Lat. neut. sing. of *ultimatus*, pa. par. of *ultimo* = to come to an end, to be at the last.] A final proposal, statement of conditions, or concession, especially in diplomatic negotiations; the final terms or offer of one party, the rejection of which may, and frequently does, involve a rupture of diplomatic relations and a declaration of war.

"He delivered to the mediators an *ultimatum*, importing that he adhered to the treaties of Westphalia and Nimègue, and accepted of Strasbourg, with its appurtenances."—*Smollett: Hist. Eng.*, bk. I, ch. v.

***ŭl-ti-mo, a.** [Lat. *ultimus*, super. of *ulter* = beyond.] [ULTRA.] Ultimate, last, final.

"Whereby the true and ultimate operations of heat are not attained."—*Bacon: Nat. Hist.*, § 99.

***ŭl-tim-i-tiy, s.** [Eng. *ultim(e)*; *-ity*.] The last stage or consequence.

"Alteration of one body into another, from crudity to perfect concoction, is the *ultimity* of that process."—*Bacon: Nat. Hist.*, § 888.

ŭl-ti-mō, s. [Lat. *ultimo* (*mense*) = in the last (month).] The month which preceded the present; last month as distinguished from the current and all other months. Generally contracted into *ult.*: as, I wrote to him on the 20th *ult.*

***ŭl-ti-mō-gēn-i-ture, s.** [Formed on analogy of *primogeniture* (q.v.), from *ultimus* = the last, and *genitus* = born.] A name proposed as a collective term to include all forms of Borough-English (q.v.).

"The extensions of the custom are all called 'borough-English, by analogy to the principal usage, but they should be classified under some more general name. It is not easy, however, to find the appropriate word. We have a choice between '*ultimogeniture*' the awkward term proposed by the Real Property Commissioners of the last generation, and such foreign forms as '*Juniority*' and '*Juniorerie*', which can hardly be excelled for simplicity; so one must coin a new phrase, like 'juniority or junior right.'"—*Elton: Origins of English History*, p. 185.

ŭl-ti-mūs, a. [Lat., super. of *ulter* = beyond.] [ULTIMATE, a.] Last.

ultimus heres, s.

Law: The last or remote heir. Thus, in cases of intestate succession, failing relations of every kind, the succession devolves upon the crown as *ultimus heres*.

***ŭl-tion, s.** [Lat. *ultio*, genit. *ultionis*, from *ultus*, pa. par. of *ulterior* = to take vengeance on.] The act of taking vengeance or retaliating; revenge, retaliation.

"To forgive our enemies is a charming way of revenge . . . and to do good for evil a soft and melting *ultion*."—*Brownie: Christian Morals*, III. 12.

***ŭl-tra, pref., a., & s.** [Lat. = beyond (adv. and prep.), nrig. ahl. fem. of O. Lat. *ulter* = beyond (adj.). *Ulter* is a comparative from O. Lat. *uls, ouls* = beyond; Fr. *oultre*; Sp. *ultra*: Ital. *ultra*.]

A. As prefix: A Latin preposition and adverb, signifying beyond, and used as a prefix in the sense of—

(1) Beyond; on the further side; chiefly with words implying natural objects, forming barriers, boundaries, or landmarks; as, *ultramontane, ultramundane, ultramarine*.

(2) Excessively, exceedingly; to or in excess; beyond what is reasonable, rational, right, or proper; with words admitting of degree, and more especially in political and polemical terms: as, *ultra-conservative, ultra-liberal, ultra-radical, and the like*.

B. As adj.: Extreme; going beyond due limit; extravagant.

"The extreme or *ultra* party."—*Milman: Hist. Latin Christianity*.

C. As subst.: One who advocates extreme views or measures; an ultraist.

"The *Ultras* would have owned him for their leader, and would have admitted that he went beyond them in uncompromising consistency."—*Brougham: Hist. Sketches*, &c.

ultra-red, a.

Physics: A term applied to the rays beyond the red, or low, end of the spectrum (q.v.). From these rays, which are invisible on account of the slowness of their vibrations, the greatest heating effects are obtained.

ultra-violet, a.

Physics: A term applied to the rays beyond the violet, or high, end of the spectrum (q.v.). The vibrations of these rays are too rapid for vision, but they possess greater chemical activity than any others.

***ŭl-trage (age as íg), s.** [OCTRAOE, s.]

ŭl-tra-ísm, s. [Eng. *ultra*; *-ism*.] The principles of *ultras*, or of those who advocate extreme measures, as of reform, &c.

ŭl-tra-íst, s. [Eng. *ultra*; *-íst*.] One who pushes a principle, doctrine, or measure to extremes; one who advocates extreme measures; an ultra.

ŭl-tra-mā-rino, a. & s. [Sp. *ultramariano* = beyond sea, foreign; also, *ultramariane* (a), from Lat. *ultra* = beyond, and *marinus* = marine; *mare* = the sea.]

A. As adj.: Situated, being, or lying beyond the sea.

"The loss of her *ultramariane* dominions lessens her expenses and ensures her remittances."—*Burke: State of the Nation*.

B. As substantive:

1. *Ord. Lang.*: A beautiful and unchangeable blue pigment, resembling in purity the blue of the prismatic spectrum. It was formerly obtained by grinding the mineral known as lapis-lazuli, calcining it, and again grinding it in a mill, or with a porphyry slab and muller. It is much prized by artists for its beauty and the permanence of its colour, both for oil and water painting. Lapis-lazuli being very rare this pigment was the most expensive of colours. Artificial ultramarine, which appears to possess all the valuable properties of the native ultramarine, was first prepared by M. Guimet, by fusing a mixture of kaolin, glauber salt, carbonate of soda and charcoal in a closed crucible, roasting the green substance so obtained with the addition of sulphur, whereby its colour is changed to blue, and pulverizing and washing the powder. The native ultramarine appears to consist of silicate of aluminium with sulphide and hyposulphite of sodium.

2. *Min.*: A name given to the richer-coloured varieties of lapis-lazuli (q.v.).

ultramarine-ashes, a. pl. The residue of lapis-lazuli, after the chief colour had been extracted, was used by the old masters as a middle or neutral tint for flesh, skies, or draperies; it is a purer and tenderer gray than that produced by mixture of more positive colours. (Fairholt.)

ŭl-tra-mōn-tāne, a. & s. [Fr. *ultramontain* = beyond the mountains; a term applied by the French to the Italians themselves, as being beyond the mountains, from the French side; from Ital. *ultramontano*, from Low Lat. *ultramontanus*, from Lat. *ultra* = beyond, and *mons, genit. montis* = a mountain; Sp. *ultramontano*.] [TRAMONTANE.]

A. As adjective:

I. Ordinary Language:

1. Being or lying beyond the mountains; *tramontane*; specifically, lying or being to the south of the Alps; that is, beyond the mountains as regard the countries north of the Alps; Italian.

2. Lying or being on the north side of the Alps; that is, being on the other side of the Alps, with reference to Italy; *tramontane*.

II. Church Hist.: Of or belonging to Ultramontanism (q.v.).

"The *Ultramontane* tone of the present day is far in advance of the Romanist writers of the Reformation period."—*Hunt: Dict. Sects*, p. 603.

B. As substantive:

***1. Ord. Lang.:** One who resides beyond or on the other side of the Alps; a foreigner.

"To the petition of the Bannets of Rome for a promotion of Cardinals he (Pope Urban) avowed his design to make so large a nomination that the Italians should resume their ascendancy over the *Ultramontanes*."—*Milman: Latin Christianity*, bk. xlii, ch. I.

2. Church Hist.: A believer in or supporter of Ultramontanism (q.v.).

"The *Ultramontanes*, such as Bellarmine, Baronius, &c., maintain that whatever dogmatic judgment or decision on a doctrinal point the pope addressed to the whole church is necessarily correct."—*McClintock & Strong: Cyclop. Bib. Lit.*, IV. 570.

ŭl-tra-mōn-tān-ísm, s. [Eng. *ultramontan(e)*; *-ism*.]

Church Hist.: A name improperly given by some theologians, north of the Alps, before the Vatican Council in 1870, to the generally received opinion of the Church in all ages, that the Papal utterances *ex cathedra* on matters of faith or morals are irrefragable. The word was used in contradistinction to Gallicanism, which attributed infallibility and supreme authority in matters of faith, morals, and discipline to the entire Church, personified in a General Council. Since the definition of the Vatican Council in 1870 concerning the infallibility of the Pope, Gallicanism has become a heresy. [VATICAN-COUNCIL.]

"The work that has done more than any other to give a scientific character and a lasting influence to *Ultramontanism* is Mohler's *Symbölik*, which first appeared in A. D. 1832, and has since spread throughout Europe and America in rapidly recurring editions."—*Blunt: Dict. Sects*, p. 604.

ŭl-tra-mōn-tān-íst, s. [Eng. *ultramontan(e)*; *-íst*.] One of the ultramontane party; one who upholds or promotes ultramontaniam.

***ŭl-tra-mūn-dāne, a.** [Pref. *ultra-*, and Eng. *mundane* (q.v.).] Being beyond the world, or beyond the limits of our system.

"We need not fly to imaginary *ultramundane* spaces."—*Boyle: Works*, v. 140.

ŭl-tra-vir-ēs, phr. [Lat.] Beyond one's power; especially beyond the power of a person, court, or corporation, legally or constitutionally.

***ŭl-trō-nē-ōūs, a.** [Lat. *ultroneus*, from *ultra* = of one's own accord.] Voluntary, spontaneous.

"Human laws oblige to an active obedience, but not to a spontaneous offer, and *ultroneus* seeking of opportunities."—*Jeremy Taylor: Ductor Dubitantium*.

***ŭl-trō-nē-ōūs-ly, adv.** [Eng. *ultroneus*; *-ly*.] Voluntarily, spontaneously, of one's own accord.

***ŭl-trō-nē-ōūs-nēss, s.** [Eng. *ultroneus*; *-ness*.] The quality or state of being ultroneous; spontaneity; voluntariness.

ŭl-u-lā, s. [Lat. = the shrieker, a acrech-owl.]

Ornith.: A lapsed genus of Strigide (q.v.) of which the Linnaean *Strix flammea* was the type.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sire, sir, marino; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, ūnite, cūr, rūle, fūll; trý, Sýrian. æ, œ = ē; ey = ā; qu = kw.

* **ül-y-lant**, a. [Lat. *ululans*, pr. par. of *ululo* = to howl.] Howling, ululating.
 * **ül-y-läte**, v.i. [Lat. *ululatum*, sup. of *ululo* = to howl, from the sound; Sp. & Port. *ulular*; Ital. *ululare*; O. Fr. *hüller*; Fr. *ululer*.] To howl, as a dog or wolf.
 "Troops of jackals . . . ululating in offensive noise."—*Sir F. Herbert: Travel*, p. 113.

* **ül-y-lä-tion**, s. [Lat. *ululatio*.] A howling, as of a dog or wolf; a wailing.
 "The ululation of vengeance ascended."—*De Quincey: Murder as a Fine Art*. [Footscript.]

ül-va, s. [Lat. = sedge, and various other aquatic plants.]

Bot.: A genus of Hymenidæ (*Lindley*); the typical genus of Ulvaceæ (*Kützinger, Berkeley, &c.*). Frond plane, simple or lobed, formed of a double layer of cells closely packed, producing zoospores. It is distinguished from *Porphyra* chiefly by its green colour, while *Porphyra* is roseate or purple. With the exception of *Ulva bullosa*, most of the species are marine, and they are widely distributed through the ocean. *U. lactuca* is Oyster-green (q.v.). This species and *U. latissima* are sometimes called Green Laver, and are eaten. In Scotland they are occasionally bound round the temples to alleviate headache. *U. thermalis* grows in the hot springs of Gastein in a temperature of about 117° Fahr. *U. compressa* is eaten by the Sandwich Islanders.

ül-vä-që-sæ, s. pl. [Lat. *ulv(a)*; fem. pl. adj. suff. -æceæ.]

Bot.: An order of Green-spored Algae, generally marine, rarely freshwater, or growing in damp places. Fronds membranous, expanded, saccate, tubular, or sometimes filiform, composed of spherical or polygonal cells firmly united into single or double layers. Reproductive organs consisting of roundish spores, formed from the whole contents of the cells, or of ciliated zoospores in twos, fours, or a greater number. Widely distributed. British genera five.

ül-yic, ül-zie (z as y), s. [Fr. *huile* = oil.] Oil. (*Scottch.*)

"Would you creesh his bonny brown hair in your nasty ulzie."—*Scott: Antiquary*, ch. 2.

Ü-ma, s. [Hind.]
Hind. Mythol.: One of the names given to the consort of Siva. [DOORJA.]

üm-bël, *üm-bël-la, s. [Lat. *umbella* = a little shadow, dimin. from *umbra* = a shadow.]

Bot.: A kind of inflorescence, in which the pedicels all proceed from a single point like the spokes of an umbrella, and are of equal length or corymbose. When each of the pedicels bears only a single flower, as in *Eryngium*, the umbel is said to be simple; when it divides and bears other umbels, as in *Heraclium*, it is said to be compound. In the latter case the assemblage of umbels is called the universal umbel, and the secondary umbels the partial umbels; or the universal umbel is called simply the umbel and the secondary ones the umbellules. The peduncles supporting the partial umbels are termed radii.

üm-bël-lal, a. [UMBELLAR.]

üm-bël-lä-lëz, s. pl. [Fem. pl. of Mod. Lat. *umbellalis*, from Lat. *umbella*.] [UMÆL.]

Bot.: The Umbellal Alliance; an alliance of Epigynous Exogens, having dichlamydeous, polypetalous flowers, solitary large seeds, and a small embryo lying in a large quantity of albumen. Orders: Apiaceæ, Araliaceæ, Cornaceæ, Hamamelidaceæ, and Brunellaceæ.

üm-bël-lar, üm-bël-lal, a. [Eng. *umbel*; -ar, -al.] Of or pertaining to an umbel; having the form of an umbel.

* **üm-bël-lä-tæ**, s. pl. [Fem. pl. of Mod. Lat. *umbellatus*, from Lat. *umbella* (q.v.).]
Bot.: The twenty-second order in Linnæus's Natural System, corresponding to the present Umbellifereæ (q.v.).

üm-bël-late, üm-bël-lä-tëd, a. [Eng. *umbel*; -ate, -ated.]

1. **Bot.**: With the inflorescence in the form of an umbel; bearing umbels; pertaining to an umbel.
 2. **Zool.**: Having a number of nearly equal radii proceeding from the same point.

üm-bël-lët, s. [Eng. *umbel*; dimin. suff. -let.] A little or partial umbel; an umbel formed at the end of one of the rays of another umbel; an umbellule.

üm-bël-lic, a. [Eng. *umbelliferone*; -ic.] Contained in or derived from umbelliferone (q.v.).

umbellio-acid, s.

Chem.: $C_9H_{10}O_4 = C_6H_5(OH) \cdot C_3H_4 \cdot CO \cdot OH$. A monobasic aromatic acid, obtained by the action of sodium amalgam on an alkaline solution of umbelliferone. It crystallizes in colourless granules, difficultly soluble in cold water, and melts at 125°.

üm-bël-lif-ër, s. [UMBELLIFERÆ.]

Bot.: Any plant of the order Umbellifereæ; a plant producing an umbel.

üm-bël-lif-ër-sæ, s. pl. [Mod. Lat., from Lat. *umbella*, and *fere* = to bear.] [UMÆL.]

Bot.: Umbellifereæ; the name given by Jusseu in 1789, and still extensively in use, for a large and easily recognised order of plants, having their inflorescence in the form of an umbel. *Lindley* called them Apiceæ, from the genus *Apium*, and placed the order under his Umbellal Alliance of Epigynous Exogens. The flowers, which are white, pink, yellow, or blue, are generally surrounded by an involucre. They have a superior calyx, either entire or five-toothed; five petals, five stamens, two styles, and a two-celled inferior ovary, with a solitary pendulous ovule in each cell. Fruit consisting of two carpels, separable by elevated ridges, of which five are primary and four secondary. The Umbellifereæ abound in temperate climates in the northern hemisphere, but are rare in the tropics. The vegetation of some—as hemlock, fool's parsley, and others—is poisonous, whilst that of the garden parsley is eaten. Similarly, the stem of the celery and the roots of the carrot and the parsnip are wholesome articles of food. Families seventeen—viz.:

UMBELLIFER
(Anagalis archangelica.)

Hydrocotylidæ, Mullidæ, Santalidæ, Amminidæ, Seselidæ, Fenchylidæ, Angelicidæ, Fencidanidæ, Silicidæ, Cunilidæ, Thapsidæ, Daucidæ, Eriogonidæ, Cauculidæ, Scandellidæ, Smyridæ, and Corinridæ.

Genera, 267; species, 1,500. (*Lindley*.) Genera, 152; species, 1,300. (*Sir J. Hooker*.) Thirty-four genera are represented in Britain.

üm-bël-lif-ër-öne, s. [Mod. Lat. *umbellifer(æ)*; snff. -one (Chem.).]

Chem.: $C_9H_9O_3 = C_6H_5(OH) \cdot O \cdot C_3H_3 \cdot CO$. A neutral body, obtained by the dry distillation of various resins, chiefly those derived from umbelliferous plants. It crystallizes in colourless rhombic prisms, is tasteless, inodorous, soluble in boiling water and in alcohol, ether, and chloroform. When heated it emits an odour of coumarin, melts at 240° to a yellowish liquid, and volatilizes without residue.

üm-bël-lif-ër-öus, a. [Eng. *umbellifer*; -ous.] Furnished with an umbel; umbellate, umbellated.

üm-bël-lü-lär-i-a, s. [Mod. Lat., dimin. from Lat. *umbella* = a sunshade.]

Zool.: A genus of Alcyonaria, sometimes separated from *Pennatula* (q.v.). Body elongate, slender, with a long osseous axis. Polypa large, terminal. *Umbellularia groenlandica* = *Pennatula encrinurus*.

üm-bël-lü-lät-ëd, a. [UMBELLULE.]

Bot.: Disposed in small umbels.

üm-bël-lule, s. [As if from a Lat. *umbellula*, a double dimin. from *umbra* = a shade; Fr. *umbellule*.] A small umbel; an umbellet; a secondary or partial umbel.

üm-bër (1), ***üm-bre** (bre as bër) (1), s. & a. [Fr. *ombre* (for *terre d'ombre*), from Ital. *ombra* (for *terra d'ombra*) = amber; lit. = earth of shadow, i.e., earth used for shadowing, from Lat. *umbra* = a shade; cf. Sp. *sombra* = shade, amber; Fr. *ombré* = umbered or sludged; Ger. *umber*.]

A. As substantive:

I. Ordinary Language:

1. A well-known pigment of an olive-brown colour in its raw state, but much redder when burnt. It consists of an ochreous earth containing manganese, is durable, has a good body, and is useful in oil and water-colour painting. It occurs either naturally in veins or beds, or is prepared artificially from various admixtures. That which is brought from Cyprus, under the name of Turkish umber, is the best. It is of a brown citrine colour, semi-opaque, has all the properties of good ochre, is perfectly durable both in water and oil, and one of the best drying colours we possess. It injures no other good pigment with which it may be mixed.

"I'll put myself in poor and mean attire,

And with a kind of umber smirch my face."

Shaksp.: *As You Like It*, l. 3.

2. A variety of peat or brown coal occurring near Cologne, used as a pigment and for the adulteration of snuff. (*Brandæ.*)

II. Min.: A clay-like substance of varying shades of a brown-colour, consisting essentially of a hydrated silicate of alumina mixed with varying proportions of iron and manganese oxides. Used as a pigment.

B. As adj.: Olive-brown.

umber-brown, s.

Bot.: A pure dull brown. Nearly the same as deep brown.

üm-bër (2), s. [Fr. *ombre*, *umbre*, from Lat. *umbra* = shade.]

1. *Ichthy.*: The grayling.

"The umber and grayling differ as the herring and pilcher do: but though they may do so in other nations, those in England differ nothing but in their names."—*Wolton: Angler*.

* **Old Arm.**: The same as UMBRIERE (q.v.).

3. *Ornith.*: The same as UMBRE (2) (q.v.).

* **üm-bër, *üm-bre** (bre as bër), s. & v.t. [UMBER (1), s.] To colour with or as with umber; to shade, to darken.

"To dye your beard and umber o'er your face."

Ben Jonson: Alchemist, v. 3.

* **üm-bëred**, a. [Eng. *umber* (1), s.; -ed.] Coloured with or as with umber; embrowned, darkened, dark, dusky.

"Thy dark cloud, with umbered lower,

That hung o'er cliff and lake, and tower."

Scott: Marston, v. (introd.)

* **üm-bër-y**, a. [Eng. *umber* (1), s.; -y.] Of or pertaining to umber; dark, dusky.

üm-bël-lic, a. & s. [UMBELLICAL.]

A. As adj.: The same as UMBELLICAL (q.v.).

* **B. As subst.**: The navel, the centre.

"Hill is the umbilic of the world, circled with a thick wall."—*Sir T. Herbert: Travels*, p. 329.

üm-bël-lic-al, *üm-bil-lic-all, a. [Lat. *umbilicus* = the navel.] Of or pertaining to the navel; formed in the middle like a navel; navel-shaped, central.

"The chapter-house is large, supported as to its arched roof by one umbilical pillar."—*Defoe: Tour Thro' Great Britain*.

umbilical arteries, s. pl. [UMBILICAL-VESSELS.]

umbilical-cord, s. [FUNICULUS, l. 1.]

umbilical-fissure, s.

Anat.: The anterior part of the longitudinal fissure between the lobes of the liver.

umbilical-hernia, s.

Pathol.: A hernia which protrudes through the umbilical opening in the middle line at the umbilicus. It is most commonly met with in infants and in women advanced in life, especially in obese subjects.

umbilical-points, s. pl.

Geom.: The same as FOCI. [FOCUS.]

umbilical-region, s.

Anat.: The middle region of the abdomen, in which the umbilicus is placed; the mesogastrium. [ABDOMEN.]

aperture of the umbilicus, and through which umbilical hernia occurs in children.

umbilical-vein, s. [UMBILICAL-VESSELS.]

umbilical-vesicle, s. [YOLK-SAC.]

umbilical-vessels, s. pl.

1. *Anat.*: A comprehensive name including the two umbilical arteries (continuations of the primitive iliacs) and the umbilical vein of the human foetus. The latter arises from the placenta, and conveys to the foetus the blood necessary for its nutrition, the residuum being carried back to the placenta by the umbilical arteries. As soon as respiration begins the arteries are transformed into fibrous cords, and the vein becomes the round ligament (*ligamentum rotundum*) of the liver.

2. *Bot.*: The vessels which pass along the umbilicus or funicle to transmit nourishment to the cotyledons.

ūm-bil-i-cāl-i-tŷ, s. [Eng. *umbilical*; -*ity*.] Character as determined by an umbilicus.

ūm-bil-i-cār-i-g, s. [Lat. *umbilicaris* = pertaining to the navel.]

Bot.: A synonym of *Gyrophora* (q.v.).

ūm-bil-i-cate, ūm-bil-i-cāt-ēd, a. [Lat. *umbilicus* = a navel.]

* *L. Ord. Lang.*: Navel-shaped; depressed in the middle like a navel.

II. *Technically*:

1. *Bot.*: Hollowed like the navel. The same as PELTATE (q.v.).

2. *Zool.*: A term applied to those univalve shells which have the axis, around which the whorls are coiled, open or hollow. The perforation may be a mere fissure, as in the *Lacuna*; or it may be filled up by a shelly deposit, as in many species of *Natica*.

ūm-bil-i-ōūs, s. [Lat. = the navel; allied to Gr. *ὀμφαλός* (*omphalos*) = the navel; Lat. *umbo* = a boss; O. Fr. *umbilic*; Ital. *umbilico*, *ombelico*, *bellico*, *bilico*; Sp. *ombigo*; Port. *umbigo*, *embiga*; Sans. *nābhī* = the navel (q.v.).]

1. *Anat.*: The navel (q.v.).

* 2. *Antiq.*: An ornamental or painted boss or ball fastened on each end of the sticks on which manuscripts were rolled.

3. *Botany*:

(1) The same as HILUM (q.v.).

(2) A genus of Crassulac. Leaves fleshy, racemose, white or yellow; calyx five-parted; corolla campanulate; stamens ten, inserted in the corolla; nectariferous scales five; carpels five. The species grow in dry stony places, and are sometimes planted in rockeries. *Umbilicus pendulinus* is the same as *Cotyledon Umbilicus*. [COTYLEDON, I. 1.]

4. *Geom.*: A term used by the older geometers as synonymous with focus; but, in modern works, a point on a surface through which all lines of curvature pass.

5. *Zool.*: The aperture of the axis near the mouth of some univalve shells. [UMBILICATED, II. 2.]

* **ūm'-ble, s.** [UMBLES.]

† To eat *umble-pie* (commonly corrupted into *to eat humble-pie*): [HUMBLE-PIE, †].

ūm'-bles, * hūm'-bles, s. pl. [For *numbles* (q.v.).] The entrails of a deer; sometimes applied to entrails generally.

ūm-bō' (pl. ūm-bō-nēs), s.

[Lat.; Fr. *ombon*; Ital. *ombone*.]

1. *Old Arm.*: The pointed boss or protuberant part of a shield.

"Such a bowl is peculiarly well adapted for the umbo of the shield."—*Murray, Greek Sculpture*, ch. III.

2. *Anat.*: The deepest part of the arched membrane of the drum of the ear, corresponding to the termination of the handle of the malleus (q.v.).

3. *Bot.*: The boss-like protuberance rising upwards from the centre of the pileus in an Agaric, &c.

4. *Zool.*: The embryonic shell, forming the point from which the growth of the valve commences in the Conchifera. The umbones are near the hinge because that side grows least rapidly, sometimes they are situated on the

margin, but they always become wider apart with age. They may be straight, as in the genus *Pecten*; or curved, as in *Venus*, or spiral, as in *Isocardia* and *Diceras*.

ūm-bō-nal, s. [Lat. *umbo*, genit. *umbon(is)*; Eng. adj. suff. -*al*.] Of, belonging to, or situated near the umbo (q.v.).

üm-bre (bre as bër) (2), s. [Fr., from the colour of the plumage.]

Ornithology:

1. *Scopus ardeta*, a South African bird, called also the Hammer-head, and Brown Stork. The body is about the size of that of a crow, plumage amber-coloured, lighter beneath; the male with a large crest on the back of the head. These birds prey upon frogs and small fish, and embellish their nests with anything bright, and glittering they can pick up.

2. (Pl.): The Scopinae (q.v.).

***üm-brël**, ***um-brël-lo**, s. [UMBRELLA.]

üm-brël-la, s. [Ital. *umbrella*, *umbrella*, *umbrella* = a fan, a canopy, a little shade, dimin. of *ombra* (Lat. *umbra*) = a shade. The true classical Latin form is *umbella*, dimin. from *umbra*. Florio has "Ombrella, a fan, a canopy, also a taster or cloth of state for a prince; also a kind of round fan or shadowing that they use to ride with in summer in Italy; a little shade" (World of Words, 1598).]

I. Ordinary Language:

1. A shade, a cover, a cloak.

"Made Religion an Umbrella to Impiety."—*Osborn: King James*, p. 91. (1874).

2. A light frame covered with silk, cotton, alpaca, or other fabric, and held above the head as a protection against sun or rain. [PARASOL, SUN-SHADE.] The use of the umbrella came to us from the East, where it has been in use from remote times, and where it is considered as a symbol of royalty or dignity. As a defence against rain it was not generally used in England till the middle of the eighteenth century. (See extract.)

"As appears by the *Femina Tattler* of Dec. 13, 1709, the umbrella was only designed as a protection between the door and the carriage. Jonas Hanway, who died in 1786, has the credit of containing public opinion, and defying the coachmen and sedan chair men, who deemed it their monopoly to protect from rain."—*Amight: Dict. Mechanics*, s. v. *Umbrella*.

II. Technically:

1. *Zool.*: The bell-shaped swimming organ of the Lacerarida, akin to the nectocyst of the Medusida, but without a velum (q.v.).

2. *Zool. & Palæont.*: Chinese Umbrella-shell; a genus of Pleurobranchida, with six recent species, from the Canaries, Mediterranean, India, China, and the Sandwich Islands. Shell small, depressed, and limpet-like, marked by concentric lines of growth; inner surface with a central coloured and striated disc, surrounded by a continuous irregular muscular impressure. Animal with a very large foot, deeply notched in front, gill forming a series of plumes beneath the shell in front and on the right side. Fossil species four, from the Oolite onward of the United States, Sicily, and Asia.

¶ *King Coffee's Umbrella*: The state umbrella of the King of Ashantee, taken at Coomassie, Feb. 4, 1874, and deposited by her Majesty in South Kensington Museum.

umbrella-bird, s.

Ornith.: *Cephalopterus ornatus*, from Peru. It is about the size of a crow, with deep black plumage; the head is adorned with a large spreading crest, which arises from a contractile skin, and capable of being erected at will; the shafts of the crest-feathers are white, and the plumes glossy blue, hairlike, and curved outward at the tips. When the crest is laid back the shafts form a compact white mass, sloping up from the back of the head; when it is erected the shafts radiate on all sides from the top of the head, reaching in front beyond and below the beak, which is thus completely concealed from view. A long cylindrical plume hangs down from the middle of the neck; the feathers of the plume lap over each other like scales, and are bordered with metallic blue. Umbrella-birds associate in small flocks, and live almost

B. As adj.: Whilom, cf-devant, late, formerly. (*Scotch*.)

"The estate, which devolved on this unhappy woman by a settlement of her unwhiles husband."—*Scott: Waverley*, ch. x.

un-(1), *pref.* [A.S. *un-*; cogn. with Dut. *on-*; Icel. *úr* or *ó* (for *un-*); Dan. *ut*; Sw. *o-*; Goth. *un-*; Ger. *un-*; Wei. *an-*; Lat. *in-*; Gr. *án-*, *á-* (*an-*, *a-*); Zend. *ana-*; Sans. *an-*; Pers. *ad-*, all prefixes denoting negation; cf. Lat. *ne-* = not; Gr. *νῆ* (*nē*); Goth. *nī-* = not; Lith. *ne-* = no; Russ. *ne-*; Gael. *neo-*, negative prefixes.] A prefix denoting negation, used chiefly before adjectives, past participles passive, present participles used adjectively, and when so used meaning simply not: as, *unfair*, *untrue*, *unold*, *unforgiving*, &c. From such words adverbs and nouns are formed: as, *unfairly*, *unfairness*, *untruly*, *unforgivingly*, *unforgiveness*, &c. *Un-* is also prefixed to some nouns to express the opposite or absence of what the noun expresses: as, *untruth*, *unrest*, *unrest*, &c. Before many words of Latin origo *un-*, in the sense of simple negation, becomes *in-* (q.v.): as, *uncomplete* and *incomplete*. Negation is also expressed by *non-* or *dis-*: as, *non-elastic*, *disreputable*, &c.

un-(2), *pref.* [A.S. *un-*, only used as a prefix in verbs, as in *unbind* = to undo, *unbindan* = to unbind, &c.; cogn. with Dut. *ont-*, as in *ont-laden* = to unload, from *laden* = to load; Ger. *ent-*, as in *ent-laden* = to unload; O. H. Ger. *ant-*, as in *ant-lühhan* = to unlock; Goth. *and-*, as in *and-bindan* = to unbind. It is the same prefix as that which appears as *an-* in Eng. *answer*, and as *and-* in A.S. *andswarian*; and it is cognate with Gr. *ἀντι* (*anti*) = in opposition to.]

1. A prefix used with verbs to imply the reversal of the meaning of the simple verb by a positive act not a simple negation of its meaning. Thus *unbind* means a positive undoing and removal of the binding which the simple verb affirmed to be fixed.

2. Prefixed to nouns it changes them into verbs, implying privation of the object expressed by the noun or of the qualities connoted by it: as, *unman*, *unsex* = to deprive of the qualities of a man, sex, &c. In this sense sometimes called *un-* privative.

3. More rarely it is almost superfluous, or at most adds intensity to the meaning of the simple verb. Thus to *loosen* and to *unloosen* do not differ much in meaning, though perhaps *unloosen* is, to a slight extent, the more forcible word.

4. It is found in a few verbs, chiefly obsolete, with the force of retraction or revocation: as, *unsay* = to retract what has been said, *unpredict* = to retract or revoke a prediction, to *unlearn* = to forget what has been learnt, &c.

5. Some words with *un-* prefixed are hardly used unless qualified by *not*: as, though we should not speak of an *unstriking* view, we should not hesitate to say the view was *not unstriking*.

6. In the case of past participles there is an ambiguity in the prefix *un-*, which may be either *un-*(1) or *un-*(2), as in *unrolled*, which may mean either not rolled, or unfolded after having been rolled up.

The meanings of most of the past participles, adjectives, adverbs, &c., having un- prefixed are so obvious that a large number of them are here omitted.

un-hidebound, a. Not hidebound; not having the skin fitting closely, as is the case when animals are swollen and full: hence, hungry and with empty stomach.

"Rav'n . . . though plenteous, all too little seems
To stuff this maw, this vast un-hidebound corse."
Milton: P. L., x, 601.
